TREND SUMMARY

Preliminary reports indicate the following trends in inventories, shipments and orders at the end of September:

Total value of manufacturers' investment in inventory increased very slightly (\$10.7 million) during September to reach \$3,510.4 million. This was an increase of 0.3 per cent from August, but a decline of 0.4 per cent from September last year. The largest single change came from the Construction Goods industries, which showed a decline of 3.2 per cent. The Consumers' Goods industries, the largest component of the total, increased 0.5 per cent.

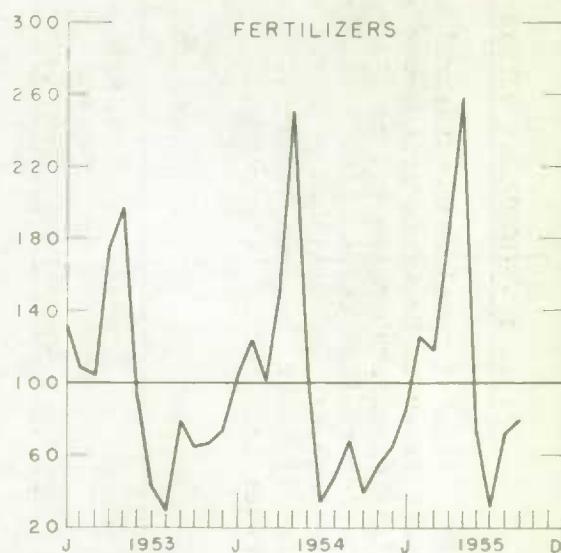

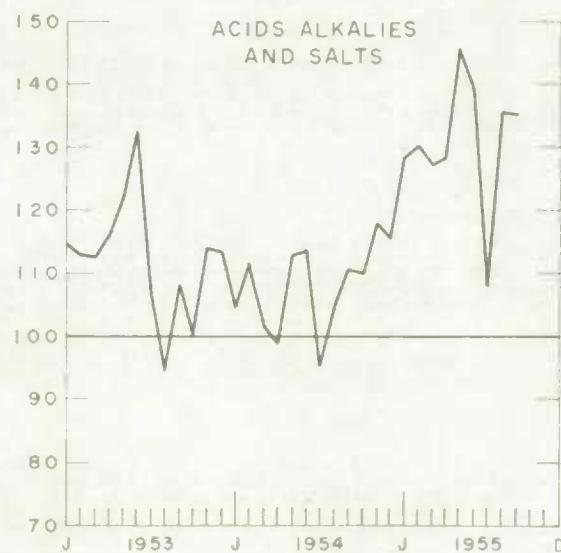

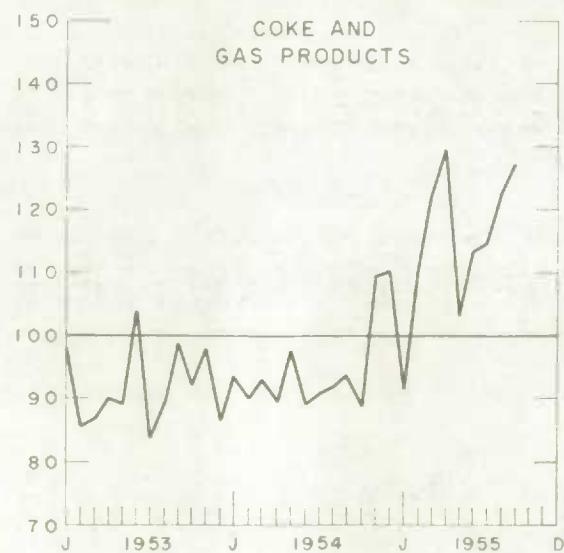

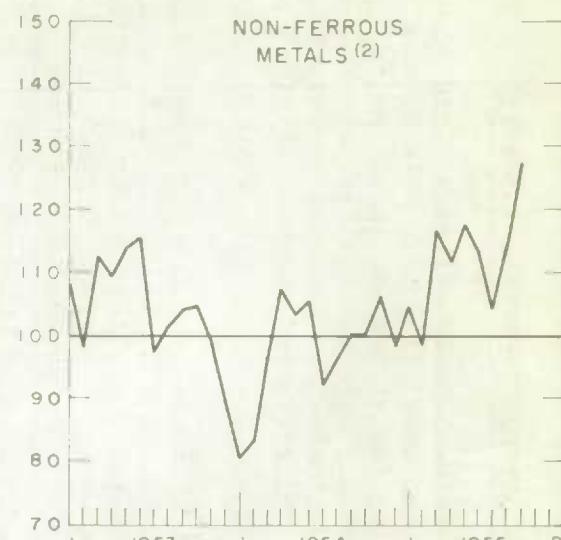

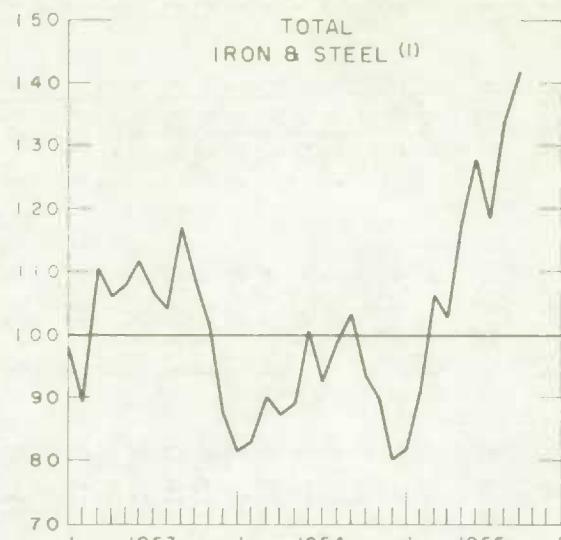

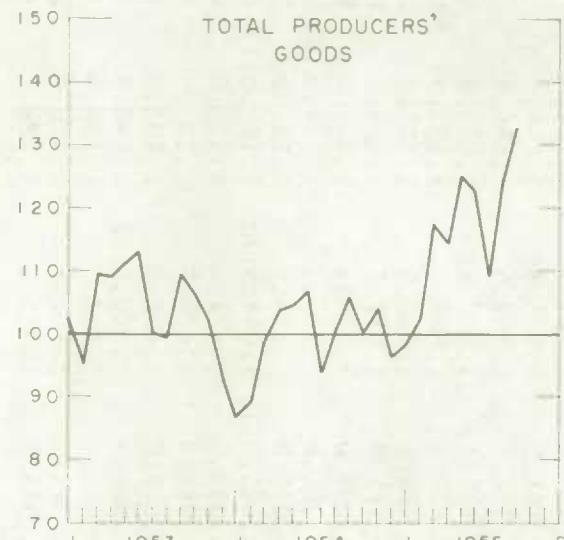

Inventory held but not owned (largely held under progress payments arrangements) increased \$5.7 million to \$548.0 million at the end of September. This was \$13.7 million lower than at the end of the same period last year.

Shipments in September were 3.4 per cent higher than in August and 14.4 per cent higher than in September 1954. Cumulative shipments for the first nine months of the year were 11.2 per cent above the same period last year.

Total value of new orders received during September declined 0.8 per cent from August but were 11.3 per cent above the same month last year. Their cumulative value for the first nine months of 1955 was 12.1 per cent above the same period last year. Total value of unfilled orders at the end of September was \$2,543.4 million, 1.8 per cent lower than the August values, and 2.6 per cent below September 1954.

INDEXES OF VALUE OF SHIPMENTS
MAIN INDUSTRIES OF PRODUCERS' GOODS GROUP

DEC. 1952 = 100

(1) INCLUDES PRIMARY IRON AND STEEL, SHEET METAL PRODUCTS, IRON CASTINGS AND WIRE AND WIRE GOODS.

