Inventories, shipments and orders in manufacturing industries

Mai 1988

Stocks, livraisons et commandes des industries manufacturières

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Current Analysis Section,
International and Financial Economics Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9162)
or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographique sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section de l'analyse de conjoncture,
Division de l'économie internationale et financière,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9162) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTICE TO USERS

Estimates in this publication are subject to revision to accommodate newly-received information. It is advisable always to use data from the most recent issue.

This publication was prepared under the direction of:

- **Basil McCormick**, Assistant Director, Industry Division
- **Henry Glouchkow**, Chief, Inventories Shipments and Orders in Manufacturing Industries

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations qu'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Cette publication a été rédigée sous la direction de:

- **Basil McCormick**, Directeur adjoint, Division de l'industrie
- **Henry Glouchkow**, Chef, Stock, livraisons et commandes des industries manufacturières

May 1988

Seasonally Adjusted

For the second time in the past three months, transportation equipment industries were responsible for a sharp rise in new and unfilled orders. In March, shipbuilding accounted for most of the increase, while the May increase was largely due to aircraft and railroad rolling stock industries. New orders and unfilled orders for industries excluding transportation equipment have rebounded slightly, increasing for the second consecutive month following declines in the first quarter of 1988.

The value of shipments for all Canadian manufacturing recorded its largest monthly increase since November 1987, pushing shipments to a record level. This increase follows five months of virtually no growth. Thirteen of the 22 major industry groups recorded increased shipments during May. The largest increases in value were for food, machinery, paper and allied products and fabricated metal products industries.

Inventories continued to increase to record levels. Since shipments continued to keep pace with the growth in inventories, the ratio of inventories to shipments has remained near the same level for the past four months.

HIGHLIGHTS

- For the second time in three months, **new orders** rose sharply, increasing 4.2% to a level of \$24.8 billion in May 1988. Transportation equipment industries, notably aircraft and railroad rolling stock industries, were responsible for the rise in May. New orders in all manufacturing industries excluding transportation equipment rose for the second consecutive month following four months of declines. In the durable goods industries, new orders, with an estimated value of \$13.0 billion, were up 6.0% over the April value. New orders in the non-durable goods industries were valued at \$11.9 billion, up 2.3%.
- Following five months of relatively no growth, the value of **shipments** increased 1.4% in May to a record level of \$24.0 billion. This increase was the largest monthly increase since November 1987. Durable goods industries increased 0.8% in May while non-durable goods industries were up 1.9%.

May 1988

Après désaisonnalisation

Pour la seconde fois dans les trois derniers mois, les industries du matériel de transport sont responsables pour l'augmentation marquée dans les nouvelles commandes ainsi que pour les commandes en carnet. En mars, la construction navale comptait pour la majorité de l'augmentation, tandis que l'augmentation de mai était due en grande partie aux industries des aéronefs et du matériel ferroviaire roulant. Les nouvelles commandes ainsi que les commandes en carnet pour l'ensemble des industries, excluant le matériel de transport, ont rebondi un peu, augmentant pour le deuxième mois consécutif suivant des diminutions dans le premier trimestre de 1988.

La valeur des livraisons pour l'ensemble des manufacturiers canadiens a enregistré sa plus forte augmentation mensuelle depuis novembre 1987, amenant les livraisons à un niveau record. Cette augmentation fait suite à cinq mois d'absence virtuelle de croissance. Treize des 22 groupes majeurs d'industries ont enregistré une hausse dans leurs livraisons en mai. Les plus fortes augmentations en terme de valeur prenaient place dans les industries des aliments, de la machinerie, du papier et des produits connexes, et dans les industries de la fabrication des produits métalliques.

Les stocks ont continué à augmenter pour atteindre des niveaux records. Comme les livraisons ont continué à suivre le rythme de croissance des stocks, le rapport des stocks aux livraisons est demeuré presque au même niveau pour les quatre derniers mois.

