REVISIONS TO PREVIOUSLY PUBLISHED ESTIMATES

ANNUAL REVISIONS: - This issue of the monthly bulletin of Shipments, Inventories and Orders incorporates the final values for 1959 from the Census of Industry and is the basis for the revisions in each series in 1960 and 1961. This will be the last revision to the current values for this classification of the manufacturing industries although publication of the series on this basis will be continued into 1962. Final values for 1960 will be published on the new standard industrial classification during the summer of 1962 at the time when the entire monthly series is revised to the new system. The monthly series on the revised classification will be carried back to January 1957 in order to provide a five year continuous series on the new basis.

SHIPMENTS: - The annual revision of the shipments series incorporates the final 1959 census of industry values into the monthly shipments series for that year and is the basis for the revision of the 1960 and 1961 series. This revision of the 1960 monthly values constitutes the preliminary estimate of 1960 manufacturers' shipments which would have been published during the past summer as usual if it had not been for the projected general revision to the new standard industrial classification. With such an extensive revision planned for next year it has been necessary to combine the annual revision of the shipments series with the revision of the inventories and orders series which is usually published in the December bulletin. Publication of the revised series in October is therefore a compromise in time for each series.

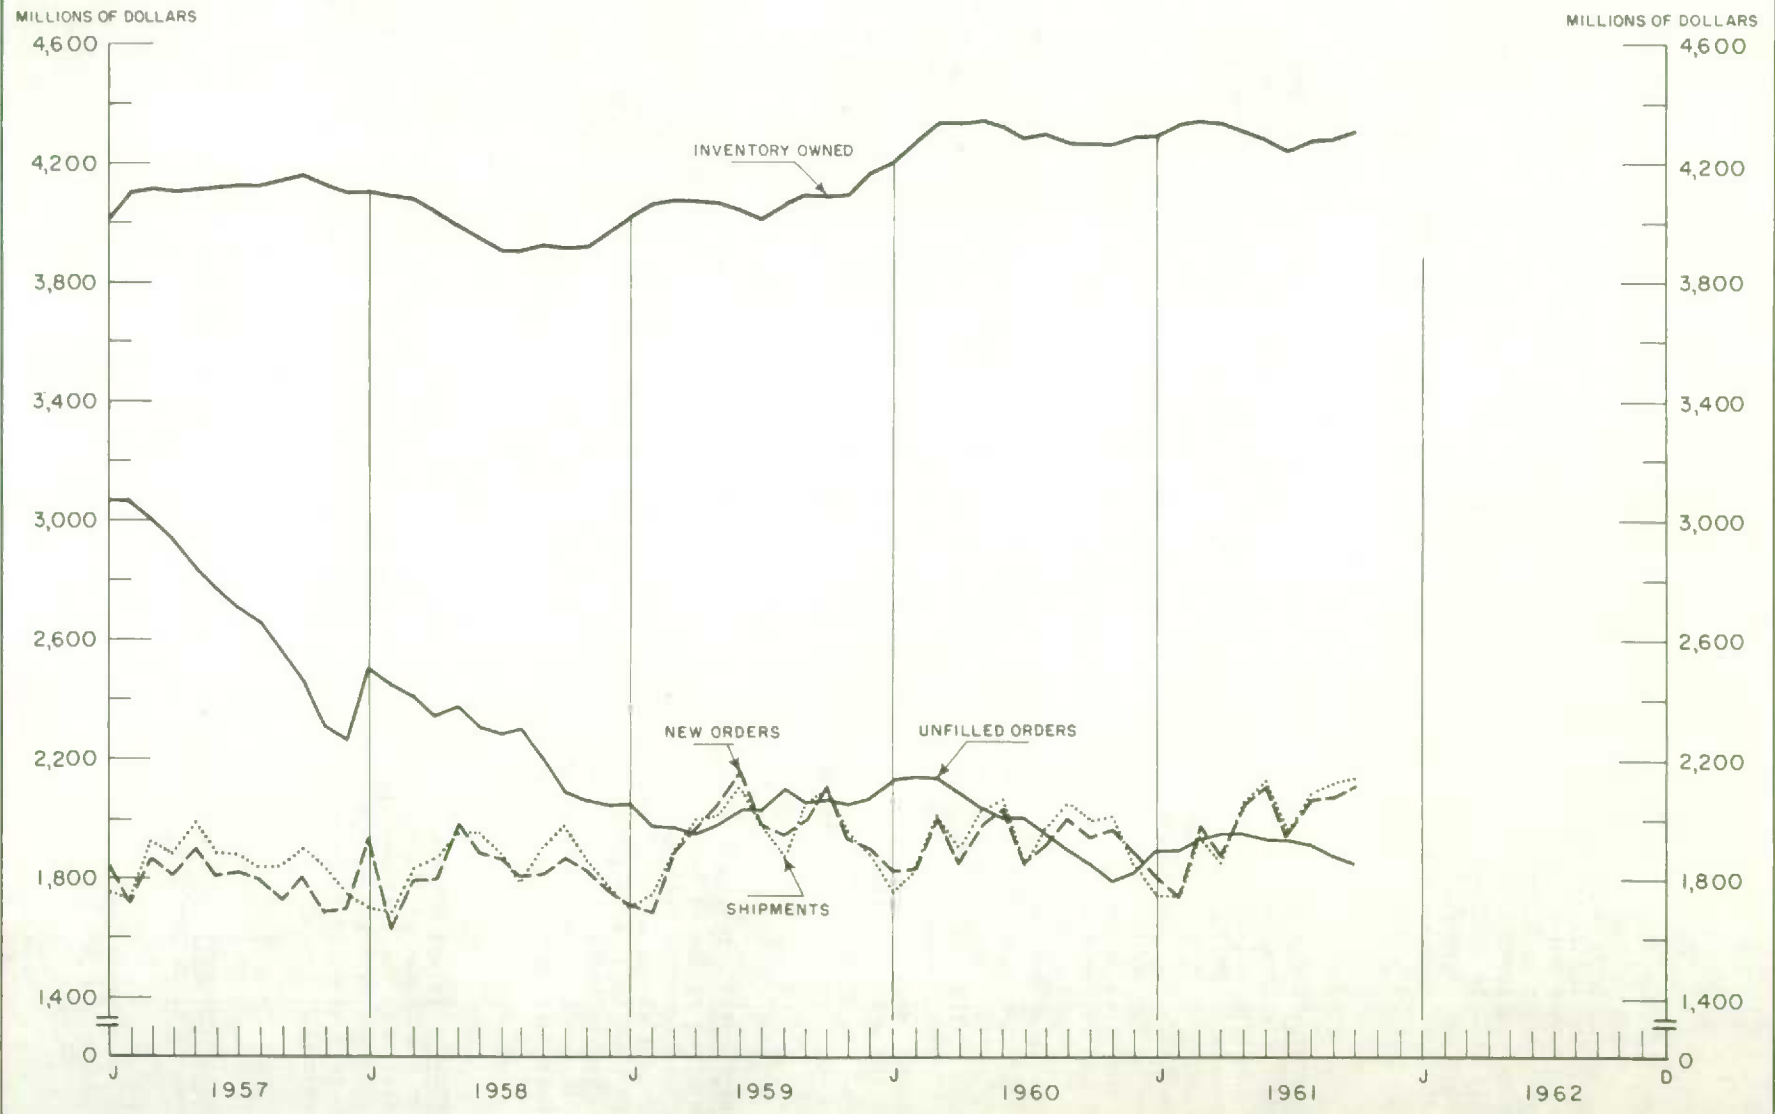

The annual revision in shipments for 1960 and 1961 also reflects all changes in the series due to adjustments in the reporting firms and the incorporation into the estimates of revised values and late values from the reporting firms. Since the current shipments estimate is based on a calculated ratio of the value of shipments by the sample firms to the total firms in each industry and since each month's values are calculated only twice between annual revisions (once for the preliminary or original estimate and again the month following for the revised current value) any revisions or reports which are received after this time can be included only at the annual revision. Similarly since the group of reporting firms must be kept constant during the year, revisions to the group to add new firms or to delete ones which have gone out of business can only be made at this time.

INVENTORIES: - Year end values from the 1959 Census of Industry have been incorporated in the monthly inventory series as benchmarks in the estimates. The error in the estimates for December 1959, derived from the December 1958 benchmark, has been assumed to be due to an accumulation during the previous eleven months; consequently the values for these months have been revised. The values for 1960 have been revised partly to reflect the change in the base from December 1958 to December 1959 and partly to reflect the change in trend resulting from adjustments in the sample. In addition to these two revisions the 1961 values have also been revised to include the values for reporting firms received too late for incorporation during the month of publication.

ORDERS: - Values for the orders series have also been revised to utilize the 1959 year-end values from the census of industry reports. The revision in the year-end values for 1959 entailed a revision in the 1959 monthly values since, as in inventories, the error is assumed to be accumulated during the previous eleven months. The 1960 and 1961 monthly values have also been revised to reflect the 1959 year end level and also on the basis of adjustments in the monthly sample and for late returns.

TRADING OUTLETS: - The revision in trading outlets is based solely on adjustments to the reporting group of firms for 1960 and 1961 and for 1961 for late returns.

ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED, AND ORDERS IN ALL MANUFACTURING INDUSTRIES

TREND SUMMARY

SHIPMENTS: Manufacturers' shipments in October of a preliminary \$2,136.0 million were 0.7 per cent above the September value of \$2,122.2 million and 7.0 per cent above the October 1960 value of \$1,996.4 million. Shipments for the ten months of 1961 of \$19,763.3 million were 1.5 per cent above the \$19,466.3 million for the ten months of 1960.

