Revisions to Previously Published Estimates

A number of corrections have been made to individual industry series for 1956 and 1957, and group totals (Tables 2 and 3) have been revised accordingly. The material in this report for these industries and groups supercedes that published in the December, 1957 report.

The revised individual industries are as follows:-

RATIOS OF UNFILLED ORDERS TO SHIPMENTS

## T R E N D S U M M A R Y

Preliminary estimates indicate the following trends for January:

SHIPMENTS - The value of shipments in January was \$1,669,864,000, a decline of 2.6% from December's \$1,714,-401,000, and of 3.4% from the \$1,728,833,000 in January, 1957. Declines in shipments are normal in January, and while the drop this year was greater than the 1% decline which occurred in January, 1957, it was less than half of the January declines in the three preceding years.

Using an Economic-Use classification, the largest drop in shipments in January 1958 as compared to January 1957, was a 26% decline in the Motor Vehicle and Related Industries group. The Export Goods group and the Intermediate Goods and Supplies group also decreased, each by 5%. These decreases were offset in part by increases in the Consumer Goods Group (4% in total), and in the Heavy Transportation group (6%).

The comparison between January 1958 and December 1957, using the Economic Use Classification, indicated declines in the Heavy Transportation group (19%), the Motor Vehicles and Related Industries group (8%), the Perishable Consumer Goods group (8%) and the Construction Goods group (4%). A decline of approximately this year's magnitude appears normal for the Heavy Transportation group, (although 1957 with a 1% increase was an exception to this). The trend in the Motor Vehicles group is generally up in January - in 1954 and 1955, increases of 12% and 11% respectively were recorded; in 1956 there was a decline of 7%, and in 1957 an increase of 3%. The declines in the Perishable Consumers' Goods and Construction Goods groups were less than half the average January declines for these groups over the past four years. The Durable Consumers' Goods group, with a decline of 2%, also had a substantially smaller drop than appears normal for the month. Increases of 12% and 9% respectively were shown in the Semi-Durable Consumers' Goods, and the Intermediate Goods and Supplies groups. In both cases these increases appeared in line with the regular seasonal pattern.

INVENTORIES - Value of inventory owned by manufacturers' at the end of January, at \$4,278,926,000, was fractionally (0.4%) lower than the revised December total of \$4,296,010,000. Since there is normally a small increase in January, this year's decline indicates that the liquidation of inventories, which apparently (allowing for average seasonal movements) began last November, is continuing fairly rapidly. The January value was only 2% higher than the level at the end of January, 1957; this year-over-year comparison has shown a steady decline since the 13.4% increase over the previous year-end which was recorded in December, 1956.

Value of total inventory held (including both inventory owned by manufacturers and inventory held under progress payments arrangements) showed a smaller decline during January than did total inventory owned, due to a 2% increase in the progress payments category. The value of total inventory held was \$4,-851,500,000, as compared with the December value of \$4,857,000,000. Raw materials declined by \$17,261,000 (1%), while goods in process and finished products rose by \$5,506,000 and \$6,255,000 respectively (0.4% in each case). These increases in goods in process and finished products were somewhat less than the average January increases for the four previous years, while raw materials normally show a slight increase during this month.

The changes by Economic-Use industry groups were relatively small, and in most cases followed the patterns of the four immediately preceding years. The only groups which appeared to deviate from the normal patterns were the Perishable Consumers' Goods and Construction Goods industries, which showed fractional declines instead of the normal slight increases, and the Motor Vehicles and Related Industries group, which declined by 1.3%, although in the two previous years small increases were registered in this month.

The January ratio of value of total inventory owned to value of shipments, at 2.56 was higher in absolute terms than at any January since 1953. Allowing for what appears to be a changing seasonal pattern for this ratio, it was not, however, as high as in late 1951 and early 1952, or again in late 1953, and there was apparently a slight decline in the ratio from the December 1957 level.

ORDERS - The value of new orders during January, at \$1,765,398,000, was \$95,534,000 higher than shipments, resulting in an increase in Unfilled Orders for the first month since January, 1957. The value of Unfilled Orders, at \$2,515,394,000 was 4% above the December level and 22% below the level at the end of January 1957.