FAITS SAILLANTS

- Pour la deuxième fois en trois mois, les **nouvelles commandes** se sont accrues fortement, augmentant de 4.2% pour atteindre un niveau de \$24.8 milliards en mai 1988. Les industries du matériel de transport, notamment les industries des aéronefs et du matériel ferroviaire roulant sont responsables pour l'augmentation de mai. Les nouvelles commandes dans l'ensemble des industries manufacturières, excluant le matériel de transport, se sont accrues pour un second mois consécutif après quatre mois de baisse. Dans les industries des biens durables, la valeur estimative des nouvelles commandes a augmenté de 6.0% comparée à la valeur d'avril et s'établissait à \$13.0 milliards. Les nouvelles commandes des biens non durables ont atteint \$11.9 milliards, soit une hausse de 2.3%.
- Faisant suite à cinq mois d'absence virtuelle de croissance, la valeur des **livraisons** a augmenté de 1.4% en mai à un niveau record de \$24.0 milliards. Cette augmentation était la plus forte augmentation mensuelle depuis novembre 1987. Les industries des biens durables étaient en hausse de 0.8% en mai, tandis que les industries des biens non durables montraient une augmentation de 1.9%.

- **Inventories** increased 1.1% to \$37.4 billion in May. Increases averaging 0.7% a month over the last eight months, have pushed inventories to a new high. Inventories held were valued at \$41.1 billion, up 1.2% over April. Increases of 1.8% in both goods in process and finished products and 0.2% in raw materials contributed to the rise.
- The **inventories to shipments ratio** remained at 1.56:1 in May, as the growth in shipments kept pace with the growth in inventories. The ratio of the finished goods inventory to shipments remained at 0.54:1.
- Large increases in transportation equipment industries accounted for most of the 3.0% increase in the **unfilled orders backlog** to push the level to \$27.4 billion. Unfilled orders for all industries excluding transportation equipment have shown some improvement over the past two months following declines in two of the first three months in 1988. In the durable goods industries, unfilled orders were up 3.3%, while non-durable goods industries showed a more modest increase of 0.3%.

Unadjusted

- Manufacturers' shipments in May 1988 were estimated at \$25.3 billion, 11.7% higher than the May 1987 level.
- Cumulative shipments for the first five months of 1988 were estimated at \$119.0 billion, 10.0% higher than the value for the corresponding period in 1987.

Note to Data Users

With the release of March 1988 data, the estimated values of shipments, inventories and orders were revised back to January 1984. These revisions reflect the incorporation of annual benchmarks to the Census of Manufactures. The benchmarking process adjusts the monthly sample estimates in the benchmark years 1984 and 1985 to the annual Census levels, updates the sample, uses new and revised data and re-estimates the seasonal adjustment factors.

Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

- Les **stocks** ont augmenté de 1.1% à \$37.4 milliards en mai. Des augmentations atteignant en moyenne 0.7% mensuellement au cours des huit derniers mois, ont contribué à amener les stocks à des niveaux records. Les stocks détenus s'établissaient à \$41.1 milliards, une augmentation de 1.2% par rapport à avril. Des augmentations de 1.8% dans les produits en cours et dans les produits finis et de 0.2% dans les matières premières ont contribué à cette hausse.
- Le **rapport des stocks aux livraisons** est demeuré à 1.56:1 en mai; puisque la croissance des livraisons a maintenu le même rythme de croissance que les stocks. Le rapport des stocks de produits finis aux livraisons est demeuré à 0.54:1.
- De fortes augmentations dans les industries du matériel de transport étaient responsables de la majeure partie de l'augmentation de 3.0% dans les **commandes en carnet**, amenant le niveau à \$27.4 milliards. Les commandes en carnet pour l'ensemble des industries, excluant le matériel de transport, ont montré des améliorations dans les deux derniers mois, suivant des diminutions dans deux des trois premiers mois de 1988. Dans les industries des biens durables, les commandes en carnet ont augmenté de 3.3%, alors que celles des industries des biens non durables montraient une augmentation plus modeste de 0.3%.

