THE MANUFACTURING INDUSTRIES OF CANADA

Section B
ATLANTIC PROVINCES
1957

Published by Authority of
The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Industry and Merchandising Division

October, 1959
6521-504

Prices 50 cents

Vol. 2—Part II—Section-B

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes as follows: **Volume I** — The Primary Industries, including mining, forestry and fishing; **Volume II** — Manufacturing; **Volume III** — Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups:

- I — General Review of the Manufacturing Industries
- II — The Manufacturing Industries of Canada,
(7 sections, see below:)
- III — Foods and Beverages
- IV — Tobacco and Tobacco Products
- V — Rubber Products
- VI — Leather Products
- VII — Textile Mills
- VIII — Knitting Mills
- IX — Clothing
- X — Wood and Paper Products
- XI — Printing Trades
- XII — Iron and Steel Products
- XIII — Transportation Equipment
- XIV — Non-ferrous Metal Products
- XV — Electrical Apparatus and Supplies
- XVI — Non-metallic Mineral Products
- XVII — Products of Petroleum and Coal
- XVIII — Chemicals and Allied Products
- XIX — Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit of filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section A. Summary for Canada
- Section B. Atlantic Provinces
- Section C. Province of Quebec
- Section D. Province of Ontario
- Section E. Prairie Provinces
- Section F. Province of British Columbia, including Yukon and Northwest Territories
- Section G. The Manufacturing Industries of Canada,
Regional Distribution

Prices of most reports released after January 1, 1959 have been increased. Information on the new prices of particular issues is available on request from the Information Services Division of the Dominion Bureau of Statistics.

TABLE OF CONTENTS

Table	Page
1. Principal Statistics of the Manufacturing Industries, by Provinces, 1957	6
Subsection 1. Newfoundland	
2. Principal Statistics of the Manufacturing Industries, 1949-1957	9
3. Principal Statistics Compared 1956 and 1957	9
4. Principal Statistics of the Leading Industries of Newfoundland, 1957	9
5. Principal Statistics by Industrial Groups, 1956 and 1957	10
6. Principal Statistics of the Individual Industries, 1957	12
Subsection 2. Prince Edward Island	
7. Principal Statistics of the Manufacturing Industries, 1931 to 1957	18
8. Principal Statistics Compared 1956 and 1957	19
9. Principal Statistics of the Leading Industries of Prince Edward Island, 1957	19
10. Principal Statistics by Industrial Groups, 1956 and 1957	20
11. Principal Statistics of the Individual Industries, 1957	22
Subsection 3. Nova Scotia	
12. Principal Statistics of the Manufacturing Industries, 1931 to 1957	28
13. Principal Statistics Compared, 1956 and 1957	29
14. Principal Statistics of the Leading Industries of Nova Scotia, 1957	29
15. Principal Statistics by Industrial Groups, 1956 and 1957	30
16. Principal Statistics of the Individual Industries, 1957	32
Subsection 4. New Brunswick	
17. Principal Statistics of the Manufacturing Industries, 1931-1957	40
18. Principal Statistics Compared, 1956 and 1957	41
19. Principal Statistics of the Leading Industries of New Brunswick, 1957	41
20. Principal Statistics by Industrial Groups, 1956 and 1957	42
21. Principal Statistics of the Individual Industries, 1957	44