The largest value changes from September to October among the major groups of the Standard Industrial Classification were an increase of \$29 million in transportation equipment and a decrease of \$18 million in iron and steel products. Lesser value changes were in foods and beverages (+\$7 million), paper products (+\$6 million), non-ferrous metal products (-\$5 million) and electrical products (-\$4 million). The remaining changes were generally quite small in value terms. The preliminary October value, the highest value yet recorded for any month, represents also a slight departure from the seasonal pattern established in earlier years since a decline in October shipments might more readily be expected. It is, however, difficult to pin-point any one of the SIC group changes as unusual in either direction or extent. Instead the October shipments peak is noteworthy chiefly because most groups reflect the unusually high value.

Shipments in October are continuing the very strong recovery after the weak first quarter which was more than 3 per cent below the first quarter of 1960. Shipments for the second quarter were just slightly higher than shipments in the previous year since the recovery did not get under way until June: the five per cent increase in the third quarter brought shipments in the first nine months to nearly one per cent above shipments in the comparable period in 1960 and the seven per cent increase in October will raise the accumulated figures by nearly half of one per cent more.

Nearly all groups of the SIC shared in the recovery but it is easier to distinguish what appear to be basic trends among the industries if the economic use classification is used in the comparison. In this grouping for the ten months of 1961 against the ten months of 1960 the consumers' sector shows a 2.8 per cent lead with the greater percentage and value share contributed by perishable consumers goods. In the capital goods sector, other capital goods show a decline of 5.0 per cent; heavy transportation equipment shows a 3.2 per cent gain over 1960 but its concomitant group, motor vehicles and related industries, shows a 5.2 per cent decline over 1960. Construction goods and the unclassifiable group both show a 2.3 per cent margin over 1960. Intermediate goods and supplies show 4.4 per cent and industries producing largely for export show 0.2 per cent over their respective 10 month 1960 totals.

The above changes are interesting in themselves but they are additionally so because they reflect what appear to be underlying trends in the economy which may be summarized as some strength in the consumers' goods groups particularly in perishable goods, some weakness in the capital goods groups and construction goods group with continuing strength in the industries producing largely for export.

INVENTORIES: Inventories owned by manufacturers' at the end of October of \$4,315.4 million were 0.7 per cent above the September level of \$4,286.2 million and 1.1 per cent above the October 1960 level of \$4,269.8 million. Inventories held by manufacturers at the end of October of \$4,525.6 million were 0.9 per cent above the September level of \$4,495.2 million and 0.3 per cent above the October 1960 level of \$4,511.9 million. The value of inventory held but not owned (progress payments) at the end of October of \$210.2 million was 0.6 per cent above \$209.1 million at the end of September and 13.2 per cent below \$242.1 million at the end of October 1960.

All components showed increases from September to October as follows: raw materials 0.8 per cent, goods in process 0.9 per cent, finished products 0.4 per cent and goods in process less the value of progress payments 0.9 per cent. Changes from October 1960 to October 1961 were: raw materials up 0.5 per cent, goods in process up 1.7 per cent, finished products down 1.1 per cent and goods in process less progress payments up 6.0 per cent.

The ratio of total inventory owned to shipments was 2.02 in October unchanged from September as compared with 2.14 in October 1960. The ratio of finished products to shipments was 0.64 in October as compared with 0.65 in September and 0.70 in October 1960.

Changes among the industry groups of the SIC from September to October were generally small in percentage terms. The largest was a 4.9 per cent decline in rubber products. Lesser changes were a 4.3 per cent increase in chemical products and a 2.4 per cent increase in foods and beverages. The two latter changes stem from clearly-defined seasonal influences.

