TREND SUMMARY

Preliminary estimates indicate the following trends for September:

SHIPMENTS: - Manufacturers' shipments in September valued at \$1,941 million reversed the downward trend shown in July and August. The preliminary estimate for September shows shipments up by 4.4% from the revised August estimate of \$1,859 million and also 4% higher than shipments in September 1958 (\$1,864 million). The cumulative estimate of shipments for 1959 to the end of the third quarter, \$17,079 million, continues to run almost 6% over shipments in 1958 accumulated for the same period, (\$16,162 million).

The increase in shipments in September was general throughout manufacturing as only industries in the heavy transportation group (considering the industries as grouped by economic-use) showed a level of shipments below August and even in this group the decline was not sufficient to offset the increase in shipments in the other capital goods industries so that the capital goods as a whole showed an increase over the previous month. For the year to date however shipments here continue to lag behind 1958 and in the total capital goods group the level of shipments is running more than five percent below the previous year. Shipments of construction goods were also running behind shipments in 1958 and September shipments at \$162 million are nearly 5% lower than shipments in September 1958. Since the construction industries shipments in July and August this year were at record highs the decline for the first nine months this year is still less than 3% of shipments in the same period in 1958.

The higher level of shipments in September as compared with August has been the general pattern for the past seven years for most industries with the exception of industries producing chiefly for export and the motor vehicle industry which for most years have shown declines in September. This year both these groups had heavier shipments in September than in August, by almost 2 percent in industries producing export goods and by nearly 16 percent in the motor vehicle group. Since the motor vehicle industry reached the low point for the year in August both this year and last the increase in September this year over September 1958 was slight, however, the increase in shipments for the first nine months of 1959 as compared with last is over 16 percent.

Turning to the industries grouped according to the standard industrial classification minor declines are shown in foods and beverages, less than 1% and in leather and petroleum products of just over 1%. Some of the shifts in shipments in the food industries in September as compared with August clearly reflect the change in season as shipments from butter and cheese factories, the carbonated beverage industries and breweries are down and shipments of processed fruits and vegetables, and from the sugar factories are up.

Large increases in shipments in September as compared with August are shown in the tobacco (16%), rubber (18%), textiles (10%) and clothing (11%), electrical (14%) and chemical (14%) industries and for the tobacco, rubber and textiles groups shipments are also well above the average increase of 6% shown for shipments in the first nine months of this year as compared with last. Clothing shipments for the first nine months of this year are, however, running at 5 percent above last year's but both the electrical and chemical products industries show shipments falling behind shipments in 1958 by about 3%. The remaining groups, wood, paper, iron and steel, non-ferrous metal, non-metallic minerals and miscellaneous industries show increases in September shipments as compared with August of 4 to 6%, except for the miscellaneous group which increased shipments by 9%, and for the first three quarters of the year are 5 to 10% higher than for the first three quarters of last year. The transportation group, reflecting the decline in the shipments of the heavy transportation industries as commented on in the economic use groupings shows an increase of only 3 percent in September over August, and is just fractionally higher for the first nine months of 1959 as compared with 1958. As compared with the level of shipments in September 1958 transportation industries show a decline of about 12%. Shipments in the wood products industries and the electrical industries are also lower by 7 and 11 percent than shipments in the corresponding month last year.

INVENTORIES: - The level of inventories in manufacturing industries at the end of September \$4,454 million, was up slightly from the level at the end of August, \$4,442 million, an increase of less than half of one percent. The decline in inventories of goods produced under progress payments although large, 3.4%, left the level of total goods in process inventory in September, \$1,244.6 million, fractionally higher than the August level, \$1,240.7 million, and at the highest level this year. Total inventory owned was up by slightly less than one percent in September, \$4,021 million, as compared with August, \$3,994 million, and by 3.3% as compared with September 1958, \$3,893 million.

The contrast in the movement of inventory holdings as between raw materials and goods in process on the one hand and finished products on the other which has begun to show up in August and September is interesting especially when considered in relation to the higher level of shipments which has been sustained during the first three quarters of this year. Total inventory held at the

end of September was 1.5% higher than the level of total inventories at the end of the second quarter and somewhat less than one percent higher than inventories both at the end of the first quarter this year and at the end of September 1958. Raw materials and goods in process inventory holdings were up by 3.4% and 2.4% respectively from the end of the second quarter and although raw materials stocks were only 1% higher than stocks at the end of the first quarter, goods in process were 3.5% higher. Finished goods inventories were down by just over 2% from the level at the end of the first and second quarters of this year but almost 3 percent higher than their level in September 1958.