THE MANUFACTURING INDUSTRIES OF CANADA

Section B

ATLANTIC PROVINCES

1957

The Atlantic Provinces are of economic importance in a number of fields, such as pulp and paper, fish processing, sawmills and primary iron and steel. In Newfoundland manufacturing production is dominated by the forest and fisheries resources. Pulp and paper was the most important industry in 1957 with shipments valued at \$63,302,987, followed by fish processing with \$16,408,800. These two industries accounted for 68 per cent of the total production of the Province. In Prince Edward Island agriculture and fishing resources make butter and cheese, slaughtering and meat packing, and fish processing the leading industries. Nova Scotia is renowned for its coal mines and its fisheries as well as extensive forests and agricultural lands and is favoured with easy access by sea to the high-grade iron-ore supply of Newfoundland. On these resources are based the leading manufactures of primary iron and steel, fish processing, pulp and paper, shipbuilding and sawmills. In addition, an important petroleum refinery, railway rolling stock, coke and gas, miscellaneous iron and steel and aircraft plants add to the diversification of the Province. The forests of New Brunswick give a leading place to its pulp and paper and sawmilling industries. Other important manufacturing and processing activities are based on fish and agricultural resources. There are also a number of metal working industries, such as heating and cooking apparatus, brass and copper products, etc.

Nova Scotia and New Brunswick, despite the lack of large rivers, have valuable sources of hydraulic power, a considerable portion of which has been developed. Tentative estimates give Newfoundland a potential of almost 1,000,000 h.p. at ordinary minimum flow, while in Labrador, the Hamilton River is outstanding as a potential source of power. Turbine installation at the end of 1957 totalled 337,970 h.p. in Newfoundland, 1,882 in Prince Edward Island, 181,958 in Nova Scotia and 209,130 in New Brunswick. Compared with Quebec, Ontario and British Columbia, the installed power in the Atlantic Provinces, is very small, amounting to 730,940 h.p. This compares with a total of 1,221,745 in the Prairie Provinces and 19,916,008 in the whole of Canada.

Manufacturing establishments reporting in 1957 numbered 3,446 for the Atlantic Provinces as a whole. These plants furnished employment to 64,651 persons who received \$187,182,459 in salaries and wages. They also shipped goods with a selling value at the factory of \$881,761,194 and spent \$485,338,979 for materials, while the value added by manufacture totalled \$362,353,683.

Considering the Atlantic Provinces as an economic unit, pulp and paper was the leading industry in 1957 with factory shipments valued at \$179,676,000. Fish processing and packing with factory shipments valued at \$81,181,000 was in second place. Other leading industries, in order of importance and with shipments exceeding

\$30,000,000, were: petroleum products, primary iron and steel, sawmills, sugar refining and railway rolling stock. These seven industries accounted for 58 p.c. of the total value of factory shipments of the Atlantic Region. Other leading industries with shipments of \$10 to \$30 million and in order of importance, were: butter and cheese, shipbuilding and repairs, bread and other bakery products, slaughtering and meat packing, miscellaneous food preparations, sash, door and planing mills, printing and publishing, coke and gas products, breweries, prepared stock and poultry feeds, carbonated beverages and miscellaneous iron and steel products.

For the Atlantic Provinces as a whole there was a drop of 1.1 p.c. in the number of persons employed and an increase of 4.6 p.c. in the value of factory shipments in 1957 as compared with the previous year. Not all industries, however, shared in the increased shipments. Most of the seven leading industries reported increased shipments in 1957, ranging from 37.6 p.c. for petroleum products to 3.5 p.c. for railway rolling stock. Pulp and paper was down 6.2 p.c. while fish processing and packing remained practically unchanged. For the leading industries with shipments of \$10 to \$30 million the trend was mixed. Increases were reported by seven industries, ranging from 23.8 p.c. for coke and gas products to 2.7 p.c. for printing and publishing. The remaining five industries in the \$10 to \$30 million class reported decreased shipments. The greatest decline of 11.0 p.c. was reported by sash, door and planing mills and the lowest decline of 0.2 p.c. by the miscellaneous iron and steel products industry. A notable feature of the 1957 manufacturing operations in the Atlantic Provinces was the continuing expansion in the petroleum products industry in Nova Scotia, with shipments increasing 38 p.c. over the previous year.

