TREND SUMMARY

Preliminary reports indicate the following trends in manufacturers' inventories, shipments and orders, at the end of November.

Total value of manufacturers' investment in inventory showed a decline for the fifth consecutive month. This was the ninth month this year to show a decrease. The amount of the November decline was \$5.6 million, with total investment value at the end of the month standing at \$3,418.4 million. In index terms, this was 98.1 (December 1952=100.0) as against 98.3 for October and 103.2 for November last year. Value of inventory held but not owned by reporting manufacturers (i.e. progress payments inventory) declined \$2.2 million in November to \$523.6 million, but was \$66.4 million above the same month last year.

Shipments values increased 1 per cent during November and were also 1 per cent above last year's level. This was the first increase over last year's values recorded during 1954. The November index was 100.5 (December 1952=100.0) as against 99.4 for October and 99.3 for November last year. Cumulative shipments for the eleven months ending November, 1954 were 4.2 per cent below the same period last year.

Value of unfilled orders for 900 firms reporting this item decreased 1.5 per cent during November and were 4.7 per cent below the same month last year.

Table 1 - INVENTORY VALUES IN ALL MANUFACTURING INDUSTRIES

Estimated value of total manufacturers' Investment in Inventories, total Inventory held under Progress Payments arrangements, and total Inventory Held by manufacturers' regardless of ownership, in all manufacturing industries and in the major economic-use grouping of industries, with Total Inventory Held sub-divided into raw materials, goods in process, and finished products. Estimates are based on reports from a sample of firms or, in some industries, on the estimated value of physical stocks. For further description, see page 38.

Table 1 - (Concl'd) INVENTORY VALUES IN ALL MANUFACTURING INDUSTRIES

Estimated value of total manufacturers' Investment in Inventories, total Inventory held under Progress Payments arrangements, and total Inventory Held by manufacturers' regardless of ownership, in all manufacturing industries and in the major economic-use grouping of industries, with Total Inventory Held sub-divided into raw materials, goods in process, and finished products. Estimates are based on reports from a sample of firms or, in some industries, on the estimated value of physical stocks. For further description, see page 38.

* 1952 indexes represent Sawmills and Planing Mills only. Beginning 1953, Veneer and Plywoods Mills are also included.

Table 3. - INDEX NUMBERS OF VALUES OF INVENTORY INVESTMENT, BY COMPONENTS, AND SHIPMENTS IN INDIVIDUAL INDUSTRIES.

Indexes represent value for reporting plants only.

Reports are classified to the industry into which the plant's major items of production fall, but since other items may be included, the indexes are not to be taken as representing commodity movements.

In cases where total inventory is shown twice for each month, the first figure represents investment (ownership) of reporting firms and the second figure and components represent total holdings. In all other cases, there is no significant difference between investment and total holdings. Shipments in all cases represent transfers of ownership, and should be used in conjunction with inventory investment only.

(Dec. 1952=100)

Industry and Month	Value of Shipments	Value of Inventory				
		Total	Raw Materials	Goods in Process	Finished Products

(1) See footnote page 33.

(2) Orders for this industry represent a two-month sales forecast, not total outstanding orders. Data for the industry are not included in any of the groupings.

CONCEPTS AND SOURCES

CONCEPTS

Inventory Investment represents the estimated total book value of manufacturers' ownership of inventory in connection with manufacturing operations, at the end of the period stated. It includes:

- (a) own raw materials on hand;
- (b) own goods in process
- (c) finished goods of own manufacture at plant and warehouse;
- (d) goods of own manufacture at manufacturers' sales offices, wholesale outlets and retail stores.

Total Inventory Held represents the estimated total value of inventory holdings of manufacturers regardless of ownership; it differs from inventory investment in including, wherever possible, inventory held under progress payments arrangements. Progress payments are generally made only on long-term contracts and inventory holdings and inventory investment differ, therefore, only in the relatively few industries characterized by such contracts.

Shipments represents the estimated value, during the period stated, of:

- (a) manufacturers' sales;
- (b) goods-in-process transfers from one unit of a multiple-unit firm to other units of the same firm for further processing;
- (c) progress receipts on long-term contracts.

The inclusion of items (b) and (c) allows the use of the shipments indexes for projection, after allowance for inventory change, of the latest available gross value of production data. Because of the inclusion of progress receipts, this concept of shipments must be used in conjunction with inventory investment data, not with total holdings.

Unfilled Orders represents the value of orders backlogs at the end of the period stated, irrespective of work done on them or of stocks from which they can be filled, but reduced by progress receipts in industries characterized by long-term contracts. Data cover the group of reporting plants only; this series is not inflated to total, as are the others, because of the lack of any logical basis for such an inflation.

Groupings - All individual industry indexes are based on groupings according to the Standard Industrial Classification. The Economic-Use groupings of industries in Tables 1 and 2 is based on the major use of each industry's products, but in certain cases assignment of an industry to a specific sector is more or less arbitrary.

SOURCES

Inventories and Shipments - Monthly reports on inventory and shipments values are received on a voluntary basis from 2200 large and medium-size plants in 96 industries. In addition, three industries are included in the total estimates by valuation of physical shipments and stock data. Industries covered held 92% of estimated total inventory, and accounted for 89% of total gross value of production, in 1950. Reporting plants represented approximately 60% of total production value in that year; coverage in individual industries varies from 15% to 98%.

Orders - Monthly reports on value of orders backlogs are received from 900 plants, representing approximately 30% of total production value in 1950.
