### ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED AND ORDERS IN ALL MANUFACTURING INDUSTRIES

Manufacturers' preliminary shipments estimate in March 1965 reached a new record high of \$2,809.0 million, an increase of 14.8 per cent over the revised value of \$2,446.4 million in February; but, after seasonal adjustment, shipments were estimated at \$2,734.5 million, showing only a small increase of 0.9 per cent over the February value of \$2,710.9 million. Total shipments during the first quarter amounted to \$7,691.3 million, 3.0 per cent higher than the 1964 level of \$7,466.6 million.

In March, virtually all major industry groups experienced considerable increases in shipments, with the greater gain of 19.2 per cent achieved by the durable industry groups. This substantial increase of shipments in the durable goods industries was led by the transportation equipment industries of 32.4 per cent, the non-metallic industries of 21.6 per cent, and the metal fabricating industries of 21.0 per cent. The other five durable goods industry groups had increases ranging from 10.0 per cent to 18.1 per cent. Within the non-durable goods industries which advanced by 11.2 per cent in March, relatively larger increases were recorded in the chemical and chemical products industries of 20.3 per cent, the tobacco industries of 17.8 per cent, the paper and allied industries of 15.7 per cent, and the miscellaneous manufacturing industries of 15.8 per cent. The petroleum and coal products industries and the knitting mills had relatively smaller increases of 3.3 per cent and 1.7 per cent respectively. All major industry groups also showed a certain amount of quarterly increases in shipments over their 1964 level, except the leather industries, the machinery industries and the metal fabricating industries; the tobacco industries registered the highest increase of 28.8 per cent as compared with the first quarter of 1964.

New orders received by manufacturers during March had increased 16.1 per cent from the revised estimate of \$2,518.9 million in February, but were up by only 1.0 per cent from the \$2,792.2 million estimated after seasonal adjustment.

Unfilled orders at the end of March increased by \$115.9 million to \$3,028.4 million which was 18.7 per cent higher than a year ago; \$112.6 million of this increase in March was attributable to the durable goods industry groups.

Inventories owned by manufacturers at the end of March totalling \$5,335.2 million were up by 0.8 per cent from \$5,294.4 million in February and were 7.5 per cent higher than the corresponding month in 1964. This moderate March accumulation occurred almost entirely in the durable goods industries which rose 1.5 per cent while the non-durable industries increased only 0.1 per cent. Both the seasonally adjusted and unadjusted estimates showed increases in total inventories held of 0.9 per cent in March from the level of \$5,524.9 million and \$5,590.2 million in February. This rise of inventories after seasonal adjustment, was reflected more in raw materials and goods in process and less in finished products with increases of 1.4 per cent, 1.0 per cent and 0.2 per cent respectively. Among the major industry groups, the tobacco industries reported the highest increase in stocks at 9.8 per cent; declines in six industry groups were slightly more than offset by the increases of others.

The ratio of finished product inventories-to-shipments of manufacturing industries declined from 0.77 to 0.67 while the ratio of inventories owned-to-shipments declined from 2.16 in February to 1.90 in March.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups are listed below.

A single asterisk (\*) preceding the individual industry title indicates that the industry is shown separately in Table 4 - Statistics for Selected Individual Industries.

A double asterisk (\*\*) preceding the individual industry title indicates that the industry is shown in Table 4 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates.

### CONCEPTS

Shipments - (Tables 1 to 4) - represent an estimated projection, on a monthly basis, of the latest available Census of Manufactures values.

New Orders - (Tables 2 and 3) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 and 3) - are defined as orders on books at the end of the period stated. That is, they cover orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 4) - represents the estimated book value of inventory owned by manufacturers in connection with the manufacturing operations of the establishment covered whether held at plant or elsewhere, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture less the value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 and 3) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 and 3) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of inventories held under progress payments arrangements.

Inventory Components - (Tables 2 and 3) - Raw Materials, Goods in Process, and Finished Products are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is not longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Groupings - The Standard Industrial Classification groupings of industries used in Tables 3 and 4 are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups will be found on page 40 of the bulletin.

### SOURCES

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Four industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island, Yukon and Northwest Territories are not published separately. They are included in the total for Canada.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Manufactures totals due to inventory adjustments for certain industries where Census of Manufactures data represent production rather than shipments values.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders and, therefore, of New Orders for industries in major groups - 1, 2, 6, 8, 9, 10, 17, 18 and 19 is small and sample coverage is not adequate to provide separate estimates for them.

(3) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 5. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (3), table 3.
