Preliminary estimates indicate the following trends for October:

SHIPMENTS - Manufacturers' shipments in October were valued at an estimated \$1,888,598,000, up 2% from the revised September value of \$1,843,134,000 and up 1% from the October 1957 total of \$1,877,928,000. The greatest increase in shipments in October of the six preceding years was in 1956 (6%), and the largest decrease was in 1954 (4%). Shipments in the first ten months of this year were valued at \$17,897,423,000, down 3% from last year's corresponding total of \$18,403,758,000.

Using the Economic-Use Classification, the comparison of shipments values in October with the revised values for September of this year showed decreases in four of the ten industry groups. The largest decrease was in the Heavy Transportation Equipment group (4%) which has usually decreased in October of the six preceding years except for 1957 when a 13% increase occurred. Other decreases in October 1958 were in the Other Capital Goods group (2%), Semi-Durable Consumers' Goods group (2%) and the Industries Producing Largely for Export group (1%). In the six preceding years, the September-October average change for the Other Capital Goods group and the Industries Producing Largely for Export group was an increase of 3% each, and for the Semi-Durable Consumers' Goods group the average change was a decrease of 3%.

Increases in October 1958 were in the following groups: Motor Vehicles and Related Industries (37%); Durable Consumers' Goods (3%); Construction Goods (3%); and 2% increases in the Perishable Consumers' Goods group, the Intermediate Goods and Supplies group, and the Unclassifiable group of industries. The October 1958 increase in the Motor Vehicles and Related Industries group is not as large as the 56% increase in October of 1956, but is greater than the increases in 1955 or 1957. This group showed small decreases in October of the three years previous to 1955. Of the remaining groups of industries, the average percentage change in October of the six preceding years was as follows: a 3% average increase in the Construction Goods group, a 2% average increase in the Perishable Consumers' Goods group, a 1% average increase in the Durable Consumers' Goods group and the Intermediate Goods and Supplies group. The unclassifiable group of industries decreased by an average of 1% over the six preceding years.

The comparison of October 1958 shipments with October 1957 showed increases in four industry groups (using the Economic-Use Classification). The largest increase was in the Motor Vehicle and Related Industries group (22%) with other increases in the Perishable Consumers' Goods group (6%); Semi-Durable Consumers' Goods group (4%); and the Construction Goods group (1%). Decreases occurred in the following groups: Heavy Transportation and Equipment (20%); Other Capital Goods (12%); Durable Consumers' Goods (7%); Industries Producing Largely for Export (1%); the Unclassifiable Industries group (1%); and a marginal decrease in the Intermediate Goods and Supplies group.

The cumulative shipments comparison for the first ten months of 1958 compared to the same period last year, showed declines in all industry groups except Perishable Consumers' Goods where a 9% increase occurred. The groups showing declines were as follows: Motor Vehicles and Related Industries group (13%); Other Capital Goods group (10%); Heavy Transportation Equipment group (5%); Industries Producing Largely for Export group (5%); Unclassifiable Industries group (5%); Construction Goods group (3%); and 2% declines in the Durable and Semi-Durable Consumers' Goods groups and the Intermediate Goods and Supplies group.

INVENTORIES - The preliminary estimate for inventory owned by manufacturers at the end of October 1958, was \$4,068,299,000, practically unchanged (i.e. up by \$594,000 or 0.01%) from the revised September value of \$4,067,705,000. While a few small decreases have been recorded (1949, 1952 and 1954), October more commonly shows an increase and this year's change is somewhat below average. The October 1958 value was \$287,367,000 (7%) below October 1957.

A decline of \$5,609,000 (1%) in the value of inventory held under progress payments arrangements during October meant that total inventory held, at \$4,607,263,000, was \$5,015,000 (0.1%) below the revised September value. Total inventory held was 5% below October 1957; this decline was smaller than that for total inventory owned due to a 17% increase in progress payments holdings.

**Raw Materials**, at \$1,890,422,000, though still down (7%) on a year-to-year comparison, increased 0.7% or \$12,615,000 from the revised September estimate. Goods in process held at \$1,254,179,000 were down only slightly \$732,000 (0.06%) from the revised September value and up 2% from the October 1957 level. If the simplifying assumption is made that all inventory held under progress payments arrangements falls into the goods in process category, goods in process owned, at \$715,215,000 was \$4,877,000 (0.7%) above the revised September value, but 8% below the 1957 level. A decline occurred in finished products which fell \$16,898,000 (1%) from September and was 5% below October 1957.

Changes in inventory owned by Economic-Use groups were generally in line with changes over the past six years. A notable exception to this was the Heavy Transportation Equipment group which showed a 0.5% decline although all but one of the past six years have shown increases. This brought the October 1958 value for this group 35% below the 1957 level. The increase in Motor Vehicles and Related Industries inventories (0.1%) was considerably less than October increases in the past two years, but since this group had a larger increase than usual in September it would appear that this was merely a change in the timing of the autumn increase. While the slight decrease in the Industries Producing Largely for Export group was somewhat less than the decreases of the past three years, and the 3% increase in Industries Producing Intermediate Goods and Supplies was below the average of the past six years, other changes both in size and direction were in line with previous experience.

Ratios of total inventory owned to shipments and of finished products to shipments both declined during the month. This is similar to the ratio changes shown in 1956 and 1957. The ratio of total inventory owned to shipments for October was 2.15 compared with 2.11 for September and 2.32 for October 1957. Finished products to shipments ratios were 0.77 for October 1958, 0.80 for September 1958 and 0.82 for October 1957.

