ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED, AND UNFILLED ORDERS IN ALL MANUFACTURING INDUSTRIES;  
RATIOS OF INVENTORY TO SHIPMENTS; AND RATIOS OF UNFILLED ORDERS TO SHIPMENTS

TREND SUMMARY

Preliminary estimates indicate the following trends for March :

Shipments - Total value of manufacturers' shipments for March at \$1,802 million was \$153 million (9.3%) above the revised February total of \$1,649 million and \$41 million (2.3%) above the level for the same month last year. The 3-month cumulative total at \$5,143 million was \$222 million (4.5%) higher than the total of \$4,921 million for the same period of 1956.

Increases during March were general. All industry groups (Standard Industrial Classification) showed increases with the exception of Products of Petroleum and Coal which declined by \$3 million (2.9%) and Electrical Apparatus and Supplies which remained unchanged. In the preceding four years Products of Petroleum and Coal increased during March by 4 to 8% while Electrical Apparatus and Supplies increased by 12 to 24%. Largest increases during the month occurred in Tobacco and Tobacco Products \$2 million (8.7%); Rubber Products \$2 million (10.0%); Paper Products \$15 million (10.5%); Iron and Steel Products \$22 million (10.0%); Transportation Equipment \$69 million (40.6%); and Non-Metallic Mineral Products \$5 million (14.0%). With the exception of Tobacco and Tobacco Products and Rubber Products (both of which showed declines in 1954 and 1955) these large increases followed the seasonal pattern apparent over the past four years but the increase in Transportation Equipment was greater than in these previous years.

Gains in the cumulative values for the quarter, as compared with the first quarter last year, were generally in the 1 to 9% range with the exception of Transportation Equipment and Products of Petroleum and Coal which increased by 26.9% and 14.8%, respectively. Decreases were registered in Leather Products (2.7%); Textiles (2.8%); Wood Products (14.1%) and Non-Ferrous Metal Products (8.1%); while Paper Products and Non-Metallic Mineral Products remained virtually unchanged.

Using an Economic Use Classification, all industry groups showed increases during March. Increases were in the 2-10% range with the exception of Motor Vehicles and Related Industries which increased by 59.1%. All groups showed increases for the first three months as compared with the same period last year except Durable Consumer Goods, which decreased by 4.6% and Industries Producing Largely for Export which decreased by 7.3%.

Inventories - Value of inventory owned by manufacturers at the end of March at \$4,240 million was nearly \$17 million (0.4%) higher than the revised February value of \$4,224 million and \$407 million 10.6% higher than at the end of March 1956.

Value of inventory held but not owned at \$510 million was \$6 million (1.1%) higher than the revised February value. The change in total inventory held was, therefore, an increase of \$22 million (0.5%) over the previous month. Raw materials and finished products increased by 0.4% and 1.0%, respectively, while goods in process remained unchanged.

Changes in total inventory owned during March for Standard Industrial Classification groups were mixed and in most cases were relatively small. Largest increases occurred in Rubber Products \$3 million (3.1%); Wood Products \$18 million (6.3%); and Non-Metallic Mineral Products \$2 million (2.6%). Largest decreases were registered in Clothing \$3 million (1.6%); and Transportation Equipment \$19 million (5.3%).

Using an Economic Use Classification changes in total inventory owned during March were on the whole upward but in most cases the increases were marginal. Largest increases occurred in Construction Goods \$11 million (2.5%) and Industries Producing Largely for Export \$14 million (2.0%). Decreases were registered in Consumer Semi-Durable Goods \$3 million (1.1%); Motor Vehicles and Related Industries \$19 million (6.6%); and Intermediate Goods and Supplies \$10 million (1.7%).

The ratios of total inventory owned to shipments at 2.35 and of finished products to shipments at 0.82 were below the February level but above the level of March 1956.

Orders - Total value of New Orders at \$1,766 million was lower than shipments during the month which resulted in a decrease in Unfilled Orders of \$37 million. Unfilled Orders at \$3,159 million were 1.2% lower than at the end of February but remained 3.7% above the March 1956 level.

Decreases during the month were general, with the exception of Rubber Products which increased by \$3 million (13.2%) and Electrical Apparatus and Supplies, Non-Metallic Mineral Products, Chemical Products and Miscellaneous Industries which showed fractional increases. Largest decreases were registered in Textile Products \$5 million (5%); and Clothing \$11 million (14.7%).

The ratio of Unfilled Orders to Shipments at the end of March was 1.75 as compared to 1.94 at the end of February and 1.73 at the end of March 1956.

