THE MANUFACTURING INDUSTRIES OF CANADA

Section B

ATLANTIC PROVINCES

1956

Published by Authority of

The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Industry and Merchandising Division

Central Assembly and Index Section

6501-611-126

Price 50 cents

Vol. 2—Part II—Section-B

EDMOND CLOUTIER, C.M.G., O.A., D.S.P., Queen's Printer and Controller of Stationery, Ottawa, 1958

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes as follows: **Volume I** — The Primary Industries, including mining, forestry and fishing; **Volume II** — Manufacturing; **Volume III** — Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups:

- I — General Review of the Manufacturing Industries, \$1.50
- II — The Manufacturing Industries of Canada,
(7 sections, see below:)
- III — Foods and Beverages
- IV — Tobacco and Tobacco Products
- V — Rubber Products
- VI — Leather Products
- VII — Textile Mills
- VIII — Knitting Mills
- IX — Clothing
- X — Wood and Paper Products
- XI — Printing Trades
- XII — Iron and Steel Products
- XIII — Transportation Equipment
- XIV — Non-ferrous Metal Products
- XV — Electrical Apparatus and Supplies
- XVI — Non-metallic Mineral Products
- XVII — Products of Petroleum and Coal
- XVIII — Chemicals and Allied Products
- XIX — Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit of filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section A. Summary for Canada, 25¢
- Section B. Atlantic Provinces, 50¢
- Section C. Province of Quebec, 25¢
- Section D. Province of Ontario, 25¢
- Section E. Prairie Provinces, 40¢
- Section F. Province of British Columbia, including Yukon and Northwest Territories, 25¢
- Section G. The Manufacturing Industries of Canada, Regional Distribution, 75¢

THE MANUFACTURING INDUSTRIES OF CANADA

Section B

ATLANTIC PROVINCES

1956

The Atlantic Provinces are of economic importance in a number of fields, such as pulp and paper, fish processing, sawmills and primary iron and steel. In Newfoundland manufacturing production is dominated by the forest and fisheries resources. Pulp and paper was the most important industry in 1956 with shipments valued at \$68,085,288, followed by fish processing with \$18,279,005. These two industries accounted for 70 per cent of the total production of the Province. In Prince Edward Island agriculture and fishing resources make butter and cheese, slaughtering and meat packing, and fish processing the leading industries. Nova Scotia is renowned for its coal mines and its fisheries as well as extensive forests and agricultural lands and is favoured with easy access by sea to the high-grade iron-ore supply of Newfoundland. On these resources are based the leading manufactures of primary iron and steel, fish processing, pulp and paper, shipbuilding and sawmills. In addition, an important petroleum refinery, railway rolling stock, cotton yarn and cloth and coke and gas plants add to the diversification of the Province. The forests of New Brunswick give a leading place to its pulp and paper and sawmilling industries. Other important manufacturing and processing activities are based on fish and agricultural resources.

Nova Scotia and New Brunswick, despite the lack of large rivers, have valuable sources of hydraulic power, a considerable portion of which has been developed. Tentative estimates give Newfoundland a potential of almost 1,000,000 h.p. at ordinary minimum flow, while in Labrador, the Hamilton River is outstanding as a potential source of power. Turbine installation at the end of 1956 totalled 336,750 h.p. in Newfoundland, 1,882 in Prince Edward Island, 177,018 in Nova Scotia and 164,130 in New Brunswick. Compared with Quebec, Ontario and British Columbia, the installed power in the Atlantic Provinces, is very small, amounting to 679,780 h.p. This compares with a total of 1,191,745 in the Prairie Provinces and 18,403,048 in the whole of Canada.

Manufacturing establishments reporting in 1956 numbered 3,381 for the Atlantic Provinces as a

whole. These plants furnished employment to 65,774 persons who received \$178,707,950 in salaries and wages. They also shipped goods with a selling value at the factory of \$845,867,291 and spent \$464,478,173 for materials, while the value added by manufacture totalled \$353,904,067.

