ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED, AND ORDERS
IN ALL MANUFACTURING INDUSTRIES

TREND SUMMARY

Preliminary estimates indicate the following trends for May:

SHIPMENTS: - Manufacturers' shipments in May were valued at an estimated \$1,971 million, an increase of three percent over the revised April value of \$1,921 million but a decrease of two percent from the May 1959 level of \$2,005 million. Cumulative shipments for the first five months at \$9,508 million are two percent higher than the corresponding value last year of \$9,324 million.

Although shipments for the first three months of 1960 are about five percent above the first three months of 1959, the trend does not seem to be continuing at this higher level. January-April 1960 shipments are only three percent above the like 1959 value and January-May 1960 shipments are two per cent of the like 1959 value. Four of the industry groups classified according to the Standard Industrial Classification declined in May but the decline in value terms is slight. The highest percentage increases were recorded by non-metallic mineral products industries (11%); chemical products industries (7%); tobacco and tobacco products industries (6%); and foods and beverages industries (5%). The last named industry accounted for nearly forty per cent, or \$19 million, of the increase in shipments in May. Iron and steel products industries accounted for a further twenty per cent, or \$10 million. The remaining part of the increase was scattered among the other ten groups.

In the Economic-Use classification of industries the advance in shipments appears fairly uniformly distributed among the groups. Only two groups show declines; semi-durable consumers' goods (7%), and motor vehicles and related industries (1%). The largest percentage increases were in construction goods industries (9%), and heavy transportation equipment industries and intermediate goods industries (6% each).

INVENTORIES: - The preliminary estimate of the value of inventory owned by manufacturers at the end of May is \$4,185 million - a small decrease (0.3%) from the revised April value of \$4,196 million but over five per cent higher than the May 1959 value. These comparative changes are similar to the corresponding percentage changes for April.

The value of inventory held by manufacturers (which includes inventory owned and the value of progress payments) at \$4,479 million decreased slightly (0.1%) in May from April but increased nearly three per cent from May 1959.

Inventory components show little change from April: raw materials inventory is lower by 0.3%; goods in process inventory is higher by 0.2%; finished products inventory is lower by 0.1%. Larger changes, however, show up in year over year comparisons. Finished products inventory is nine per cent higher this May than last. Raw materials inventory is two and one half per cent higher this May. Goods in process inventory is lower by nearly four per cent. However, subtraction of progress payments from goods in process leaves the May 1960 value seven per cent higher than the corresponding May 1959 value. Progress payments are lower this May from last by twenty-five per cent. The decrease is centered in the transportation industries. Progress payments this May have increased, however, from the April value by two per cent.

As there was virtually no change in inventories levels from April to May the three per cent increase in shipments is reflected in the ratio of total inventory

owned to shipments by a decrease from 2.18 to 2.12. The same ratio last May was 1.98. The shipments increase was similarly reflected in the ratio of finished products to shipments by a decrease from 0.73 to 0.71. The same ratio last May was 0.64.

ORDERS: - Unfilled orders declined \$20 million or 1% from \$2,199 million in April to \$2,178 million in May. With May shipments of \$1,971 million, the decline in unfilled orders was balanced by new orders at a level of \$1,951 million. The new orders at this level are 4% higher than the level for April but 5% lower than the level for May 1959.

Unfilled orders were lower in May for six industries grouped according to the Economic-Use Classification. The largest declines in unfilled orders were in the motor vehicles and related industries (10%), and industries producing largely for export (8%). The largest increases in unfilled orders were in semi-durable consumers goods (11%), and in heavy transportation equipment industries (3%). Some notable changes in unfilled orders are made this May over May 1959. This May, perishable consumers goods industries are down 24%, durable consumers goods industries up 27% and total consumers goods industries up 14% from the May 1959 value. Heavy transportation equipment industries are up 29% and other capital goods industries are up 12% leaving total capital goods industries up 23% from May 1959 values. The motor vehicles and related industries are down 22% this May from last.

TRADING OUTLETS: - Sales through manufacturers' trading outlets in May at \$219 million are 7 per cent below the revised April value of \$234 million and 4 per cent below the May 1959 value. Outlet sales declined in the iron and steel industries by 2 per cent and in the petroleum and coal industries by 15 per cent. Increases of 3 per cent were shown in foods and beverages industries, 2 per cent in rubber industries, 7 per cent in wood and paper industries, 7 per cent in chemical industries and 3 per cent in all other industries. There was virtually no change in the electrical apparatus industries.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups and the Economic Use Groups are listed below.

A single asterisk (*) preceding the individual industry title indicates that the industry is shown separately in Table 5 - Statistics for Selected Individual Industries.

A double asterisk (**) preceding the individual industry title indicates that the industry is shown in Table 5 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders-in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates as described in the December 1959 report, page 79.

C O N C E P T S

Shipments - (Tables 1 to 5) - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - (Tables 2 to 5) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 to 5) - are defined at estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 5) - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture at plant and warehouse, less value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 to 5) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 to 5) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of amounts held under progress payments arrangements.

Inventory Components - (Tables 2 to 5) - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all industry held but not owned had been included with goods in process.

Trading Outlets - (Table 7) - are defined as any establishments (other than retail stores) operated by manufacturers, apart from their plants or plant-warehouses, which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock, or which carry small quantities only for demonstration purposes, are not included. Sales for this series represent direct sales from the outlet of goods manufactured by the owning or associated manufacturing company, with sales arranged by outlets but shipped direct from plant excluded wherever possible; goods purchased for re-sale from sources other than the owning or associated manufacturing company are also excluded except for the Petroleum Products industry group where a separation of purchased products is not feasible. Inventories for this series represents owned inventories held at Trading Outlets or in warehouses serving the trading outlets; again, goods purchased for re-sale are excluded except for the Petroleum Products industry.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Tables 3, 6 and 7, are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups and in the Economic-Use groupings of industries (Tables 4, and 6) will be found on page 52 of the bulletin.

S O U R C E S

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Four industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island and Nova Scotia combined for monthly estimates.

(2) Yukon and the Northwest Territories combined with British Columbia.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Industry totals due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(2) Part of the change in values from December 1958 to January 1959, is the result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries group. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders for industries in S.I.C. groups - 1, 2, 3, 7, 8, 12, 14, 15, 16 and 17 is small, and sample coverage is not adequate to provide separate estimates for them.

(3) See footnote (2), table 2.

(4) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 4. - (1) See footnote (2), table 2.

(2) This grouping does not include the consumer portion of Motor Vehicles, nor of Heating and Cooking Apparatus; it does include the electronic equipment portion of Radios and Parts, (Telecommunication Equipment), and the office and store portion of Furniture. The bulk of Inventory Held but not Owned in this group is applicable to the electronic equipment portion of Radios and Parts.

(3) This grouping does not include trucks and buses.

(4) This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports.

TABLE 7. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (4), table 3.

TABLE 8. - (1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) See footnote (2), table 2.

(3) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet values cannot be separated from plant values.
