NEW SERIES

Beginning with this report two additional tables are added to Table 3, the estimated value of shipments, orders and inventory in manufacturing industries grouped according to the Standard Industrial Classification. The additions constitute a further grouping of the seventeen S.I.C. groups into Durable and Non-Durable manufacturing industries. The industries included in the Non-Durable group are 1 - Foods and Beverages, 2 - Tobacco and Tobacco Products, 3 - Rubber Products, 4 - Leather Products, 5 - Textile Products, 6 - Knitting Mills and Clothing, 8 - Paper Products, 9 - Printing and Publishing, 15 - Products of Petroleum and Coal, 16 - Chemical Products, 17 - Miscellaneous Manufacturing Industries; and in the Durable groups are S.I.C. 7 -Wood Products, 10 - Iron and Steel Products, 11 - Transportation Equipment, 12 - Non-Ferrous Metal Products. These groupings correspond to the durable and non-durable groupings published in the employment and industrial production statistics.

ÍV

TREND SUMMARY

Preliminary estimates indicate the following trends for January:

<u>SHIPMENTS</u>: - Manufacturers' shipments in January were valued at an estimated \$1,834 million, a decline of almost three percent from the revised December estimate of \$1,884 million. January shipments have been lower than December shipments during the past five years, with the exception of January 1957 when shipments were fractionally higher than December. It is interesting to note that although at a considerably higher level than the previous three years, (January shipments are eight percent higher than in January 1959 and higher than in any previous January), the decline in shipments from the October peak, of thirteen percent, is in line with the usual decline during this period.

The decline in shipments between December and January was fairly general throughout the various industrial groups with only two of the ten economic-use groups, semi-durable consumers' goods and motor vehicles and related industries, and six of the industry groups in the standard industrial classification, leather products, textiles, clothing, transportation, petroleum products and chemical products having higher shipments than in December.

The largest increase in shipments in both relative and absolute terms was in the motor vehicles and related industries group which advanced twenty-four percent in January to \$148 million from \$120 million in the province month. The increase was reflected in the transportation industries grouping under the S.I.C. classification but the divergent movement between shipments in the motor vehicles part of the transportation industry, (it should be pointed out the motor vehicles group is not confined to passenger automobiles but includes trucks and buses also), and the heavy transportation equipment part resulted in a combines increase of less than \$20 million or just under thirteen percent. Shipments in the heavy transportation equipment industries not only declined twenty percent in January from December but it was the only group in the economic-use groupings to show a continuous decline during the year 1959. Shipments in 1959 were eighteen percent lower than in 1958; shipments in January 1960 at \$50 million were only sixty percent of the value of shipments in January 1958 (\$83 million).

In contrast to the general decline in January, shipments in the semi-durable consumers' goods industries have had higher shipments in January each year since 1953. The increase this year was nearly seven percent, from \$96 million in December to \$102 million in January, and at this level was two percent higher than shipments in January 1959 (\$100 million). This movement appears to be part of the seasonal pattern of shipments in these industries which customarily reach a peak in shipments in September and October, decline for the remainder of the fourth quarter and increase through the first quarter of the following year to reach a peak in March. Shipments in 1959 were in total some seven percent above shipments in the previous three years. The increase in S.I.C. groups 4 and 6, leather products and clothing are part of this movement since the large percentage increase, eighteen and one half percent, in shipments in the leather products group in concentrated in the leather footwear industry and the increase in the clothing and knit goods industries of six percent is centred in men's and women's clothing.

Foreshadowing the upward trend in shipments in the semi-durable industries in the first quarter is the increase in shipments in the textile products industries of four percent, which includes such industries as cotton yarn and cloth, synthetic textiles, yarn and cloth and the primary textiles.

<u>INVENTORIES</u>: - Levels of inventory at the end of January were relatively unchanged from the end of December, with total inventory owned at \$4,063 million as compared with \$4,057 million at the end of December and total inventory held at \$4,402 million compared with \$4,388 million.

There was more variation in the change in levels of inventory by groups as both goods in process and raw materials stocks fell slightly and stocks and finished products rose by nearly three percent. This increase in finished products inventory combines with the decline in shipments is reflected in a rise in the ratio of inventories of finished goods to shipments to the highest level since the beginning of 1959. Inventory levels are higher than a year earlier except for inventories held under progress payments arrangements which are nearly twenty-three percent lower. Stocks of raw materials rose fractionally; goods in process (excluding stocks held but not owned) rose by eight percent, and stocks of finished products were nearly five percent higher.

The largest changes in inventory occur in those groups with the greatest change in shipments. Inventory owned in the Heavy Transportation industries, for example, declined by fourteen percent in January to \$98 million as compared with \$114 million in December and by sixteen percent as compared with inventory owned in January 1959 (\$116 million). Inventory held declined somewhat less in January as compared with December as inventory held but not owned rose by two percent; during the past year, however, the decline in this part of inventory was from \$298 million to \$215 million or twenty-eight percent. The increase in inventory owned in motor vehicles and related industries although only two percent higher in January at \$227 million, than in December (\$222 million) is twenty-four percent higher than in January 1959 (\$183 million). The level is actually more comparable with that at the beginning of 1958 than for any of the months between.

ORDERS: - The level of unfilled orders in January moved slightly upward by two percent from December to \$2,194 million continuing the upward trend established during 1959. New orders received in total, being strongly influenced by the value of shipments, fell by three percent. The increase in manufacturing activity during the past year which showed up in the higher level of shipments during the year was, in addition, accompanied by a general rise in the level of unfilled orders; at the end of January this year, the level is seven percent higher than the level a year ago.