Considering the Atlantic Provinces as an economic unit, pulp and paper was the leading industry in 1956 with factory shipments valued at \$191,465,894. This was followed by fish processing with \$81,202,927, primary iron and steel \$51,321,212, sawmills \$44,251,499 and railway rolling stock \$33,758,676. These five industries accounted for 49 p.c. of the total value of factory shipments of the Atlantic Region. Other important industries, in order of value of factory shipments and with shipments valued at \$10,000,000 or more, were: petroleum products, sugar refining, butter and cheese, shipbuilding, bread and other bakery products, slaughtering and meat packing, sash, door and planing mills, miscellaneous food preparations, printing and publishing, prepared stock and poultry feeds, breweries, miscellaneous iron and steel products, and coke and gas products.

For the Atlantic Provinces as a whole there was an increase of 1.5 p.c. in the number of persons employed and 10.6 p.c. in the value of factory shipments in 1956 as compared with the previous year. Not all industries, however, shared in the advance. Of the leading industries, fish processing with a loss of 8.4 p.c. in the value of shipments reported the greatest decline. This was followed by sawmills with a drop of 4.9 p.c. and shipbuilding with a drop of 4.2 p.c. The majority of the leading industries with shipments of \$10,000,000 or more, however, reported increased shipments. The greatest gain of 97.4 p.c. was reported by the railway rolling stock industry, followed by primary iron and steel with 17.8 p.c. and pulp and paper 7.5 p.c. A notable feature of the 1956 manufacturing operations in the Atlantic Provinces was the expansion in the petroleum products industry in Nova Scotia, with shipments almost double the previous year.

Principal Statistics of the Atlantic Provinces, 1956

Province	Establishments	Employees	Salaries and wages	Cost at plant of materials used	Value added by manufacture	Selling value of factory shipments
	number					
Newfoundland	783	10,502	30,463	55,452	62,608	123,691
Prince Edward Island	192	1,775	3,233	17,807	6,162	24,497
Nova Scotia	1,402	30,937	83,949	214,779	159,820	384,398
New Brunswick	1,004	22,560	61,063	176,440	125,314	313,281
Total	3,381	65,774	178,708	464,478	353,904	845,867

THE MANUFACTURING INDUSTRIES

In the Atlantic region the program of industrial development has been more selective than in some of the other provinces. Fish processing, new sawmills, increased pulp-making capacity and the manufacture of non-metallic building materials like cement and gypsum products have accounted for well over half of the industrial growth. There are however, a few outstanding exceptions. Two sizeable defence plants have been established in Nova Scotia, one to repair and overhaul naval aircraft and the other to build and repair radar and related electronic equipment. Considerable development has taken place in Newfoundland. Besides plants for the manufacture of cement and gypsum wallboard and plaster, factories for producing boots and shoes, birch veneer, leather goods, industrial machinery and a leather tannery were established, thus broadening the industrial base of the province. With these exceptions, most of the developments in the Atlantic Provinces have been either small and scattered or confined to the modernization and expansion of manufacturing facilities that were already established at the close of World War II.

In spite of the rapid development in the Atlantic Provinces since 1949 manufacturing production did not quite keep pace with the development in the more industrialized provinces of Ontario, Quebec and British Columbia. This is indicated by a slight

drop in the Atlantic Provinces' share of the Canadian total from 4.52 in 1949 to 3.83 in 1956. In number of persons employed there was an increase of 2.4 per cent for the Atlantic Provinces as compared with an increase of 15.3 per cent for Canada as a whole. For salaries and wages paid the increase was 49.3 per cent as compared with 76.2 per cent for Canada, and in selling value of factory shipments the increase was 46.6 per cent for the Atlantic Provinces and 73.2 per cent for Canada as a whole.