**ORDERS** - The value of new orders received during October was \$1,792,099,000. This was an increase of 2% from the revised September value of \$1,757,618,000 and an increase of slightly under 1% from the October, 1957 value of \$1,777,192,000. The increase in new orders from September to October was slightly less than the rise which occurred in the previous two years (3% in 1956 and 4% in 1957) but in the four years prior to 1956, October values declined.

Shipments exceeded new orders by \$96,499,000 during the month, with the result that unfilled orders declined by this amount. The level of unfilled orders at the end of October was \$2,139,639,000, which was 4% below the revised September level of \$2,236,138,000 and 14% below the level at the end of October 1957 (\$2,488,911,000).

Changes in new orders from September to October for the Economic-Use groups have shown a fair amount of irregularity over recent years, so that generalizations as to whether this year's changes followed normal patterns are difficult. One group, Motor Vehicles and Related Industries, showed a 53% increase in new orders, which was considerably higher than any September-October increase in the previous six years. September-October increases for the Consumers' Semi-Durable Goods industries, the Consumers' Durable Goods industries, and the Capital Goods (other than Heavy Transportation Equipment) industries, which were 11%, 11%, and 14% respectively, were greater than those generally occurring during this period in recent years; in three of the preceding six years, the Consumers' Durable Goods group showed sizeable declines in new orders during October. An increase of 4% in the Construction Goods industries in October was slightly less than the normal increase for this group. The Heavy Transportation Equipment group showed a sizeable decline (48%) but declines of this magnitude are fairly common in this group in October. The Industries Producing Largely for Export had a 15% decline during the month; declines occurred in this group during October in three of the preceding years, but this year's decline is greater than any of these earlier ones. Only small changes occurred in the remaining groups -- increases of 4% and 2%, respectively, for the Unclassifiable group and the Consumers' Perishable Goods industries, and a decrease of 2% in the Intermediate Goods and Supplies industries; September-October changes in these groups have shown regular patterns in recent years.

Unfilled orders in most groups were lower at the end of October than a year earlier. The Consumers' Semi-Durable Goods industries, and the Consumers' Durable Goods industries were, however, 7% and 13% above the October, 1957 level. The Export Goods industries were at the same level as a year earlier. All other groups were down, by percentages ranging from 6% for Consumers' Perishable Goods industries to 23% in the Construction Goods industries, and Capital Goods (other than Heavy Transportation Equipment) industries.

(1) Table 1 includes estimates for all items in all industries; in Tables 2 and 3 following, which represent two different breakdowns of the all-industry totals, some items were omitted as noted, and SIC group 9 (Printing and Publishing) has been omitted from Table 2. (2) Annual shipments values differ slightly from published Census of Industry totals, due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values. (3) Preliminary. (3) Revised December 1955 comparable with 1956 series - see Revisions in April 1958 report, page iii. (4) See footnote 3, page 11.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for this group cannot be published separately, since less than 3 firms predominate. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) Shipments values in the Petroleum Products industry for 1954 are affected by a change in method of valuation for Census of Industry purposes. This change accounted for an increase of approximately \$140 million for the year. (5) Preliminary.

Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

MISCELLANEOUS INDUSTRIES

(d) - Industries Producing Largely For Export

(For definitions, see Page 48)

(For industries included, see Page 46)

This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports

(1) See footnote 1, page 1. (2) The value of Inventory Held but Not Owned in this group is very small, and coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well. (3) See footnote 3, page 1.

INDUSTRIES INCLUDED IN EACH ECONOMIC USE GROUPING IN TABLE 3

The bracketed numbers following each industry title indicate the Standard Industrial Classification Grouping (Table 2) to which the industry belongs.

The bracketed letters following the individual industry titles indicate the series in which the industry is included on the basis of monthly reports from firms or from special estimates - (s) means that the industry is covered for the shipments series; (i) for the inventory series; (o) for the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group total estimates as described on page 73.

A single asterick preceding the individual industry title indicates that the data for the industry are shown separately in Table 4. A double asterick indicates that the data for the industry are shown in Table 4 combined with data for one or more similar industries as indicated in the footnotes for that table.

## CONCEPTS AND SOURCES

For further detail, and for description of Methods Used, see December, 1957 report, Page 73.

## CONCEPTS

Shipments - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - are defined as estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of:

- (a) raw materials;  
(b) goods in process;  
(c) finished goods of own manufacture at plant and warehouse;  
(d) goods of own manufacture at manufacturers' sales offices, wholesale outlets and retail stores;  
less (e) value of inventory held but not owned which cannot be assigned to specific components.

Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common, although because of the nature of the item, the value per industry is high.

Because of variations in accounting methods, there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered, to some extent, incomplete.

Total Inventory Held - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of progress payments inventory. It includes items (a) to (d) as shown above under total inventory owned.

Inventory Components - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to make definitions of components appropriate for each industry as a whole.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings, but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Industries and Groupings - All individual industries (Table 4) and the Standard Industrial Classification groupings of industries used in Table 2, are defined according to the Standard Industrial Classification Manual. A description of the Economic-Use groupings of industries (Table 3) will be found in the December 1955 report, Page 5.

## S O U R C E S

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 2,700 plants in 119 industries; in addition, 2,700 small plants in 95 of these industries and one additional industry report monthly shipments only. Of the first group, 1,034 plants in 94 industries also report new and unfilled orders. Six industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.
