ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED, AND ORDERS IN ALL MANUFACTURING INDUSTRIES

TREND SUMMARY

Preliminary estimates indicate the following trends for June:

SHIPMENTS: - Manufacturers' shipments in June were valued at an estimated \$2,012 million, an increase of one percent over the revised May estimate of \$1,995 million but a decrease of four percent from the June 1959 value of \$2,099 million. Cumulative shipments for the first two quarters of 1960 at \$11,544 million were one percent higher than the corresponding value last year of \$11,424 million.

The one percent increase is the result of higher (by five percent) shipments in the first quarter but lower (by three percent) in the second quarter. Second quarter 1960 shipments are less than six percent higher than first quarter 1960 shipments; last year the second quarter was higher by over fourteen percent. However, in all these, and similar comparisons, it should be noted that both 1959 shipments and 1960 shipments are two rather non-typical series. Shipments in 1959 reached an all-time high in dollar value and in the first six months, rose with only a slight hesitation in May to a peak in June. Shipments in 1960 are somewhat unusual in starting from a high level in January and rising rapidly to a high peak in March.

In the Standard Industrial Classification grouping of industries, four groups showed declines in June: knitting mills and clothing of six million dollars (9%), transportation equipment industries of ten million dollars (5%), petroleum and coal products industries of two million dollars (1%), and chemical products industries of four million dollars (3%).

Increases in shipments in the industry groups classified according to the Standard Industrial Classification were generally small with the largest increases as follows: tobacco and tobacco products industries of five million dollars (22%), non-metallic mineral products industries of six million dollars (11%) and miscellaneous manufacturing industries of two million dollars (5%). The shipments declines were reflected in three groups of industries grouped according to the Economic-Use Classification, viz., semi-durable consumers' goods industries of six million dollars (6%), motor vehicles and related industries of thirteen million dollars (8%), and industries producing intermediate goods and supplies of five million dollars (2%). However, semi-durable consumers' goods industries have declined each June since 1953, as have motor vehicles and related industries except for 1959 when an increase was recorded. The intermediate goods industries show shipments declines each June except in 1953 and 1959.

INVENTORIES: - The preliminary estimate of the value of total inventory owned by manufacturers at the end of June was \$4,197 million, a decline of 0.3 percent from the revised May value of \$4,210 million but an increase of 6 percent from the June 1959 value of \$3,944 million.

Total inventory held by manufacturers, at \$4,500 million, declined 0.1 percent from the revised May value of \$4,505 but increased 3.5 percent from the June 1959 value of \$4,346 million. The difference of \$303 million between inventory owned and inventory held represents the value of inventory held under progress payments arrangements. The June value is higher by 2.7 percent than the revised May value but is 24 percent lower than June 1959. Nearly all of the change from June 1959 is attributable to the transportation equipment industries.

Inventory components showed only fractional changes from May. Raw materials and goods in process inventories were both down 0.4 percent; finished products inventory was up 0.5 percent; goods in process inventory minus progress payments was down 1.5 percent. Inventory components showed larger changes from June 1959. Raw materials inventory was up 3.5 percent; goods in process down 3.3 percent; finished products up 10 percent.

Current manufacturing inventory is at the high levels of 1957. The peak value that year of inventory owned of \$4,167 million was recorded in October and the revised May 1960 value of \$4,210 million is about 1 percent higher than the 1957 high. Some structural differences in the accumulation are noticeable. Durable goods inventory represented 48.3 percent of total manufacturing inventory at the end of the first quarter 1957 and 46.9 percent at the end of the first quarter 1960. It should be noted that the data in the following Tables are not seasonally or price adjusted.

Changes in inventory owned were nominal among the industries classified according to the Standard Industrial Classification. Ten groups showed decreases ranging to a maximum of 4 percent. Six groups showed increases ranging to a maximum of 3 percent. Greater changes show up in year over year comparisons. The larger increases from June 1959 to June 1960 were: rubber products (17%), textile products (9%), wood products (18%), iron and steel products (12%), electrical apparatus and supplies (13%), and miscellaneous manufacturing industries (9%). Only two industry groups had a lower inventory in June 1960 than in June 1959. They were foods and beverages (0.5%) and non-ferrous metal products (3%).

Among the industry groups classified according to the Economic-Use Classification, none showed a decrease in inventory owned from June 1959. The larger increases were: other capital goods industries (10%), construction goods industries (14%), and motor vehicles and related industries (11%). Changes among these groups from revised May to June values show the largest declines in perishable consumers' goods industries, (7%), and motor vehicles and related industries, (6%), and four other (nominal) declines. Heavy transportation equipment industries, increased 3% and three other industry groups had nominal increases.

