Advance Statement, Summary Statistics of Manufacturing Industries, 1963

The statistics in the accompanying tables are based on the results of the 1963 annual Census of Manufactures and represent a selection of those which will be published later in the 1963 issues of DBS reports, "The Manufacturing Industries of Canada" (Catalogue Nos. 31-203 to 31-208 inclusive).

As a result of the high level of economic activity, with rising exports and higher capital and consumer expenditures, and with some increases in prices, manufacturers' shipments rose 8.3% in 1963 to a new record of \$28,943,000,000. Other major dollar measures also set new records: value added by manufacture was up 7.0% to \$12,568,000,000; total value added, which includes non-manufacturing activity of manufacturing establishments, was up 7.1% to \$13,173,000,000; total wages and salaries rose 6.6% to \$6,505,000,000, while wages of production and related workers rose 6.9% to \$4,098,000,000.

The total number of employees rose by 2.6% to 1,427,143, and the number of production and related workers advanced 3.1% to 1,003,915. Production and related workers were thus 70.3% of total employees, compared with 70.0% in 1962 and 69.4% in 1961. The number of manufacturing establishments decreased by 297 in 1963 to a total of 33,133. There were 16,032 working owners and partners in manufacturing in 1963.

The largest proportionate provincial increase in 1963 shipments, 13.8%, took place in New Brunswick, as shown in Table 1. The next greatest increase was registered by Ontario, 9.6%, followed closely by British Columbia, up 8.6%. Gains for other provinces were below the national average: Newfoundland, 7.9%; Nova Scotia, 7.6%; Manitoba, 6.9%; Alberta, 6.8%; Quebec, 6.4%; Saskatchewan, 5.1%; and Prince Edward Island, 1.4%.

Ontario and Quebec together accounted for 80.6% of value added by manufacture in Canada in 1963. Of this, Ontario was responsible for 52.0% and Quebec for 28.6%. British Columbia accounted for 8.4%, the Prairie Provinces for 7.4% and the Atlantic Provinces for 3.5%.

In Ontario value added by manufacture averaged \$1,014 per capita of the population. Per capita value added by manufacture in other regions was: Quebec, \$656; British Columbia, \$626; the Prairie Provinces, \$284; the Atlantic Provinces, \$226. These compare with a national average of \$665.

Stimulated by the high level of consumer demand for cars, the transportation equipment industries showed the largest proportionate gain in 1963 value of shipments over 1962, 20.8%. With shipments of \$2,830,000,000, this was the third largest industry group, as shown in Table 2. The largest group in terms of shipments, the food and beverage industries, had shipments of \$5,714,000,000, an increase of 6.3%.

Other industry groups with shipments of \$1,000,000,000 or more, with 1963 shipments and the percentage increase, were: primary metal industries, \$3,101,000,000 (4.5%); paper and allied industries, \$2,452,000,000 (5.1%); metal fabricating industries, \$1,877,000,000 (9.0%); chemicals and chemical products, \$1,645,000,000 (6.6%); electrical products industries, \$1,545,000,000 (11.2%); petroleum and coal products industries, \$1,366,000,000 (5.5%); wood industries, \$1,277,000,000 (10.6%); textile industries, \$1,100,000,000 (12.0%).

Pulp and paper mills were again Canada's largest manufacturing industry in terms of shipments, which totalled \$1,793,000,000 or 4.5% more than the year before. (See Table 3.) As a result of the sharply rising demand for passenger cars, motor vehicle manufacturers moved into second place from fourth the year before; shipments rose by 29.6% to \$1,529,000,000. The third largest industry, smelting and refining, showed a decrease of 1.9% in shipments, to \$1,520,000,000. Petroleum refining was in fourth place, with shipments of \$1,322,000,000, up 5.5%. Slaughtering and meat packing plants were again in fifth place, with shipments of \$1,142,000,000, almost unchanged. Iron and steel mills remained sixth, their shipments of \$963,000,000 being up 11.9%. Sawmills came seventh, with shipments of \$691,000,000, up 12.8%, influenced by larger exports. Increased demand for capital goods helped raise the miscellaneous machinery and equipment industry to eighth from ninth place the year before; its shipments rose 18.7% to \$577,000,000. Manufacturers of industrial chemicals were ninth, with shipments of \$554,000,000, up 7.1%. The tenth largest industry, motor vehicle parts and accessories manufacturers, also benefited greatly from buoyant car sales, moving up from twelfth place; shipments increased 24.9% to \$545,000,000.

Among the forty leading industries, half showed increases of 7.5% or more and only five showed decreases. The largest increase, 64.8% in sugar refineries shipments, reflected higher raw sugar prices; the decreases, besides that noted in smelting and refining, were: aircraft and parts manufacturers, 5.4%; butter and cheese factories, 4.3%; fabricated structural metal, 3.9%; and fish products, 0.8%.

Wages and salaries averaged \$4,558 per employee in 1963, an increase of 3.9% over the year before, almost the same as the 1962 increase of 4.0% over 1961. British Columbia had the highest 1963 average of \$4,965, with Ontario second at \$4,833. Other provincial averages, all below the national average, were: Alberta, \$4,459; Saskatchewan, \$4,357; Quebec, \$4,238; Manitoba, \$4,038; Newfoundland, \$3,801; Nova Scotia, \$3,733; New Brunswick, \$3,667; Prince Edward Island, \$2,695.

Production and related workers' wages averaged \$1.92 per man-hour paid, compared with \$1.85 in 1962. The corresponding averages by region were: British Columbia, \$2.32; Ontario, \$2.04; the Prairie Provinces, \$1.86; Quebec, \$1.71; the Atlantic Provinces, \$1.57. Principal statistics by province and industry group are shown in Table 4.

It should be noted that all figures are subject to revision. Though revisions have been made to 1962 data on individual industries in Table 3, so that these agree with 1962 data in 1963 individual industry reports, corresponding revisions to 1962 data at the industry group level are being postponed until it is possible to incorporate further revisions to the component industries.