The revised data on total inventory owned reveal even more clearly than the earlier data the

strengthening influence of seasonal forces and the apparently diminishing influence of longer term forces. A longer term view may prove this interpretation inadequate but at the moment there is much to support it. For the years 1959, 1960 and 1961 to date the corresponding month-to-month changes throughout each year bear remarkable similarity. In 1959 and 1961, inventory owned moved upward from January through March then moved downward until the end of July and during this period the rates of change were also very similar. During the first half of 1960 the same general pattern can be seen with the difference that the accumulation at the beginning of the year continued past March to slightly higher values in April and May before moving down in June and July. Accumulation started again for 1959 and 1961 in August and continued through September although the October 1959 value was down slightly and the preliminary October 1961 value (which may change) showed a good increase. A three-month plateau (September-October-November) of reasonably stable values is noticeable in 1959 and 1960. In both years this was ended by accumulation in December.

The difference between the seasonal patterns evident in the last three years and the cyclical patterns evident in earlier years can be easily pointed out. During most of the years 1953, 1955, 1956, and 1957 inventories were accumulating although at widely varying rates. During most of the years 1952, 1954, 1958 inventories were liquidating. The turning points were not all of course at the year-end as implied but the longer swing both in building up and liquidating inventories was the predominant characteristic. During this year and in 1959 and 1960 it is quite clear that the earlier patterns of inventory behaviour have been changed.

ORDERS: Unfilled orders at the end of October of \$1,851.0 million were 1.3 per cent below the September value of \$1,875.0 million and 0.4 per cent above the \$1,844.2 million at the end of October 1960.

New orders received in October of \$2,112.0 million were 1.6 per cent above \$2,079.0 million received in September and 8.7 per cent above \$1,943.7 million received in October 1960.

TRADING OUTLETS: Sales through manufacturers' trading outlets in October estimated at \$252.3 million were 1.1 per cent below September sales of \$255.1 million and 3.7 per cent above October 1960 sales of \$243.2 million.

Inventories held at manufacturers' trading outlets at the end of October of \$308.0 million were 0.2 per cent below the September total of \$308.5 million and 0.8 per cent below the October 1960 total of \$310.4 million.

TABLE 3. ESTIMATED VALUE OF SHIPMENTS, ORDERS AND INVENTORY, AT PLANT, IN MANUFACTURING INDUSTRIES

GROUPED ACCORDING TO THE STANDARD INDUSTRIAL CLASSIFICATION

DURABLE

Includes S.I.C. groups 7, 10, 11, 12, 13 and 14.

Date	SHIPMENTS	ORDERS		INVENTORY AT END OF MONTH					
		New Orders Received During Month	Unfilled Orders at end of Month	Owned	Held but not Owned	All Inventory Held			
						TOTAL	Raw Materials	Goods in Process	Finished(3) Products
- thousands of dollars -

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups and the Economic Use Groups are listed below.

A single asterisk (*) preceding the individual industry title indicates that the industry is shown separately in Table 5 - Statistics for Selected Individual Industries.

A double asterisk (**) preceding the individual industry title indicates that the industry is shown in Table 5 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders-in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates as described on page 82.

STANDARD INDUSTRIAL CLASSIFICATION

Industrial Groupings shown in Tables 3 and 7.

S.I.C. Group 1. Foods and Beverages

- ** Slaughtering and Meat Packing (s)(i)
- ** Sausages and Casings (s)
- Animal Oils and Fats (s)
- ** Butter and Cheese Factories (s)(i)
- ** Concentrated Milk (s)(i)
- ** Processed Cheese (s)(i)
- ** Other Dairy Products (s)(i)
- Canned and Cured Fish (s)(i)
- * Fruit and Vegetable Preparations (s)(i)(o)
- * Flour Mills (s)(i)(o)
- Breakfast Foods (s)(i)
- Prepared Stock and Poultry Feeds (s)(i)
- * Biscuits and Crackers (s)(i)
- Bread and Other Bakery Products (s)
- Aerated Waters (s)
- Distilled Liquors (s)(i)
- * Breweries (s)(i)
- * Wines (s)(i)
- * Confectionery (s)(i)
- * Sugar Refineries (s)(i)
- ** Miscellaneous Food Preparations (s)(i)
- Macaroni (s)(i)
- ** Starch and Glucose (s)
- ** Malt Products (s)(i)

S.I.C. Group 2. Tobacco and Tobacco Products

- Tobacco Processing and Packing (s)(i)
- Tobacco, Cigars and Cigarettes

S.I.C. Group 3. Rubber Products

- * Rubber Footwear (s)(i)
- * Tires, Tubes and Other Rubber Products (s)(i)(o)

S.I.C. Group 4. Leather Products

- * Leather Footwear (s)(i)(o)
- Leather Gloves and Mittens (s)
- * Leather Tanneries (s)(i)(o)
- Belting Leather (s)
- Miscellaneous Leather Products (s)
- Boot and Shoe Findings (s)

S.I.C. Group 5. Textile Products (except clothing)

- Cotton Thread (s)(i)
- * Cotton Yarn and Cloth (s)(i)(o)

S.I.C. Group 5. Textile Products (except clothing) - (Concl'd)

- Miscellaneous Cotton Goods (s)
- * Woollen Cloth (s)(i)(o)
- * Woollen Yarn (s)(i)(o)
- Miscellaneous Woollen Goods (s)(i)(o)
- * Synthetic Textiles (s)(i)(o)
- Dyeing and Finishing of Textiles (s)(i)(o)
- Laces, Tapes and Bindings (s)(i)(o)
- * Canvas Products (s)(i)(o)
- * Carpets, Mats and Rugs (s)(i)(o)
- * Cordage, Rope and Twine (s)(i)
- * Cotton and Jute Bags (s)(i)(o)
- * Oilcloth, Linoleum and Other Coated Fabrics (s)(i)(o)
- ** Automobile Accessories, Fabric (s)
- ** Embroideries etc. (s)
- ** Miscellaneous Textiles, n.e.s. (s)(i)(o)

S.I.C. Group 6. Knitting Mills and Clothing (textiles and fur)

- ** Men's Clothing (s)(i)(o)
- ** Men's Clothing Contractors (s)
- ** Children's Clothing (s)(i)(o)
- ** Women's Clothing (s)(i)(o)
- ** Women's Clothing Contractors (s)
- * Hosiery (s)(i)(o)
- * Other Knit Goods (s)(i)(o)
- * Corsets and Foundation Garments (s)(i)(o)
- Fur Dressing and Dyeing
- Fur Goods (s)(i)
- Hats and Caps (s)(i)(o)
- Oiled and Waterproof Clothing (s)
- Fabric Gloves and Mittens (s)
- Miscellaneous Clothing, n.e.s. (s)(i)(o)

