Industries included in groups according to an economic-use classification, Table 4 ..... 130
Concepts and Merhods ..... 132

PROPORTIONS OF SHIPMENTS IN ALL MANUFACTURING INDUSTRIES BY AN ECONOMIC USE GROUPING

## REVISIONS TO THE SERIES

Along with a general revision of the monthly series of shipments, inventories and orders from January 1965 to the turrent month, published in this issue, some other adjustments have been made in the series dating back to 1961 . The general :svision of the series from 1965 to date results from the adoption of 1965 census bencharks from which current monthly bntimates are now projected. Previous estimates were projected from 1964 census data.

The principal change in the 1961 series from previously published figures is in the values for the amelting and refining industry. The 1961 estimates for that industry are now comparable in definition to the estimates for 1962 and later years wherein the value of metal produced by smelting and refining processes that are part of integrated mining companies is no longer considered manufacturers' shipments. Additional other minor adjustments have been made throughout the series to bring them in line with published census data.

Several factors contributed to the revisions for each month from January 1966 to date although, in general, the month-to-month trends are not signlficantly changed. Adjustment to 1965 census base values meant similar corrections were extended through all succeeding months. These, in turn, should be closer to the actual values that will be compiled by the census for the respective years. The number of firms that report has been increased substantially in some industries in the past two years. Analysis of 1965 census data has resulted in re-classification of some establishments among industries or to other activities such as trade or construction and values have been incorporated from sampled establishments that responded too late for their valuea to be included in the regulat compilations.

As a result of 1965 census reports analysis a number of establishments were transferred from the syntheric textiles industry to the carpet, mat and rug industry to bring about a relatively substantial increase in the estimated shipments for the latter industry. Certain other adjustments to both industry and provinclal totals for recent months result from being able for the first time to measure current activity of some individual establishments in some industries and provinces. In these cases values received heretofore in a combined company report, were subject to an a priori division, based on census data, for allocation to the appropriate place in the sample frame.

This publication contains estimates of shipments in major group 11, the printing and publishing industry from 1964 to date and of inventories in that industry for the months from January 1967 to date. With publication of this series, values for all of the 20 major groups of manufacturing industries in the 1960 standard industrial classification become available on a current basis. In addition, the data for individual Industries now include estimates of current values for all the sub-group components of major group 19, chemical and chemical products industries. These additional individual industries now shown are manufacturers of printing inks, industrial chemicals, and other chemical industries not elsewhere specified. The latter values include those for manufacturers of explosives and ammuntion.

## THE NEW ECONOMIC USE GROUPINGS

Publication of manufacturers' shipments, inventories and orders grouped according to an economic use classification Whs temporarily suspended in 1963 when the monthly survey was adjusted to the 1960 base which had been revised to the new Jandard Industrial Classification and the new establishment concept. The separate industries as revised under the Standard I:dustrial classification have now been re-grouped into an economic use classification that is published in this issue of the Enthly report with time series from January I961 to date,

The main purpose of the classification is to facilitate analysis of trends by grouping the individual manufacturing industries according to the main use of their products. The 1960 standard Industrial Classification is, from this point of view, an improvement over the old classification in that it is based on the underlying criteria of the process carried on and the end - product produced rather than on the basic raw material used. Extensive use of the purpase or use of products in the new industrial classification has brought many individual industries more closely in line with the economic use concept. However, reliance on individual industry data may involve too much detail and some industry data may not be ayailable. Nor is the use of major industry groups very satisfactory because too many diverging trends of the demand factors are concealed. For example, industry groups such as food and beverages, machinery and transportation equipment classified under the criterion of end products, consist of some industries whose main products are also classifiable to intemediate goods and supplies or to export goods. In the same wsy some major industry groups classified on the basis of chief component material such as leather goods or wood include some individual industrles that produce mainly consumer goods and some that produce largely for export. Therefore, an economic use classification based on a similarity in the demand factors which affect industries is a useful addition to the all industry total and to the major industry group levels.

In revising the economic use classification, the groupings of consumer goods, capital goods and construction goods have been made to agree with the concepts of the rational accounts as closely as possible.