The greatest change in unfilled orders over the year shows up in the durable consumer goods industries where unfilled orders this month are over half as much again as at the beginning of 1959. The change in level was in fact at its peak at the end of the third quarter since during the first nine months of 1959 new orders received each month exceeded shipments; during the last quarter new orders fell off to some degree and shipments continued to rise reducing the level of unfilled orders slightly each month. The level at the end of January was almost two percent lower than at the end of December.

The only large change in unfilled orders levels at the end of January as compared with the end of December shows up in the industries producing largely for export where unfilled orders rose to \$171 million from \$141 million. The increase from January 1959 is slightly less than one and one-half percent. The large increase in new orders received monthly over the past year having been accompanied by a comparable increase in shipments has resulted in a fairly stable level of unfilled orders. The increase at the beginning of the year is customary in this group.

TRADING OUTLETS: - Sales through manufacturers' trading outlets increased steadily during 1959 to sustain sales of products of own manufacture during the year at a level five percent greater than in 1958. All industry groups with one exception, the electrical apparatus industry shared in the general increase. Sales of goods of own manufacture in the electrical apparatus industries were only ninety-three percent of the level reached in 1958 but a part of the decline is very likely the result of some of the electrical apparatus manufacturers' discontinuing trading outlets; part of the decline may reflect a decline in sales as manufacturers' shipments in this industry were only two percent higher in 1959 than in 1958, an increase considerably less than the general increase in manufacturers' shipments. Sales through trading outlets in the chemical industries in 1959 increase considerably more than the average in 1959 from \$102 million in 1958 to \$121 million, or eighteen percent.

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys. (2) The value of Inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data. Estimates of this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups and the Economic Use Groups are listed below.

A single asterisk (*) preceding the individual industry title indicates that the industry is shown separately in Table 5 - Statistics for Selected Individual Industries.

A double asterisk (**) preceding the individual industry title indicates that the industry is shown in Table 5 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series shipments, inventories and orders-in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates as described on page 57.

Industries included in the Standard Industrial Classification Groups - Table 3 and Table 7.

S.I.C. Group 1. Foods and Beverages

- ****** Slaughtering and Meat Packing (s)(i) ** Sausages and Casings (s) Animal Oils and Fats (s)
- ** Butter and Cheese Factories (s)(i)
- ** Concentrated Milk (s)(i)
- ** Processed Cheese (s)(i)
- ** Other Dairy Products (s)(i)
- Canned and Cured Fish (s)(i)
- * Fruit and Vegetable Preparations (s)(i)(o)
- * Flour Mills (s)(i)(o) Breakfast Foods (s)(1) Prepared Stock and Poultry Feeds (s)(i)
- * Biscuits and Crackers (s)(i) Bread and Other Bakery Products (s) Aerated Waters (s) Distilled Liquors (s)(i)
- * Breweries (s)(i)
- * Wines (s)(i)
- * Confectionery (s)(i)
- * Sugar Refineries (s)(i)
- ** Miscellaneous Food Preparations (s)(i) Macaroni (s)(i)
- ** Starch and Glucose (s)
- ** Malt Products (s)(i)

S.I.C. Group 2. Tobacco and Tobacco Products

Tobacco Processing and Packing) (s)(i) Tobacco, Cigars and Cigarettes)

S.I.C. Group 3. Rubber Products

- * Rubber Footwear (s)(i)
- * Tires, Tubes and Other Rubber Products(s)(i)(o)
- S.I.C. Group 4, Leather Products
- * Leather Footwear (s)(i)(o) Leather Gloves and Mittens (s)
- * Leather Tanneries (s)(i)(o) Belting Leather (s) Miscellaneous Leather Products (s) Boot and Shoe Findings (s)

S.I.C. Group 5, Textile Products(except clothing) * Roofing Paper (s) (i) (o)

Cotton Thread (s)(i)

- * Cotton Yarn and Cloth (s)(i)(o) Miscellaneous Cotton Goods (s)
- * Woollen Cloth (s)(i)(o)
- * Woollen Yarn (s)(i)(o)
- Miscellaneous Woollen Goods (s)(i)(o)
- * Synthetic Textiles (s)(i)(o)

S.I.C. Group 5, Textile Products (except clothing)-(Concl'd)

Dyeing and Finishing of Textiles (s)(i)(o) Laces, Tapes and Bindings (s)(i)(o)

- * Canvas Products (s)(i)(o)
- * Carpets, Mats and Rugs (s)(i)(o)
- * Cordage, Rope and Twine (s) (i)
- * Cotton and Jute Bags (s)(i)(o)
- * Oilcloth, Linoleum and Other Coated Fabrics (s)(1)(o)
- ** Automobile Accessories, Fabric (s)
- ** Embroideries etc. (s)
- ** Miscellaneous Textiles, n.e.s. (s)(i)(o)

S.I.C. Group 6, Knitting Mills and Clothing (textiles and fur)

- ** Men's Clothing (s)(i)(o)
- ** Men's Clothing Contractors (s)
- ** Children's Clothing (s)(i)(o)
- ** Women's Clothing (s)(i)(o)
 ** Women's Clothing Contractors (s)
- * Hosiery (s)(i)(o)
- * Other Knit Goods (s)(i)(o)
- * Corsets and Foundation Garments (s)(i)(o) Fur Dressing and Dyeing Fur Goods (s)(i) Hats and Caps (s)(i)(o) Oiled and Waterproof Clothing (s) Fabric Gloves and Mittens (s) Miscellaneous Clothing, n.e.s. (s) (i) (o)