Avant désaisonnalisation

- On a estimé à \$25.3 milliards les livraisons des manufacturiers en mai 1988 ce qui représente une augmentation de 11.7% par rapport au niveau de mai 1987.
- Pour les cinq premiers mois de 1988, les livraisons estimatives ont totalisé \$119.0 milliards, soit un gain de 10.0% par rapport à la période correspondante en 1987.

Note aux utilisateurs

Débutant avec le communiqué de mars 1988, les valeurs estimatives des livraisons, stocks et commandes ont été révisées jusqu'en janvier 1984. Ces révisions reflètent l'incorporation des données-repères annuelles du recensement des manufactures. L'incorporation des données-repères ajuste les estimations mensuelles de l'échantillon pour les années 1984 et 1985 aux niveaux du recensement annuel, utilise des données nouvelles et révisées, et réestime les facteurs d'ajustement saisonniers.

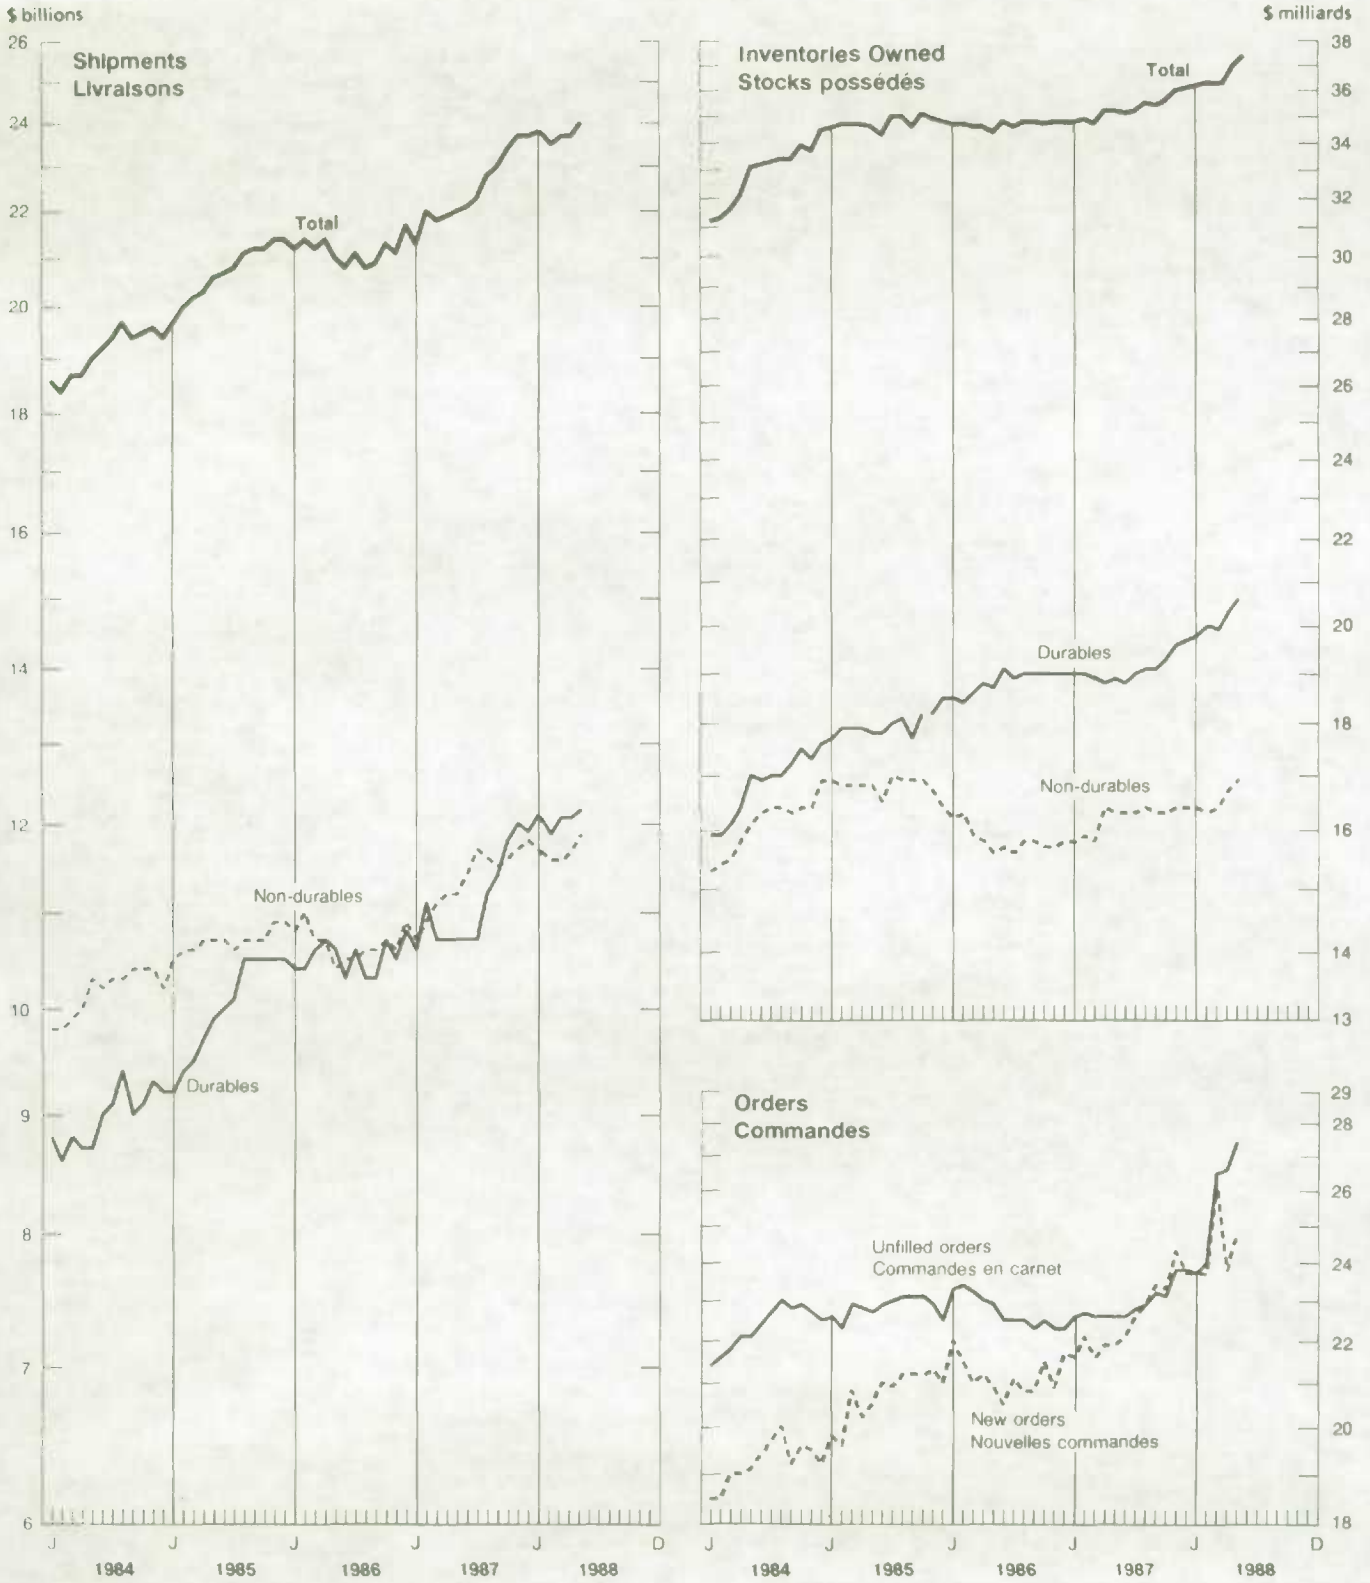

Les stocks font référence dans le texte ci-haut aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries où des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation aux travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

See footnote(s) at end of statistical tables. - Voir note(s) à la fin des tableaux statistiques.