This classification of manufacturing industries into different economic use groups presents some prablems in that it involves the identification of the nature and uses of the products of each industry and the assigning of each individual industry to one specific group. In the first place, because specific items of output may be used for many different purposes, many items may be regarded as final products or as intermediate goods. An end-product may be used for consumption, for investment or for export. Similarly, intermediate goods may be used for further processing, as component parts, for construction or for export. Secondly, according to the 1960 Standard Industrial Classification, each establishment is assigned to one of the industries on the basis of its principal product or activity. Each industry in turn is classified in terms of its principal products and assigned to a specific major industry group. Only in comparatively new industries is che output of a typical establishment confined to one commodity. Thus, within most industries, the output includes a variety of comodities of various economic uses. So, while on the basis of the chief use of their products, some industries appear to fall quite clearly into specific groups, classification of others is not as obvious because of the variety of commodities produced.

The criterion for this classification of economic use groups was the main use of the products produced or handled. An industry was assigned to a particular group when more than half of its products fell into the category or when slighty less than half of the products belonged to a group while the remainder was scattered over two or more groups. In some industries, w:alled analysis of the various uses of comodities produced was necessary before classification was made. The value of Httpments of the 1964 census of manufactures was the basis for commodity breakdow. In many cases, the 1961 channel of dis= E: ibution of the Manufacturing Industries was used in addition to other sources. It should be noted that groupings of these fndustries may be revised in the future when the main use of products has changed.

 eliminating the former sub-group of "Unclassifiable Industrias"

 Goods Industries". The former sub-groups of "Heavy Transportation Equipment industries" and "Machinery industries" are now combined under the single heading, 'Machinery and Equipment Industries' representing the final products of capital goods.

Individual industries formerly classified to the miscellaneous industries sub-group of 'Motor Vehicles and Related Industries" have been assigned to consumers' goods or intermediate goods. At the same time, these industries are also shown as a separate supplementary category. The groupings of construction goods, intermediate goods and supplies and largely export goods industries remain the same as before although their industry content has been changed to some extent.

While the groupings of the economic use groups have been built up in line with the concepts of the national accounts, they do not all correspond exactly with those sectors of the accounts. Because a great number of the individual industries are published separately, it is possible that some modification in the composition of groupings can be made by individual users for specific analytical purposes.

lisetis for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned Sts fontmote (2), page 57.

## INDUSTRIAL GROUPING:

The three digit number preceding the individual industry title indicates the $S . I . C$. group code,
The four digit number preceding the individual industry title indicates the S.I. C. sub group code.

## STANDARD INDUSTRIAL CLASSIFICATION

Industrial Groupings shown in Tables 3 and 6

| S.I.C. <br> Code | Major Group 1. Foods and Beverages | $\begin{gathered} \text { S.I.C. } \\ \text { Code } \\ \hline \end{gathered}$ | Major Group 5. Textile Industries - Concluded |
| :---: | :---: | :---: | :---: |
| 1011 | Slaughtering and Meat Packing Plants | 211 | Fibre Preparing Mills |
| 1012 | Animal Oils and Fats Plants | 212 | Thread Mills |
| 1013 | Sausage and Sausage Casing Manufacturers | 213 | Cordage and Twine Industry |
| 103 | Poultry Processors | 214 | Narrow Fabric Mills |
| 1051 | Butter and Cheese Plants | 215 | Pressed and Punched Felt Mills |
| 1053 | Pasteurizing Plancs | 216 | Carpet, Mat and Rug Industry |
| 1055 | Condenseries | 218 | Textile Dyeing and Einishing Plants |
| 1056 | Ice Cream Manufacturers | 219 | Linoleum and Coated Fabrics Industry |
| 107 | Process Cheese Manufacturers | 221 | Canvas Products Industry |
| 111 | Fish Products Industry | 223 | Cotcon and Jute Bag Industry |
| 112 | Fruit and Vegetable Canners and Preservers | 2291 | Automobile Fabric Accessory Manufacturcrs |
| 123 | Feed Manufacturers | 2292 | Embroidery, Pleatiag and Hemstitchins Nanci me: |
| 124 | Flour Mills | 2299 | Miscellaneaus Textiles Indusiry, 1.8 .5. |
| 125 | Breakfast Cereal Manufacturers |  |  |
| 128 | Biscuit Manufacturers |  |  |

$\frac{\text { Major Group 11. Printing, Publishing and Allied }}{\text { Industries }}$
Conmercial Printing
Plate Making, Typesetting and Trade Bindery Plants
Publishing Only
Printing and Publishing

Major Group 12. Primary Metal Industries
Iron and Steel M111s
Steel Pipe and Tube Mills
Iron Foundries
Smelting and Refining
Aluminum Rolling, Casting and Extruding
Copper and Alloy Rolling, Casting and Extruding Metal Rolling, Casting and Extruding, n.e.s.