S.I.C. Group 7. Wood Products

- * Plywood and Veneer Mills (s)(i)(o)
- Sash, Door and Planing Mills (s)(i)
- Hardwood Flooring (s)(i)(o)
- Sawmills (s)(i)(o)
- * Furniture (s)(i)(o)
- Miscellaneous Wood Products (s)(i)(o)

S.I.C. Group 8. Paper Products

- * Paper Boxes and Bags (s)(i)(o)
- * Pulp and Paper Mills (s)(i)(o)
- * Roofing Paper (s)(i)(o)
- Miscellaneous Paper Products (s)(i)(o)

S.I.C. Group 9. Printing, Publishing and Allied Industries S.I.C. Group 14. Non-Metallic Mineral Products(Concl'd)

Commercial Printing (s)
Engraving, Stereotype and Allied Industries (s)
Printing and Publishing (s)

Clay Products from Domestic Clay (s)(i)
Glass and Glass Products (s)(i)(o)
Lime (s)
Miscellaneous Non-Metallic Mineral
Products (s)(i)
Salt (s)(i)

S.I.C. Group 10. Iron and Steel Products

* Agricultural Implements (s)(i)(o)
* Boilers and Plate Work (s)(i)(o)
* Fabricated and Structural Steel (s)(i)(o)
* Hardware and Tools (s)(i)(o)
 Heating and Cooking Apparatus (s)(i)(o)
* Household, Office and Store Machinery (s)(i)(o)
* Iron Castings (s)(i)(o)
 Machine Shop Products
* Machine Tools (s)(i)(o)
* Industrial Machinery n.e.c. (s)(i)(o)
* Primary Iron and Steel (s)(i)(o)
* Sheet Metal Products (s)(i)(o)
* Wire and Wire Goods (s)(i)(o)
* Miscellaneous Iron and Steel Products (s)(i)(o)

S.I.C. Group 15. Products of Petroleum and Coal

Coke and Gas Products (s)(i)(o)
* Petroleum Refining and Products (s)(i)
Miscellaneous Products of Petroleum and
Coal (s)(i)

S.I.C. Group 11. Transportation Equipment

Aircraft (s)(i)(o)
Bicycles and Parts (s)(i)(o)
Boat Building (s)
* Motor Vehicles (s)(i)
* Motor Vehicle Parts and Accessories (s)(i)(o)
* Railroad and Rolling Stock Equipment (s)(i)(o)
Shipbuilding and Repairing (s)(i)(o)
Miscellaneous Transportation Equipment (s)

S.I.C. Group 16. Chemical Products

* Acids, Alkalis and Salts (s)(i)(o)
Explosives, Ammunitions and Pyrotechnics(s)(i)(o)
* Fertilizers (s)(i)(o)
* Medicinal and Pharmaceutical Preparations(s)(i)(o)
* Paints and Varnishes (s)(i)(o)
* Soaps, Washing and Cleaning Compounds (s)(i)(o)
* Toilet Preparations (s)(i)
Vegetable Oil Mills (s)(i)
* Primary Plastics (s)(i)(o)
Miscellaneous Chemical Products (s)(i)(o)
Printing Inks (s)
Writing Inks (s)
Polishes and Dressings (s)(i)(o)
Coal Tar Distillation (s)(i)
Compressed Gases (s)(i)(o)
* Adhesives (s)(i)(o)

S.I.C. Group 12. Non-Ferrous Metal Products

Aluminum Products (s)(i)(o)
* Brass and Copper Products (s)(i)(o)
* Jewellery and Silverware (s)(i)(o)
* Non-Ferrous Metal Smelting and Refining (s)(i)(o)
White Metal Alloys (s)(i)(o)
Miscellaneous Non-Ferrous Metal Products

S.I.C. Group 17. Miscellaneous Manufacturing Industries

S.I.C. Group 13. Electrical Apparatus and Supplies

* Batteries (s)(i)(o)
* Heavy Electrical Equipment and
 Machinery (s)(i)(o)
* Radios and Parts (s)(i)(o)
* Refrigerators and Appliances (s)(i)(o)
* Miscellaneous Electrical Products (s)(i)(o)
* Wire and Cable (s)(i)(o)

* Brooms, Brushes and Mops (s)(i)(o)
Fabricated Plastic Products (s)(i)
Musical Instruments (s)(i)(o)
Typewriter Supplies (s)
Fountain Pens and Pencils (s)(i)(o)
* Professional and Scientific Equipment(s)(i)(o)
Clocks and Watches (s)
Sporting Goods (s)(i)
Toys and Games (s)(i)
Buttons, Buckles and Fasteners (s)
Candles (s)
Hair Goods (s)
Artificial Flowers and Feathers (s)
Lamps, electric, and lamp shades (s)
Miscellaneous Industries, n.e.c. (s)(i)(o)
Pipes, lighters and smokers' supplies (s)
Signs (s)
Stamps and stencils (s)
Statuary and Art Goods (s)
Umbrellas (s)
Artificial Ice (s)

S.I.C. Group 14. Non-Metallic Mineral Products

* Abrasives and Abrasive Products (s)(i)(o)
* Asbestos Products (s)(i)(o)
** Cement Hydraulic (s)(i)
** Concrete Products (s)(i)(o)
Clay Products from Imported Clay (s)(i)(o)
Brick and tile (s)(i)
Sand-lime brick (s)(i)
Gypsum Products (s)(i)(o)
Stone Products (s)(i)(o)

ECONOMIC USE GROUPS

Industrial Groupings shown in Tables 4 and 7.

CONSUMER GOODS INDUSTRIES

Perishable Consumer Goods Industries

- ** Slaughtering and Meat Packing (s)(i)
- ** Sausages and Casings (s)
- ** Butter and Cheese Factories (s)(i)
- ** Concentrated Milk (s)(i)
- ** Processed Cheese (s)(i)
- ** Other Dairy Products (s)(i)
- * Fruit and Vegetable Preparations (s)(i)(o)
- Breakfast Foods (s)(i)
- * Biscuits and Crackers (s)(i)
- Bread and Other Bakery Products (s)
- Aerated Waters (s)
- Distilled Liquors (s)(i)
- * Breweries (s)(i)
- * Wines (s)(i)
- * Confectionery (s)(i)
- Macaroni (s)(i)
- ** Miscellaneous Food Preparations (s)(i)
- Tobacco Processing and Packing (s)(i)
- Tobacco, Cigars and Cigarettes (s)(i)
- Salt (s)(i)
- * Medicinal and Pharmaceutical Preparations (s)(i)(o)
- * Soaps, Washing and Cleaning Compounds (s)(i)(o)
- * Toilet Preparations (s)(i)
- Polishes and Dressings (s)(i)(o)
- Candles (s)

