# ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED AND UNFILLED ORDERS IN ALL MANUFACTURING INDUSTRIES

## TREND SUMMARY

v

Manufacturers' shipments in January, according to the preliminary estimate, were valued at \$2,804 million, a drop of 7.5 per cent from the revised estimate of \$3,031 million in December last, but a substantial increase of 15.5 per cent compared with the value in January 1965. January shipments, seasonally adjusted at \$3,097 million, were, however, 0.9 per cent higher than the preceding month. New orders received during January dropped 5.7 per cent from December to \$2,858 million which was 11.6 per cent above the value in January a year earlier. Unfilled orders at the end of January rose 1.7 per cent to \$3,210 million from \$3,156 million in December; the rise in January, however, was less than the expected seasonal increase as the seasonally adjusted backlogs for the month declined by 3.4 per cent from \$3,280 million to \$3,169 million. The end-of-January inventories owned showed fractionally higher levels than December both in the seasonally adjusted and the unadjusted estimates.

Shipments of durable goods manufacturers were valued at \$1,364 million in January, lower than the revised estimate of \$1,501 million on December by 9.1 per cent but significantly higher, by 23.3 per cent, than the \$1,106 million in January of last year. At the preliminary estimate of \$1,440 million, non-durable goods producers' January shipments also showed a decrease of 5.9 per cent from the month before and an increase of 9.0 per cent over the corresponding month a year earlier. Nearly all major industry groups shared the seasonal decline of shipments from December to January. Relatively marked decreases in the value of shipments were reported by the non-metallic minerals industries (-23.8 per cent), the furniture and fixtures industries (-23.5 per cent), and the electrical products industries (-20.1 per cent). Seasonal influences were less apparent than usual in January 1966 shipments values in the machinery industries, in sharp contrast with the movement last January when the decline from December was the highest recorded. Consequently the comparison of shipments this month with January last year shows a very large increase. January shipments in the machinery industries declined 5.5 per cent from the record high in December. All major industry groups registered higher values of shipments in January compared with the same month of the previous year, with relatively large increases recorded in the transportation equipment industries (30.9 per cent), the metal fabricating industries (29.0 per cent) and the rubber industries (26.0 per cent).

At the estimated value of \$3,210 million at the end of January, manufacturers' unfilled orders were 16.4 per cent above the level in January 1965; this higher level of unfilled orders was shared by both the durable and the non-durable goods manufacturers which reported increases of 16.0 per cent and 18.2 per cent respectively. It should be noted that the value of month-end unfilled orders had been consistently higher than monthly shipments by rates ranging from 1.4 per cent to 10.7 per cent from January of last year to January 1966, based on the seasonally adjusted figures. In the durable goods industries, new orders which declined 5.5 per cent in January were 15.6 per cent over the January value in 1965.

Manufacturers' inventories owned and inventories held at the end of January amounted to \$5,761 million and \$6,058 million, up 10.9 per cent and 9.7 per cent

respectively compared with the levels at the end of January last year. Seasonally adjusted inventories held at the end of January were only 0.1 per cent above the level in December; small increases in raw materials and finished products were partly offset by the decrease in goods in process inventory. Inventories owned in the durable goods industries in January rose 0.3 per cent from December to \$2,850 million which was 17.2 per cent above the level of January 1965. Non-durable goods manufacturers' stocks were down 0.2 per cent from December but up 5.3 per cent compared with the corresponding month a year ago. Comparatively large accumulation of inventories owned in January were recorded in the miscellaneous industries of 3.2 per cent, the wood industries and the non-metallic minerals industries of 2.0 per cent, while the foods and beverages industries reported the largest decrease of 2.3 per cent in January. All industry groups reported higher level of inventories owned in January this year than last year except the petroleum and coal products industries which showed a slight decrease.

Based on the seasonally unadjusted estimate in January, value of inventories owned was 2.05 times the value of shipments compared with 1.90 in December, and the ratio of finished products inventory to shipments was also up from 0.69 to 0.71.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups are listed below.

A single asterisk (\*) preceding the individual industry title indicates that the industry is shown separately in Table 4 - Statistics for Selected Individual Industries.

A double asterisk (\*\*) preceding the individual industry title indicates that the industry is shown in Table 4 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The three digit number preceding the individual industry title indicates the S.I.C. group code.

The four digit number preceding the individual industry title indicates the S.I.C. sub group code.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates.

### CONCEPTS

Shipments - (Tables 1 to 4) - represent an estimated projection, on a monthly basis, of the latest available Census of Manufactures values.

New Orders - (Tables 2 and 3) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 and 3) - are defined as orders on books at the end of the period stated. That is, they cover orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 4) - represents the estimated book value of inventory owned by manufacturers in connection with the manufacturing operations of the establishment covered whether held at plant or elsewhere, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture less the value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 and 3) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 and 3) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of inventories held under progress payments arrangements.

Inventory Components - (Tables 2 and 3) - Raw Materials, Goods in Process, and Finished Products are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is not longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments/inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Groupings - The Standard Industrial Classification groupings of industries used in Tables 3 and 4 are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups will be found on page 40 of the bulletin.

### SOURCES

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Two industries are included in the total shipments estimates by using data available from other Bureau series, and they are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island, Yukon and Northwest Territories are not published separately. They are included in the total for Canada.

TABLE 3. - (1) The value of Unfilled Orders and, therefore, of New Orders for industries in major groups - 1, 2, 6, 8, 9, 10, 17, 18 and 19 is small and sample coverage is not adequate to provide separate estimates for them.

(2) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 5. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (2), table 3.