In the Atlantic region the program of industrial development has been more selective than in some of the other provinces. Fish processing, new sawmills, increased pulp-making capacity and the manufacture of non-metallic building materials like cement and gypsum products have accounted for well over half of the industrial growth. There are however, a few outstanding exceptions. Two sizeable defence plants have been established in Nova Scotia, one to repair and overhaul naval aircraft and the other to build and repair radar and related electronic equipment. Considerable development has taken place in Newfoundland. Besides plants for the manufacture of cement and gypsum wallboard and plaster, factories for producing boots and shoes, birch veneer, leather goods, industrial machinery and a leather tannery were established, thus broadening the industrial base of the province. With these exceptions, most of the developments in the Atlantic Provinces have been either small and scattered or confined to the modernization and expansion of manufacturing facilities that were already established at the close of World War II.

Principal Statistics of the Atlantic Provinces, 1957

Province	Establishments	Employees	Salaries and wages	Cost at plant of materials used	Value added by manufacture	Selling value of factory shipments
	number			thousands of dollars		
Newfoundland	916	10,473	32,784	53,995	56,544	117,714
Prince Edward Island	193	1,663	3,279	18,315	6,580	24,953
Nova Scotia	1,356	31,530	90,635	238,287	175,683	427,299
New Brunswick	981	20,985	60,485	174,742	123,547	311,795
Total	3,446	64,651	187,183	485,339	362,354	881,761

In spite of the rapid development in the Atlantic Provinces since 1949 manufacturing production did not quite keep pace with the development in the more industrialized provinces of Ontario, Quebec and British Columbia. This is indicated by a slight drop in the Atlantic Provinces' share of the Canadian total from 4.52 in 1949 to 3.97 in 1957. In number of persons employed there was an increase of 1.3 per cent for the Atlantic Provinces as compared with an increase of 15.8 per cent for Canada as a whole. For salaries and wages paid the increase was 57.2 per cent as compared with 85.8 per cent for Canada, and in selling value of factory shipments the increase was 53.3 per cent for the Atlantic Provinces and 77.6 per cent for Canada as a whole. The increased employment since 1949 reported by Newfoundland and Nova Scotia was offset by declines in Prince Edward Island and New

Brunswick, resulting in a net increase of only 1.3 p.c. for the Atlantic Provinces as compared with an increase of 15.8 p.c. for Canada.

As mentioned previously, the drop in manufacturing employment in 1957 in the Atlantic Provinces was 1.1 p.c., accompanied by an increase in the selling value of factory shipments of 4.6 p.c. This compares with an increase of 0.4 p.c. in employment and 2.5 p.c. in factory shipments for Canada as a whole. Nova Scotia manufacturers operated at a higher level in 1957 with an increase of 1.9 p.c. in employment and 11.2 p.c. in selling value of factory shipments. Both Newfoundland and New Brunswick reported decreases in employment and shipments, while Prince Edward Island, although reporting lower employment, nevertheless reported slightly higher shipments.

Variation in Employment and Factory Shipments, 1957 Compared with 1949

Province	Employees	Salaries and wages	Selling value of factory shipments
	per cent		
Newfoundland ¹	+16.5	+85.6	+50.6
Prince Edward Island	-4.8	+53.7	+37.7
Nova Scotia	+7.6	+65.7	+72.6
New Brunswick	-10.5	+36.8	+34.7
Atlantic Provinces	+1.3	+57.2	+53.3
Canada	+15.8	+85.8	+77.6

¹ Exclusive of fish processing.

PROVINCE OF NEWFOUNDLAND

TABLE 2. Principal Statistics of the Manufacturing Industries of Newfoundland, 1949 - 1957

Year	Establishments	Employees	Salaries	Cost at plant	Value added	Gross
			and wages	of materials used	by manufacture ¹	value of products ²
		number		dollars		
1949 ³	793	6,934	15,486,336	31,228,173	32,918,776	67,264,282
1950 ³	850	6,682	16,246,252	31,505,623	36,712,377	71,062,850
1951	822	9,622	22,681,246	43,117,299	53,690,187	100,642,613
1952	948	10,303	25,233,851	45,477,620	56,109,014	105,459,684
1953	939	10,575	26,604,908	44,972,021	57,784,697	106,524,603
1954	790	9,892	30,101,186	46,503,032	59,483,922	109,567,770
1955	785	10,361	28,604,468	49,914,856	60,586,922	115,579,036
1956	783	10,502	30,462,735	55,451,956	62,607,709	123,691,344
1957	916	10,473	32,783,715	53,995,122	56,543,792	117,713,795

¹ In 1951 and previous years the "Value added by manufacture" is computed by subtracting cost of fuel, electricity and materials used from the "Gross value of products"; in 1952 and 1953, from factory shipments; in 1954 and subsequent years from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

³ Exclusive of fish processing.