Semi-Durable Consumer Goods Industries

- * Rubber Footwear (s)(i)
- * Leather Footwear (s)(i)(o)
- Leather Gloves and Mittens (s)
- Miscellaneous Leather Products (s)
- * Carpets, Mats and Rugs (s)(i)(o)
- * Oilcloth, Linoleum and Other Coated Fabrics (s)(i)(o)
- ** Automobile Accessories, Fabric (s)
- ** Embroideries etc. (s)
- ** Miscellaneous Textiles, n.e.s. (s)(i)(o)
- ** Men's Clothing (s)(i)(o)
- ** Children's Clothing (s)(i)(o)
- ** Women's Clothing (s)(i)(o)
- ** Women's Clothing Contractors (s)
- * Hosiery (s)(i)(o)
- * Other Knit Goods (s)(i)(o)
- * Corsets and Foundation Garments (s)(i)(o)
- Fur Goods (s)(i)
- Hats and Caps (s)(i)(o)
- Oiled and Waterproof Clothing (s)
- Fabric Gloves and Mittens (s)
- Miscellaneous Clothing, n.e.s. (s)(i)(o)
- * Brooms, Brushes and Mops (s)(i)(o)
- Fountain Pens and Pencils (s)(i)(o)
- Sporting Goods (s)(i)
- Toys and Games (s)(i)
- Lamps, electric, and lamp shades (s)
- Pipes, lighters and smokers' supplies (s)
- Umbrellas (s)
- ** Men's Clothing Contractors (s)

Durable Consumer Goods Industries

- * Furniture (s)(i)(o)
- Bicycles and Parts (s)(i)(o)
- Boat Building (s)
- * Jewellery and Silverware (s)(i)(o)

Durable Consumer Goods Industries (Concl'd)

- * Radios and Parts (s)(i)(o)
- * Refrigerators and Appliances (s)(i)(o)
- Musical Instruments (s)(i)(o)
- Clocks and Watches (s)

CAPITAL GOODS INDUSTRIES

Heavy Transportation Equipment Industries

- Aircraft (s)(i)(o)
- * Railroad and Rolling Stock Equipment (s)(i)(o)
- Shipbuilding and Repairing (s)(i)(o)

Other Capital Goods Industries

- * Agricultural Implements (s)(i)(o)
- * Hardware and Tools (s)(i)(o)
- * Household, Office and Store Machinery (s)(i)(o)
- * Machine Tools (s)(i)(o)
- * Industrial Machinery n.e.c. (s)(i)(o)
- * Heavy Electrical Equipment and Machinery (s)(i)(o)
- Signs (s)

CONSTRUCTION GOODS INDUSTRIES

- Sash, Door and Planing Mills (s)(i)
- Hardwood Flooring (s)(i)(o)
- * Roofing Paper (s)(i)(o)
- * Boilers and Plate Work (s)(i)(o)
- * Fabricated and Structural Steel (s)(i)(o)
- * Iron Castings (s)(i)(o)
- Aluminum Products (s)(i)(o)
- * Miscellaneous Electrical Products (s)(i)(o)
- * Wire and Cable (s)(i)(o)
- * Asbestos Products (s)(i)(o)
- ** Cement Hydraulic (s)(i)
- ** Concrete Products (s)(i)(o)
- Clay Products from Imported Clay (s)(i)(o)
- Gypsum Products (s)(i)(o)
- Stone Products (s)(i)(o)
- Brick and Tile (s)(i)
- Sand-lime Brick (s)
- Clay Products from Domestic Clay (s)(i)
- Miscellaneous Non-Metallic Mineral Products (s)(i)
- Miscellaneous Products of Petroleum and Coal (s)(i)
- Coal Tar Distillation (s)(i)

MISCELLANEOUS INDUSTRIES

Industries Producing Largely for Export

- Canned and Cured Fish (s)(i)
- * Flour Mills (s)(i)(o)
- Sawmills (s)(i)(o)
- * Pulp and Paper Mills (s)(i)(o)
- * Non-Ferrous Metal Smelting and Refining (s)(i)(o)
- * Abrasives and Abrasive Products (s)(i)(o)

Motor Vehicles and Related Industries

- * Tires, Tubes and Other Rubber Products (except Footwear) (s)(i)(o)
- * Motor Vehicles (s)(i)
- * Motor Vehicle Parts and Accessories (s)(i)(o)
- * Batteries (s)(i)(o)

Industries Producing Intermediate Goods and Supplies

- Prepared Stock and Poultry Feeds (s)(i)
- * Sugar Refineries (s)(i)
- ** Malt Products (s)(i)
- Animal Oils and Fats (s)
- * Leather Tanneries (s)(i)(o)
 - Belting Leather (s)
 - Boot and Shoe Findings (s)
 - Cotton Thread (s)(i)
- * Cotton Yarn and Cloth (s)(i)(o)
 - Miscellaneous Cotton Goods (s)
- * Woollen Cloth (s)(i)(o)
- * Woollen Yarn (s)(i)(o)
 - Miscellaneous Woollen Goods (s)(i)(o)
- * Synthetic Textiles (s)(i)(o)
 - Dyeing and Finishing of Textiles (s)(i)(o)
 - Laces, Tapes and Bindings (s)(i)(o)
- * Cordage, Rope and Twine (s)(i)
- * Cotton and Jute Bags (s)(i)(o)
 - Fur Dressing and Dyeing
- * Paper Boxes and Bags (s)(i)(o)
 - Miscellaneous Paper Products (s)(i)(o)
- * Primary Iron and Steel (s)(i)(o)
- * Wire and Wire Goods (s)(i)(o)
 - White Metal Alloys (s)(i)(o)
 - Lime (s)
 - Coke and Gas Products (s)(i)(o)
- * Acids, Alkalis and Salts (s)(i)(o)
- * Fertilizers (s)(i)(o)
 - Vegetable Oil Mills (s)(i)(o)
- * Primary Plastics (s)(i)(o)
- Compressed Gases (s)(i)(o)
- * Adhesives (s)(i)(o)
 - Printing Inks (s)
 - Writing Inks (s)
 - Typewriter Supplies (s)
 - Buttons, Buckles and Fasteners (s)

Industries Producing Intermediate Goods and Supplies (Concl'd)

- Artificial Flowers and Feathers (s)
- Hair Goods (s)
- Stamps and Stencils (s)
- Miscellaneous Industries, n.e.c. (s)(i)(o)

