# ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED AND UNFILLED ORDERS IN ALL MANUFACTURING INDUSTRIES

## TREND SUMMARY

At the preliminary estimates of \$3,253 million and \$3,181 million, manufacturers' shipments and new orders in September advanced more than seasonally from the revised August estimates of \$3,088 million and \$3,069 million respectively. With a seasonally adjusted increase of 0.6 per cent the value of shipments was higher than that of the previous month for the fourth consecutive month. Manufacturers' new orders booked during September, seasonally adjusted, were 2.8 per cent above the estimate for August but unfilled orders, dropping \$72 million to \$3,756 million during the month were fractionally lower after adjustment for seasonal influences. Total manufacturing inventory holdings in September dropped to \$7,105 million from the new high level of \$7,157 million in August, with all components showing decreases and with half of the decline occurring in inventory held but not owned. Seasonally adjusted, the estimate of stocks owned by manufacturers at the end of September was off 0.6 per cent from the previous month after rising steadily for the previous six months.

More than nine-tenths of the 5.3 per cent increase in manufacturing shipments in September originated in durable goods industries (11.6 per cent). Substantial advances, mainly reflecting the usual seasonal pattern, were recorded in the transportation equipment industries (39.9 per cent) and the electrical products industries (19.2 per cent). At the estimate of \$104 million, machinery manufacturers also reported a sizable rise of 10.6 per cent from August but still 7.7 per cent lower than in September 1966. Within non-durable goods manufacturing, which rose only 0.7 per cent from August to September, changes among the major industry groups were rather offsetting. Relatively more noticeable increases were shown in rubber, chemical and chemical products, and miscellaneous industries, and decreases recorded in the tobacco products and clothing industries.

Total manufacturing shipments from January to the end of September this year reached \$27,731 million, 2.2 per cent ahead of the \$27,143 million estimate of last year. For the same nine-month period, the largest gain in shipments was in the tobacco products (20.7 per cent) and transportation equipment (10.6 per cent) industry groups, while the more prominent declines appeared in the clothing industries (-10.4 per cent) and the non-metallic mineral products industries (-10.1 per cent).

New orders received by durable goods manufacturers amounted to \$1,383 million in September, 6.2 per cent higher than the estimate for August and 2.0 per cent above September a year earlier. Unfilled orders in the durable goods industries for September receded 1.9 per cent to \$3,290 million from \$3,355 million in the previous month. This decrease in the backlogs of durable goods, accounting for about 90 per cent of the total manufacturing backlogs decline in the month, was attributable largely to the substantial falls in the primary metal and the transportation equipment industries.

More than three quarter of the 0.7 per cent decrease in total manufacturing inventories held in September occurred in the durable goods industries which reported a decline of 1.2 per cent with decreases showing in all the three inventory components. The drop in their goods in process inventory, however, reflected almost entirely the fall in stocks held but not owned. In the non-durable goods manufacturing, a drop in raw materials slightly outweighed increases in goods in process and finished products.

Except for the foods and beverages, the paper and allied products, the primary metal, and the transportation equipment industries, all major industry groups reported decreases in owned stocks from August to September. Tobacco products manufacturers reported the largest relative decline of 4.1 per cent to 195 million but this was, nonetheless, 22.5 per cent above the level at the same time last year.

In terms of contribution, other substantial decreases in the metal fabricating and electrical products industries were offset by increases in the foods and beverages and the transportation equipment industries.

Ratios of manufacturers' owned inventories to shipments and finished products to shipments declined to 2.06 and 0.75 in September from 2.18 and 0.80 respectively in August. Seasonally adjusted ratios at 2.11 and 0.77 were also slightly down from those of the previous month.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups are listed below.

A single asterisk (\*) preceding the individual industry title indicates that the industry is shown separately in Table 4 - Statistics for Selected Individual Industries.

A double asterisk (\*\*) preceding the individual industry title indicates that the industry is shown in Table 4 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The three digit number preceding the individual industry title indicates the S.I.C. group code.

The four digit number preceding the individual industry title indicates the S.I.C. sub group code.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates.

CONCEPTS AND SOURCES

The monthly bulletin of manufacturers' shipments, inventories and orders publishes values of monthly shipments and inventories and unfilled orders on the books at the end of the month estimated on the basis of the latest census of manufactures by monthly returns from representative establishments in each industry. The December 1966 bulletin is the first issue in which the census base of 1964 is used. Values for 1962, 1963 and 1964 are derived directly from each annual census; values for 1965 and 1966 are projected from the 1964 census. The aggregate monthly shipments for each year which is based directly on a census should equal published census values. The year end inventory values published here are for December and thus will differ from the year end census values to the extent which establishments have reported to the census on a fiscal year ending at a date other than December 31. Unfilled orders on books are published for industries where orders are part of the accounting record.

The monthly survey covers approximately 6,500 establishments. The survey accepts combinations of establishments within companies on a monthly basis to accommodate monthly accounting records and also accepts estimates of inventories and orders values if actual records are not available. Many establishments in several industries take inventory only annually and keep no record of orders as orders. The number of firms reporting actual inventory values is approximately two-thirds of the total reporting shipments; approximately one third report unfilled orders.

The monthly sample of establishments in the survey is revised annually in accordance with the census base and the list is kept constant between revisions. The identity of an establishment is also retained between revisions. This is done because, simply stated, the estimates are calculated by multiplying the sum of monthly reported values for each industry in each province by the ratio of the establishments in the sample to the census total for the same unit. Separate ratios are calculated for shipments, inventories and unfilled orders. If a report is not received in time for the monthly compilation an estimated value is written in. Since each month is published first as a preliminary value monthly returns are accepted up to the time the machine compilation is begun and late returns for the month will be used one month later in the revised estimate. Returns received after beginning the compilation for the next month (i.e. January returns received after the February compilation is begun) are not used in the estimates until the following annual revision.

Thus changes in the monthly series will arise from changes in the identity of establishments between censuses, and from the substitution of reported for estimated values.

The inventory values published are shown both for total inventory owned and total inventory held by an establishment. The difference between these values is the amount of inventory financed by progress payments as the work proceeds on goods being produced. Since some goods manufactured are held as in-progress inventory for a considerable time the book value of manufacturers' inventory may build up and, to the extent that this has been covered by the payment received, is higher than the manufacturers' investment in inventory. Both the amount of the manufacturers' investment in inventories and the amount of inventory held by manufacturers is of economic interest. It is also interesting to distinguish between inventory held by the degree of fabrication which has taken place. Consequently firms are asked to report their stocks by level of fabrication: raw materials and components; work in progress and finished products.

Unfilled orders cover orders received but not yet shipped, or treated as a sale, irrespective of work done on them or stocks from which they can be filled. Establishments in many industries do not maintain order books but fill orders as they are received from stocks. Most establishments which do maintain order books strike a value of unfilled orders on their books at the end of each accounting period. New orders received, although an estimate of considerable interest to economists as an indication of the rate at which new business is being received, is not often available from accounting records. Consequently the estimate for new orders published here is derived by industry, by province from the relationship between unfilled orders and shipments.

The definitions, classifications and groupings are taken from the census of manufactures.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island, Yukon and Northwest Territories are not published separately. They are included in the total for Canada.

TABLE 3. - (1) The value of Unfilled Orders and, therefore, of New Orders for industries in major groups - 1, 2, 6, 8, 9, 10, 17, 18 and 19 is small and sample coverage is not adequate to provide separate estimates for them.

(2) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 5. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (2), table 3.

Dear Sir,

I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the above matter.

The same has been referred to the proper authorities for their consideration.

I am, Sir, very respectfully,  
Yours truly,
