ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED AND UNFILLED ORDERS IN ALL MANUFACTURING INDUSTRIES

TREND SUMMARY

The preliminary estimate of manufacturers' shipments in November reached \$3,306 million, an increase of \$22 million over the revised estimate for October. After adjustment for trading-day and seasonal influences, November shipments showed a rise of 1.5 per cent from \$3,122 million to \$3,170 million. The value of new orders booked during November which fell \$30 million from October to \$3,278 million was less than the value of shipments for the month. Consequently, the backlog of orders in November also dropped \$28 million to the preliminary estimate of \$3,715 million. Seasonally adjusted, both estimates of new orders and unfilled orders in November were slightly down from the previous month. Manufacturers' November owned inventories edged up slightly by 0.2 per cent, or 0.5 per cent seasonally adjusted, following decreases in the past two months. Inventory holdings of goods in process and finished products in November, seasonally adjusted, rose over one per cent while raw materials fell fractionally.

Total manufacturing shipments for the January-November period in 1967 amounted to \$34,328 million, 2.1 per cent higher than the corresponding period a year earlier, with about 78 per cent of the rise occurring in the non-durable goods industries. This increase in manufacturing shipments was rather low compared with the 9.8 per cent and 8.5 per cent recorded in the same period of 1966 and 1965 respectively.

November shipments of non-durable goods showed a decline of \$41 million from October, attributable mainly to the decreases in the foods and beverages, the chemical and chemical products, and the rubber industries. Durable goods manufacturers on the other hand, reported a total gain of \$63 million, or 4.3 per cent in shipments, to a new record in 1967 of \$1,525 million; decreases in many industry groups were more than offset by the substantial increases in the transportation equipment industries (\$71 million) and the primary metal industries (\$14 million). In the transportation equipment industries, the significant increase in shipments from October to November was caused chiefly by the motor vehicle and the parts and accessories industries which reported large seasonal rises. Manufacturers of copper and alloy rolling, casting and extruding products also showed a substantial \$8 million or 39.2 per cent increase in November shipments, and was the main reason for a 5.4 per cent gain in the primary metals industry group.

New orders received by durable goods industries in November were up just 0.8 per cent from the month before; this small increase was outweighed by a substantial drop in the non-durable goods industries. Outstanding orders of durable goods were off 0.7 per cent to \$3,264 million at the end of November, representing 2.14 times the value of shipments for the month.

November inventories owned by durable goods producers remained at about the October level. Inventory changes among the several industry groups largely offset each other in November. Owned stocks in non-durable goods industries, however, showed a small rise of 0.3 per cent; more prominent accumulations were recorded in the tobacco industries and the miscellaneous manufacturing industries.

Manufacturer - owned inventories were equal to 2.03 times, or after seasonal adjustment, 2.13 times the value of shipments for the month. The comparable ratios for October were 2.04 and 2.16. The ratio of finished products inventory to shipments remained at 0.74, unchanged from October; the ratio based on the seasonally adjusted estimates was 0.78, compared with 0.79 in the previous month.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups are listed below.

A single asterisk (*) preceding the individual industry title indicates that the industry is shown separately in Table 4 - Statistics for Selected Individual Industries.

A double asterisk (**) preceding the individual industry title indicates that the industry is shown in Table 4 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The three digit number preceding the individual industry title indicates the S.I.C. group code.

The four digit number preceding the individual industry title indicates the S.I.C. sub group code.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates.

CONCEPTS AND SOURCES

The monthly bulletin of manufacturers' shipments, inventories and orders publishes values of monthly shipments and inventories and unfilled orders on the books at the end of the month estimated on the basis of the latest census of manufactures by monthly returns from representative establishments in each industry. The December 1966 bulletin is the first issue in which the census base of 1964 is used. Values for 1962, 1963 and 1964 are derived directly from each annual census; values for 1965 and 1966 are projected from the 1964 census. The aggregate monthly shipments for each year which is based directly on a census should equal published census values. The year end inventory values published here are for December and thus will differ from the year end census values to the extent which establishments have reported to the census on a fiscal year ending at a date other than December 31. Unfilled orders on books are published for industries where orders are part of the accounting record.

The monthly survey covers approximately 6,500 establishments. The survey accepts combinations of establishments within companies on a monthly basis to accommodate monthly accounting records and also accepts estimates of inventories and orders values if actual records are not available. Many establishments in several industries take inventory only annually and keep no record of orders as orders. The number of firms reporting actual inventory values is approximately two-thirds of the total reporting shipments; approximately one third report unfilled orders.

The monthly sample of establishments in the survey is revised annually in accordance with the census base and the list is kept constant between revisions. The identity of an establishment is also retained between revisions. This is done because, simply stated, the estimates are calculated by multiplying the sum of monthly reported values for each industry in each province by the ratio of the establishments in the sample to the census total for the same unit. Separate ratios are calculated for shipments, inventories and unfilled orders. If a report is not received in time for the monthly compilation an estimated value is written in. Since each month is published first as a preliminary value monthly returns are accepted up to the time the machine compilation is begun and late returns for the month will be used one month later in the revised estimate. Returns received after beginning the compilation for the next month (i.e. January returns received after the February compilation is begun) are not used in the estimates until the following annual revision.

Thus changes in the monthly series will arise from changes in the identity of establishments between censuses, and from the substitution of reported for estimated values.

The inventory values published are shown both for total inventory owned and total inventory held by an establishment. The difference between these values is the amount of inventory financed by progress payments as the work proceeds on goods being produced. Since some goods manufactured are held as in-progress inventory for a considerable time the book value of manufacturers' inventory may build up and, to the extent that this has been covered by the payment received, is higher than the manufacturers' investment in inventory. Both the amount of the manufacturers' investment in inventories and the amount of inventory held by manufacturers is of economic interest. It is also interesting to distinguish between inventory held by the degree of fabrication which has taken place. Consequently firms are asked to report their stocks by level of fabrication: raw materials and components; work in progress and finished products.

Unfilled orders cover orders received but not yet shipped, or treated as a sale, irrespective of work done on them or stocks from which they can be filled. Establishments in many industries do not maintain order books but fill orders as they are received from stocks. Most establishments which do maintain order books strike a value of unfilled orders on their books at the end of each accounting period. New orders received, although an estimate of considerable interest to economists as an indication of the rate at which new business is being received, is not often available from accounting records. Consequently the estimate for new orders published here is derived by industry, by province from the relationship between unfilled orders and shipments.

The definitions, classifications and groupings are taken from the census of manufactures.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island, Yukon and Northwest Territories are not published separately. They are included in the total for Canada.

TABLE 3. - (1) The value of Unfilled Orders and, therefore, of New Orders for industries in major groups - 1, 2, 6, 8, 9, 10, 17, 18 and 19 is small and sample coverage is not adequate to provide separate estimates for them.

(2) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 5. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (2), table 3.
