ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED, AND ORDERS  
IN ALL MANUFACTURING INDUSTRIES

TREND SUMMARY

Preliminary estimates indicate the following trends for November:

SHIPMENTS: - The value of manufacturers' shipments in November was estimated at \$2,022 million, little changed from the revised October value of \$2,023 million but nearly two percent higher than the November 1959 value of \$1,986 million. Shipments for the eleven months of 1960 were valued at \$21,795 million and were virtually unchanged from the similar 1959 total of \$21,793 million.

Shipments in 1960 have been maintained very close to the record levels of 1959 and unless December shipments fall off to an unusual extent, 1960 will probably see a level of shipments only slightly below that of 1959. Usually October to November sees a large decline in shipments. Last year the decline for this period was over seven percent while for 1958 the decline was over six percent. November to December declines are also usually fairly severe. However the final months of 1960 have some indications that December, like November, will not fall into the more usual pattern of considerable decline. Instead, 1960 shipments levelled off at a fairly high level early in the fall and, if repeating the trend of similar previous years, will remain at a fairly high level without significant decline.

Among the major groups of the Standard Industrial Classification, ten groups showed decreases and six increases. Of the latter, the largest were paper products of \$9.8 million or five percent and transportation equipment of \$9.5 million or six percent. Inspection of the tables below will show that the increase in paper products was largely a reflection of a \$9.2 million increase in pulp and paper mills. Further, paper boxes and bags increased by \$0.7 million, and these two industries account for the major part of the change in the group total. The other major group mentioned above as having a large increase, transportation equipment, reflects the increase in the motor vehicles industry. This increase can be seen better in the motor vehicles and related industries group of the Economic Use Classification. This group showed an increase of six percent or \$8.1 million. It is worthy of note that the increase in pulp and paper mills is not easily seen in the Economic Use Classification where it is classified under industries manufacturing largely for export although this group showed an increase of \$3 million or 0.9 percent.

Decreases in November shipments in value terms were greatest in: foods and beverages of \$5.6 million or 1.4%, knitting mills and clothing of \$6.5 million or 7.0 percent, non-ferrous metal products of \$4. million or 2.4 percent, and non metallic mineral products of \$3.3 million or 5.4 percent. These decreases accounted for \$19.4 million of the gross declines of \$26.4 million. The gross increases of \$25.7 million left a net decline of \$0.7 million from October.

INVENTORIES: - Total inventory owned by manufacturers at the end of November of \$4,149 million was up 0.4 percent from the revised October value of \$4,131 million and up 3.8 percent from the November 1959 value of \$3,997 million.

Total inventory held by manufacturers at the end of November of \$4,417 million was up 0.3 percent from the revised October value of \$4,406 million and up 1.7 percent from the November 1959 value of \$4,342 million. Inventory held under long-term contracts (progress payments) were \$268 million in November, down 2.3 percent from October, and down 22.4 percent from November 1959.

Inventory components showed the following changes: raw materials up 0.4 percent, goods in process up 0.6%, goods in process minus progress payments up 1.5 percent and finished products down 0.2 percent. Much of the increase in raw material and goods in process can be attributed to the foods and beverages group, the tobacco and tobacco products group, and the chemical products group. The decline in finished products centred around three industry groups; wood products, paper products and transportation equipment. For major groups 3,4,5,6,14,17 there was no appreciable value shift in components.

Among the industries classified according to the Standard Industrial Classification ten groups showed small increases in percentage terms. Six groups showed very small decreases in percentage terms. The largest value changes were an increase in foods and beverages of \$14.5 million, and an increase in chemical products of \$7.8 million. Both these increases were in response to seasonal influences and the October-November increases are usually about this magnitude. The largest decrease in value terms was in wood products of \$4.8 million or two percent. This decline was also part of a seasonal fluctuation. Wood products inventory varies considerably during the year from a high in March to a low usually in November.

Among the industries grouped according to the Economic Use Classification, October-November percentage changes were small. Perishable consumers goods were up 1.6 percent or \$11 million and the total consumers sector up 0.8 percent or \$9 million. The total capital goods sector was up 1.6 percent

or \$6.6 million reflecting increases in both heavy transportation equipment and other capital goods industries. Among the miscellaneous industries, intermediate goods and supplies showed a 2.2 percent or \$15 million increase. Industries manufacturing largely for export showed a 1.1 percent or \$8 million decrease.