The higher level of raw materials and goods in process inventories contrasted with a decline in finished products inventories at the end of the third quarter contrasted with the first two quarters this year is shown in the rubber goods industries (S.I.C. group no.3), the leather products group (S.I.C. no. 4), textile products (S.I.C. no. 5), iron and steel products (S.I.C. no. 10), non-ferrous metal products (S.I.C. no. 12), and electrical apparatus and supplies (S.I.C. no. 13). The clothing industry (S.I.C. no. 6) shows a decline in finished products inventory in September but the level, although lower than the level of finished products inventory at the end of June, is above the levels prevailing at the end of 1958 and during the first quarter of the year. Inventories of goods in process and raw materials are being sustained at the higher levels which were shown at the end of the second quarter. Goods in process inventory in the transportation equipment group (S.I.C. no.11) has risen considerably in both August and September to reach the highest point in 1959 (\$385.8 million) although this is lower than the low point in 1958 which was obtained in January of that year. Raw materials inventories have risen in this quarter and are higher than at the end of the second quarter but are lower than the levels at the beginning of this year. Inventories of finished products in this group, transportation equipment, after falling in August rose in September to the highest point since the end of 1957. Finished products inventory in the non-ferrous metal industries (S.I.C. no.12) are lower at the end of September, \$55.2 million, than at the end of the second or third quarter but levels of inventory of goods in process and raw materials have been maintained at a fairly constant level throughout the year. In the non-metallic minerals industries (S.I.C.no.14) a slight increase in finished products inventories has been accompanied by a small but definite decline in goods in process inventories while raw materials inventories are somewhat higher at the end of September than at the end of the first and second quarters. A very pronounced decline in inventory levels of finished products in the tobacco and tobacco products industries (S.I.C. no.2) was accompanied by drawing down raw materials stocks and an increase in goods in process. The decline in raw materials holdings in September, of course, follows the well defined seasonal pattern in this industry. The foods and beverage industries (S.I.C. no. 1) also reflect seasonal factors with the pronounced increase in stocks of finished products in September. Raw materials inventories have also gone up in each of the last three months, while goods in process stocks have been sustained at a high but constant level since June of this year.

The ratio of inventory owned to shipments was 2.07 in September reflecting both the slight increase in inventories and the larger increase in shipments during the month. The revised ratio for August, 2.15 as compared with the preliminary estimate of 2.10, reflects both the slight upward revision in inventories and the slight downward revision in shipments for August. The ratio of finished products inventory to shipments at the end of September was 0.63 a decline from 0.66 at the end of August reflecting again the increase in shipments during the month.

ORDERS: - Unfilled orders at the end of September were estimated at a level of \$2,215 million, a decline of \$32 million from the revised August estimate of \$2,247 million, reflecting both the increase in shipments and the decline in new orders during the month. Although the decline in unfilled orders reversed the upward trend which had continued from April this year, the comparison with a year ago has narrowed this month to less than one percent.

TRADING OUTLETS: - Sales from manufacturers' trading outlets in September are estimated at \$256.1 million, five percent higher than the revised estimate for August of \$243.3 million. This level of sales is only fractionally higher (\$31,000) than sales in September 1958 but although it is a rather pronounced drop in the amount by which sales this year have been exceeding those in the previous year - during the first six months of 1959, sales were at a level almost six percent higher than during the same period in 1958 and in July and August just less than five percent higher - the difference is largely the result of a sharp increase in sales last September. Since sales through trading outlets not only tend to reflect the level of business activity but are also, since they represent only a small fraction of the total value of manufacturers' shipments, very sensitive to any change in the distribution practices of manufacturers it may be somewhat misleading to refer to a trend in sales from the values reported here. This year the contrast has been particularly marked in the electrical goods industry where, as noted in a footnote to the table, the lower level of sales in January this year as compared with December and for each month in 1959 as compared with the corresponding month in 1958 is the result of the cessation of trading outlet operations in part of this industry.