FOOTNOTES

Tables 1 and 5

- (1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.
- (2) The value for total shipments contains three industries where "production" is used instead of shipments. Please see concepts and methods, 7th paragraph for more details.

Tables 2 to 4

- (1) Series which contain no significant seasonality include:

Raw Materials

Rubber Products Industries,
Primary Textile Industries,
Refined Petroleum and Coal Products
Industries

Goods in Process

Tobacco Products Industries

Unfilled Orders

Plastic Products Industries,
Machinery Industries (Except Electrical
Machinery)
Transportation Equipment Industries

Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

Table 6

- (1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 7th paragraph.
- (2) From January 1983 onwards, the data for industry 3711, Industrial Inorganic Chemical Industries n.e.c., no longer includes the data for industry 3721, Chemical Fertilizer and Fertilizer Materials Industries.

Note: Figures may not add due to rounding.

NOTES

Tableaux 1 et 5

- (1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant incluses dans le total pour le Canada.
- (2) La valeur des livraisons totales contient trois industries où la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7^{ième} paragraphe des concepts et méthodes.

Tableaux 2 à 4

- (1) Les séries qui sont peu sensibles aux variations saisonnières incluent:

Matières premières

Industries des produits en caoutchouc
Industries textiles de première transformation
Industries des produits raffinés du pétrole et du charbon

Produits en cours

Industries du tabac

Commandes en carnet

Industries des produits en matière plastique,
Industries de la machinerie (sauf électrique)

Industries du matériel de transport

Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimales entre les séries sont attribuables à la technique d'arrondissement utilisée.

Tableau 6

- (1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7^{ième} paragraphe des concepts et méthodes.
- (2) Depuis janvier 1983, les données pour l'industrie 3711, industries des produits chimiques inorganiques d'usage industriel, n.c.a., ne comprennent plus les données de l'industrie 3721, industries des engrais chimiques et de matières pour engrais.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

CONCEPTS AND METHODS

Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1984 and 1985 Censuses. Values for years prior to 1984 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1985 are projections, these totals are subject to adjustment when more recent census data become available.

For current periods, deaths, when they have been verified, are removed from the sample. Large births are added to the estimates as we become aware of them through press or manufacturing association sources. Small births have a minor impact on manufacturing data and are incorporated during the annual benchmarking process as described above.

Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 12,500 establishments in the reporting panel.

CONCEPTS ET MÉTHODES

Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient cette publication sont ajustées en fonction des recensements de 1984 et 1985. Les chiffres pour les années jusqu'à 1984 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1985 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes.

Pour les périodes courantes, les disparitions d'entreprises après avoir fait l'objet d'une vérification, sont retirées de l'échantillon. Les créations d'importantes entreprises sont additionnées aux estimations aussitôt que nous connaissons la création de telles entreprises par les médias d'information ou par des sources d'associations manufacturières. Les créations de petites entreprises ont un impact mineur sur les données manufacturières et sont incorporées durant le processus annuel de rajeunissement tel que décrit plus haut.

Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cet échantillon est révisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps, Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercice comptable. On compte environ 12,500 établissements dans l'échantillon.

Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, goods in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned are published. The difference between inventory held and inventory owned is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stock and ships. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

In order to reduce the distortion in the shipments of the three above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and order books are, accordingly, not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. À cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant et les bateaux. À mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

Afin de réduire la distorsion qui surviendrait dans les trois industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas incluses dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercice comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui, par conséquent, ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue, soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received. In conjunction with preliminary estimates for the current month, the estimates for the preceding three months are revised to account for any late returns. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number (e.g. D 315674) for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

Imputation

L'imputation des données se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations. Conformément aux estimations préliminaires pour le mois courant, on révisé les estimations pour les trois mois précédents afin de prendre en compte toutes données déclarées en retard. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repères du recensement.

