# ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED, AND ORDERS IN ALL MANUFACTURING INDUSTRIES

### TREND SUMMARY

**SHIPMENTS:** Manufacturers' shipments in November of \$2,154.9 million were 0.8 per cent above the October value of \$2,137.6 million and 7.0 percent above the November 1960 value of \$2,013.7 million. Shipments for the eleven months of 1961 of \$21,919.8 million were 2.0 percent above the corresponding 1960 total of \$21,480.0 million.

The largest increases from October to November among the manufacturer's groups of the Standard Industrial Classification were in transportation equipment of \$24 million, and iron and steel of \$7 million. The largest declines were in knitting mills and clothing of \$7 million, and foods and beverages of \$5 million. In the same period, all groups of the consumers sector of the economic use classification showed declines. All remaining groups of this classification excepting intermediate goods and supplies showed increases.

Shipments in November are continuing the very strong recovery after the weak first quarter which was more than three per cent below the first quarter 1960. Shipments for the second quarter of 1961 were just slightly higher than shipments for the second quarter of 1960 since the recovery did not get under way until June. The five per cent increase in the third quarter brought shipments in the first nine months in 1961 to nearly one per cent above shipments in the comparable 1960 period. The increases in October and November will raise the accumulated figures by one per cent more.

These comparisons should not obscure the fact that three groups in the S.I.C. did show a margin at the end of the first quarter of 1961 over the first quarter 1960. Foods and beverages has maintained a fairly consistent 3 per cent lead over 1960; leather products had a 6 per cent lead in the first quarter over 1960 and increased this to 12 per cent in November; miscellaneous manufacturing increased a 4 per cent lead to 7 per cent from the first quarter to November. Most of the remaining groups have moved from varying percentages below their respective 1960 totals to show eleven month cumulative totals that are up to two per cent higher than 1960. In fact, only two groups failed to show an improvement in total shipments for 1961 to date compared with 1960. Tobacco and tobacco products are fractionally below the 1960 total but transportation equipment is 2 per cent or \$35 million below the 1960 total and reflects the low production and shipments of motor vehicles in 1961 up to the end of November.

November shipments are the highest yet recorded for any month and this fact is additionally remarkable since November shipments, usually among the middle values of the year, frequently show a decline from October. In the nine years since 1953 only in three did November shipments show any gain over October and two of these, this year and last, they have been nominal (\$17 million each): the declines have often been considerably greater.

This change in the monthly pattern of shipments is the first significant departure from the usual seasonal movements since the recovery began. For the ten months of 1961 ending in October the 1.5 per cent lead obtaining over the ten months of 1960 was shared by most manufacturing groups without any widespread or significant shift from the usual seasonal movements. In November, however, construction goods, industries producing largely for export, and unclassifiable industries have all shown increases where decreases have prevailed almost exclusively for the past nine years. On the other hand, the three consumers' goods groups usually show a decline in November and do so this November. The seasonal changes in the remaining groups have been less consistent over the years.

Adding to the shift in the seasonal pattern has been the rather unusual movement in the motor vehicles and related industries. This group has moved decisively upward since the usual seasonal low in August and the unusual strength from this group has contributed significantly to the high total shipments values of the last few months. Despite this recent strength the eleven-month shipments total for 1961 was 3.5 per cent or \$53 million below the 1960 total for a similar period. Production of motor vehicles in terms of the total number of vehicles produced reflects the same differences.

Similar strength in the industries producing largely for export in the last few months has brought down a substantial accumulation of finished products inventory. Although part of this run off is undoubtedly seasonal, part may also be in response to the continuing high level of unfilled orders which has not yet shown the year-end decline which frequently occurs.

**INVENTORIES:** Inventories owned by manufacturers at the end of November estimated at \$4,372.3 million were up 0.5 per cent from \$4,350.3 million at the end of October and up 2.4 per cent from \$4,268.8 million at the end of November 1960. Inventories held by manufacturers at the end of November estimated at \$4,573.8 million were up 0.6 per cent from \$4,548.0 million in October and up 1.5 per

cent from \$4,508.4 million in November 1960. The value of inventory held but not owned (progress payments) at \$201.6 million in November rose 2.0 per cent from \$197.7 million in October and declined 15.9 per cent from \$239.6 million in November 1960.

Inventory components all showed increases from October to November as follows: raw materials 0.8 per cent, goods in process 0.2 per cent, and finished products 0.5 per cent. All components showed increases this November over last and were, in percentages: 1.2, 2.4, and 1.1 respectively. Goods in process less the value of progress payments showed a 0.2 per cent decline from October to November and a 7.5 per cent increase from November 1960 to November 1961.

The ratio of total inventory owned to shipments was 2.03 in November, 2.04 in October and 2.12 in October 1960. The ratio of finished products to shipments was 0.64 in November, 0.65 in October and 0.68 in November 1960.

Increases in inventory owned among the manufacturing groups of the Standard Industrial Classification were largest in value terms from October to November in foods and beverages (\$16 million), iron and steel products (\$10 million) and chemical products (\$6 million). The largest declines were in wood products (\$9 million) and paper products (\$4 million).