Inventories at trading outlets after rising in May and June have been held fairly steady during the third quarter. During the year, however, they have been maintained at a level below that of 1958 and considerably below those in 1957.

(1) Table 1 includes estimates for all items in all industries; in Tables 3 and 4 following, which represent two different breakdowns of the all-industry totals, some items were omitted as noted, and SIC group 9 (Printing and Publishing) has been omitted from Table 3. (2) Annual shipments values differ slightly from published Census of Industry totals, due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values. (3) Unfilled Orders data from January 1956 on are not comparable to earlier data due to changes in methods of reporting by a number of firms in 5 industries. The bracketed value represents a December 1955 estimate on the same basis as 1956 estimates. (4) See footnote 4, page 14. (5) Change in series between December 1958 and January 1959, see footnote 2, page 47. (6) Preliminary.

(1) See footnote 1, page 2. (2) See footnote 2, page 2. (3) The value of Unfilled orders for industries in this group is small, and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

(1) See footnote 1, page 2. (2) See footnote 2, page 2. (3) The value of Unfilled Orders for industries in this group is small and sample coverage is not adequate to provide separate estimates for the group. (4) The value of Inventory Held but Not Owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes, this can be considered the equivalent of Inventory Owned as well. (5) Preliminary.

MISCELLANEOUS INDUSTRIES

(d1) - Industries Producing Largely For Export
(For definitions, see Page 52.)

(For industries included, see Page 50.)

This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys. (2) The value of Inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data. Estimates of this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well. (3) Preliminary.

(1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) Part of the change in values from December 1958 to January 1959, is a result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries group. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups. (3) Preliminary.

(1) Includes sales and inventories of purchased goods.

(2) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet data could not be separated from plant values.

(3) Preliminary.

INDUSTRIES INCLUDED IN EACH ECONOMIC USE GROUPING IN TABLE 3

The bracketed numbers following each industry title indicate the Standard Industrial Classification Grouping (Table 2) to which the industry belongs.

The bracketed letters following the individual industry titles indicate the series in which the industry is included on the basis of monthly reports from firms or from special estimates - (s) means that the industry is covered for the shipments series; (i) for the inventory series; (o) for the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group total estimates as described in the December, 1958 publication, page 89.

A single asterick preceding the individual industry title indicates that the data for the industry are shown separately in Table 5. A double asterick indicates that the data for the industry are shown in Table 5 combined with data for one or more similar industries as indicated in the footnotes for that table.

- * Motor Vehicles (11)(s)(i)
- * Motor Vehicle Parts and Accessories (11)(s)(i)(o)
- * Batteries (13)(s)(i)(o)

(c) INDUSTRIES PRODUCING INTERMEDIATE GOODS AND SUPPLIES

- Prepared Stock and Poultry Feeds (1)(s)(i)(o)
- * Sugar Refineries (1)(s)(i)
- ** Malt Products (1)(s)(i)
- Animal Oils and Fats (1)(s)
- Feed and Chopping Mills (1)
- * Leather Tanneries (4)(s)(i)(o)
- Belting Leather (4)(s)
- Boot and Shoe Findings (4)(s)
- Cotton Thread (5)(s)(i)
- * Cotton Yarn and Cloth (5)(s)(i)(o)
- Miscellaneous Cotton Goods (5)(s)
- * Woollen Cloth (5)(s)(i)(o)
- * Woollen Yarn (5)(s)(i)(o)

(c) INDUSTRIES PRODUCING INTERMEDIATE GOODS AND SUPPLIES (Cont'd)