#### SUPPLEMENTARY TABLES

Two supplementary tables are included in this issue:

Table 5 contains estimates of value of shipments for the calendar years 1954, 1955 and 1956, for each of the individual industries which are published separately in Table 4. Data for 1954 are based on final Census of Industry estimates of gross value of shipments for that year, and data for 1955 are based on preliminary Census of Industry estimates for that year (in both cases modified as described in the note on Page 49); data for 1956 are the sums of the final monthly estimates for each industry from Table 4 - these are based on projections, by means of sample data, of the 1955 preliminary Census of Industry estimates. The purpose of this table is to facilitate comparisons of preliminary estimates of annual data for 1956 with data for earlier years.

Table 6 contains ratios of values of total inventory owned to shipments, and finished products inventory to shipments, for each of the Standard Industrial Classification groupings of industries and the Economic-Use groupings of industries, by months, from 1953 to date. Because of seasonal movements in both inventories and shipments, ratios vary so considerably by months that meaningful comparisons of current ratios can only be made with the ratios for the same months of previous years (rather than with those for, say, the previous month or for the average of the previous or current year). The Table is, therefore, presented for reference for use with data for the remaining months of 1957.

Table 1. - ESTIMATED VALUE OF SHIPMENTS, ORDERS AND INVENTORY  
IN ALL MANUFACTURING INDUSTRIES, by months. (1)

(in thousands of dollars)

(For definitions, see Page 49.)

Date	SHIPMENTS(2)	ORDERS		INVENTORY AT END OF MONTH

(1) Table 1 includes estimates for all items in all industries; in Tables 2 and 3 following, which represent two different breakdowns of the all-industry totals, some items were omitted as noted, and SIC group 9 (Printing and Publishing) has been omitted from Table 2. (2) Annual shipments values differ slightly from published Census of Industry totals, due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(3) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

Table 2 (Cont'd) - ESTIMATED VALUE OF SHIPMENTS, ORDERS AND INVENTORY IN MANUFACTURING INDUSTRIES GROUPED ACCORDING TO THE STANDARD INDUSTRIAL CLASSIFICATION, by months. (1)

(in thousands of dollars)

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for this group cannot be published separately, since less than 3 firms predominate. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) Shipments values in the Petroleum Products industry for 1954 are affected by a change in method of valuation for Census of Industry purposes. This change accounted for an increase of approximately \$140 million for the year. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

Table 3 - ESTIMATED VALUE OF SHIPMENTS, ORDERS AND INVENTORY IN MANUFACTURING INDUSTRIES GROUPED ACCORDING TO AN ECONOMIC USE CLASSIFICATION, by months.  
(in thousands of dollars)

CONSUMER GOODS INDUSTRIES

Table 3 (Cont'd) - ESTIMATED VALUE OF SHIPMENTS, ORDERS AND INVENTORY IN MANUFACTURING INDUSTRIES GROUPED ACCORDING TO AN ECONOMIC USE CLASSIFICATION, by months. (1)

(In thousands of dollars)

MISCELLANEOUS INDUSTRIES

(d1) - Industries Producing Largely For Export

(For definitions, see Page 49)

(For industries included, see Page 47)

This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports

Date	SHIPMENTS	ORDERS		INVENTORY AT END OF MONTH

(1) See footnote 1, page 1.

(2) The value of Inventory Held but Not Owned in this group is very small, and coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well.

(3) Preliminary.

Table 3 (Cont'd) - ESTIMATED VALUE OF SHIPMENTS, ORDERS AND INVENTORY IN MANUFACTURING INDUSTRIES GROUPED ACCORDING TO AN ECONOMIC USE CLASSIFICATION, by months. (1)

December									

(1) See footnote 1, page 1.

(2) The value of Inventory Held but Not Owned for this group is very small, and coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well.

(3) Preliminary.

Table 3 (Cont'd) - ESTIMATED VALUE OF SHIPMENTS, ORDERS AND INVENTORY IN MANUFACTURING INDUSTRIES GROUPED ACCORDING TO AN ECONOMIC USE CLASSIFICATION, by months. (1)

(in thousands of dollars)

MISCELLANEOUS INDUSTRIES  
(d3) - Intermediate Goods and Supplies

(For definitions, see Page 49)  
(For industries included, see Page 47)

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys.

(2) The value of inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data.

Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

(3) Preliminary.

INDUSTRIES INCLUDED IN EACH ECONOMIC USE GROUPING IN TABLE 3

The bracketed numbers following each industry title indicate the Standard Industrial Classification Grouping (Table 2) to which the industry belongs.

