ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED AND ORDERS IN ALL MANUFACTURING INDUSTRIES

Shipments of manufacturers in June advanced to a preliminary estimate of \$2,944.9 million, an increase of 4.1 per cent from the revised estimate of \$2,829.8 million in May. After seasonal adjustment the increase of shipments in June was 0.5 per cent higher than that of last month, and was 8.7 per cent over the corresponding month in 1964. Cumulative shipments in the first half of 1965 amounting to \$16,268.9 million, were 5.6 per cent higher than the value of \$15,406.2 million in the same period a year ago.

June shipments of non-durable industries rose 2.3 per cent to \$1,522.2 million from the revised value of \$1,487.5 million in the previous month; relatively higher increases of 12.4 and 10.7 per cent were reported by the tobacco industries and the knitting mills, and a decrease of 9.0 per cent was shown by the clothing industries. Durable goods producers' shipments reached \$1,422.8 million in June which was 6.0 per cent higher than \$1,342.3 million in May; more substantial advances of 16.8, 14.7 and 11.2 per cent were achieved by the wood industries, the metal fabricating industries, and the non-metallic mineral products industries respectively. As compared with the value of shipments in June 1964, durable and non-durable goods industries were up 13.5 per cent and 3.8 per cent this month; nearly all the major industry groups showed increases, ranging from 0.8 to 17.5 per cent, except the leather industries, the petroleum industries and the textile industries.

New orders received by manufacturers during June were valued at a preliminary estimate of \$2,973.6 million which was 5.9 per cent above the value of the month before, and 8.7 per cent over the value in June the year earlier; seasonally adjusted, manufacturers' new orders showed an increase of only 2.5 per cent for the month. Durable goods producers' new orders in June were up by 8.7 per cent to \$1,405.0 million from the last month's level of \$1,292.9 million, and 10.9 per cent higher than the comparable level of the year before.

The backlog of unfilled orders at the end of June totalled \$3,063.7 million, a small increase of 0.9 per cent over \$3,035.0 million in May, and 17.5 per cent higher than the value in June 1964. Average month-end unfilled orders of manufacturers in the January - June period was 16.7 per cent above the level of the same period of last year. At the end of June, unfilled orders of durable goods producers declined 0.7 per cent from May due to the higher than incoming business increase in shipments, whereas producers of non-durable goods reported an increase of 8.9 per cent over the level in May. Seasonally adjusted estimate of manufacturers' unfilled orders in June was 1.7 per cent higher compared with that of last month.

Total inventories held by manufacturing industries at the end of June was slightly lower by 0.4 per cent to \$5,608.5 million from the \$5,629.4 million estimate in May, with the more prominent decrease shown in the non-durable industries. Manufacturers' owned inventories in June also showed a fractional decline to \$5,327.4 million from \$5,339.0 million at the end of the previous month; the small decrease in non-durable goods industries was partially offset by a slight increase in durable goods industries. In comparison with the level at the end of June of last year, both

inventories owned and inventories held had increases of 7.1 and 6.5 per cent respectively this month. After allowance for seasonal variation, inventories held at the end of June were up by 0.4 per cent compared with the level in the previous month with increases of 0.3 to 0.8 per cent shared by raw materials, finished products, and goods in process. Without seasonal adjustment, a more significant decrease of 2.9 per cent in inventories owned was experienced by the petroleum and coal products industries, and the highest increase of 2.6 per cent was reported by the clothing industries.

In June, the ratio of inventories owned to shipments dropped to 1.81 from 1.89 of last month while the ratio of finished products inventories to shipments declined from 0.66 to 0.63 in this month.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups are listed below.

A single asterisk (*) preceding the individual industry title indicates that the industry is shown separately in Table 4 - Statistics for Selected Individual Industries.

A double asterisk (**) preceding the individual industry title indicates that the industry is shown in Table 4 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates.

CONCEPTS

Shipments - (Tables 1 to 4) - represent an estimated projection, on a monthly basis, of the latest available Census of Manufactures values.

New Orders - (Tables 2 and 3) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 and 3) - are defined as orders on books at the end of the period stated. That is, they cover orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 4) - represents the estimated book value of inventory owned by manufacturers in connection with the manufacturing operations of the establishment covered whether held at plant or elsewhere, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture less the value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 and 3) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 and 3) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of inventories held under progress payments arrangements.

Inventory Components - (Tables 2 and 3) - Raw Materials, Goods in Process, and Finished Products are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is not longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Groupings - The Standard Industrial Classification groupings of industries used in Tables 3 and 4 are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups will be found on page 40 of the bulletin.

SOURCES

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Four industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island, Yukon and Northwest Territories are not published separately. They are included in the total for Canada.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Manufactures totals due to inventory adjustments for certain industries where Census of Manufactures data represent production rather than shipments values.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders and, therefore, of New Orders for industries in major groups - 1, 2, 6, 8, 9, 10, 17, 18 and 19 is small and sample coverage is not adequate to provide separate estimates for them.

(3) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 5. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (3), table 3.
