Preliminary estimates indicate the following trends for March:

SHIPMENTS: - Manufacturers' shipments in March were valued at an estimated \$1,820,418,000, up 6% from the revised February value of \$1,723,245,000 and up 3% from the March 1958 total of \$1,770,644,000. Shipments increased in March of each of the seven preceding years, with increases ranging from 4% in 1952, to 12% in 1953, 1954 and 1957. Shipments in the first quarter of this year were valued at \$5,234,646,000, up 4% from last year's corresponding total of \$5,039,155,000.

Using the Economic-Use Classification, the comparison of shipments values in March with the revised values for February 1959 showed increases in all groups. The increases were as follows: Construction Goods group (13%); Other Capital Goods group (11%); Intermediate Goods and Supplies group (7%); Industries Producing Largely for Export group (6%); Motor Vehicle and Related Industries group (5%); Perishable Consumers' Goods group (5%); Semi-Durable Consumers' Goods (5%); Heavy Transportation Equipment group (3%); Durable Consumers' Goods group (2%); Unclassifiable group (2%). In the seven preceding years, seven of the ten groups had March increases in shipments as follows: Construction Goods group (average increase of 15%); Other Capital Goods group (average increase of 11%); Intermediate Goods and Supplies group (average increase of 8%); Industries Producing Largely for Export group (average increase of 9%); Semi-Durable Consumers' Goods group (average increase of 12%); Unclassifiable group (average increase of 6%); and the Motor Vehicles and Related Industries group which showed increases ranging from a marginal increase in 1955, to a 7% increase in 1957. (This latter increase in the Motor Vehicles and Related Industries group reflects the occurrence of the annual peak of shipments in March instead of subsequent months as in 1955, 1956, and 1958.) The remaining three industry groups had increases in six of the seven preceding years. The Perishable Consumers' Goods group decreased by 3% in March 1952, but increased by an average of 8% in the remaining six years. The Durable Consumers' Goods group decreased by 2% in March 1957, but increased by an average of 13% in the remaining six years. The Heavy Transportation Equipment group decreased by 11% in March 1956, but increased by an average of 12% in the remaining six years.

The comparison of March 1959 shipments with March 1958, showed increases in six of the ten industry groups, using the Economic-Use Classification. These increases were as follows: Motor Vehicles and Related Industries group (19%); Intermediate Goods and Supplies group (9%); Unclassifiable group (6%); Perishable Consumers' Goods group (5%); Semi-Durable Consumers' Goods group (4%); Industries Producing Largely for Export group (1%). Decreases occurred in the Heavy Transportation and Equipment group (25%); Construction Goods group (8%); Other Capital Goods group (4%); and a fractional decrease in the Durable Consumers' Goods group.

Cumulative shipments for the first quarter of 1959 were higher in seven of the ten industry groups when compared to the same quarter last year. The industry groups showing increases were as follows: Motor Vehicle and Related Industries group (21%); Intermediate Goods and Supplies group (9%); Unclassifiable group (8%); Semi-Durable Consumers' Goods group (8%); Perishable Consumers' Goods group (7%); Durable Consumers' Goods group (3%); Industries Producing Largely for Export group (1%). Decreases occurred in the Heavy Transportation and Equipment group (25%); Construction Goods group (9%); and the Other Capital Goods group (4%).

INVENTORIES: - The preliminary estimate of the value of inventory owned by manufacturers at the end of March 1959 was \$4,023,849,000 up \$21,132,000 (0.5%) from the revised February value of \$4,002,717,000. March inventories are generally higher than February, though 1957 and 1958 showed only small changes, and this year's increase was less than those in 1955 and 1956 (1.0% and 1.5%, respectively). The level of inventory owned in 1959 continues to approach that of 1958 with March 1959 only 1.5% below the March 1958 level.

Since progress payments holdings were practically unchanged from the revised February level, total inventory held (including both inventory owned by manufacturers and inventory held under progress payments arrangements) at \$4,460,976,000 was also 0.5% above the revised February value (\$4,440,051,000). Raw materials at \$1,971,148,000 were up very slightly from the revised February figure (\$1,970,582,000) but about 2% below March 1958. Goods in process held (\$1,211,672,000) were up fractionally from the revised February level (\$1,206,034,000) but 3% below the level of March 1958. If the simplifying assumption is made that all inventory held under progress payments arrangements is in the goods in process held category, then goods in process owned (i.e. less progress payments) at \$774,545,000 was almost 1% above the revised February value of \$768,700,000 and fractionally above the March 1958 level. Although over 1% above the revised February value (\$1,263,435,000), finished products inventory at \$1,278,156,000 was more than 2% below the March 1958 level.