Unclassifiable

- ** Starch and Glucose (s)(i)
- * Canvas Products (s)(i)(o)
- * Plywood and Veneer Mills (s)(i)(o)
 - Miscellaneous Wood Products (s)(i)(o)
 - Commercial Printing (s)
 - Engraving, Stereotype and Allied Industries(s)
 - Printing and Publishing (s)
 - Heating and Cooking Apparatus (s)(i)(o)
- * Sheet Metal Products (s)(i)(o)
- * Miscellaneous Iron and Steel Products(s)(i)(o)
 - Machine Shop Products
 - Miscellaneous Transportation Equipment (s)
- * Brass and Copper Products (s)(i)(o)
 - Miscellaneous Non-Ferrous Metal Products
 - Glass and Glass Products (s)(i)(o)
- * Petroleum Refining and Products (s)(i)
- * Paints and Varnishes (s)(i)(o)
 - Explosives, Ammunitions and Pyrotechnics (s)(i)(o)
 - Miscellaneous Chemical Products (s)(i)(o)
 - Fabricated Plastic Products (s)(i)
- * Professional and Scientific Equipment (s)(i)(o)
 - Statuary and Art Goods (s)
 - Artificial Ice (s)

CONCEPTS, METHODS AND LIMITATIONS

C O N C E P T S

PLANT SHIPMENTS, ORDERS, AND INVENTORIES (Tables 1, 2, 3, 4, 5 and 7):

Shipments - represent an estimated projection, on a monthly basis, of the latest available Gross Value of Factory Shipments from the annual Census of Industry. In the majority of cases, Census of Industry values include (a) sales from manufacturing plant of products made at the plant, (b) amounts received for repairs or custom work, (c) shipments of goods manufactured in the plant for further processing in another unit of the same company, and (d) shipments of finished products to manufacturers' sales branches for sale, for each establishment included. The value level used is defined as "factory selling value". Goods purchased for re-sale without further processing are not included. (1)

New Orders - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - are defined as estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled. (Since progress payments are treated for this survey as sales in the month received, total unfilled orders reported each month by firms operating on a progress payments basis are reduced by the total of progress accounts for these firms.) This definition of Unfilled Orders is therefore an expression in terms of future shipments values.

(1) There are a few exceptions to the definition of Census of Industry values given above:

- (i) In two industries, Sawmills, and Slaughtering and Meat Packing, custom work is valued at the estimated selling value of the product rather than by the amounts received for such work.
- (ii) In nine industries (Fish Processing, Veneer and Plywoods, Sawmills, Pulp and Paper, Non-Ferrous Metals, Smelting and Refining, Coke and Gas Products, Petroleum Products, and Miscellaneous Products of Petroleum and Coal) the Census of Industry values represent production of finished goods rather than shipments. For these industries the Census of Industry values are adjusted by change in finished products inventory before projection for the monthly series.
- (iii) In four industries, Fabricated and Structural Steel, Aircraft, Railroad Rolling Stock and Shipbuilding, the Census of Industry value is for "work done during the year", i.e. production of finished goods plus change in goods-in-process inventory during the year, rather than shipments. For these industries, the Census of Industry values are also adjusted by change in finished products inventory before projection for the monthly series.

There are three industries apart from those listed under (ii) and (iii) above, for which adjustments to Census of Industry values are made before projection for the monthly series. In the Flour Milling, Brewing and Fruit and Vegetable Preparations industries, all of which are characterized by large seasonal variations, many large firms operate on fiscal year periods (which are used in Census of Industry compilations) differing from the calendar year. In unusual years the projection of Census of Industry values for these industries, as if they represent calendar year values, could cause considerable distortion in the estimates. To avoid this, the Census of Industry values from 1954 on have been adjusted to estimated calendar year values before projection. This adjustment is based on values reported to the monthly survey.

Firms operating on long-term contracts represent a special problem for the monthly series. The value levels projected are those of the Census of Industry as described in the first paragraph (except for the four industries described under (iii) above). However, for the monthly series, all progress receipts on long-term contracts are included as sales in the month received, instead of the total sale being included in the month the sale is finalized. It is felt that this treatment gives a better indication of monthly activity but it does allow possible distortion of value levels in that, for the Census of Industry value which is being projected, any final sale will be recorded in one specific year, while the monthly series may have spread this sale over more than one calendar year. Since the bulk of the value of long-term contract work falls in the four industries noted (in (iii) above), for which adjustments for work done are made in compiling the Census of Industry value, this inconsistency does not affect the all-industry or group totals to any great extent.

Total Inventory Owned - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of:

- (a) raw materials;
 - (b) goods in process;
 - (c) finished goods of own manufacture at plant and warehouse;
- less (d) value of inventory held but not owned. This item cannot be assigned to specific components.

Since the series relates to manufacturing inventory only, the value of inventory of goods purchased for re-sale without further processing is not included.

Inventory Held but Not Owned - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory - some firms treat progress receipts as sales and reduce book value of inventory as payments are received; in some of these cases they no longer have records of actual holdings above the book value level. Wherever estimates are available, these have been included, but the estimated value of inventory under this heading must be considered, to some extent, incomplete.

Total Inventory Held - represents the estimated total book value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from total inventory owned because of the inclusion of inventory held under progress payments arrangements. It includes items (a) to (c) as shown above under total inventory owned.

Inventory Components: Raw Materials, Goods in Process, and Finished Products, are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to make definitions of components appropriate to each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Table 3, are defined according to the Standard Industrial Classification Manual.

The Economic Use groups of industries (Table 4) were designed to facilitate the analysis of trends by a grouping based on the use made of each industry's products i.e. on the main demand factors affecting each industry. In drawing up this classification the groupings were designed to tie in with National Accounts concepts as closely as possible; as a result the three main groupings - Consumer Goods industries, Capital Goods industries, and Construction Goods industries - contain only industries producing mainly final products in each of these categories. Only industries in which substantially more than half the production is of items clearly belonging to one or other of these three specific categories or industries in which half the production falls into one such category and the remainder is scattered over two or more other categories, were assigned to one of the main groupings. All other industries were assigned to a miscellaneous category which was sub-divided into four further groupings of related industries: Industries Producing largely for Export, Intermediate Goods and Supplies, Motor Vehicles and Related Industries, and a final unclassifiable group. The latter groupings cut across the Economic Use criteria to some extent. For further detail on the considerations leading to the assignment of industries for these groupings reference should be made to the December, 1955 report.

TRADING OUTLETS SALES AND INVENTORIES (Table 8): See page 75.

Trading Outlets are defined as any establishments operated by manufacturers, apart from their plants (or plant warehouses), which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock or which carry small quantities for demonstration purposes are not included. Sales arranged by outlets carrying stock but shipped direct from plant are excluded wherever possible. Inventories of trading outlets include any holdings at warehouses which serve the outlets. Other warehouses, unless they have sales staffs, are excluded.