Major Group 13. Metal Fabricating Industries (except Machinery and Transportation Equipment Industries)

Boiler and Plate Works
Eabricated Structural Metal Industry
Ornamental and Architectural Metal Industry
Metal Stamping, Pressing and Coating Industry
Wire and Wire Products Manufacturers
Hardware, Tool and Cutlery Manufacturers
Heating Equipment Manufacturers
Machine Shops
Masellaneous Metal Fabricating Industries

Major Group 14. Machinery Industries (except Electrical Machinery)

Agricultural Implement Industry
Miscellaneous Machinery and Equipment
Manufacturers
Conmercial Refrigeration and Alr Conditioning
Equipment Manufacturers
Office and Stare Machinery Manufacturers

Major Group 15. Transportation Equipment Industries
Aircraft and parts Manufacturers
Motor Vehicle Manufacturers
Truck Body and Trailer Manufacturers
Motor Vehicle Parts and Accessories Mantacturers
Railroad Rolling Stock Industry
Shipbuilding and Repair
Boatbuilding and Repait
Miscellaneous Vehicle Manufacturers

## Major Group 16. Electrical Products Industries

Manufacturers of Small Electrical Appliances Manufacturers of Major Appilances (electric and non-electric)
Manufacturers of Household Radio and Television Receivers
Communications Equipment Manufacturers
Manufacturers of Electrical Industrdal Equipment
Battery Manufacturers
S. I.C

Code
$\frac{\text { Major Group 16. Electrical Products Induatries }}{\text { Concluded }}$
Manufacturers of Electric Whre and Cable
Manufacturers of Miscellaneous Electrical Producta

Major Group 17. Non-Metallic Mineral Product: Industries

Cement Manufacturers
Lime Manufacturers
Gypsum Products Manufacturezs
Concrete Products Manufacturers
Ready-Mdx Concrete Manufacturers
Clay Products Manufacturers (from domestic clays)
Clay Products Manufacturers (from imported clays)
Refractories Manufacturers
Stone Products Manufacturers
Mineral Wool Manufacturers
Asbestos Products Manufacturers
Glass Manufacturers
Glass Products Manufacturers
Abrasives Manufacturers
Other Non-Metallic Mineral Products Industries

## Major Group 18. Petroleum and Coal Products Industries

Petroleum Refining
Manufacturers of Lubricating Oils and Greases
Other Petroleum and Cosl Products Industries

Major Group 19. Chemical and Chemical Products Industry
Explosives and Ammunition Manufacturess
Manufacturers of Mixed Fertilizers
Manufacturexs of Plastics and Synthetic Reains
Manufacturers of Pharmaceuticals and Medicines
Paint and Varnish Manufacturers
Manufacturers of Soap and Cleaning Compounds
Manufacturera of Toilet Preparations
Manufacturers of Industrial Chemicals
Manufacturers of Printing Inks
Other Chemical Industries, n.e.s.

Major Group 20. Miscellaneous Manufacturing Induatries
Instrument and Related Products Manufacturera
Clock and Watch Manufacturers
orthopedic and Surgical Appliance Manufacturers
Ophthalmic Goods Manufacturers
Dental Laboratoriea
Jewellery and Silverware Manufacturers
Broom, Brush and Mop Industry
Venetian Blind Manufacturers
Plastic Fabricators, n.e.a.
Sporting Goods Industry
Toys and Games Industry
Fur Dressing and Dyeing Industry
Signs and Displays Industry
Button, Buckle and Fastener Industry
Candle Manufacturers
Hair Goods Manufacturers
Artificial Flowers and Feathers Manufacturers
Model and Pattern Manufacturers
Musical Instruments and Sound Recording Industry
Typewriter Supplies Manufacturers
Fountain Pen and Pencil Manufacturers
Smokers' Supplies Manufacturers
Stamp and Stencil (Kubber and Metal) Manufacturers
Statuary, Art Goods, Regalia and Novelty Manufacturers
Unbrella Manufacturers
Artificid Ice Manufacturers
Other Miscellaneous Industries