S.I.C. Group 7. Wood Products

- * Plywood and Veneer Mills (s)(i)(o) Sash, Door and Planing Mills (s)(i)(o) Hardwood Flooring (s)(i)(o) Sawmills (s)(i)(o)
- * Furniture (s) (i) (o) Miscellaneous Wood Products (s)(i)(o)

S.I.C. Group 8, Paper Products

- * Paper Boxes and Bags (s)(i)(o)
- * Pulp and Paper Mills (s)(i)(o)
- Miscellaneous Paper Products (s) (i) (o)

S.I.C. Group 9, Printing, Publishing and Allied Industries

Commercial Printing (s) Engraving, Stereotype and Allied Industries (s) Printing and Publishing (s)

S.I.C. Group 10. Iron and Steel Products

- * Agricultural Implements (s)(i)(o)
- * Boilers and Plate Work (s)(i)(o)
- * Fabricated and Structural Steel (s) (i) (o) * Hardware and Tools (s)(i)(o)
- Heating and Cooking Apparatus (s)(i)(o)
- * Household, Office and Store Machinery (s)(i)(o)
- * Iron Castings (s)(i)(o)
- Machine Shop Products
- * Machine Tools (s)(i)(o)
- * Industrial Machinery n.e.c. (s)(i)(o)
- * Primary Iron and Steel (s)(i)(o)
- * Sheet Metal Products (s)(i)(o) * Wire and Wire Goods (s)(i)(o)
- * Miscellaneous Iron and Steel Products (s)(i)(o)

S.I.C. Group 11. Transportation Equipment

Aircraft (s)(i)(o) Bicycles and Parts (s)(i)(o) Boat Building (s)

- * Motor Vehicles (s)(i)
- * Motor Vehicle Parts and Accessories (s) (i) (o) * Railroad and Rolling Stock Equipment (s)(i)(o)
- Shipbuilding and Repairing (s)(i)(o) Miscellaneous Transportation Equipment (s)

S.I.C. Group 12, Non-Ferrous Metal Products

Aluminum Products (s) (i) (o)

- * Brass and Copper Products (s)(i)(o)
- * Jewellery and Silverware (s) (i) (o)
- * Non-Ferrous Metal Smelting and Refining (s)(i)(o) White Metal Alloys (s)(i)(o) Miscellaneous Non-Ferrous Metal Products

S.I.C. Group 13. Electrical Apparatus and Supplies

* Batteries (s)(i)(o)

- * Heavy Electrical Equipment and
- Machinery (s)(i)(o)
- * Radios and Parts (s)(i)(o)
- * Refrigerators and Appliances (s)(i)(o)
- * Miscellaneous Electrical Products (s)(i)(o)
- * Wire and Cable (s)(i)(o)

S.I.C. Group 14, Non-Metallic Mineral Products

- * Abrasives and Abrasive Products (s)(i)(o)
- * Asbestos Products (s)(i)(o)
- ** Cement Hydraulic (s)(i)
- ** Concrete Products (s) (i) (o) Clay Products from Imported Clay (s)(i)(o) Brick and tile (s)(i) Sand-lime brick (s)(i) Gypsum Products (s)(i)(o) Stone Products (s)(i)(o)

Industries included in the Economic use Groups - Table 4 and Table 7.

PERISHABLE CONSUMER GOODS INDUSTRIES

- ** Slaughtering and Meat Packing (s) (i)
- ** Sausages and Casings (s)
- ** Butter and Cheese Factories (s)(i)
- ** Concentrated Milk (s) (i)
- ** Processed Cheese (s)(i)
- ** Other Dairy Products (s)(i)
- * Fruit and Vegetable Preparations (s)(i)(o) Breakfast Foods (s) (i)
- * Biscuits and Crackers (s)(i) Bread and Other Bakery Products (s) Aerated Waters (s) Distilled Liquors (s)(i)
- * Breweries (s)(i)

S.I.C. Group 14. Non-Metallic Mineral Products (concl'd)

```
Clay Products from Domestic Clay (s)(i)
Glass and Glass Products (s) (i) (o)
Lime (s)
Miscellaneous Non-Metallic Mineral
    Products (s)(i)
Salt (s)(i)
```

S.I.C. Group 15. Products of Petroleum and Coal

Coke and Gas Products (s)(i)(o) * Petroleum Refining and Products (s)(i) Miscellaneous Products of Petroleum and Coal (s)(i)

S.I.C. Group 16. Chemical Products

- * Acids, Alkalis and Salts (s)(i)(o) Explosives, Ammunitions and Pyrotechnics (s)(i)(o)
- * Fertilizers (s)(i)(o)
- * Medicinal and Pharmaceutical Preparations (s)(i)(o)
- * Paints and Varnishes (s)(i)(o)
- * Soaps, Washing and Cleaning Compounds (s)(i)(o) * Toilet Preparations (s)(i)
- Vegetable Oil Mills (s)(i) * Primary Plastics (s)(i)(o) Miscellaneous Chemical Products (16)(s)(i)(o) Printing Inks (s) Writing Inks (s) Polishes and Dressings (s)(i)(o) Coal Tar Distillation (s)(i) Compressed Gases (s)(i)(o)

* Adhesives (s)(i)(o)