1957	193	"	1,663	3,278,822	18,315,249	6,579,507	24,952,853

¹ Prior to 1952 the "Value added by manufacture" is computed by subtracting the cost of materials, fuel and electricity used from the "Gross value of products", in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

TABLE 8. Principal Statistics Compared, 1956 and 1957

Principal statistics		1956	1957	+Increase -Decrease
Establishments	No.	192	193	+ 1
Supervisory and office employees:				
Male	"	338	315	- 23
Female	"	96	89	- 7
Salaries	\$	981,372	932,042	- 49,330
Production workers:				
Male	No.	926	886	- 40
Female	"	415	373	- 42
Wages	\$	2,252,032	2,346,780	+ 94,748
Cost of fuel and electricity	\$	401,428	409,434	+ 8,006
Cost at plant of materials used	\$	17,806,842	18,315,249	+508,407
Value added by manufacture ¹	\$	6,161,628	6,579,507	+417,879
Selling value of factory shipments	\$	24,497,245	24,952,853	+455,608

¹Calculated value of production (shipments plus closing inventory, minus opening inventory of finished products) less cost of materials and fuel and electricity used.

¹ Prior to 1952 the "Value added by manufacture" is computed by subtracting the cost of materials, fuel and electricity used from the "Gross value of products"; in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

TABLE 13. Principal Statistics Compared, 1956 and 1957

Principal statistics		1956	1957	+ Increase - Decrease
Establishments	No.	1,402	1,356	- 46
Supervisory and office employees:				
Male	"	3,780	3,999	+ 219
Female	"	1,161	1,254	+ 93
Salaries	\$	16,142,859	17,775,461	+ 1,632,602
Production workers:				
Male	No.	22,471	22,582	+ 111
Female	"	3,525	3,695	+ 170
Wages	\$	67,805,651	72,859,154	+ 5,053,503
Cost of fuel and electricity	\$	13,346,321	16,056,542	+ 2,710,221
Cost at plant of materials used	\$	214,779,069	238,286,745	+23,507,676
Value added by manufacture ¹	\$	159,820,242	175,682,924	+15,862,682
Selling value of factory shipments	\$	384,398,103	427,299,045	+42,900,942

¹ Calculated value of production (shipments plus closing inventory, minus opening inventory of finished products) less cost of materials and fuel and electricity used.

¹ Prior to 1952 the "Value added by manufacture" is computed by subtracting the cost of materials, fuel and electricity used from the "Gross value of products;" in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

TABLE 18. Principal Statistics Compared, 1956 and 1957

Principal statistics		1956	1957	+Increase -Decrease
Establishments	No.	1,004	981	- 23
Supervisory and office employees:				
Male	"	2,668	2,564	- 104
Female	"	853	828	- 25
Salaries	\$	11,800,042	12,174,704	+ 374,662
Production workers:				
Male	No.	16,019	14,929	- 1,090
Female	"	3,020	2,664	- 356
Wages	\$	49,263,259	48,310,603	- 952,656
Cost of fuel and electricity	\$	14,250,659	14,136,491	- 114,168
Cost at plant of materials used	\$	176,440,306	174,741,863	-1,698,443
Value added by manufacture ¹	\$	125,314,488	123,547,460	-1,767,028
Selling value of factory shipments	\$	313,280,599	311,795,501	-1,485,098

¹ Calculated value of production (shipments plus closing inventory, minus opening inventory of finished products) less cost of materials and fuel and electricity used.