Définitions

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Séries chronologiques

Les séries importantes publiées dans cette livraison sont emmagasinées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,

Ottawa (Ontario) K1A 0Z7

Désaisonnalisation

On désaisonnalise les séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrence du programme normalisé qui sert à appliquer la version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" (ex: D 315674) pour les séries désaisonnalisées et indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to sub-divide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groupes mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques à un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

1986 CENSUS PROFILES

LES PROFILS DU RECENSEMENT DE 1986

**YOUR TICKET

CONNAÎTRE
LES CANADIENS**

The 1986 Profiles will put you on the fast track to any Canadian community you want to study.

You're looking for a fast introduction to the social and demographic realities of a city, a town, a municipality or an entire province. And you don't have the time to wade through piles of statistics.

Focus in on the area of your choice with a CENSUS PROFILE. Each PROFILE features more than 46 items of information on the area that interests you... from population counts, to the living arrangements of its elderly.

Choose a PROFILE on any one of

- 6009 Census Subdivisions (municipalities)
- 266 Census Divisions (counties)
- 282 Federal Electoral Districts
- 25 Census Metropolitan Areas
- 114 Census Agglomerations
- a variety of urban/rural breakdowns
- and, more.

With 52 publications in this series, we can fast track you to any destination you want.

For more information, call us at 1-800-267-6677 and request the Census brochure (which includes ordering information), or write us at:

Le Canada et ses régions sont à votre portée grâce aux Profils du recensement de 1986.

Vous désirez connaître le portrait socio-démographique d'une province, d'une ville ou d'une municipalité en particulier, mais la perspective d'avoir à vous battre avec des montagnes de statistiques vous effraie?

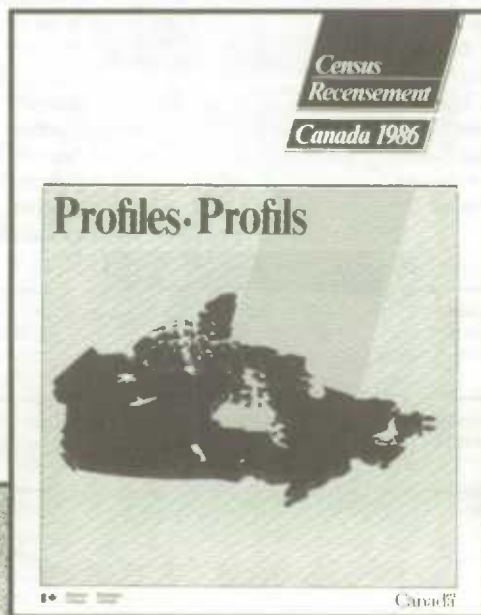

Balayez toute appréhension! Les Profils du recensement de 1986 vous épargneront temps et effort. Chaque Profil présente plus de 46 éléments différents d'information sur chacune des régions répertoriées. Des chiffres de population aux données sur les modes de vie de la population âgée, vous saurez tout.

Vous n'avez qu'à faire votre choix. Et quel choix! Les 52 publications de la série portent sur:

- 6,009 municipalités (subdivisions de recensement);
- 266 comtés (divisions de recensement);
- 282 circonscriptions électorales fédérales;
- 25 régions métropolitaines de recensement;
- 114 agglomérations de recensement;
- diverses régions urbaines et rurales;
- et plus encore

Toutes les semaines

The numbers that make decisions

The data that highlight national economic trends

Infomat is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

Infomat, Catalogue No. 11-002E (weekly), is available for \$2.00 per copy/\$100.00 annually (in Canada); \$3.00 per copy/\$150.00 annually (elsewhere).

