PRELIMINARY STATEMENT OF MANUFACTURES IN CANADA, 1949

This report contains preliminary statistics on Canadian Manufactures for the year 1949. In addition to general statistics covering gross value of production, cost of materials and employment and payrolls, it provides for the first time preliminary information on the production of 1,000 important commodity groups.

The estimated value of manufactured products in Canada in 1949 totalled \$12,378,731,000 an increase of approximately \$500 million over 1948, the previous record year. Approximately 10% of the increase is accounted for by the inclusion for the first time of the statistics of manufacturing plants in Newfoundland.

Employees engaged in manufacturing totalled 1,159,315, slightly higher than in the previous year and salaries and wages paid reached \$2,566,104,000 an increase of \$157 million in 1949. Cost of materials used advanced \$132,000,000 to \$6,764,896,000.

The value of output of the industries in the Foods and Beverages group led the list at \$2,872,336,000. Iron and Steel products ranked second with a value of \$1,409,000,000. Paper products was third at \$1,091,666,000 and transportation equipment stood fourth at \$1,063,000,000.

Historical Summary of Statistics of Manufactures for Significant Years 1917-1949 (1)

1949 (2)	1,159,315	2,566,104	302,575	6,764,896	12,378,731

- (1) 1949 figures are preliminary and subject to revision.
- (2) 1949 figures include the Province of Newfoundland.
- (3) Not available.
- (4) A change in method of computing the number of wage earners in the years 1925 to 1930 increased the number somewhat over that which the method otherwise used would have given and the figure shown for 1929 is not directly comparable. In 1931 the method in force prior to 1925 was re-adopted. The figures from 1933 forward are therefore comparable with those for 1922 and earlier years.