The January increase was only 2/3 of the average rise during this month over the previous four years. Half of it occurred in the Industries Producing largely for Export, and was mainly due to the placement of annual contracts in the Pulp and Paper industry; the increase for the group was, however, not as large as in the immediately preceding years. Most of the remainder of the increase occurred in the Heavy Transportation group, in the Shipbuilding industry; the normal pattern for this group appears to be a slight decline during January. The Perishable Consumers' Goods industries (where orders backlog are relatively unimportant) and the Durable Consumers' Goods industries, showed slight increases, although small declines appear to be normal for January. On the other hand, the Construction Goods Industries group, and Industries Related to Motor Vehicles, showed small increases than average for the past four years, and the Intermediate Goods and Supplies group, which normally shows a substantial increase, declined slightly.

The ratio of value of unfilled orders to value of shipments in January was 1.51, as compared with 1.41 in December and 1.88 in January 1957.

(1) Table 1 includes estimates for all items in all industries; in Tables 2 and 3 following, which represent two different breakdowns of the all-industry totals, some items were omitted as noted, and SIC group 9 (Printing and Publishing) has been omitted from Table 2. (2) Annual shipments values differ slightly from published Census of Industry totals, due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(3) The value of Unfilled Orders for industries in this group is small and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for this group cannot be published separately, since less than 3 firms predominate. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) Shipments values in the Petroleum Products industry for 1954 are affected by a change in method of valuation for Census of Industry purposes. This change accounted for an increase of approximately \$140 million for the year. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders in this group cannot be published separately, since less than 3 firms predominate. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) This table is a sub-total for Tables 3, b2 and 3, b3.

(2) As of January, 1956, one plant was transferred out of this group into the Consumers Durable Goods group. This transfer accounts for the bulk of the decrease shown in Inventory Held but Not Owned, Total Inventory Held, and Goods in Process Inventory Held, between December 1955 and January 1956.

MISCELLANEOUS INDUSTRIES  
(d1) - Industries Producing Largely For Export  
(For definitions, see Page 48)  
(For industries included, see Page 46)

This group comprises only the 6 industries which cannot be fitted into any of the other groups because  
of the high proportion of total production exported. Shipments are not to be taken as total exports

(2) The value of Inventory Held but Not owned in this group is very small, and coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well.

(1) Preliminary

INDUSTRIES INCLUDED IN EACH ECONOMIC USE GROUPING IN TABLE 3

The bracketed numbers following each industry title indicate the Standard Industrial Classification Grouping (Table 2) to which the industry belongs.

The bracketed letters following the individual industry titles indicate the series in which the industry is included on the basis of monthly reports from firms or from special estimates - (s) means that the industry is covered for the shipments series; (i) for the inventory series; (o) for the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group total estimates as described on page 73.

A single asterick preceding the individual industry title indicates that the data for the industry are shown separately in Table 4. A double asterick indicates that the data for the industry are shown in Table 4 combined with data for one or more similar industries as indicated in the footnotes for that table.

#### CONCEPTS AND SOURCES

For further detail, and for description of Methods Used, see December, 1957 report, Page 73.

#### C O N C E P T S

Shipments - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - are defined as estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of:

- (a) raw materials;
- (b) goods in process;
- (c) finished goods of own manufacture at plant and warehouse;
- (d) goods of own manufacture at manufacturers' sales offices, wholesale outlets and retail stores;
- less                   (e) value of inventory held but not owned which cannot be assigned to specific components.

Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common, although because of the nature of the item, the value per industry is high.

Because of variations in accounting methods, there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered, to some extent, incomplete.

Total Inventory Held - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of progress payments inventory. It includes items (a) to (d) as shown above under total inventory owned.

Inventory Components - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to make definitions of components appropriate for each industry as a whole.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings, but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Industries and Groupings - All individual industries (Table 4) and the Standard Industrial Classification groupings of industries used in Table 2, are defined according to the Standard Industrial Classification Manual. A description of the Economic-Use groupings of industries (Table 3) will be found in the December 1955 report, Page 5.

#### S O U R C E S

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 2,700 plants in 119 industries; in addition, 2,700 small plants in 95 of these industries and one additional industry report monthly shipments only. Of the first group, 1,034 plants in 94 industries also report new and unfilled orders. Six industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.