S.I.C. Group 17. Miscellaneous Manufacturing Industries

```
* Brooms, Brushes and Mops (s)(i)(o)
 Fabricated Plastic Products (s)(i)
 Musical Instruments (s)(i)(o)
 Typewriter Supplies (s)
 Fountain Pens and Pencils (s)(i)(o)
* Professional and Scientific Equipment (s)(i)(o)
 Clocks and Watches (s)
 Sporting Goods (s)(i)
 Toys and Games (s) (1)
 Buttons, Buckles and Fasteners (s)
 Candles (s)
 Hair Goods (s)
 Artificial, Flowers and Feathers (s)
 Lamps, electric, and lamp shades (s)
 Miscellaneous Industries, n.e.c. (s) (i) (o)
 Pipes, lighters and smokers' supplies (s)
 Signs (s)
 Stamps and stencils (s)
 Statuary and Art Goods (s)
 Umbrellas (s)
 Artificial Ice (s)
```

PERISHABLE CONSUMER GOODS INDUSTRIES (Concl'd)

- * Wines (s)(i) * Confectionery (s) (i)
- Macaroni (s)(i)
- ** Miscellaneous Food Preparations(s)(i) Tobacco Processing and Packing) Tobacco, Cigars and Cigarettes) (s) (i) Salt (s)(1)
- * Medicinal and Pharmaceutical Preparations (s)(i)(o)
- * Soaps, Washing and Cleaning Compounds (s)(i)(o)
 * Toilet Preparations (s)(i)
- Polishes and Dressings (s)(i)(o) Candles (s)

SEMI-DURABLE CONSUMER GOODS INDUSTRIES

- * Rubber Footwear (s)(i)
 * Leather Footwear (s)(i)(o)
 Leather Gloves and Mittens (s)
 Miscellaneous Leather Products (s)
 * Carpets, Mats and Rugs (s)(i)(o)
- * Oilcloth, Linoleum and Other Coated Fabrics(s)(i)(0)
- ** Automobile Accessories, Fabric (s)
- ** Embroideries etc. (s)
- ** Miscellaneous Textiles, n.e.s. (s)(i)(o)
- ** Men's Clothing (s)(1)(0)
- ** Children's Clothing (s)(i)(o)
 ** Women's Clothing (s)(i)(o)
- ** Women's Clothing Contractors (s)
- * Hosiery (s)(i)(o)
- * Other Knit Goods (s)(1)(o)
- * Corsets and Foundation Garments (s)(i)(o) Fur Goods (s)(i) Hats and Caps (s)(i)(o) Oiled and Waterproof Clothing (s) Fabric Gloves and Mittens (s) Miscellaneous Clothing, n.e.s. (s)(i)(o)
- * Brooms, Brushes and Mops (s)(i)(o) Fountain Pens and Pencils (s)(i)(o) Sporting Goods (s)(i) Toys and Games (s)(i) Lamps, electric, and lamp shades (s) Pipes, lighters and smokers' supplies (s) Umbrellas (s)
- ** Men's Clothing Contractors (s) DURABLE CONSUMER COODS INDUSTRIES
- * Furniture (s)(i)(o)
 Bicycles and Parts (s)(i)(o)
 Boat Building (s)
- * Jewellery and Silverware (s)(i)(o)
- * Radios and Parts (s)(i)(o)
- * Refrigerators and Appliances (s)(i)(o) Musical Instruments (s)(i)(o) Clocks and Watches (s)

HEAVY TRANSPORTATION EQUIPMENT INDUSTRIES

Aircraft (s)(i)(o)

* Railroad and Rolling Stock Equipment (s)(i)(o) Shipbuilding and Repairing (s)(i)(o)

OTHER CAPITAL GOODS INDUSTRIES

- * Agricultural Implements (s)(i)(o)
- * Hardware and Tools (s) (i) (o)
- * Household, Office and Store Machinery (s) (i) (o)
- * Machine Tools (s)(i)(o)
- * Industrial Machinery n.e.c. (s)(i)(o)
- * Heavy Electrical Equipment and Machinery (s)(1)(o) Signs (s)

CONSTRUCTION GOODS INDUSTRIES

Sash, Door and Planing Mills (s)(i)(o) Hardwood Flooring (s)(i)(o)

- * Roofing Paper (s)(i)(o)
- * Boilera and Plate Work (s)(i)(o)
- * Fabricated and Structural Steel (s) (i) (o)
- * Iron Castings (s)(i)(o)
- Aluminum Products (s)(i)(o)
- * Miscellaneous Electrical Products (s) (i) (o)
- * Wire and Cable (s)(1)(0)

CONSTRUCTION GOODS INDUSTRIES (Concl'd)

- * Asbestos Products (s)(i)(o)
- ** Cement Hydraulic (s)(1)
- ** Concrete Products (s)(i)(o)
 Clay Products from Imported Clay (s)(i)(o)
 Gypsum Products (s)(i)(o)
 Stone Products (s)(i)(o)
 Brick and Tile (s)(i)
 Sand-lime Brick (s)
 Clay Products from Domestic Clay (s)(i)
 Miscellaneous Non-Metallic Mineral Products (s)(i)
 Miscellaneous Products of Petroleum and Coal (s)(i)
 Coal Tar Distillation (s)(i)
- MISCELLANEOUS INDUSTRIES
- (a) INDUSTRIES PRODUCING LARGELY FOR EXPORT
 - Canned and Cured Fish (s) (i)
- * Flour Mills (s)(i)(o) Sawmills (s)(i)(o)
- * Pulp and Paper Mills (s)(i)(o)
- * Non-Ferrous Metal Smelting and Refining (s)(1)(0)
- * Abrasives and Abrasive Products (s) (1) (0)
- " ADLASINES AND ADLASINE ILOGOCLS (5) (1) (0)