The bracketed letters following the individual industry titles indicate the series in which the industry is included on the basis of monthly reports from firms or from special estimates - (s) means that the industry is covered for the shipments series; (i) for the inventory series; (o) for the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group total estimates as described on page 49.

A single asterick preceding the individual industry title indicates that the data for the industry are shown separately in Table 4. A double asterick indicates that the data for the industry are shown in Table 4 combined with data for one or more similar industries as indicated in the footnotes for that table.

PERISHABLE CONSUMER GOODS INDUSTRIES

- \*\* Slaughtering and Meat Packing (1)(s)(i)
- \*\* Sausages and Casings (1)
- \*\* Butter and Cheese Factories (1)(s)(i)
- \*\* Concentrated Milk (1)(s)(i)(o)
- \*\* Processed Cheese (1)(s)(i)
- \*\* Other Dairy Products (1)(s)(i)
- \* Fruit and Vegetable Preparations (1)(s)(i)(o)
- Breakfast Foods (1)(s)(i)(o)
- \* Biscuits and Crackers (1)(s)(i)(o)
- Bread and Other Bakery Products (1)(s)
- Aerated Waters (1)(s)
- Distilled Liquors (1)(s)(i)
- \* Breweries (1)(s)(i)
- \* Wines (1)(s)(i)(o)
- \* Confectionery (1)(s)(i)(o)
- Macaroni (1)(s)(i)
- \*\* Miscellaneous Food Preparations (1)(s)(i)(o)
- Tobacco Processing and Packing (2) ) (s)(i)
- Tobacco, Cigars and Cigarettes (2) ) (s)(i)
- Salt (14)(s)(i)
- \* Medicinal and Pharmaceutical Preparations (16)(s)(i)(o)
- \* Soaps, Washing and Cleaning Compounds (16)(s)(i)(o)
- \* Toilet Preparations (16)(s)(i)
- Polishes and Dressings (16)(s)(i)(o)
- Candles (17)

SEMI-DURABLE CONSUMER GOODS INDUSTRIES

- \* Rubber Footwear (3)(s)(i)
- \* Leather Footwear (4)(s)(i)(o)
- Leather Gloves and Mittens (4)
- Miscellaneous Leather Products (4)
- \* Carpets, Mats and Rugs (5)(s)(i)(o)
- \* Oilcloth, Linoleum and Other Coated Fabrics (5)(s)(i)(o)
- \*\* Automobile Accessories, Fabric (5)
- \*\* Embroideries etc. (5)
- \*\* Miscellaneous Textiles, n.e.s. (5)(s)(i)(o)
- \*\* Men's Clothing (6)(s)(i)(o)
- \*\* Men's Clothing Contractors (6)
- \*\* Children's Clothing (6)(s)(i)(o)
- \*\* Women's Clothing (6)(s)(i)(o)
- \*\* Women's Clothing Contractors (6)
- Hosiery (6)(s)(i)(o)
- \* Other Knit Goods (6)(s)(i)(o)
- \* Corsets and Foundation Garments (6)(s)(i)(o)

SEMI-DURABLE CONSUMER GOODS INDUSTRIES (Cont'd)

- Fur Goods (6)(s)(i)
- Hats and Caps (6)(s)(i)(o)
- Oiled and Waterproof Clothing (6)
- Fabric Gloves and Mittens (6)
- Miscellaneous Clothing, n.e.s. (6)(s)(i)(o)
- \* Brooms, Brushes and Mops (17)(s)(i)(o)
- Fountain Pens and Pencils (17)(s)(i)(o)
- Sporting Goods (17)
- Toys and Games (17)
- Lamps, electric, and lamp shades (17)
- Pipes, lighters and smokers' supplies (17)
- Umbrellas (17)

DURABLE CONSUMER GOODS INDUSTRIES

- \* Furniture (7)(s)(i)(o)
- Bicycles and Parts (11)(s)(i)(o)
- Boat Building (11)
- \* Jewellery and Silverware (12)(s)(i)(o)
- \* Radios and Parts (13)(s)(i)(o)
- \* Refrigerators and Appliances (13)(s)(i)(o)
- Musical Instruments (17)(s)(i)(o)
- Clocks and Watches (17)

HEAVY TRANSPORTATION EQUIPMENT INDUSTRIES

- Aircraft (11)(s)(i)(o)
- \* Railroad and Rolling Stock Equipment (11)(s)(i)(o)
- Shipbuilding and Repairing (11)(s)(i)(o)