February to March changes in inventory owned by Economic-Use Groups were generally upwards though all changes were small. The only more than 1% changes were in Industries Producing Largely for Export (up about 3%) and Semi-Durable Consumers' Goods Industries (down just over 1%). In both cases the changes were in line with the pattern of earlier years. While changes in other groups were in general smaller than in earlier years, their direction was in most cases the same. Exceptions were the Other Capital Goods Industries, where the slight increase this March was the first March increase since 1956, and the Construction Goods Industries, which were practically unchanged this year, while 3 of the 4 earlier years showed substantial March increases. Motor Vehicles and Related Industries inventories show no definite pattern of February-March changes, though past changes in both directions have been considerably larger than this year's slight increase.

On a year-over-year comparison, only three groups were above March 1958. Both Perishable and Durable Consumers' Goods Industries were up substantially (6% and 8%, respectively) from last year's level. Industries Producing Intermediate Goods and Supplies were also up about 1% from March 1958. The groups down most noticeably from a year ago were: Heavy Transportation Equipment Industries (26%); Construction Goods Industries (5%); Motor Vehicles and Related Industries and Unclassifiable Industries, (both about 4%).

The ratio of total inventory owned to shipments in March 1959, at 2.21, was below both February 1959 (2.32) and March 1958 (2.31). The finished products to shipments ratio, 0.70, was similarly below February 1959 (0.73) and March 1958 (0.74).

TRADING OUTLETS: - Sales from Manufacturers' Trading Outlets in March at \$227,912,000 were about 1% above the February level (\$225,493,000) and about 2% above March 1958. March sales are generally higher than February, and the increase this year is less than half the average increase of the previous four years. The Petroleum and Coal Industries (down 5%) were the only ones not to share in the March increase. The most noticeable sales increases were in Wood and Paper Products (up 22%) and the Rubber Industries (up 15%).

The value of inventories held at Manufacturers' Trading Outlets at \$254,194,000 was down about 1% from the revised February value (\$256,173,000), and down over 5% from the March 1958 level. February to March changes in inventories in the past four years have been mixed. Iron and Steel Industries and Chemical Industries, were both up about 3%, Electrical and Rubber Industries were practically unchanged, and all other groups showed declines.

ORDERS: - The value of new orders received during March was \$1,822,295,000, an increase of 11% from the revised February value of \$1,636,773,000 and an increase of 5% from the March 1958 value of \$1,736,906,000. Increases in the range of 1% to 11% occurred in six of the seven preceding years. The one decrease (4%) was in March 1954.

New orders exceeded shipments by \$1,877,000 during the month, with the result that unfilled orders increased by this amount. The level of unfilled orders at the end of March was \$2,098,563,000, which was marginally above the February level of \$2,096,686,000 and 13% below the level at the end of February 1958 (\$2,421,133,000).

There were increases in the value of new orders in eight of the ten economic-use groups in the current February-March comparison, but comparison with the seven preceding years did not indicate any pronounced improvement or decline in any of the economic-use groups. The one exception was the Industries Producing Largely for Export group which increased by 22% in March 1959, compared to a 1% decrease in March 1956 and smaller increases in the six preceding years (ranging from 2% to 21%). The March 1959 increase of 5% in the Perishable Consumers' Goods group was lower than the increase in any of the preceding six years. The Semi-Durable Consumers' Goods group decreased in four of the seven preceding years (decreases from 1% to 5%) but the remaining three years (1955, 1957 and 1958) had increases greater than the 1% increase in March 1959. The Intermediate Goods and Supplies group increased by 4% in March 1959 compared to decreases ranging from 2% to 7% (in 1953, 1955 and 1956) and increases ranging from 3% to 11% in the remaining four preceding years. The Unclassifiable group showed a marginal increase in March 1959 compared to a 5% decrease in 1952 and increases between 2% and 10% in the remaining six preceding years. In March 1959, the Construction Goods group increased by 17%, the Other Capital Goods group increased by 5%, the Motor Vehicles and Related Industries group increased only marginally, and the Durable Consumers' Goods group decreased by 10%. For these last four groups there is no definite pattern discernible in previous year's figures. The Heavy Transportation and Equipment Group showed a positive new orders value in March 1959 after a negative value in February, but the level was lower than March last year. The February-March trend for this group has been erratic in previous years.

A comparison of unfilled orders at the end of March as compared with February levels showed increases in seven of the ten economic-use groups as follows: Perishable Consumers' Goods group (9%); Industries Producing Largely for Export group (7%); Construction Goods group (4%); and approximately 1% increases in the Other Capital Goods group, the Motor Vehicles and Related Industries group, the Intermediate Goods and Supplies group; and in the Unclassifiable group. Decreases occurred in the Semi-Durable Consumers' Goods group (13%); the Heavy Transportation and Equipment group (5%); and in the Durable Consumers' Goods group (2%).