As there was virtually no change in inventory levels or in shipments levels from May to June, the inventory to shipments ratios were little changed. The ratio, total inventory owned to shipments, moved from the May value of 2.11 to 2.09 in June. The same ratio last June was 1.88. The ratio, finished products to shipments, was unchanged in June from 0.70 in May. The value last June was 0.61.

ORDERS: - Unfilled orders declined \$32 million or 1.5% percent, from the revised May value of \$2,170 million to \$2,138 million in June. This value is 4 percent higher than the June 1959 value of \$2,058 million. New orders received in June were \$14 million, or 0.7 percent, above the revised May value of \$1,966 million, but 8 percent below the June 1959 value of \$2,147 million.

Unfilled orders were higher in June for only three industries grouped according to the Economic Use Classification. They were: semi-durable consumers' goods industries (6.3%), durable consumers' goods industries (1%), and other capital goods industries (0.4%). The declines in the other groups were nominal, the three largest being perishable consumer's goods industries (5%), motor vehicles and related industries (3.5%), and heavy transportation equipment industries (3.3%).

TRADING OUTLETS: - Sales through manufacturers' trading outlets in June at \$228 million were 5 percent above the revised May value of \$218 million and 10 percent below the June 1959 value of \$254 million. Outlet sales increased in all the groups except two: iron and steel industries declined 2 percent and chemical industries declined 1 percent. Increased outlet sales were in: foods and beverages industries, (3%), rubber industries, (10%), wood and paper industries, (9%), electrical apparatus industries, (11%), petroleum and coal industries, (5%), and all other industries, (4%).

Inventories held at manufacturers' trading outlets increased by 0.7 percent at the end of June to \$291 million from the revised May value of \$289 million. Most groups changes were nominal. The larger changes were: foods and beverages industries up 4 percent, rubber industries down 5 percent, electrical apparatus down 3 percent, and petroleum and coal industries up 3 percent.

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys. (2) The value of inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data. Estimates of this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of inventory owned as well.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups and the Economic Use Groups are listed below.

A single asterisk (*) preceding the individual industry title indicates that the industry is shown separately in Table 5 - Statistics for Selected Individual Industries.

A double asterisk (**) preceding the individual industry title indicates that the industry is shown in Table 5 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders-in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates as described in the December 1959 report, page 79.

CONCEPTS AND SOURCES

For further detail, and for description of methods used, see December, 1959 report, page 79.

CONCEPTS

Shipments - (Tables 1 to 5)- represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - (Tables 2 to 5) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 to 5) - are defined at estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 5) - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture at plant and warehouse, less value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 to 5) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 to 5) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of amounts held under progress payments arrangements.

Inventory Components - (Tables 2 to 5) - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all industry held but not owned had been included with goods in process.

Trading Outlets - (Table 7) - are defined as any establishments (other than retail stores) operated by manufacturers, apart from their plants or plant-warehouses, which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock, or which carry small quantities only for demonstration purposes, are not included. Sales for this series represent direct sales from the outlet of goods manufactured by the owning or associated manufacturing company, with sales arranged by outlets but shipped direct from plant excluded wherever possible; goods purchased for re-sale from sources other than the owning or associated manufacturing company are also excluded except for the Petroleum Products industry group where a separation of purchased products is not feasible. Inventories for this series represents owned inventories held at Trading Outlets or in warehouses serving the trading outlets; again, goods purchased for re-sale are excluded except for the Petroleum Products industry.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Tables 3, 6 and 7, are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups and in the Economic-Use groupings of industries (Tables 4, and 6) will be found on page 52 of the bulletin.

SOURCES

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Four industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island and Nova Scotia combined for monthly estimates.

(2) Yukon and the Northwest Territories combined with British Columbia.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Industry totals due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(2) Part of the change in values from December 1958 to January 1959, is the result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries group. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders for industries in S.I.C. groups - 1, 2, 3, 7, 8, 12, 14, 15, 16 and 17 is small, and sample coverage is not adequate to provide separate estimates for them.

(3) See footnote (2), table 2.

(4) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 4. - (1) See footnote (2), table 2.

(2) This grouping does not include the consumer portion of Motor Vehicles, nor of Heating and Cooking Apparatus; it does include the electronic equipment portion of Radios and Parts, (Telecommunication Equipment), and the office and store portion of Furniture. The bulk of Inventory Held but not Owned in this group is applicable to the electronic equipment portion of Radios and Parts.

(3) This grouping does not include trucks and buses.

(4) This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports.

TABLE 6. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (4), table 3.

TABLE 7. - (1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) See footnote (2), table 2.

(3) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet values cannot be separated from plant values.