OTHER CAPITAL GOODS INDUSTRIES

- \* Agricultural Implements (10)(s)(i)(o)
- \* Hardware and Tools (10)(s)(i)(o)
- \* Household, Office and Store Machinery (10)(s)(i)(o)
- \* Machine Tools (10)(s)(i)(o)
- \* Industrial Machinery n.e.c. (10)(s)(i)(o)
- \* Heavy Electrical Equipment and Machinery (13)(s)(i)(o)
- Signs (17)

CONSTRUCTION GOODS INDUSTRIES

- Sash, Door and Planing Mills (7)(s)(i)(o)
- Hardwood Flooring (7)(s)(i)(o)
- \* Roofing Paper (8)(s)(i)(o)
- \* Boilers and Plate Work (10)(s)(i)(o)
- \* Fabricated and Structural Steel (10)(s)(i)(o)

CONSTRUCTION GOODS INDUSTRIES (Cont'd)

- \* Iron Castings (10) (s) (i) (o)
- Aluminum Products (12) (s) (i) (o)
- \* Miscellaneous Electrical Products (13) (s) (i) (o)
- \* Wire and Cable (13) (s) (i) (o)
- \* Asbestos Products (14) (s) (i) (o)
- \*\* Cement Hydraulic (14) (s) (i)
- \*\* Concrete Products (14) (s) (i) (o)
- Clay Products from Imported Clay (14) (s) (i) (o)
- Gypsum Products (14)
- Stone Products (14) (s) (i) (o)
- Brick and Tile (14)
- Sand-lime Brick (14)
- Clay Products from Domestic Clay (14)
- Miscellaneous Non-Metallic Mineral Products (14) (s) (i)
- Miscellaneous Products of Petroleum and Coal (15) (s) (i)
- Coal Tar Distillation (16) (s) (i)

MISCELLANEOUS INDUSTRIES

(a) INDUSTRIES PRODUCING LARGELY FOR EXPORT

- Canned and Cured Fish (1) (s) (i) (o)
- \* Flour Mills (1) (s) (i) (o)
- Sawmills (7) (s) (i) (o)
- \* Pulp and Paper Mills (8) (s) (i) (o)
- \* Non-Ferrous Metal Smelting and Refining (12) (s) (i) (o)
- \* Abrasives and Abrasive Products (14) (s) (i) (o)

(b) MOTOR VEHICLES AND RELATED INDUSTRIES

- \* Tires, Tubes and Other Rubber Products (except Footwear) (3) (s) (i) (o)
- \* Motor Vehicles (11) (s) (i)
- \* Motor Vehicle Parts and Accessories (11) (s) (i) (o)
- \* Batteries (13) (s) (i) (o)

(c) INDUSTRIES PRODUCING INTERMEDIATE GOODS AND SUPPLIES

- Prepared Stock and Poultry Feeds (1) (s) (o)
- \* Sugar Refineries (1) (s) (i)
- \*\* Malt Products (1) (s) (i)
- Animal Oils and Fats (1)
- Feed and Chopping Mills (1)
- \* Leather Tanneries (4) (s) (i) (o)
- Belting Leather (4)
- Boot and Shoe Findings (4)
- Cotton Thread (5) (s) (i)
- \* Cotton Yarn and Cloth (5) (s) (i) (o)
- Miscellaneous Cotton Goods (5)
- \* Woollen Cloth (5) (s) (i) (o)
- \* Woollen Yarn (5) (s) (i) (o)
- Miscellaneous Woollen Goods (5) (s) (i) (o)
- Rayon, Nylon, and Silk Textiles (5) (s) (i) (o)
- Dyeing and Finishing of Textiles (5) (s) (i) (o)
- Laces, Tapes and Bindings (5) (s) (i) (o)
- \* Cordage, Rope and Twine (5) (s) (i)
- \* Cotton and Jute Bags (5) (s) (i) (o)

(c) INDUSTRIES PRODUCING INTERMEDIATE GOODS AND SUPPLIES (Cont'd)