## Code

Other Intermediate Goods and Supplies Industries -

Fur Dressing and Dyeing Industry
Button, Buckle and Fastener Induatry
Halr Goods Manufacturers
Model and Patterns Manufacturers
Typewriter Supplies Manufacturers
Stamp and Stencil (rubber and metal)
Manufacturers
Artificial Ice Manufacturers
Other Miscellaneous Industries

Export-based Industries
Fish Products Industry
Distilleries
Shingle Mills
Sawmills and Planing Mills
Pulp and Paper Mills
Smelting and Refining
Agricultural Implement Industry
Abrasives Manufacturers

Supplementary Classification (Industries listed here have also been classified to the Economic Use Groupings listed above).

Automotive Products Industries
Rubber Tire and Tube Manufacturers
Automobile Fabric Accessory Manufacturers
Motor Vehicle Manufacturers
Truck Body and Trailer Manufacturers
Motor Vehicle Parts and Accessorles
Manufacturers
Battery Manufacturers
Petroleum Refining
Manufacturers of Lubricacing Oils and Greases

## CONCEPTS AND METHOIS

Inventories, shipments and orders values in this publications mantily projections of annual census of manufactures values based on returns from a representative sample of manufacturing establishments. The July 1968 data are the first to be based on the 1965 census. Values for years prior to and including 1965 are derived directly from the census and the aggregate of monthly shipments in those years should equal published census values. Because the monthly values subsequent to 1965 are projections, these totals are subject to adjustment when more recent census data become available. Year end inventory values published here are for December and differ from year end census values to the extent that fiscal year census reports show inventory values at dates other than December 31. Unfilled orders on books are published for industries where orders are part of the accounting records.

Monthly reports are sought from establishments whose shipments in total represent about 75 per cent of the aggregate shipments in each industry. For adequate estimation of total shipments by province, the sample is further streng thened by reports from representative establishments in each industry in each province. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combination reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. About two-thirds of the 8,000 firms now included in the sample report inventory values and about one-third report orders.

The estimates of shipments are calculated each month by multiplying the sum of the values in the current sample in each industry in each province by the ratio of similarly defined census aggregates to the sum of the values reported by the sample in the census year. Ratios of calculated December 31 values in the census year to the sum of the sample values of the same data are derived for inventories by component (i.e. raw materials and components, goods in process and finished products) and for unfilled orders. These ratios are applied to the current sample aggregates of the same items.

Inventory values are published for both total inventory owned and total inventory held by e: tablishments. The difference between these values is the amount of inventory financed by progress payments as work proceeds on goods being produced. Because some goods are held as in-progress invenctiy for a considerable time the book value of manufacturers' inventory may build up. To the extent that this has been covered by payments received, it will be higher than the manufacturers' investment in inventory. Both the amount of the manufacturers' investment in inventories and the amount of inventory held by manufacturers are of economic interest. It is also useful for derivation of production values in many industries and for other economic studies to measure the value of inventory held by the degree of fabrication that has taken place. Consequently firms are asked to report their stocks and estimates are made of the values by level of fabrication: raw materials and components, goods in progress and finished products.

Most establishments that maintain orders books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled as received from stocks on hand and orders books are, therefore, not generally maintained.

New orders are calculated to provide an indication of the rate at which new business is being received. The series, which is of considerable interest to economists and marketing people, is derived by adjusting current shipments by the changes between the opening and closing backlogs.

Because a constant sample is used between census revisions, values must be estimated for each establishment when response has not been received at compilation time. Calculation of revised estimates for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. Values received currently for months earlier than that for which revised figures have been published are used when all series are adjusted to new census benchmarks.

At the time of adjustments to census benchmarks, there may be substantial changes in the series. These may be caused by changes in the industrial classification of firms when their activity has been analysed for census purposes after preliminary estimates of industry totals have been made for this series; by inclusion of month-by-month responses received too late for use in calculating prelimiuary or revised data and by changes in accounting and, therefore, reporting methods by multi-establishment companies.