(2) INCLUDES NON-FERROUS METALS, SMELTING AND REFINING, BRASS AND COPPER PRODUCTS, ALUMINUM PRODUCTS AND WHITE METAL ALLOYS.

Table 1 - INVENTORY VALUES IN ALL MANUFACTURING INDUSTRIES

Estimated value of total manufacturers' Investment in Inventories, total Inventory held under Progress Payments arrangements, and total Inventory Held by manufacturers' regardless of ownership, in all manufacturing industries and in the major economic-use grouping of industries, with Total Inventory Held sub-divided into raw materials, goods in process, and finished products. Estimates are based on reports from a sample of firms or, in some industries, on the estimated value of physical stocks. For further description, see page 42.

Table 2 - INDEXES OF INVENTORY VALUE IN ALL MANUFACTURING INDUSTRIES

Table 2(a) - Index Number of Estimated Value of Total Manufacturing Inventory Held,
whether owned or not, in all manufacturing industries and in the major economic-use
groupings of industries. Estimates are based on the same sources as in Table 1.

(December 1952 = 100)

	Total Industries	All Industries	Consumers' Goods	Capital Goods	Producers' Goods	Construction Goods
1951 - Dec.		96.1	103.5	78.4	95.7	90.2
1952 - Dec.		100.0	100.0	100.0	100.0	100.0
1953 - Jan.		100.7	100.3	102.0	99.5	102.6
Feb.		101.2	100.0	102.6	99.8	109.7
Mar.		101.7	99.9	103.5	98.8	116.4
Apr.		101.8	99.8	105.1	99.4	112.7
May		103.0	100.4	106.2	100.9	117.7
June		104.4	102.2	106.3	102.4	119.2
July		105.2	102.8	105.9	104.9	120.0
Aug.		106.8	103.8	106.8	107.5	125.9
Sept.		106.7	104.2	106.6	107.9	121.1
Oct.		107.0	104.4	106.9	110.3	117.6

* 1952 indexes represent Sawmills and Planing Mills only. Beginning 1953, Veneer and Plywood Mills are also included.

Table 3. - INDEX NUMBERS OF VALUES OF INVENTORY INVESTMENT, BY COMPONENTS, AND SHIPMENTS IN INDIVIDUAL INDUSTRIES.