The build-up inventory from August followed the seasonal liquidation from April to July. While some seasonal accumulation could be expected toward the year-end the increase to date exceeds reasonable expectations and may indicate the increasing importance of cyclical or other influences in contrast to the seasonal ones. The latter months of 1961 seem removed from the strongly seasonal pattern which marked the earlier months, and which identified it with the years 1960 and 1959 in which the seasonal pattern was clearly evident.

This point of view can be made clearer by referring to the movement of the manufacturing groups of the SIC. The usual and expected increases occurred in foods and beverages and chemical products in October and November. Several other groups recorded declines which were also more or less anticipated as fairly regular seasonal movements. Strong upward movements during October and November in iron and steel, transportation equipment, and non ferrous metals have boosted the seasonal accumulation by \$45 million. By contrast these three groups were reduced by \$12 million in the same period in 1960. Iron and steel products displays a fairly clear cyclical pattern and the movements, whether of accumulation or liquidation, usually are significant in the movement of total owned manufacturers' inventory. Transportation equipment also displays a distinctly cyclical movement but has also certain seasonal characteristics which may be of sufficient strength to affect total data for one or several months. Non-ferrous metals has been in nearly continuous accumulation since December 1959 and has somewhat blurred the clearer picture of seasonal and cyclical inventory movements.

ORDERS: New orders received by manufacturers in November of \$2,136.8 million were 1.4 per cent above the October value of \$2,106.5 million and 8.9 per cent above the November 1960 value of \$1,961.9 million. The largest percentage increases from October to November were in semi-durable consumers' goods (10.3) and motor vehicles and related industries (6.3).

Unfilled orders at the end of November of \$1,825.8 million were 1.0 per cent below the October total of \$1,843.9 million and 1.9 per cent above the November 1960 total of \$1,792.4 million.

TRADING OUTLETS: Sales through manufacturers' trading outlets in November of \$250.5 million were down 1.9 per cent from \$255.3 million in October and up 3.0 per cent from \$243.3 million in November 1960.

Inventories held at outlets of \$313.5 million at the end of November were 3.0 per cent above the October value of \$304.3 million and 0.9 per cent below the November 1960 value of \$316.4 million.

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys. (2) The value of Inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data. Estimates of this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups and the Economic Use Groups are listed below.

A single asterisk (\*) preceding the individual industry title indicates that the industry is shown separately in Table 5 - Statistics for Selected Individual Industries.

A double asterisk (\*\*) preceding the individual industry title indicates that the industry is shown in Table 5 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders-in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates as described in the October 1961 report, page 82.

## CONCEPTS AND SOURCES

For further detail, and for description of methods used, see October 1961 report, page 82.

### C O N C E P T S

Shipments - (Tables 1 to 5) - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - (Tables 2 to 5) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 to 5) - are defined at estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 5) - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture at plant and warehouse, less value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 to 5) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 to 5) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of amounts held under progress payments arrangements.

Inventory Components - (Tables 2 to 5) - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Trading Outlets - (Table 7) - are defined as any establishments (other than retail stores) operated by manufacturers, apart from their plants or plant-warehouses, which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock, or which carry small quantities only for demonstration purposes, are not included. Sales for this series represent direct sales from the outlet of goods manufactured by the owning or associated manufacturing company, with sales arranged by outlets but shipped direct from plant excluded wherever possible; goods purchased for re-sale from sources other than the owning or associated manufacturing company are also excluded except for the Petroleum Products industry group where a separation of purchased products is not feasible. Inventories for this series represents owned inventories held at Trading Outlets or in warehouses serving the trading outlets; again, goods purchased for re-sale are excluded except for the Petroleum Products industry.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Tables 3, 6 and 7, are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups and in the Economic-Use groupings of industries (Tables 4, and 6) will be found on page 53 of the bulletin.

### S O U R C E S

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Four industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island and Nova Scotia combined for monthly estimates.

(2) Yukon and the Northwest Territories combined with British Columbia.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Industry totals due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(2) Part of the change in values from December 1958 to January 1959, is the result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries groups. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders and therefore, of New Orders for industries in S.I.C. groups - 1, 2, 3, 7, 8, 12, 14, 15, 16 and 17 is small, and sample coverage is not adequate to provide separate estimates for them.

(3) See footnote (2), table 2.

(4) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 4. - (1) See footnote (2), table 2.

(2) This grouping does not include the consumer portion of Motor Vehicles, nor of Heating and Cooking Apparatus; it does include the electronic equipment portion of Radios and Parts, (Telecommunication Equipment), and the office and store portion of Furniture. The bulk of Inventory Held but not Owned in this group is applicable to the electronic equipment portion of Radios and Parts.

(3) This grouping does not include trucks and buses.

(4) This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports.

TABLE 6. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (4), table 3.

TABLE 7. - (1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) See footnote (2), table 2.

(3) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet values cannot be separated from plant values.