- Fur Dressing and Dyeing (6)
- \* Paper Boxes and Bags (8) (s) (i) (o)
- Miscellaneous Paper Products (8) (s) (i) (o)
- \* Primary Iron and Steel (10) (s) (i) (o)
- \* Wire and Wire Goods (10) (s) (i) (o)
- White Metal Alloys (12) (s) (i) (o)
- Lime (14)
- Coke and Gas Products (15) (s) (i) (o)
- \* Acids, Alkalis and Salts (16) (s) (i) (o)
- \* Fertilizers (16) (s) (i) (o)
- Vegetable Oil Mills (16) (s) (i) (o)
- \* Primary Plastics (16) (s) (i) (o)
- Compressed Gases (16) (s) (i) (o)
- \* Adhesives (16) (s) (i) (o)
- Printing Inks (16)
- Writing Inks (16)
- Typewriter Supplies (17)
- Buttons, Buckles and Fasteners (17)
- Artificial Flowers and Feathers (17)
- Hair Goods (17)
- Stamps and Stencils (17)
- Miscellaneous Industries n.e.c. (17) (s) (i) (o)

(d) UNCLASSIFIABLE INDUSTRIES

- \*\* Starch and Glucose (1)
- \* Canvas Products (5) (s) (i) (o)
- \* Plywood and Veneer Mills (7) (s) (i) (o)
- Miscellaneous Wood Products (7) (s) (i) (o)
- Commercial Printing (9) (s)
- Engraving, Stereotyping and Allied Industries (9) (s)
- Printing and Publishing (9) (s)
- Heating and Cooking Apparatus (10) (s) (i) (o)
- \* Sheet Metal Products (10) (s) (i) (o)
- \* Miscellaneous Iron and Steel Products (10) (s) (i) (o)
- Machine Shop Products (10)
- Miscellaneous Transportation Equipment (11)
- \* Brass and Copper Products (12) (s) (i) (o)
- Miscellaneous Non-Ferrous Metal Products (12)
- Glass and Glass Products (14) (s) (i) (o)
- \* Petroleum Refining and Products (15) (s) (i)
- \* Paints and Varnishes (16) (s) (i) (o)
- Explosives, Ammunitions and Pyrotechnics (16) (s) (i) (o)
- Miscellaneous Chemical Products (16) (s) (i) (o)
- Fabricated Plastic Products (17) (s) (i)
- \* Professional and Scientific Equipment (17) (s) (i) (o)
- Statuary and Art Goods (17)
- Artificial Ice (17)

CONCEPTS, SOURCES, METHODS AND LIMITATIONS

C O N C E P T S

Shipments - represent an estimated projection, on a monthly basis, of the latest available Gross Value of Factory Shipments from the annual Census of Industry. In the majority of cases, Census of Industry values include (a) sales from manufacturing plant of products made at the plant, (b) amounts received for repairs or custom work, (c) shipments of goods manufactured in the plant for further processing in another unit of the same company, and (d) shipments of finished products to manufacturers' sales branches for sale, for each establishment included. The value level used is defined as "factory selling value". Goods purchased for re-sale without further processing are not included. (1)

New Orders - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - are defined as estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled. (Since progress payments are treated for this survey as sales in the month received, total unfilled orders reported each month by firms operating on a progress payments basis are reduced by the total of progress accounts for these firms.) This definition of Unfilled Orders is therefore an expression in terms of future shipments values.

(1) There are a few exceptions to the definition of Census of Industry values given above:

- (i) In two industries, Sawmills, and Slaughtering and Meat Packing, custom work is valued at the estimated selling value of the product rather than by the amounts received for such work.
- (ii) In eight industries (Fish Processing, Veneer and Plywoods, Sawmills, Pulp and Paper, Non-Ferrous Metals Smelting and Refining, Coke and Gas Products, Petroleum Products, and Miscellaneous Products of Petroleum and Coal) the Census of Industry values represent production of finished goods rather than shipments. For these industries the Census of Industry values are adjusted by change in finished products inventory before projection for the monthly series.
- (iii) In four industries, Fabricated and Structural Steel, Aircraft, Railroad Rolling Stock and Shipbuilding, the Census of Industry value is for "work done during the year", i.e. production of finished goods plus change in goods-in-process inventory during the year, rather than shipments. For these industries, the Census of Industry values are also adjusted by change in finished products inventory before projection for the monthly series.

There are three industries apart from those listed under (ii) and (iii) above, for which adjustments to Census of Industry values are made before projection for the monthly series. In the Flour Milling, Brewing and Fruit and Vegetable Preparations industries all of which are characterized by large seasonal variations, many large firms operate on fiscal year periods (which are used in Census of Industry compilations) differing from the calendar year. In unusual years, the projection of Census of Industry values for these industries as if they represented calendar year values could cause considerable distortion in the estimates. To avoid this, the Census of Industry values from 1954 on have been adjusted to estimated calendar year values before projection. This adjustment is based on values reported to the monthly survey.