Unfilled Orders increased in four economic-use groups in the comparison of March 1959 with March of last year. The increases were as follows: Durable Consumers' Goods group (21%); Intermediate Goods and Supplies group (18%); Motor Vehicles and Related Industries group (5%); and the Semi-Durable Consumers' Goods group (5%). The largest decreases were in the Heavy Transportation and Equipment group (46%) and the Construction Goods group (10%). The remaining groups (Perishable Consumers' Goods, Other Capital Goods, Industries Producing Largely for Export, and the Unclassifiable group) showed decreases between 1% and 3%.

(1) Table 1 includes estimates for all items in all industries; in Tables 2 and 3 following, which represent two different breakdowns of the all-industry totals, some items were omitted as noted, and SIC group 9 (Printing and Publishing) has been omitted from Table 2. (2) Annual shipments values differ slightly from published Census of Industry totals, due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values. (3) Unfilled Orders data from January 1956 on are not comparable to earlier data due to changes in methods of reporting by a number of firms in 5 industries. The bracketed value represents a December 1955 estimate on the same basis as 1956 estimates. (4) See footnote 4, page 13. (5) Change in series between December 1958 and January 1959, see footnote 2, page 46. (6) Preliminary.

(4) A correction of reporting methods which cannot be carried back to 1955 data, accounts for the bulk of the decrease between December 1955 and January 1956 in Inventory Held but not Owned, Total Inventory Held and Goods in Process Inventory. (5) Change in series between December 1958 and January 1959, see footnote 2, page 46. (6) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 1. (2) See footnote 2, page 1. (3) The value of Unfilled Orders for industries in this group is small and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

MISCELLANEOUS INDUSTRIES

(d1) - Industries Producing Largely For Export

(For definitions, see Page 51.)

(For industries included, see Page 49.)

This group comprises only the 6 industries which cannot be fitted into any of the other groups because
of the high proportion of total production exported. Shipments are not to be taken as total exports

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys.

(2) The value of Inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

(1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) Part of the change in values from December 1958 to January 1959, is a result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries group. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups. (3) Preliminary.

(1) Includes sales and inventories of purchased goods.

(2) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet data could not be separated from plant values.

(3) Preliminary.

INDUSTRIES INCLUDED IN EACH ECONOMIC USE GROUPING IN TABLE 3

The bracketed numbers following each industry title indicate the Standard Industrial Classification Grouping (Table 2) to which the industry belongs.

The bracketed letters following the individual industry titles indicate the series in which the industry is included on the basis of monthly reports from firms or from special estimates - (s) means that the industry is covered for the shipments series; (i) for the inventory series; (o) for the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group total estimates as described in the December, 1958 publication, page 89.

A single asterick preceding the individual industry title indicates that the data for the industry are shown separately in Table 4. A double asterick indicates that the data for the industry are shown in Table 4 combined with data for one or more similar industries as indicated in the footnotes for that table.

Shipments - (Tables 1 to 5) - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - (Tables 1 to 4) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlog.

Unfilled Orders - (Tables 1 to 4) - are defined as estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 1 to 5) - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture at plant and warehouse, less value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 1 to 4) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common, although because of the nature of the item, the value per industry is high.

Because of variations in accounting methods, there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered, to some extent, incomplete.

Total Inventory Held - (Tables 1 to 4) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of amounts held under progress payments arrangements.

Inventory Components - (Tables 1 to 5) - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to make definitions of components appropriate for each industry as a whole.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings, but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Trading Outlets - (Table 6) - are defined as any establishments (other than retail stores) operated by manufacturers, apart from their plants or plant-warehouses, which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock, or which carry small quantities only for demonstration purposes, are not included. Sales for this series represent direct sales from the outlet of goods manufactured by the owning or associated manufacturing company, with sales arranged by outlets but shipped direct from plant excluded wherever possible; goods purchased for re-sale from sources other than the owning or associated manufacturing company are also excluded, except for the Petroleum Products industry group, where a separation of purchased products is not feasible. Inventories for this series represents owned inventories held at Trading Outlets or in warehouses serving the trading outlets; again, goods purchased for re-sale are excluded except for the Petroleum Products industry.

Industries and Groupings - All individual industries (Table 4) and the Standard Industrial Classification groupings of industries used in Tables 2, 5 and 6, are defined according to the Standard Industrial Classification Manual. A description of the Economic-Use groupings of industries (Tables 3, and 5) will be found in the December 1955 report, Page 5.

S O U R C E S

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 2,700 plants in 119 industries; in addition, 2,700 small plants in 95 of these industries and one additional industry report monthly shipments only. Of the first group, 1,034 plants in 94 industries also report new and unfilled orders. Six industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.
