NEW MANUFACTURING ESTABLISHMENTS IN CANADA

This report revises and brings up to date a previous issue published in June 1962. It contains the names, addresses and principal products manufactured by new establishments which have come into operation recently, or report that they expect to be in operation in the near future. To enable the examination of new entrants in a particular field or area, the firm names have been arranged by industry and by province within each industrial group. Revised issues of this report will be published every six months.

The listing comprises the names of firms that have not been in business before, as well as new branch plants of existing businesses, all of which have indicated that they operate in the manufacturing field. The names of those establishments appearing for the first time are preceded by an asterisk(*). Branch sales offices and separate new warehousing facilities are excluded. Change of ownership does not constitute a new firm as it is essentially the same business even though it may operate under a new name.

The industrial classification follows the concepts of the revised Standard Industrial Classification which shows twenty major manufacturing groups. A complete listing of establishments in operation or about to start operations in any one industry can be secured by using this memorandum along with the most recent Industry and Merchandising Annual Report.

The information contained in this report should be qualified in view of the fact that there has been no evidence to show whether or not the new firms are in actual production. It has been reported that for every firm listed, production has recently started or that it is expected to start in the near future but this cannot be considered as solid information until such time as data are collected in the annual Census of Industry, covering the details of the manufacturing operations.

The names listed cover establishments which have come to the attention of the Bureau since the last published annual report for each industry. Since the previous report was prepared, 1,049 new names have been added as a result of information received. During this same period, 1,094 names which appeared in the June 1962 issue have been dropped from the listings. Of those deleted 661 were firms now included in Industry and Merchandising annual reports, 50 were duplications because of change in the firm name, further contact revealed that 216 were out of business and 86 were not manufacturers as originally reported and the remainder, 81 were discarded for various reasons. With annual reports being issued throughout the year, it is impossible to avoid some duplication of firm names in this report, and certain of the annual reports of the Industry and Merchandising Division. This, however, has been kept to a minimum.

All new establishments, irrespective of size, are included if they report as being operators in the manufacturing field. In cases where a firm is in the organizational stage when contact is made and information relating to the nature and scope of operations to be conducted is secured through solicitors, the establishments are excluded until such time as a permanent business address is established. This procedure is followed as many new businesses apply for letters patent to protect a firm or trade name, with actual operations commencing at some considerable time after this action has been taken.

FOOD AND BEVERAGE INDUSTRIES

<u>Firm name and address</u>	<u>Products</u>
<u>NEWFOUNDLAND</u>	
Andrews, Bernard V., 12 Maple St., St. John's, Nfld.	frozen foods
* Danish & French Pasteries & Delicatessen, 322 Water St., St. John's, Nfld.	bakery

THE HISTORY OF THE
CITY OF BOSTON

The history of the city of Boston is a subject of great interest and importance. It is a city that has played a significant role in the development of the United States. From its early days as a small fishing village to its current status as a major metropolitan area, Boston has a rich and varied history. The city's location on a narrow neck of land between the harbor and the mainland has made it a natural center of trade and commerce. Its strategic position has also made it a key location for military and political events. The city's history is filled with stories of courage, sacrifice, and innovation. It is a city that has shaped the course of American history and continues to do so today.