Firms operating on long-term contracts represent a special case for the monthly series. The value levels projected are those of the Census of Industry as described in the first paragraph (except for the four industries described under iii above). However, for the monthly series, all progress receipts on long-term contracts are included as sales in the month received, instead of the total sale being included in the month the sale is finalized. It is felt that this treatment gives a better indication of monthly activity, but it does allow possible distortion of value levels in that, for the Census of Industry value which is being projected, any final sale will be recorded in one specific year, while the monthly series may have spread this sale over more than one calendar year. Since the bulk of the value of long-term contract work falls in the four industries noted for which adjustments for work done are made in compiling the Census of Industry value, this inconsistency does not affect the all-industry or group totals to any great extent.

Total Inventory Owned represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of:

- (a) raw materials;
- (b) goods in process;
- (c) finished goods of own manufacture at plant and warehouse;

(d) goods of own manufacture at manufacturers' sales offices, wholesale outlets and retail stores;

less (e) value of inventory held but not owned. This item cannot be assigned to specific components.

Since the series relates to manufacturing inventory only, the value of inventory of goods purchased for re-sale without further processing is not included.

Inventory Held but Not Owned represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common, although because of the nature of the item, the value per industry is high.

Because of variations in accounting methods, there are a few cases where it is not possible to obtain values for this type of inventory - some firms treat progress receipts as sales and reduce book value of inventory as payments are received; in some of these cases they no longer have records of actual holdings above the book value level. Wherever estimates are available, these have been included, but the estimated value of inventory under this heading must be considered, to some extent, incomplete.

Total Inventory Held represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from total inventory owned because of the inclusion of inventory held under progress payments arrangements. It includes items (a) to (d) as shown above under total inventory owned.

Inventory Components (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to make definitions of components appropriate for each industry as a whole.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings, but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Industries and Groupings - All individual industries (Table 4) and the Standard Industrial Classification groupings of industries used in Table 2, are defined according to the Standard Industrial Classification Manual.

The Economic Use groups of industries (Table 3) were designed to facilitate the analysis of trends by a grouping based on the use made of each industry's products i.e. on the main demand factors affecting each industry. In drawing up this classification, the groupings were designed to tie in with National Accounts concepts as closely as possible; as a result the three main groupings - Consumer Goods industries, Capital Goods industries, and Construction Goods industries - contain only industries producing mainly final products in each of these categories. Only industries in which substantially more than half the production is of items clearly belonging to one or other of these three specific categories, or industries in which half the production falls into one such category and the remainder is scattered over two or more other categories, were assigned to one of the main groupings. All other industries were assigned to a miscellaneous category, which was sub-divided into three further groupings of related industries - Industries Producing largely for Export, Intermediate Goods and Supplies, and Motor Vehicles and Related Industries - and an unclassifiable group. The latter groupings cut across the Economic Use criteria to some extent. For further detail on the considerations leading to the assignment of industries for these groupings, reference should be made to the December, 1955 report.

## SOURCES

### (a) Monthly Estimates -

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 2700 plants in 119 industries; in addition, 2600 small plants in 20 of these industries and one additional industry report monthly shipments only. Of the first group, 1034 plants in 94 industries also report new and unfilled orders. Six industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates. Coverage has been gradually increased over the past eight years; as at the end of 1956 it was as follows:-

Plants reporting shipments accounted for 71 per cent of total 1954 gross value of shipments. Industries covered, either by samples of reporting firms or by valuation of physical stocks, accounted for 96 per cent of total 1954 gross value of shipments.

Plants reporting inventories accounted for 73 per cent of total 1954 Year-End inventory values. Industries covered, either by samples of reporting firms or by valuation of physical stocks, accounted for 96 per cent of the 1954 Year-End total.

Plants reporting orders accounted for 74 per cent of the estimated 1955 Year-End Unfilled Orders Value. Industries covered accounted for 97 per cent of estimated total Unfilled Orders at December, 1954.

(b) Benchmark Levels -

Benchmark data for annual corrections to the three series (see Section on Methods below) are obtained as follows:

Shipments - Benchmarks for 1953 and 1954 are the final Census of Industry gross value of shipments estimates (as modified in note (1) on Page 49. ) for these years. Benchmarks for 1955 and later years are the preliminary Census of Industry estimates for 1955 as published in the Preliminary Statement of Manufactures, 1955 (also modified according to the note on Page 49. )

Inventories - Benchmark data are obtained from an annual Calendar Year-End survey covering all manufacturing plants with an annual production value of over \$50,000 (approximately 19,000 plants). These plants account for 95 per cent of total gross value of shipments and inflation to total is made on the basis of total shipments from the annual Census of Industry. The latest available Year-End survey values are for 1954.