The November ratio of total inventory owned to shipments was 2.05 compared to 2.04 in October and 2.01 in November 1959. The ratio of finished products to shipments was unchanged at 0.67 in November and was up from 0.63 last November.

ORDERS: - The value of unfilled orders at the end of November of \$1,898 million declined 1.6 percent from \$1,930 million in October and declined 9.3 percent from \$2,093 million in November 1959.

The total of consumers groups was up 2.5 percent reflecting moderate value increases in both perishable and semi-durable consumers goods and a decline in durable consumers goods. Total capital goods was down 0.8 percent reflecting a large dollar decline in heavy transportation equipment and a small dollar decline in other capital goods. Construction goods declined by \$11.6 million or 3.4 percent. Industries producing largely for export showed a large decrease of \$20.7 million or 14 percent.

New orders received in November at \$1,991 million increased 1.4 percent from \$1,964 million in October and increased 0.8 percent from \$1,975 million in November 1959.

TRADING OUTLETS: - Sales of goods of own manufacture through manufacturers' trading outlets in November were estimated at \$233 million down 1.8 percent from the revised October value of \$238 million and down 4.9 percent from the November 1959 value of \$245 million. Outlet sales were down in the rubber industries by 23%, in the iron and steel industries by 18% and in all other industries by 12 percent. The larger increases in outlet sales were in foods and beverages (6%) and "own goods" of electrical apparatus industries (7%).

Inventories held at manufacturers trading outlets at the end of November of \$300 million were up 1.4 percent from October and up 1 percent from November 1959. The largest changes from October were foods and beverages up 3.9 percent and iron and steel industries down 2.1 percent.

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys. (2) The value of Inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data. Estimates of this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups and the Economic Use Groups are listed below.

A single asterisk (\*) preceding the individual industry title indicates that the industry is shown separately in Table 5 - Statistics for Selected Individual Industries.

A double asterisk (\*\*) preceding the individual industry title indicates that the industry is shown in Table 5 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders-in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates as described in the December 1959 report, page 79.

## CONCEPTS AND SOURCES

For further detail, and for description of methods used, see December, 1959 report, page 79.

CONCEPTS

Shipments - (Tables 1 to 5) - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - (Tables 2 to 5) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 to 5) - are defined at estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 5) - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture at plant and warehouse, less value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 to 5) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 to 5) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of amounts held under progress payments arrangements.

Inventory Components - (Tables 2 to 5) - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Trading Outlets - (Table 7) - are defined as any establishments (other than retail stores) operated by manufacturers, apart from their plants or plant-warehouses, which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock, or which carry small quantities only for demonstration purposes, are not included. Sales for this series represent direct sales from the outlet of goods manufactured by the owning or associated manufacturing company, with sales arranged by outlets but shipped direct from plant excluded wherever possible; goods purchased for re-sale from sources other than the owning or associated manufacturing company are also excluded except for the Petroleum Products industry group where a separation of purchased products is not feasible. Inventories for this series represents owned inventories held at Trading Outlets or in warehouses serving the trading outlets; again, goods purchased for re-sale are excluded except for the Petroleum Products industry.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Tables 3, 6 and 7, are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups and in the Economic-Use groupings of industries (Tables 4, and 6) will be found on page 52 of the bulletin.

SOURCES

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Four industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island and Nova Scotia combined for monthly estimates.

(2) Yukon and the Northwest Territories combined with British Columbia.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Industry totals due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(2) Part of the change in values from December 1958 to January 1959, is the result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries group. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders for industries in S.I.C. groups - 1, 2, 3, 7, 8, 12, 14, 15, 16 and 17 is small, and sample coverage is not adequate to provide separate estimates for them.

(3) See footnote (2), table 2.

(4) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 4. - (1) See footnote (2), table 2.

(2) This grouping does not include the consumer portion of Motor Vehicles, nor of Heating and Cooking Apparatus; it does include the electronic equipment portion of Radios and Parts, (Telecommunication Equipment), and the office and store portion of Furniture. The bulk of Inventory Held but not Owned in this group is applicable to the electronic equipment portion of Radios and Parts.

(3) This grouping does not include trucks and buses.

(4) This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports.

TABLE 6. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (4), table 3.

TABLE 7. - (1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) See footnote (2), table 2.

(3) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet values cannot be separated from plant values.