- Miscellaneous Woollen Goods (5)(s)(i)(o)
- * Synthetic Textiles (5)(s)(i)(o)
- Dyeing and Finishing of Textiles (5)(s)(i)(o)
- Laces, Tapes and Bindings (5)(s)(i)(o)
- * Cordage, Rope and Twine (5)(s)(i)
- * Cotton and Jute Bags (5)(s)(i)(o)
- Fur Dressing and Dyeing (6)
- * Paper Boxes and Bags (8)(s)(i)(o)
- Miscellaneous Paper Products (8)(s)(i)(o)
- * Primary Iron and Steel (10)(s)(i)(o)
- * Wire and Wire Goods (10)(s)(i)(o)
- White Metal Alloys (12)(s)(i)(o)
- Lime (14)(s)
- Coke and Gas Products (15)(s)(i)(o)
- * Acids, Alkalis and Salts (16)(s)(i)(o)
- * Fertilizers (16)(s)(i)(o)
- Vegetable Oil Mills (1)(s)(i)(o)
- * Primary Plastics (16)(s)(i)(o)
- Compressed Gases (16)(s)(i)(o)
- * Adhesives (16)(s)(i)(o)

CONCEPTS AND SOURCES

For further detail, and for description of Methods Used, see December, 1958 report, Page 89.

C O N C E P T S

Shipments - (Tables 1 to 6) - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - (Tables 2 to 5) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 to 5) - are defined as estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 6) - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture at plant and warehouse, less value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 to 5) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common, although because of the nature of the item, the value per industry is high.

Because of variations in accounting methods, there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered, to some extent, incomplete.

Total Inventory Held - (Tables 2 to 5) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of amounts held under progress payments arrangements.

Inventory Components - (Tables 2 to 6) - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to make definitions of components appropriate for each industry as a whole.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings, but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Trading Outlets - (Table 7) - are defined as any establishments (other than retail stores) operated by manufacturers, apart from their plants or plant-warehouses, which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock, or which carry small quantities only for demonstration purposes, are not included. Sales for this series represent direct sales from the outlet of goods manufactured by the owning or associated manufacturing company, with sales arranged by outlets but shipped direct from plant excluded wherever possible; goods purchased for re-sale from sources other than the owning or associated manufacturing company are also excluded, except for the Petroleum Products industry group, where a separation of purchased products is not feasible. Inventories for this series represents owned inventories held at Trading Outlets or in warehouses serving the trading outlets; again, goods purchased for re-sale are excluded except for the Petroleum Products industry.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Tables 3, 6 and 7, are defined according to the Standard Industrial Classification Manual. A description of the Economic-Use groupings of industries (Tables 4, and 6) will be found in the December 1955 report, Page 5.

S O U R C E S

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 2,700 plants in 119 industries; in addition, 2,700 small plants in 95 of these industries and one additional industry report monthly shipments only. Of the first group, 1,034 plants in 94 industries also report new and unfilled orders. Six industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

APPENDIX

EMPLOYMENT AND EARNINGS IN MANUFACTURING BY INDUSTRY AND PROVINCE

1957-1958

For a number of years it has been the practice to publish, late in the year, the Preliminary Statement of Manufactures which showed advance data of principal statistics for the previous year by industry and province together with shipments or production of specified commodities collected in monthly, quarterly or annual surveys. The Preliminary Statement of Manufactures report has now been discontinued and the monthly report on Inventories, Shipments and Orders in Manufacturing Industries will henceforth contain whatever preliminary annual principal statistics can be compiled from available data. The present report has contained for some time the monthly value of shipments by industry and group of industries and, since May, 1959, has also shown total value of manufacturing shipments by province. The annual totals for these series will now serve as the official preliminary figures until the actual Census of Manufactures results can be made available.

In order to compensate for the loss of employment and earnings data previously contained in the Preliminary Statement of Manufactures estimates of the total number of employees and total earnings by major industry group and by province for the latest year are presented in the table and will, in future, be published in this report as soon as the estimates can be compiled. These figures are projections of the latest Census of Manufactures data of number of employes and of salaries and wages based on averages of the monthly indexes of employment and payrolls prepared and published by the Labour Division of the Bureau.

The data for 1958 shown in the table are compiled by applying to the 1957 Census of Manufactures figure for each component industry and province the percentage change between 1957 and 1958 as indicated by the corresponding monthly average indexes of employment and payrolls. The sums of the individual industry figures for 1958 are taken as the Canada totals and the slightly different totals obtained by summing the individual provincial estimates are adjusted pro rata to the industry totals. As soon as the 1958 Census of Manufactures data are available, in the early part of 1960, the 1959 annual estimates of employment and payrolls will be projected in the same manner from the revised 1958 figures and published in this report.