Orders - Three benchmark surveys for Year-End Unfilled Orders have been made, covering 1953, 1954, and 1955.

The 1953 survey covered all manufacturers with an annual gross value of shipments of over \$50,000. However, in addition to lack of coverage of firms under \$50,000 (representing 5 per cent of total gross value of shipments) actual coverage was incomplete due to non-response (representing 17 per cent of g.v.s.) and to lack of value records of unfilled orders (6 per cent of g.v.s.). The total estimate was made as follows:

1. - Unfilled Orders/shipments ratios for 7 shipments size-groups were calculated for reporting firms in every industry. Shipments values used for this purpose were those for 1952, which were the latest available at time of compilation.
2. - Estimates for firms reporting unfilled orders but no value records were based on the Unfilled Orders/shipments ratios for firms reporting orders values in the same industry and size-group.
3. - Estimates for the group of firms not replying to the question were based on the assumptions that (a) gross value of shipments for firms with orders backlogs and for firms with no backlogs would be in the same proportions as for the group of reporting firms in the same industry and size-group and (b) unfilled orders/shipments ratios for the portion of the industry thus assumed to have orders would be the same as for reporting firms in the same industry and size-group.
4. - Estimates for firms under \$50,000 were made as for non-respondents, using the proportions and unfilled orders/shipments ratios of the smallest size-group for the appropriate industry.

The 1954 and 1955 surveys covered 7000 manufacturing plants. These plants accounted for approximately 80 per cent of 1953 gross value of shipments. Again, coverage was incomplete due to some non-response or to lack of value records for unfilled orders. The total estimates were made by the same method as used in 1953, except that, in most cases, industries were not sub-divided into size-groups since it was found that this additional step had little effect on the final estimates.

METHODS

(a) Current Estimates -

For six series (shipments, raw materials, goods in process, finished products, inventory held but not owned, and unfilled orders) current value estimates for each industry covered are made by applying the monthly percentage changes shown by the unweighted group of reporting firms in each industry to the latest available benchmark values for the same industries. Industries not covered are carried at the latest available benchmark levels.

(The above is subject to a few exceptions. In one industry, reporting firms are treated as a stratum sample, rather than as an unweighted group. In three industries, available physical data on stocks and shipments are valued using price indexes. In three industries, shipments estimates are based on employment data and price indexes.)

Total inventory held in each industry is the sum of the estimated values for raw materials, goods in process, and finished products. Total inventory owned in each industry is calculated by deducting the estimated value for inventory held but not owned from estimated total inventory held. Value of new orders in each industry is derived from estimated shipments and unfilled orders using the formula "Unfilled Orders at end of previous month plus Net New Orders during month less Shipments during month equals Unfilled Orders at end of current month".

(b) Benchmark Revisions -

As new benchmarks become available, estimates for the year to which the benchmarks apply are revised as follows:

- For the shipments series, the Census of Industry value for the year for each industry is spread by months according to the trend shown by reporting firms in the original estimate for that year.

- For the four basic inventory series (raw materials, goods in process, finished products and inventory held but not owned) and the unfilled orders series, where the benchmark values apply to the Year-End rather than to the entire year as in the shipments series, the error in the original estimate for the year-end for each industry is assumed to have accumulated equally over all twelve months of the year (i.e., one-twelfth of the amount of the error is added to the original estimate for January; two-twelfths is added to the original estimate for February; three-twelfths to March and so on).

- The three derived series (total inventory held, total inventory owned, and new orders) are re-calculated on the basis of the revised data for the other six series.