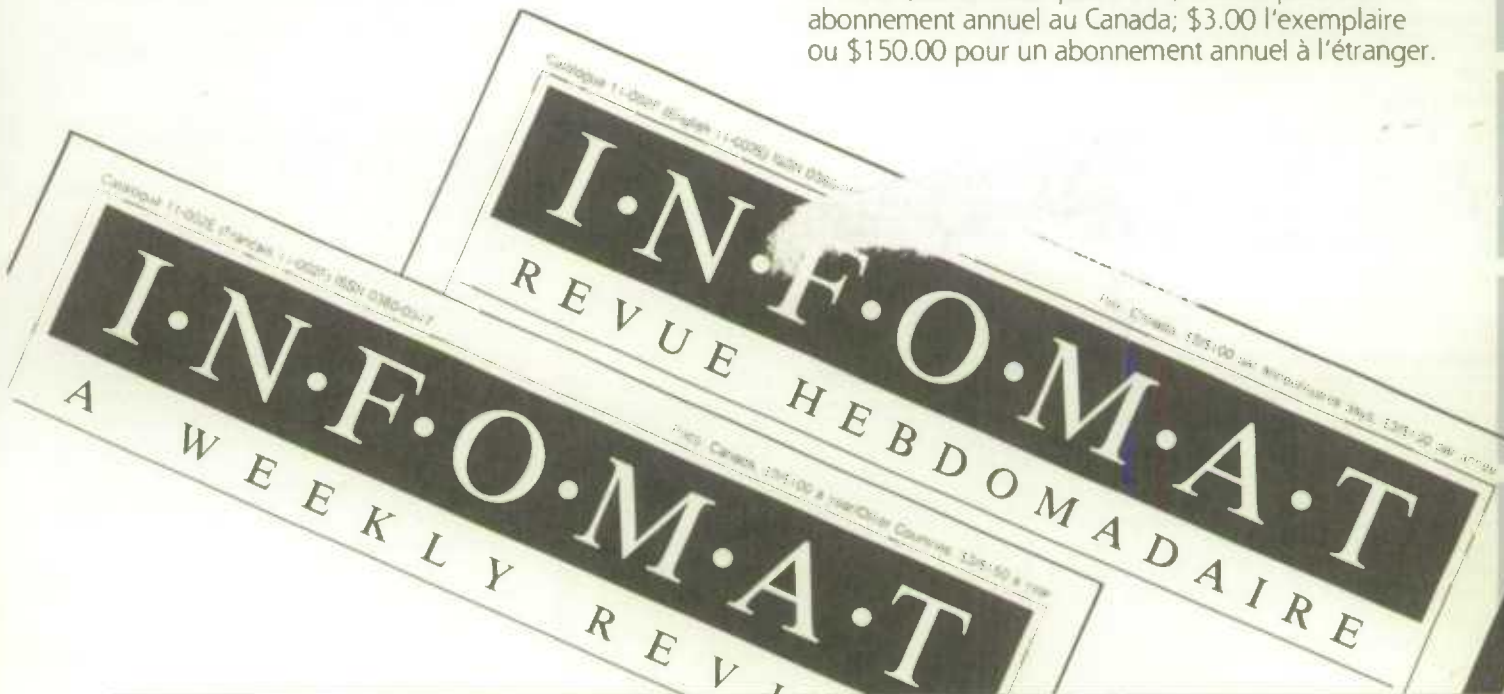

Les chiffres qui font les décisions

Les données illustrant les tendances de l'économie canadienne

Infomat est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

Infomat, n° 11-002F au catalogue (hebdomadaire), se vend \$2.00 l'exemplaire ou \$100.00 pour un abonnement annuel au Canada; \$3.00 l'exemplaire ou \$150.00 pour un abonnement annuel à l'étranger.

To order, complete the order form included or write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. For faster service, using Visa or MasterCard, call toll-free.

Please make cheques or money orders payable to the Receiver General for Canada/Publications.

Contact a Regional Reference Centre near you for further information.