(b) MOTOR VEHICLES AND RELATED INDUSTRIES

- * Tires, Tubes and Other Rubber Products (except Footwear) (s)(i)(o)
- * Motor Vehicles (s)(i)
- * Motor Vehicle Parts and Accessories (s)(i)(o)
- * Batteries (s)(i)(o)

(c) INDUSTRIES PRODUCING INTERMEDIATE GOODS AND SUPPLIES

- Prepared Stock and Poultry Feeds (s) (i)
- * Sugar Refineries (s)(i)
- ** Malt Products (s)(i)
- Animal Oils and Fats (s) * Leather Tanneries (s)(i)(o) Belting Leather (s) Boot and Shoe Findings (s) Cotton Thread (s)(i)
- * Cotton Yarn and Cloth (s)(i)(o) Miscellaneous Cotton Goods (s)
- * Woollen Cloth (s)(i)(o)
- * Woollen Yarn (s)(i)(o)
- Miscellaneous Woollen Goods (s)(i)(o) * Synthetic Textiles (s)(i)(o) Dyeing and Finishing of Textiles (s)(i)(o)
- Laces, Tapes and Bindings (s)(i)(o)
- * Cordage, Rope and Twine (s)(i) * Cotton and Jute Bags (s)(i)(o)
- Fur Dressing and Dyeing * Paper Boxes and Bags (s)(i)(o)
- Miscellaneous Paper Products (s)(1)(o) * Primary Iron and Steel (s)(1)(o)
- * Wire and Wire Goods (s) (1) (o) White Metal Alloys (s) (i) (o) Lime (s) Coke and Gas Products (s) (i) (o)
- * Acids, Alkalis and Salts (s)(1)(0)
- * Fertilizers (s)(i)(o)
- Vegetable Oil Mills (s) (i) (o)
- * Primary Plastics (s)(1)(o)
 - Compressed Gases (s)(i)(o) * Adhesives (s)(i)(o) Printing Inks (s)

- (c) INDUSTRIES PRODUCING INTERMEDIATE GOODS AND SUPPLIES (Concl'd)

CONCEPTS, METHODS AND LIMITATIONS

CONCEPTS

PLANT SHIPMENTS, ORDERS, AND INVENTORIES (Tables 1, 2, 3, 4, 5 and 7):

Shipments - represent an estimated projection, on a monthly basis, of the latest available Gross Value of Factory Shipments from the annual Census of Industry. In the majority of cases, Census of Industry values include (a) sales from manufacturing plant of products made at the plant, (b) amounts received for repairs or custom work, (c) shipments of goods manufactured in the plant for further processing in another unit of the same company, and (d) shipments of finished products to manufacturers' sales branches for sale, for each establishment included. The value level used is defined as "factory selling value". Goods purchased for re-sale without further processing are not included. (1)

<u>New Orders</u> - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

<u>Unfilled Orders</u> - are defined as estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled. (Since progress payments are treated for this survey as sales in the month received, total unfilled orders reported each month by firms operating on a progress payments basis are reduced by the total of progress accounts for these firms.) This definition of Unfilled Orders is therefore an expression in terms of future shipments values.

- (1) There are a few exceptions to the definition of Census of Industry values given above:
 - (i) In two industries, Sawmills, and Slaughtering and Meat Packing, custom work is valued at the estimated selling value of the product rather than by the amounts received for such work.
 - (ii) In nine industries (Fish Processing, Veneer and Plywoods, Sawmills, Pulp and Paper, Non-Ferrous Metals, Smelting and Refining, Coke and Gas Products, Petroleum Products, and Miscellaneous Products of Petroleum and Coal) the Census of Industry values represent production of finished goods rather than shipments. For these industries the Census of Industry values are adjusted by change in finished products inventory before projection for the monthly series.
 - (iii) In four industries, Fabricated and Structural Steel, Aircraft, Railroad Rolling Stock and Shipbuilding, the Census of Industry value is for "work done during the year", i.e. production of finished goods plus change in goods-in-process inventory during the year, rather than shipments. For these industries, the Census of Industry values are also adjusted by change in finished products inventory before projection for the monthly series.

There are three industries apart from those listed under (ii) and (iii) above, for which adjustments to Census of Industry values are made before projection for the monthly series. In the Flour Milling, Brewing and Fruit and Vegetable Preparations industries, all of which are characterized by large seasonal variations, many large firms operate on fiscal year periods (which are used in Census of Industry compilations) differing from the calendar year. In unusual years the projection of Census of Industry values for these industries, as if they represent calendar year values, could cause considerable distortion in the estimates. To avoid this, the Census of Industry values from 1954 on have been adjusted to estimated calendar year values before projection. This adjustment is based on values reported to the monthly survey.

Firms operating on long-term contracts represent a special problem for the monthly series. The value levels projected are those of the Census of Industry as described in the first paragraph (except for the four industries described under (iii) above). However, for the monthly series, all progress receipts on long-term contracts are included as sales in the month received, instead of the total sale being included in the month the sale is finalized. It is felt that this treatment gives a better indication of monthly activity but it does allow possible distortion of value levels in that, for the Census of Industry value which is being projected, any final sale will be recorded in one specific year, while the monthly series may have spread this sale over more than one calendar year. Since the bulk of the value of longterm contract work falls in the four industries noted (in (iii) above), for which adjustments for work done are made in compiling the Census of Industry value, this inconsistency does not affect the all-industry or group totals to any great extent. Total Inventory Owned - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of:

- (a) raw materials;
- (b) goods in process;

(c) finished goods of own manufacture at plant and warehouse;

less (d) value of inventory held but not owned. This item cannot be assigned to specific components.

