## NEW MANUFACTURING ESTABLISHMENTS IN CANADA

This memorandum revises and brings up to date a previous issue published in December 1956. It contains the names, addresses and principal products manufactured by new establishments which have come into operation recently, or report that they expect to be in operation in the near future. To enable the examination of new entrants in a particular field or area, the firm names have been arranged by industry and by provinces within each industrial group. Revised issues of this memorandum will be published every six months.

The listing comprises the names of entirely new firms that have not been in business before, as well as new branch plants of existing businesses, all of which have indicated that they operate in the manufacturing field. Branch sales offices and separate new warehousing facilities are excluded. Change of ownership does not constitute a new firm as it is essentially the same business even though it may operate under a new name.

The industrial classification follows the concepts of the Standard Industrial Classification except that, in most cases, where the activity is essentially repair in nature, the establishments are not classified as manufacturers. Businesses engaged in re-upholstering and furniture refinishing and repair are, however, considered as manufacturing by the Census of Industry and are, therefore, included as such in this memorandum. An establishment reported as operating in more than one manufacturing field is classified in that sector where the major part of its operations are conducted.

The information contained in this memorandum should be qualified in view of the fact that there has been no evidence to show whether or not the new firms are in actual production. It has been reported that for every firm listed, production has recently started or that it is expected to start in the near future but this cannot be considered as solid information until such time as data are collected in the Annual Census of Industry, covering the detail of the manufacturing operations.

The names listed cover establishments which have come to the attention of the Bureau since the last published annual report for each industry. Since the previous memorandum was prepared, 1,893 new names have been added as a result of information received. The names of those establishments appearing for the first time are preceded by an asterisk(\*). During this same period, 981 names which appeared in the first memorandum have been dropped from the listing. Of those

.....

2.

deleted, 775 were firms now included in Industry and Merchandising annual reports, 74 when contacted again were found to be out of business and the remainder, 132, were discarded for various other reasons. With annual reports being issued throughout the year, it is impossible to avoid some duplication of firm names in this memorandum and certain of the annual reports of the Industry and Merchandising Division. This, however, has been kept to a minimum.

All new establishments, irrespective of size, are included in this memorandum if they report as being operators in the manufacturing field. In cases where a firm is in the organizational stage when contact is made and information relating to the nature and scope of operations to be conducted is secured through solicitors, the establishments are excluded until such time as a permanent business address is established. This procedure is followed as many new businesses apply for letters patent to protect a firm or trade name, with actual business operations commencing at some considerable time after this action has been taken.

The information given in this memorandum is limited to that permitted by the Statistics Act, Statutes of Canada 1953, Chapter 45, which authorizes the Dominion Bureau of Statistics to issue, "an index or list ..... of particulars taken from individual returns, of the names and locations of individual firms or businesses, of types of products produced, manufactured or dealt with by individual firms or businesses, but no such list or index shall otherwise reveal any of the particulars comprised in any individual return".

June 7, 1957.