Up to 1952 the increase in employment in the Atlantic Provinces was about the same as for Canada as a whole. Between 1953 and 1955, however, employment in the Atlantic Provinces declined by 6.0 p.c. while for Canada as a whole the decline was only 2.2 p.c. In 1956 the same situation prevailed. Employment in the Atlantic Provinces rose by 1.5 p.c. as compared with 1955, while for Canada as a whole the increase was 4.2 p.c. The increased employment since 1949 reported by Newfoundland, Prince Edward Island and Nova Scotia was offset by a drop 3.8 p.c. in New Brunswick, resulting in a net increase of only 2.4 p.c. for the Atlantic Provinces as compared with an increase of 15.3 p.c. for Canada. Selling value of factory shipments was 46.6 p.c. higher in the Atlantic Provinces while for Canada as a whole it was 73.2 p.c. higher.

Variation in Employment and Factory Shipments, 1956 Compared with 1949

Province	Employees	Salaries and wages	Selling value of factory shipments	
			per cent	
Newfoundland ¹	+10.5	+66.3		+56.8
Prince Edward Island	+1.6	+51.6		+35.2
Nova Scotia	+5.5	+53.5		+55.3
New Brunswick	-3.8	+38.1		+35.3
Atlantic Provinces	+2.4	+49.3		+46.6
Canada	+15.3	+76.2		+73.2

¹ Exclusive of fish processing.

PROVINCE OF NEWFOUNDLAND

TABLE 2. Principal Statistics of the Manufacturing Industries of Newfoundland, 1949-1956

Year	Establishments	Employees	Salaries and wages	Cost at plant of materials used	Value added by manufacture ¹	Gross value of products ²
			number	\$	\$	\$
1949 ³	793	6,934	15,486,336	31,228,173	32,918,776	67,264,282
1950 ³	850	6,682	16,246,252	31,505,623	36,712,377	71,062,850
1951	822	9,622	22,681,246	43,117,299	53,690,187	100,642,613
1952	948	10,303	25,233,851	45,477,620	56,109,014	105,459,684
1953	939	10,575	26,604,908	44,972,021	57,784,697	106,524,603
1954	790	9,892	30,101,186	46,503,032	59,483,922	109,567,770
1955	785	10,361	28,604,468	49,914,856	60,586,922	115,579,036
1956	783	10,502	30,462,735	55,451,956	62,607,709	123,691,344

¹ In 1951 and previous years the "Value added by manufacture" is computed by subtracting cost of fuel, electricity and materials used from the "Gross value of products"; in 1952 and 1953, from factory shipments; in 1954 and subsequent years from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

³ Exclusive of fish processing.

1955	204	"	1,769	3,074,085	16,803,035	6,431,660	23,628,831
1956	192	"	1,775	3,233,404	17,806,842	6,161,628	24,497,245

¹ Prior to 1952 the "Value added by manufacture" is computed by subtracting the cost of materials, fuel and electricity used from the "Gross value of products", in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

¹ Prior to 1952 the "Value added by manufacture" is computed by subtracting the cost of materials, fuel and electricity used from the "Gross value of products; in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

TABLE 13. Principal Statistics Compared, 1955 and 1956

Principal statistics		1955	1956	+ Increase - Decrease
Establishments	No.	1,524	1,402	- 122
Supervisory and office employees:				
Male	"	3,754	3,780	+ 26
Female	"	1,076	1,161	+ 85
Salaries	\$	14,456,233	16,142,859	+ 1,686,626
Production workers:				
Male	No.	22,012	22,471	+ 459
Female	"	3,376	3,525	+ 149
Wages	\$	62,099,690	67,805,651	+ 5,705,961
Cost of fuel and electricity	"	10,661,696	13,346,321	+ 2,684,625
Cost at plant of materials used	"	175,194,419	214,779,069	+39,584,650
Value added by manufacture ¹	"	139,646,423	159,820,242	+20,173,819
Selling value of factory shipments	"	331,129,690	384,398,103	+53,268,413

¹ Calculated value of production (shipments plus closing inventory, minus opening inventory of finished products) less cost of materials and fuel and electricity used.

¹ Prior to 1952 the "Value added by manufacture" is computed by subtracting the cost of materials, fuel and electricity used from the "Gross value of products;" in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".