LIMITATIONS TO THE USES OF THE DATA IN THIS REPORT

- (1) Data for individual industries should not be interpreted as commodity data, since very few industries produce only one commodity or only one class of commodities.
- (2) Since the series are in terms of current values, changes over time may be the result of both price and volume changes. Some indication of the extent to which changes in value are due to price changes, thus isolating the physical change which has taken place, can be obtained by reference to the wholesale price index. This procedure is, however, inadequate for anything more than a general indication of trends. The main problem is that the wholesale price index is a commodity price index, while the shipments, orders, and inventory series are industry series with the possibility of changes in commodity content over time. These changes in commodity content could seriously affect the weighting pattern to be applied to price indexes considered applicable for any specific industry. In considering inventory values, turnover rates and valuation methods are other important variables which should be taken into consideration, but for which adequate data are seldom available.
- (3) Shipments data do not necessarily represent market sales for the manufacturing universe. (a) Apart from the few exceptions as noted under (b) below they are defined (see Page 49.) to include total movement of goods out of manufacturing plants (or, in some cases, divisions of plants); shipments of goods for further processing by other plants of multiple-unit companies are, therefore, included as well as shipments for sale. (b) In a few special cases, the Census of Industry values include goods-in-process change, and for these cases progress receipts on long-term contracts are included as shipments as they occur, rather than at the time sales are finalized. (c) Many manufacturers re-sell purchased goods, in addition to their sales of own products, and these re-sale items are not included.
- (4) The component breakdown for inventories is on an establishment, not a commodity, basis. Since each manufacturer reports inventories as on his own books, both for the monthly and annual surveys, and since a number of industries contain plants at various stages of processing, the finished products for one plant might represent commodities which would be considered raw materials or goods in process for another plant in the same industry. The composition of each industry must be studied before attempting to use the component breakdown as applicable to the industry as such, rather than to the firms in the industry.
- (5) For Unfilled Orders, the following reservations apply:
  - (a) The series, by definition, excludes plants producing entirely for stock. Since approximately 40 % of manufacturing is done by such plants, the trends shown are not necessarily applicable to manufacturing in general.
  - (b) Since the series is defined as "unshipped" orders, rather than "unproduced" orders, there is always the probability that some of the Unfilled Orders are accounted for in inventory

holdings. The reduction of unfilled orders by progress receipts eliminates to a considerable extent the effect of large goods-in-process holdings in connection with long-term contracts, but the amount of the remaining inventory, either goods-in-process or finished products, which is held in connection with existing unfilled orders would be difficult to evaluate.

- (c) The series includes total orders, not just those considered as "binding", so estimates of future shipments trends based on these may be overstated due to the possibility of cancellations.
  - (d) Unfilled Orders for all industries include to some extent a duplication due to the fact that orders for final products in one industry may result in orders to firms at secondary or primary stages of processing. Since the total gross value of shipments will contain the same duplication, this does not invalidate the series for purposes of analysis. However, the total impact of any one order on future shipments levels will not necessarily be shown in the Unfilled Orders series, since at any stage an order may be filled from stock, rather than added to existing backlogs.
- (6) The Economic-Use grouping of industries - Table 3 - The difficulties involved in classifying both commodities as such, and industries on the basis of commodities made, are sufficient to limit the usefulness of this compilation to indications of trends only. The main difficulty is that many commodities may be used for different purposes which cut across classification lines. Depending on the use made of it, the same product may be a "final" product or a component part; or a final product may be used for consumption, investment, as a supply, or in construction. A second difficulty is that the basic data for this survey are in terms of estimates for individual industries, not for commodity data. An industry is a group of establishments primarily concerned with the production of a specified product or class of products. Many establishments produce other commodities in addition to those in which they are primarily concerned, and as a result very few industries can be considered "pure" in the sense that they produce only the product or class of products implied in their title. Therefore many industries, which might fall quite clearly into specified groups on the basis of the chief use of their main products, are much less clear-cut when the additional commodities produced in the establishments concerned are considered.

In this classification, only those industries in which substantially more than half the production is of items clearly belonging to that grouping, or in which half the production is of such items and the remainder is scattered over two or more groups, were assigned to the main categories; all industries which could not be so assigned were placed in the "Unclassifiable" category. This means that the inclusion of extraneous commodities is kept to a minimum. It does not, unfortunately, do anything about the fact that each category does not necessarily include all important relevant items. The grouping that is most seriously affected by the forced exclusion of relevant items is the Durable Goods sub-group of the Consumer Goods category. As mentioned above, it does not contain the consumer portion of the Automobile industry, and in addition, it does not include the stove portion of Heating and Cooking Apparatus (since the latter industry had to be assigned to the Unclassifiable group). On the other hand, it does include two large industries with important production of items which should not be assigned to Consumer Durables - these are the Furniture industry, which also produces office and store furniture, as well as household furniture; and the Radios and Parts industry which also produces electronic equipment. The sub-category "Other Capital Goods Industries" contains the highest proportion of industries in which only about half of total production actually should be assigned to the specific grouping, but where the remainder of production is dispersed over a number of other groupings. It is, however, felt that this dispersion is not so likely to result in distortion as is possible with the large specific items involved in the Consumers' Durable Goods group.
