Inventories shipments and orders in manufacturing industries

December 1981

Stocks, livraisons et commandes des industries manufacturières

Décembre 1981

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Shipments, Inventories and Orders Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, K1A 0V6 (telephone: 996-7008) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A 0V7, ou à Imprimerie et édition, Approvisionnement et Services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des livraisons, des stocks et des commandes,
Division des industries manufacturières et primaires,

Statistique Canada, Ottawa, K1A 0V6 (téléphone: 996-7008) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTICE TO USERS

Estimates in this publication are subject to revision to accommodate newly-received information. It is advisable always to use data from the most recent issue.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations qu'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Manufacturers' Shipments, Inventories and Orders, 1977-1981

Les livraisons, les stocks et les commandes des fabricants, 1977-1981

(Seasonally Adjusted — Chiffres désaisonnalisés)

(Ratio scale — Échelle semi-logarithmique)

HIGHLIGHTS

POINTS SAILLANTS

DECEMBER — 1981 — DÉCEMBRE

- Preliminary estimates show the value of new orders received in all Canadian manufacturing industries rose 2.2% in December 1981 to a seasonally adjusted level of \$15,436.5 million from the revised November value of \$15,097.9 million and was just fractionally below the October level of \$15,441.4 million. In durable goods industries, the preliminary estimate of \$6,489.5 million was up 9.6% from \$5,922.2 million (revised) in November, reflecting substantial increases in new orders received in primary metals, metal fabricating, machinery and transportation equipment industries; however there was a decline posted in electrical products industries. New orders in non-durable goods industries at \$8,947.0 million were 2.5% below the revised November level of \$9,175.9 million.
- Canadian manufacturers' shipments in December 1981 were estimated at \$15,434.7 million, seasonally adjusted, down 1.4% from the revised November estimate of \$15,659.7 million. Among the 20 major groups of industries, shipments were lower in 12 and higher in eight. Shipments of durable goods rose 0.4% to \$6,530.1 million from \$6,504.9 million in November. In this group, increases of \$65.1 million in metal fabricating industries and \$25.3 million in the non-metallic minerals group were almost offset by declines of \$43.4 million in electrical products industries and \$20.9 million in primary metals. A sharp \$154.9 million decline for petroleum refineries helped push non-durable goods shipments down 2.7% to \$8,904.6 million from \$9,154.8 million. Also contributing to the decline were shipments in food and beverage industries which were \$88.6 million lower in December.
- At the end of December, the total value of inventory owned by manufacturers, seasonally adjusted, was \$33,462.3 million, up 0.5% from \$33,306.5 million in November. The value of finished products inventory grew 1.5% during the month and raw materials 0.5% while goods in process were down 1.9%. Almost all the decline in the latter category was a reflection of deliveries of high value heavy equipment by establishments in the miscellaneous machinery industries.
- The total value of unfilled orders in manufacturing industries showed little change from November to December — the preliminary estimate of the December backlog was \$18,893 million, seasonally adjusted, compared with the revised value of \$18,891.2 million for November. A 0.2% decline in the unfilled orders of durable goods industries to \$16,527.9 million from \$16,568.5 million was offset by an increase of 1.8% for non-durable goods industries to \$2,365.1 million from \$2,322.7 million.
- Après désaisonnalisation, la valeur estimative des nouvelles commandes dans l'ensemble des industries manufacturières en décembre 1981 s'est établie à 15,436.5 millions de dollars, soit 2.2% de plus que le chiffre révisé de novembre (15,097.9 millions de dollars) et légèrement en dessous du niveau d'octobre (15,441.4 millions de dollars). Dans les industries de biens durables, la valeur estimative de 6,489.5 millions de dollars était supérieure de 9.6% au chiffre révisé de novembre (5,922.2 millions de dollars). L'augmentation des nouvelles commandes en décembre est due en grande partie à la hausse importante enregistrée dans les industries de première transformation des métaux, de fabrication de produits en métal, de fabrication de machines et de fabrication d'équipement de transport. Il y a eu une baisse dans les industries de fabrication de produits électriques. Après désaisonnalisation, la valeur estimative des nouvelles commandes dans les industries de biens non durables s'est établie à 8,947.0 millions de dollars soit une baisse de 2.5% par rapport au chiffre révisé de novembre (9,175.9 millions de dollars).
- Après désaisonnalisation, la valeur estimative des livraisons des industries manufacturières canadiennes en décembre 1981 s'est établie à 15,434.7 millions de dollars, soit une baisse de 1.4% par rapport au chiffre révisé de novembre (15,659.7 millions de dollars). Des baisses furent notées dans 12 des 20 groupes majeurs des industries manufacturières. Les livraisons des biens durables ont accusé une hausse de 0.4%, passant de 6,504.9 millions de dollars en novembre à 6,530.1 millions de dollars. Dans ce groupe, des hausses respectives de 65.1 millions de dollars et de 25.3 millions de dollars pour les livraisons des industries de fabrication de produits en métal et pour la fabrication de produits minéraux non métalliques furent compensées par des baisses de 43.4 millions de dollars et de 20.9 millions de dollars dans les industries de fabrication de produits électriques et de première transformation des métaux. Une baisse abrupte de 154.9 millions de dollars dans les livraisons des raffineries de pétrole a contribué à une baisse de 2.7% dans les livraisons des biens non durables passant de 9,154.8 millions de dollars à 8,904.6 millions de dollars. Les livraisons des industries des aliments et boissons ont aussi contribué à cette baisse en accusant une diminution de 88.6 millions de dollars en décembre.
- A la fin de décembre, la valeur désaisonnalisée des stocks possédés par les manufacturiers était de 33,462.3 millions de dollars, comparativement à 33,306.5 millions de dollars en novembre, ce qui représente une hausse de 0.5%. La valeur des produits finis a augmenté de 1.5% et celle des matières premières de 0.5%. La valeur des produits en cours est en baisse de 1.9%. Cette diminution est due surtout aux livraisons de matériel lourd de grande valeur par les fabricants de machines et d'équipement divers.
- Il n'y a eu aucun changement notable dans la valeur des commandes en carnet pour le secteur manufacturier de novembre à décembre. La valeur estimative désaisonnalisée des commandes en carnet était de 18,893 millions de dollars en décembre comparativement à 18,891.2 millions de dollars en novembre. Les commandes en carnet des biens durables ont accusé une baisse de 0.2%, passant de 16,568.5 millions de dollars à 16,527.9 millions de dollars. Cette baisse est compensée par une hausse de 1.8% dans les biens non durables, portant les commandes en carnet à 2,365.1 millions de dollars alors qu'elles étaient de 2,322.7 millions de dollars le mois précédent.