Since the series relates to manufacturing inventory only, the value of inventory of goods purchased for re-sale without further processing is not included.

<u>Inventory Held but Not Owned</u> - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on longterm contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory - some firms treat progress receipts as sales and reduce book value of inventory as payments are received; in some of these cases they no longer have records of actual holdings above the book value level. Wherever estimates are available, these have been included, but the estimated value of inventory under this heading must be considered, to some extent, incomplete.

Total Inventory Held - represents the estimated total book value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from total inventory owned because of the inclusion of inventory held under progress payments arrangements. It includes items (a) to (c) as shown above under total inventory owned.

<u>Inventory Components</u>: Raw Materials, Goods in Process, and Finished Products, are reported and compiled as <u>On the books</u> of each manufacturer, i.e. there has been no attempt to make definitions of components appropriate to each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Table 3, are defined according to the Standard Industrial Classification Manual.

The Economic Use groups of industries (Table 4) were designed to facilitate the analysis of trends by a grouping based on the use made of each industry's products i.e. on the main demand factors affecting each industry. In drawing up this classification the groupings were designed to the in with National Accounts concepts as closely as possible; as a result the three main groupings - Consumer Goods industries, Capital Goods industries, and Construction Goods industries - contain only industries producing mainly final products in each of these categories. Only industries in which substantially more than half the production is of items clearly belonging to one or other of these three specific categories or industries in which half the production falls into one such category and the remainder is scattered over two or more other categories, were assigned to one of the main groupings. All other industries were **ass**igned to a miscellaneous category which was sub-divided into four further groupings of related industries: Industries Producing largely for Export, Intermediate Goods and Supplies, Motor Vehicles and Related Industries, and a final unclassifiable group. The latter groupings cut across the Economic Use criteria to some extent. For further detail on the considerations leading to the assignment of industries for these groupings reference should be made to the December, 1955 report.

TRADING OUTLETS SALES AND INVENTORIES (Table 8): See page 50.

Trading Outlets are defined as any establishments operated by manufacturers, apart from their plants (or plant warehouses), which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock or which carry small quantities for demonstration purposes are not included. Sales arranged by outlets carrying stock but shipped direct from plant are excluded wherever possible. Inventories of trading outlets include any holdings at warehouses which serve the outlets. Other warehouses, unless they have sales staffs, are excluded.

The Trading Outlets series has two purposes:

- (a) To clarify the manufacturing shipments and inventory series by excluding distribution activity (the extraneous activity which is most commonly included in reports by manufacturers) so that the manufacturing series is confined, as far as possible, to plant activities only at plant value levels;
- (b) To provide as complete and consistent a series as possible on manufacturers' distributional activity, so that this can be combined with the manufacturing series, if desired, for analytical purposes; or combined with data for independent wholesalers to provide a more complete picture of current wholesale activity than has previously been available.

Trading Outlets may or may not be separately incorporated wholesale companies. The majority of them are not separately incorporated. Any separately incorporated wholesale company owned by a manufacturing company or by a group of manufacturing companies is, however, included if the bulk of its sales are of goods manufactured by the owning orassociated companies. Since it is obvious from the reports received that almost all unincorporated outlets handle mainly the products of the owning manufacturing company the Trading Outlets series may be taken to represent the activities of establishments the main function of which is to distribute the products of the manufacturing companies which own them.

This series was first published a year ago in the December 1958 bulletin. It is still to some extent in the experimental stage in the sense that the universes which are being projected monthly are not necessarily final, and the levels of the published data are, therefore, subject to revision over the next few years. In addition, only part of the total material collected for the series is considered adequate for publication at this time. It has, however, rectified to a large extent two areas of inconsistency in previous reports, one practical and the other conceptual.

The practical inconsistency was that many companies selling entirely or partially through their own sales organizations find it simpler to report total company sales monthly than to report "shipments leaving plant", which may be either final sales or shipments to their own selling outlets. Such reports were previously accepted in a large number of cases but were used to project the latest available Census of Industry values, which are generally defined as shipments from plant at plant selling value. For many of these companies it has now been possible to arrange for a monthly report covering an estimated value of plant shipments at plant selling value, in addition to the company sales figure. The former is now used for compilation of shipments values for Tables 1 to 5. To the extent that trends in the plant shipments series were being distorted by use of company sales values rather than plant shipments values this change represents an improvement. (It should, however, be noted that the change has not yet been possible in all relevant cases.)

The conceptual inconsistency was that, while shipments represented plant level shipments, the finished products inventories values previously represented total finished products owned by manufacturers, whether held at plant, warehouse or trading outlets, rather than plant finished products only. The two separate series, one for plant, and the other for trading outlets, now each cover sales and inventories for comparable activities.

(It should not, however, be assumed that the plant finished products series and the Trading Outlets inventory series are, when summed, the exact equivalent of the previous manufacturers' finished products series. As a matter of fact, they are reasonably close to being equivalent, but the former finished products series included some retail store operations of manufacturers (retail operations are excluded from the Trading Outlets series) and the Trading Outlet series includes a number of separately incorporated wholesale companies which were not previously included.)