Indexes represent values for reporting plants only.

Reports are classified to the industry into which the plant's major items of production fall, but since other items may be included, the indexes are not to be taken as representing commodity movements.

In cases where total inventory is shown twice for each month, the first figure represents investment (ownership) of reporting firms and the second figure and components represent total holdings. In all other cases, there is no significant difference between investment and total holdings. Shipments in all cases represent transfers of ownership, and should be used in conjunction with inventory investment only.

(Dec. 1952=100)

Industry and Month	Value of Shipments	Value of Inventory				
		Total	Raw Materials	Goods in Process	Finished Products	
<u>FOODS AND BEVERAGES</u>						
<u>Dairy Products</u>

(1) See footnote page 35.

CONCEPTS

Inventory Investment represents the estimated total book value of manufacturers' ownership of inventory in connection with manufacturing operations, at the end of the period stated. It includes:

- (a) own raw materials on hand;
- (b) own goods in process;
- (c) finished goods of own manufacture at plant and warehouse;
- (d) goods of own manufacture at manufacturers' sales offices, wholesale outlets and retail stores.

Total Inventory Held represents the estimated total value of inventory holdings of manufacturers regardless of ownership; it differs from inventory investment in including, wherever possible, inventory held under progress payments arrangements. Progress payments are generally made only on long-term contracts and inventory holdings and inventory investment differ, therefore, only in the relatively few industries characterized by such contracts.

Shipments represents the estimated value, during the period stated, of:

- (a) manufacturers' sales;
- (b) goods-in-process transfers from one unit of a multiple-unit firm to other units of the same firm for further processing;
- (c) progress receipts on long-term contracts.

The inclusion of items (b) and (c) allows the use of the shipments indexes for projection, after allowance for inventory change, of the latest available gross value of production data. Because of the inclusion of progress receipts, this concept of shipments must be used in conjunction with inventory investment data, not with total holdings.

Unfilled Orders represents the estimated total value of manufacturers' orders backlog at the end of the period stated, irrespective of work done on them or of stocks from which they can be filled, but reduced by progress receipts in industries characterized by long-term contracts.

New Orders represents the estimated selling value of total new orders net of cancellations received by manufacturers' during the period stated, regardless of whether the orders will be added to existing backlog, or will be filled from stock, or as a result of activity during the same month (and therefore also be reported as shipments in the month received).

Groupings - All individual industry indexes are based on groupings according to the Standard Industrial Classification. The Economic-Use groupings of industries in Tables 1 and 2 is based on the major use of each industry's products, but in certain cases assignment of an industry to a specific sector is more or less arbitrary.

SOURCES

Inventories and Shipments - Monthly reports on inventory and shipments values are received on a voluntary basis from 2,200 large and medium-size plants in 96 industries. In addition, three industries are included in the total estimates by valuation of physical shipments and stock data. Industries covered held 92% of estimated total inventory, and accounted for 89% of total gross value of production, in 1950. Reporting plants represented approximately 60% of total production value in that year; coverage in individual industries varies from 15% to 98%.

Orders - Monthly reports on value of orders backlog are received from 900 plants, representing approximately 30% of total production value in 1950.

N O T E S

1. A correction in method of reporting by one firm resulted in an increase in December 1954 values for Total Inventory Investment, Total Inventory Held, and Goods in Process of \$20.9. In addition, a decision to incorporate all inventory from the Slaughtering and Meat Packing Industry as Raw Materials resulted in an increase of \$41.8 in this component, a decrease of \$3.3 in Goods in Process and a decrease of \$38.5 in Finished Products. Values subsequent to December incorporate the corrected method in both cases.
2. A decision to incorporate all inventory from the Slaughtering and Meat Packing Industry as Raw Materials resulted in an increase of \$41.8 in this component in December 1954, a decrease of \$3.3 in Goods in Process, and a decrease of \$38.5 in Finished Products. Values subsequent to December 1954 incorporate the corrected method.
3. A correction in method of reporting by one firm resulted in an increase in December 1954 values for Total Inventory Investment, Total Inventory Held, and Goods in Process of \$20.9. Values subsequent to December incorporate the corrected method.
4. A correction in method of reporting by one firm resulted in an increase in the December, 1954 index for Total All Industries of 0.6; and for Capital Goods Industries of 2.5. Indexes subsequent to December, 1954 incorporate the corrected method.
5. A correction in method of reporting by one firm resulted in an increase in the December 1954 index of Total Inventory Investment for All Industries of 0.5; for Total Capital Goods Industries of 4.5; and for Machinery of 12.3. Indexes subsequent to December incorporate the corrected method.
6. A change in the method of calculating shipments indexes in the Slaughtering and Meat Packing Industry resulted in an increase in the December 1954 index of Shipments for All Industries of 1.5; for Total Consumers' Goods of 2.6; for Non-Durable Consumers' Goods of 4.1; and for Foods of 8.9. Indexes subsequent to December incorporate the new method.