- The seasonally adjusted ratio of total inventory owned to shipments at the end of December was 2.17:1, compared to 2.13:1 as revised for November. While the December ratio marked a high since May 1975, it was below the past decade's peak level of 2.20:1 set in both January and March of that year. The ratio of finished products to shipments at the end of December was 0.73:1 compared to the revised value of 0.71:1 for November.
- The preliminary estimate of the total value of shipments in manufacturing industries for 1981 of \$188,295.4 million was 12.8% above the comparable value for the previous year of \$166,958.3 million. Largest relative growth took place in Alberta where 1981 shipments of \$12,987.7 million were 22.8% higher than in 1980. The smallest increase was recorded in British Columbia where declines in shipments of the forest products industries held the 1981 value to \$16,539.0 million, 4.2% above the 1980 total. (These preliminary estimates are subject to revision when data from the annual census of manufactures become available).
- Le rapport désaisonnalisé du total des stocks possédés aux livraisons est passé de 2.13:1 en novembre à 2.17:1 en décembre. Le rapport de décembre a augmenté pour rejoindre celui de mai 1975 se situe encore sous le niveau record des dix dernières années établi en janvier et mars 1975 (2.20:1). Le rapport des produits finis aux livraisons s'est élevé à 0.73:1 alors qu'il était de 0.71:1 en novembre.
- La valeur estimative des livraisons des industries manufacturières non désaisonnalisée pour 1981 a totalisé 188,295.4 millions de dollars contre 166,958.3 millions de dollars pour l'année précédente, soit une hausse de 12.8%. La plus grande augmentation relative a été enregistrée pour l'Alberta avec une hausse de 22.8% pour s'établir à 12,987.7 millions de dollars en 1981. Pour sa part, la Colombie-Britannique a connu la plus faible augmentation annuelle, soit 4.2% de plus qu'en 1980 pour s'établir à 16,539.0 millions de dollars. Cette légère augmentation est due surtout aux livraisons dans les industries du bois, qui ont connu une baisse en 1981. Les estimations préliminaires peuvent être révisées lorsque les données du recensement annuel des manufactures seront disponibles.

CONCEPTS AND METHODS

Inventories, shipments and orders values in this publication are monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the August 1981 publication are the first to be adjusted to the 1978 census. Values for years prior to and including 1978 have been benchmarked to the relevant census and the aggregate of monthly shipments in those years should correspond with published census values. In addition, the calendar year totals of shipments values have been summarily adjusted to conform with the preliminary census of manufactures totals of shipments for that year. Because the monthly estimates subsequent to 1978 are projections these totals are subject to adjustment when more recent census data become available. Inventory estimates for December, published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. In addition, some components of inventory are included in the monthly survey's benchmark value that may not be included in census inventories. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog is a normal part of the accounting procedure.