The problems which have been raised by a separate series covering sales and inventories of Trading Outlets are due basically to difficulties of response. The major problems are:

(a) In the cases remaining where it is still impossible to obtain plant level shipments values on a monthly basis it is often also impossible to obtain plant level finished products inventory holdings separately from Trading Outlets holdings. The inventory breakdown is, in these cases, available only at year-ends. There is, therefore, an element of uncertainty in the monthly finished products trends for the two series when used separately which did not exist when the two elements were combined. For one industry group, Tobacco Products, it was impossible to obtain separate Trading Outlets data, so total finished products inventory values for this group were left in the manufacturing series.

- (b) In a number of cases, Trading Outlet sales and inventory values, while easily available separately from plant values, are not available broken down as between "goods of own manufacture" and "goods purchased for re-sale". This is more often the case with separately incorporated wholesale companies than with other outlets. In most industry groups enough reports are available which distinguish between own and purchased goods to make a separation of values under this heading feasible. For one industry group, Petroleum Products, the separation is, however, not possible, so total sales and inventories have been included under the heading of "goods of own manufacture" for this group.
- (c) In a number of cases where the separation, by the appropriate reporting firms, of plant level shipments and Trading Outlets sales is not yet available it has been possible to estimate Trading Outlets sales of goods of own manufacture on the basis of the total sales figures for the companies concerned and the probable proportion of total sales which are being made through outlets. It did not, however, appear possible to estimate sales of purchased goods in these cases, because of the wide range of ratios of own to purchased goods in the sales values reported by the remaining companies. It is hoped that some improvement can be made in this area in the coming year. In the meantime, with the exception of the Electrical Apparatus and Supplies group where practically no estimating problem occurs, it is felt that the estimates of sales of goods purchased for re-sale do not yet warrant publication. This problem is not so acute for inventory values of goods purchased for own and purchased goods separately, but it is felt that publication of this item should be postponed until comparable sales values are available.

Many of the companies operating trading outlets are multiple-unit firms with operations crossing two or more individual industries. No attempt has been made to obtain detail at this level for the Trading Outlets series. This means that the industry-group (e.g. Foods industries, Iron and Steel Industries) is the smallest unit for which data can be shown separately. There are a few cases where outlet operations cut across two industry-groups, and in these cases the values have been assigned to the group in which the bulk of the manufacturers' production falls.

Because of the relatively small number of companies included and because, on the whole, this type of operation tends to be large it can be expected that, when a company gives up its distributing organization or when new organizations are set up, the effect on the series will be to cause considerably larger sudden changes than are common in the plant shipments and inventory series.

METHODS

(a) Current Estimates -

For eight series (plant shipments, raw materials, goods in process, plant finished products, inventory held but not owned, unfilled orders, trading outlets sales, and trading outlets inventories,) current value estimates for each industry covered are made by applying the monthly percentage changes shown by the unweighted group of reporting firms in each industry to the latest available benchmark values for the same industries. Industries not covered are carried at the latest available benchmark levels.

(The above is subject to a few exceptions. In one industry, reporting firms are treated as a stratum sample, rather than as an unweighted group. In three industries, available physical data on stocks and shipments are valued using price indexes. In three industries, shipments estimates are based on employment data and price indexes.)

<u>Total inventory held</u> in each industry is the sum of the estimated values for raw materials, goods in process, and finished products. <u>Total inventory owned</u> in each industry is calculated by deducting the estimated value for inventory held but not owned from estimated total inventory held. Value of <u>new orders</u> in each industry is derived from estimated shipments and unfilled orders using the formula "Unfilled Orders at end of previous month plus Net New Orders during month less Shipments during month equals Unfilled Orders at end of Current month".

(b) Benchmark Revisions -

As new benchmarks become available, estimates for the year to which the benchmarks apply are revised as follows:

- For the plant shipments series, the Census of Industry value for the year for each industry is spread by months according to the trend shown by reporting firms in the original estimate for that year.

- For the trading outlets sales series, the estimated value for the year, obtained from the Annual Trading Outlets survey, for each industry is spread by months according to the trend shown by reporting firms in the original estimate for that year. - For the five basic inventory series (raw materials, goods in process, plant finished products, inventory held but not owned and trading outlets inventory) and the unfilled orders series, where the benchmark values apply to the Year-End rather than to the entire year as in the shipments series, the error in the original estimate for the year-end for each industry is assumed to have accumulated equally over all twelve months of the year (i.e., one-twelfth of the amount of the error is added to the original estimate for January; two-twelfths is added to the original estimate for February; three-twelfths to March and so on).

- The three derived series (total inventory held, total inventory owned, and new orders) are re-calculated on the basis of the revised data for the other six series.