The Trading Outlets series has two purposes:

- (a) To clarify the manufacturing shipments and inventory series by excluding distribution activity (the extraneous activity which is most commonly included in reports by manufacturers) so that the manufacturing series is confined, as far as possible, to plant activities only at plant value levels;
- (b) To provide as complete and consistent a series as possible on manufacturers' distributional activity, so that this can be combined with the manufacturing series, if desired, for analytical purposes; or combined with data for independent wholesalers to provide a more complete picture of current wholesale activity than has previously been available.

Trading Outlets may or may not be separately incorporated wholesale companies. The majority of them are not separately incorporated. Any separately incorporated wholesale company owned by a manufacturing company or by a group of manufacturing companies is, however, included if the bulk of its sales are of goods manufactured by the owning or associated companies. Since it is obvious from the reports received that almost all unincorporated outlets handle mainly the products of the owning manufacturing company the Trading Outlets series may be taken to represent the activities of establishments the main function of which is to distribute the products of the manufacturing companies which own them.

This series was first published a year ago in the December 1958 bulletin. It is still to some extent in the experimental stage in the sense that the universes which are being projected monthly are not necessarily final, and the levels of the published data are, therefore, subject to revision over the next few years. In addition, only part of the total material collected for the series is considered adequate for publication at this time. It has, however, rectified to a large extent two areas of inconsistency in previous reports, one practical and the other conceptual.

The practical inconsistency was that many companies selling entirely or partially through their own sales organizations find it simpler to report total company sales monthly than to report "shipments leaving plant", which may be either final sales or shipments to their own selling outlets. Such reports were previously accepted in a large number of cases but were used to project the latest available Census of Industry values, which are generally defined as shipments from plant at plant selling value. For many of these companies it has now been possible to arrange for a monthly report covering an estimated value of plant shipments at plant selling value, in addition to the company sales figure. The former is now used for compilation of shipments values for Tables 1 to 5. To the extent that trends in the plant shipments series were being distorted by use of company sales values rather than plant shipments values this change represents an improvement. (It should, however, be noted that the change has not yet been possible in all relevant cases.)

The conceptual inconsistency was that, while shipments represented plant level shipments, the finished products inventories values previously represented total finished products owned by manufacturers, whether held at plant, warehouse or trading outlets, rather than plant finished products only. The two separate series, one for plant, and the other for trading outlets, now each cover sales and inventories for comparable activities.

(It should not, however, be assumed that the plant finished products series and the Trading Outlets inventory series are, when summed, the exact equivalent of the previous manufacturers' finished products series. As a matter of fact, they are reasonably close to being equivalent, but the former finished products series included some retail store operations of manufacturers (retail operations are excluded from the Trading Outlets series) and the Trading Outlet series includes a number of separately incorporated wholesale companies which were not previously included.)

The problems which have been raised by a separate series covering sales and inventories of Trading Outlets are due basically to difficulties of response. The major problems are:

- (a) In the cases remaining where it is still impossible to obtain plant level shipments values on a monthly basis it is often also impossible to obtain plant level finished products inventory holdings separately from Trading Outlets holdings. The inventory breakdown is, in these cases, available only at year-ends. There is, therefore, an element of uncertainty in the monthly finished products trends for the two series when used separately which did not exist when the two elements were combined. For one industry group, Tobacco Products, it was impossible to obtain separate Trading Outlets data, so total finished products inventory values for this group were left in the manufacturing series.

- (b) In a number of cases, Trading Outlet sales and inventory values, while easily available separately from plant values, are not available broken down as between "goods of own manufacture" and "goods purchased for re-sale". This is more often the case with separately incorporated wholesale companies than with other outlets. In most industry groups enough reports are available which distinguish between own and purchased goods to make a separation of values under this heading feasible. For one industry group, Petroleum Products, the separation is, however, not possible, so total sales and inventories have been included under the heading of "goods of own manufacture" for this group.
- (c) In a number of cases where the separation, by the appropriate reporting firms, of plant level shipments and Trading Outlets sales is not yet available it has been possible to estimate Trading Outlets sales of goods of own manufacture on the basis of the total sales figures for the companies concerned and the probable proportion of total sales which are being made through outlets. It did not, however, appear possible to estimate sales of purchased goods in these cases, because of the wide range of ratios of own to purchased goods in the sales values reported by the remaining companies. It is hoped that some improvement can be made in this area in the coming year. In the meantime, with the exception of the Electrical Apparatus and Supplies group where practically no estimating problem occurs, it is felt that the estimates of sales of goods purchased for re-sale do not yet warrant publication. This problem is not so acute for inventory values of goods purchased for re-sale, since year-end values at least are generally available for own and purchased goods separately, but it is felt that publication of this item should be postponed until comparable sales values are available.

Many of the companies operating trading outlets are multiple-unit firms with operations crossing two or more individual industries. No attempt has been made to obtain detail at this level for the Trading Outlets series. This means that the industry-group (e.g. Foods industries, Iron and Steel Industries) is the smallest unit for which data can be shown separately. There are a few cases where outlet operations cut across two industry-groups, and in these cases the values have been assigned to the group in which the bulk of the manufacturers' production falls.

Because of the relatively small number of companies included and because, on the whole, this type of operation tends to be large it can be expected that, when a company gives up its distributing organization or when new organizations are set up, the effect on the series will be to cause considerably larger sudden changes than are common in the plant shipments and inventory series.

METHODS

(a) Current Estimates -

For eight series (plant shipments, raw materials, goods in process, plant finished products, inventory held but not owned, unfilled orders, trading outlets sales, and trading outlets inventories,) current value estimates for each industry covered are made by applying the monthly percentage changes shown by the unweighted group of reporting firms in each industry to the latest available benchmark values for the same industries. Industries not covered are carried at the latest available benchmark levels.

(The above is subject to a few exceptions. In one industry, reporting firms are treated as a stratum sample, rather than as an unweighted group. In three industries, available physical data on stocks and shipments are valued using price indexes. In three industries, shipments estimates are based on employment data and price indexes.)

Total inventory held in each industry is the sum of the estimated values for raw materials, goods in process, and finished products. Total inventory owned in each industry is calculated by deducting the estimated value for inventory held but not owned from estimated total inventory held. Value of new orders in each industry is derived from estimated shipments and unfilled orders using the formula "Unfilled Orders at end of previous month plus Net New Orders during month less Shipments during month equals Unfilled Orders at end of Current month".

(b) Benchmark Revisions -

As new benchmarks become available, estimates for the year to which the benchmarks apply are revised as follows:

- For the plant shipments series, the Census of Industry value for the year for each industry is spread by months according to the trend shown by reporting firms in the original estimate for that year.

- For the trading outlets sales series, the estimated value for the year, obtained from the Annual Trading Outlets survey, for each industry is spread by months according to the trend shown by reporting firms in the original estimate for that year.