The population is divided into groups of large, medium and small establishments according to the total value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combination reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 12,000 establishments in the reporting panel.

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, work in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned are published. The difference, inventory held but not owned, is the value of progress payments received by manufacturers for partially completed items such as aircraft, ships or structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance or progress payments on manufacturers' books from total inventory, the value of manufacturer's investment in inventory is derived. At the same time, by

CONCEPTS ET METHODES

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication d'août 1981 sont les premières qui soient ajustées en fonction du recensement de 1978. Les chiffres pour les années jusqu'à 1978 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. L'échantillon demeure essentiellement constant d'une année à l'autre puisqu'il est tiré de la liste des établissements du recensement annuel des manufactures. On doit recourir à l'imputation pour les établissements ayant déclaré trop tard pour être pris en compte dans le calcul des estimations mensuelles. Comme les estimations mensuelles postérieures à 1978 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre; elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. En outre, certains éléments des stocks compris dans la valeur-repère de l'enquête mensuelle peuvent ne pas être compris dans les stocks du recensement. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur totale des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cet échantillon est révisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps, Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercice comptable. On compte environ 12,000 établissements qui produisent des déclarations.

Il est important d'isoler les chiffres des éléments des stocks selon le stade de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. À cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leur matières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, les bateaux ou des constructions qui utilisent des semi-produits en acier. À mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme

reflecting the receipt of progress payments in shipments each month, it is possible to reduce the distortion in the affected series that would be caused when responding companies finally treat such items of relatively high value as completed sales.

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled as received from stocks on hand and orders books are, therefore, not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. Because unfilled orders are measured, the new orders are the total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Because the sample is drawn from the list of establishments included in the annual census of manufactures, it remains largely constant from one year to the next. Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received. Calculation of revised estimates for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions, classifications and groupings are taken from the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

investie dans les stocks par les fabricants. De même, en tenant compte des acomptes à valoir dans les livraisons mensuelles, on peut réduire la distorsion qui surviendrait dans les séries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées.

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercice comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes dès réceptions, à partir de leurs stocks et qui par conséquent ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue soit pendant ce mois, soit avant. Étant donné qu'on évalue les commandes en carnet, les nouvelles commandes représentent le total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

De plus, les données sur les livraisons totales pour l'année civile ont été rectifiées sommairement en fonction des données préliminaires du recensement des manufactures sur les livraisons totales cette année-là. L'imputation des données se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations. Le calcul des estimations révisées pour le mois précédent et des estimations préliminaires pour le mois observé permet d'utiliser les données déclarées trop tard pour la première compilation. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repère du recensement.

Les définitions, les classifications et les groupes sont ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Series chronologiques

Les séries importantes publiées dans cette livraison sont stockées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

Service des séries chronologiques générales

Seasonal Adjustment

The seasonal adjustment method applied to the series is a computerized ratio-to-moving average method in use at Statistics Canada. It is the standard computer program to apply the X-11 version of the U.S. Bureau of the Census Method II.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number for seasonally adjusted series, indicates the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one, for the most erratic series it is six. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

Désaisonnalisation

On désaisonnalise des séries en calculant par ordinateur le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrence du programme normalisé qui sert à appliquer les versions X-11 de la méthode II du U.S. Bureau of the Census.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir renvois pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" pour les séries désaisonnalisées indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de six pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

FOOTNOTES

Table 1

- (1) Prince Edward Island, Yukon and Northwest Territories are not published separately. They are included in the total for Canada.

Table 3-4

- (1) The series for raw materials in the petroleum industries, goods in process in furniture and fixture industries and inventory held but not owned in the transportation and electrical products industries contain no significant seasonality. In the table of seasonally adjusted series, the unadjusted values are repeated. Any small differences between the unadjusted and adjusted values are due to slightly differing rounding techniques. Other data in the table have been seasonally adjusted.

Note: Figures may not add due to rounding.

RENVIS

Tableau 1

- (1) L'Île-du-Prince Édouard, le Yukon et les Territoires du Nord-Ouest ne sont pas publiés séparément; ils sont inclus dans le total pour le Canada.

Tableau 3-4

- (1) La série des matières brutes dans l'industrie pétrolière, des biens en cours de transformation dans l'industrie du meuble et des articles d'ameublement et des stocks détenus mais non possédés dans l'industrie des transports et des produits électriques ne présente aucune tendance saisonnière importante. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimales entre les séries sont attribuables aux deux techniques d'arrondissement. On a procédé à la désaisonnalisation des autres chiffres du tableau.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.