LIMITATIONS TO THE USES OF THE DATA IN THIS REPORT

- (1) Data for individual industries should not be interpreted as commodity data, since very few industries produce only one commodity or only one class of commodities.
- (2) Since the series are in terms of current values, changes over time may be the result of both price and volume changes. Some indication of the extent to which changes in value are due to price changes, thus isolating the physical change which has taken place, can be obtained by reference to the wholesale price index. This procedure is, however, inadequate for anything more than a general indication of trends. The main problem is that the wholesale price index is a commodity price index, while the shipments, orders, and inventory series are industry series with the possibility of changes in commodity content over time. These changes in commodity content could seriously affect the weighting pattern to be applied to price indexes considered applicable for any specific industry. In considering inventory values turnover rates and valuation methods are other important variables which should be taken into consideration but for which adequate data are seldom available.
- (3) Shipments data do not necessarily represent market sales for the manufacturing universe. (a) Apart from the few exceptions as noted under (b) below they are defined (see page 57) to include total movement of goods out of manufacturing plants (or, in some cases, divisions of plants); shipments of goods for furthe, processing by other plants of multiple-unit companies are, therefore, included as well as shipments for sale. (b) In a few special cases, the Census of Industry values include goods in-process change, and for these cases progress receipts on long-term contracts are included as shipments as they occur, rather than at the time sales are finalized. (c) Many manufacturers re-sell purchased goods, in addition to sales of their own products and these re-sale items are not included.
- (4) The component breakdown for inventories is on an establishment, not a commodity, basis. Since each manufacturer reports inventories as on his own books, both for the monthly and annual surveys, and since a number of industries contain plants at various stages of processing, the finished products for one plant might represent commodities which would be considered raw materials or goods in process for another plant in the same industry. The composition of each industry must be studied before attempting to use the component breakdown as applicable to the industry as such, rather than to the firms in the industry.
- (5) For Unfilled Orders, the following reservations apply:
 - (a) The series, by definition, excludes plants producing entirely for stock. Since approximately 40% of manufacturing is done by such plants the trends shown are not necessarily applicable to manufacturing in general.
 - (b) Since the series is defined as "unshipped" orders, rather than "unproduced" orders, there is always the probability that some of the Unfilled Orders are accounted for in inventory holdings. The reduction of unfilled orders by progress receipts eliminates to a considerable extent the effect of large goods-in-process holdings in connection with long-term contracts, but the amount of the remaining inventory, either goods-in-process or finished products, which is held in connection with existing unfilled orders would be difficult to evaluate.
 - (c) The series includes total orders, not just those considered as "binding", so estimates of future shipments trends based on these may be overstated due to the possibility of cancellations.
 - (d) Unfilled Orders for all industries include to some extent a duplication due to the fact that orders for final products in one industry may result in orders to firms at secondary or primary stages of processing. Since the total gross value of shipments will contain the same duplication, this does not invalidate the series for purposes of analysis. However, the total impact of any one order on future shipments levels will not necessarily be shown in the Unfilled Orders series since at any stage an order may be filled from stock rather than added to existing backlogs.

(6) The Economic-Use grouping of industries (Table 4). The difficulties involved in classifying both commodities, and industries on the basis of commodities made, are sufficient to limit the usefulness of this compilation to indications of trends only. The main difficulty is that many commodities may be used for different purposes which cut across classification lines. Depending on the use made of it, the same product may be a "final" product or a component part; or a final product may be used for consumption, capital equipment, or in construction. A second difficulty is that the basic data for this survey are in terms of estimates for individual industries not for commodity data. An industry is a group of establishments produce other commodities in addition to those with which they are primarily concerned and, as a result, very few industries can be considered "pure" in the sense that they produce only the product or class of products implied in their title. Therefore, many industries which might fall quite clearly into specified groups on the basis of the chief use of their main products are much less clear-cut when the additional commodities produced in the establishments concerned are considered.

In this classification only those industries in which substantially more than half the production is of items clearly belonging to a specified grouping or in which half the production is of such items and the remainder is scattered over two or more groups were assigned to the main categories; all industries which could not be so assigned were placed in the "Unclassifiable" category. This means that the inclusion of extraneous commodities is kept to a minimum. It does not, unfortunately, do anything about the fact that each category does not necessarily include all important relevant items. The grouping that is most seriously affected by the forced exclusion of relevant items is the Durable Goods sub-group of the Consumer Goods category. It does not contain the consumer portion of the Automobile industry and, in addition, it does not include the stove portion of Heating and Cooking Apparatus, since the latter industry had to be assigned to the Unclassifiable group. On the other hand, it does include two large industries with important production of items which should not be assigned to Consumer Durables - these are the Furniture industry, which produces office and store furniture as well as household furniture; and the Radios and Parts industry which also produces electronic equipment. The sub-category "Other Capital Goods Industries" contains the highest proportion of industries in which only about half of total production actually should be assigned to the specific grouping but where the remainder of production is dispersed over a number of other groupings. It is, however, felt that this dispersion is not so likely to result in distortion as is possible with the large specific items involved in the Consumers' Durable Goods group.

FOOTNOTES TO TABLES

- TABLE 1. (1) Prince Edward Island and Nova Scotia combined for monthly estimates.
 - (2) Yukon and the Northwest Territories combined with British Columbia.
- TABLE 2. (1) Annual shipments values differ slightly from published Census of Industry totals due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.
 - (2) Part of the change in values from December 1958 to January 1959, is the result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries group. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups.
- TABLE 3. (1) See footnote (1), table 2.
 - (2) The value of Unfilled Orders for industries in S.I.C. groups 1, 2, 3, 7, 8, 12, 14, 15, 16 and 17 is small, and sample coverage is not adequate to provide separate estimates for them.
 - (3) See footnote (2), table 2.
 - (4) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.
- TABLE 4. (1) See footnote (2), table 2.
 - (2) This grouping does not include the consumer portion of Motor Vehicles, nor of Heating and Cooking Apparatus; it does include the electronic equipment portion of Radios and Parts, (Telecommunication Equipment), and the office and store portion of Furniture. The bulk of Inventory Held but not Owned in this group is applicable to the electronic equipment portion of Radios and Parts.
 - (3) This grouping does not include trucks and buses.
 - (4) This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports.
- TABLE 7. (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (4), table 3.
- TABLE 8. (1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.
 - (2) See footnote (2), table 2.
 - (3) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet values cannot be separated from plant values.