- For the five basic inventory series (raw materials, goods in process, plant finished products, inventory held but not owned and trading outlets inventory) and the unfilled orders series, where the benchmark values apply to the Year-End rather than to the entire year as in the shipments series, the error in the original estimate for the year-end for each industry is assumed to have accumulated equally over all twelve months of the year (i.e., one-twelfth of the amount of the error is added to the original estimate for January; two-twelfths is added to the original estimate for February; three-twelfths to March and so on).

- The three derived series (total inventory held, total inventory owned, and new orders) are re-calculated on the basis of the revised data for the other six series.

LIMITATIONS TO THE USES OF THE DATA IN THIS REPORT

- (1) Data for individual industries should not be interpreted as commodity data, since very few industries produce only one commodity or only one class of commodities.
- (2) Since the series are in terms of current values, changes over time may be the result of both price and volume changes. Some indication of the extent to which changes in value are due to price changes, thus isolating the physical change which has taken place, can be obtained by reference to the wholesale price index. This procedure is, however, inadequate for anything more than a general indication of trends. The main problem is that the wholesale price index is a commodity price index, while the shipments, orders, and inventory series are industry series with the possibility of changes in commodity content over time. These changes in commodity content could seriously affect the weighting pattern to be applied to price indexes considered applicable for any specific industry. In considering inventory values turnover rates and valuation methods are other important variables which should be taken into consideration but for which adequate data are seldom available.
- (3) Shipments data do not necessarily represent market sales for the manufacturing universe.
(a) Apart from the few exceptions as noted under (b) below they are defined (see page 82) to include total movement of goods out of manufacturing plants (or, in some cases, divisions of plants); shipments of goods for further processing by other plants of multiple-unit companies are, therefore, included as well as shipments for sale. (b) In a few special cases, the Census of Industry values include goods in-process change, and for these cases progress receipts on long-term contracts are included as shipments as they occur, rather than at the time sales are finalized. (c) Many manufacturers re-sell purchased goods, in addition to sales of their own products and these re-sale items are not included.
- (4) The component breakdown for inventories is on an establishment, not a commodity, basis. Since each manufacturer reports inventories as on his own books, both for the monthly and annual surveys, and since a number of industries contain plants at various stages of processing, the finished products for one plant might represent commodities which would be considered raw materials or goods in process for another plant in the same industry. The composition of each industry must be studied before attempting to use the component breakdown as applicable to the industry as such, rather than to the firms in the industry.
- (5) For Unfilled Orders, the following reservations apply:
 - (a) The series, by definition, excludes plants producing entirely for stock. Since approximately 40% of manufacturing is done by such plants the trends shown are not necessarily applicable to manufacturing in general.
 - (b) Since the series is defined as "unshipped" orders, rather than "unproduced" orders, there is always the probability that some of the Unfilled Orders are accounted for in inventory holdings. The reduction of unfilled orders by progress receipts eliminates to a considerable extent the effect of large goods-in-process holdings in connection with long-term contracts, but the amount of the remaining inventory, either goods-in-process or finished products, which is held in connection with existing unfilled orders would be difficult to evaluate.
 - (c) The series includes total orders, not just those considered as "binding", so estimates of future shipments trends based on these may be overstated due to the possibility of cancellations.
 - (d) Unfilled Orders for all industries include to some extent a duplication due to the fact that orders for final products in one industry may result in orders to firms at secondary or primary stages of processing. Since the total gross value of shipments will contain the same duplication, this does not invalidate the series for purposes of analysis. However, the total impact of any one order on future shipments levels will not necessarily be shown in the Unfilled Orders series since at any stage an order may be filled from stock rather than added to existing backlogs.

- (6) The Economic-Use grouping of industries (Table 4). The difficulties involved in classifying both commodities, and industries on the basis of commodities made, are sufficient to limit the usefulness of this compilation to indications of trends only. The main difficulty is that many commodities may be used for different purposes which cut across classification lines. Depending on the use made of it, the same product may be a "final" product or a component part; or a final product may be used for consumption, capital equipment, or in construction. A second difficulty is that the basic data for this survey are in terms of estimates for individual industries not for commodity data. An industry is a group of establishments primarily concerned with the production of a specified product or class of products. Many establishments produce other commodities in addition to those with which they are primarily concerned and, as a result, very few industries can be considered "pure" in the sense that they produce only the product or class of products implied in their title. Therefore, many industries which might fall quite clearly into specified groups on the basis of the chief use of their main products are much less clear-cut when the additional commodities produced in the establishments concerned are considered.

In this classification only those industries in which substantially more than half the production is of items clearly belonging to a specified grouping or in which half the production is of such items and the remainder is scattered over two or more groups were assigned to the main categories; all industries which could not be so assigned were placed in the "Unclassifiable" category. This means that the inclusion of extraneous commodities is kept to a minimum. It does not, unfortunately, do anything about the fact that each category does not necessarily include all important relevant items. The grouping that is most seriously affected by the forced exclusion of relevant items is the Durable Goods sub-group of the Consumer Goods category. It does not contain the consumer portion of the Automobile industry and, in addition, it does not include the stove portion of Heating and Cooking Apparatus, since the latter industry had to be assigned to the Unclassifiable group. On the other hand, it does include two large industries with important production of items which should not be assigned to Consumer Durables - these are the Furniture industry, which produces office and store furniture as well as household furniture; and the Radios and Parts industry which also produces electronic equipment. The sub-category "Other Capital Goods Industries" contains the highest proportion of industries in which only about half of total production actually should be assigned to the specific grouping but where the remainder of production is dispersed over a number of other groupings. It is, however, felt that this dispersion is not so likely to result in distortion as is possible with the large specific items involved in the Consumers' Durable Goods group.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island and Nova Scotia combined for monthly estimates.

(2) Yukon and the Northwest Territories combined with British Columbia.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Industry totals due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(2) Part of the change in values from December 1958 to January 1959, is the result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries groups. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders and therefore, of New Orders for industries in S.I.C. groups - 1, 2, 3, 7, 8, 12, 14, 15, 16 and 17 is small, and sample coverage is not adequate to provide separate estimates for them.

(3) See footnote (2), table 2.

(4) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 4. - (1) See footnote (2), table 2.

(2) This grouping does not include the consumer portion of Motor Vehicles, nor of Heating and Cooking Apparatus; it does include the electronic equipment portion of Radios and Parts, (Telecommunication Equipment), and the office and store portion of Furniture. The bulk of Inventory Held but not Owned in this group is applicable to the electronic equipment portion of Radios and Parts.

(3) This grouping does not include trucks and buses.

(4) This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports.

TABLE 7. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (4), table 3.

TABLE 8. - (1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) See footnote (2), table 2.

(3) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet values cannot be separated from plant values.
