## SYMBOLS

The following symbols have been used in the "Footnote or Symbol" column in this report:

.. Data on quantity not available

... Data on quantity not appropriate or not applicable

X Data on quantity and value confidential under Section 15 (2) of the Statistics Act; publication would substantially reveal particulars relating to one or more establishments. Value for this item included in relevant industry group for the reporting establishment under "Products for which data cannot be published".

For footnotes (indicated by numbers), see end of table.

## UNITS OF MEASURE

Abbreviation	Unit	Remarks
BBL	Barrel	Petroleum coke - 420 lb Other petroleum products - 34.97 Canadian gallons
BOOK	Book of matches	Number varies
BU	Bushel	
CASE	Case	Quantity varies
CELL	Cell	
CORD	Cord	A pile of wood 4x4x8 feet
CU FT	Cubic foot	
CWT	Hundredweight	
DOZ	Dozen	100 pounds avoirdupois
DOZ PR	Dozen pair	
FT	Foot	
GAL	Gallon	Canadian gallon (for all practical purposes, equivalent to the Imperial gallon)
GROSS	Gross	12 dozen
KEG	Keg	Nails, rivets, etc. - 100 pounds (Net weight) Pound avoirdupois
LB	Pound	
LB BF	Pounds butterfat	
M	Thousand	
M B F	Thousand board feet	1 board foot is 12"x12"x1"
M CU FT	Thousand cubic feet	
M LIN FT	Thousand linear feet	
M SQ FT	Thousand square feet	
NO	Number	
PF GAL	Proof gallon	A Canadian gallon of spirits containing 57.06 per cent by volume of ethyl alcohol
PR	Pair	
REAM	Rream	480 sheets of paper
RF SQ	Roofing square	Sufficient roofing material to cover 100 square feet of roof.
SET	Set	
SQ FT	Square foot	
SQ YD	Square yard	
TON	Short ton	
YD	Yard	2000 pounds avoirdupois

## EXPLANATORY NOTES

### Scope of the Report

Several important qualifications with respect to content, coverage and arrangement of the items listed in the report should be noted by the user. Although most of the items listed are commodities, services performed by manufacturing establishments, such as repairs, dyeing, shrinking, etc., are also included. The object of including such service items is to conform with the "value of shipments of goods of own manufacture" concept used in the Bureau's annual Census of Manufactures. This census, which applies to all establishments classified to the manufacturing industries (classes 101 to 399, inclusive, of Statistics Canada Standard Industrial Classification<sup>1</sup>), provides complete coverage of operational activities and collects, among other items, detailed data on value and, where applicable, quantities of goods of own manufacture shipped as well as services provided. Data for all commodities represent **quantities and values of goods of own manufacture shipped in 1969** regardless of whether manufactured in 1969 or earlier. Goods purchased for re-sale are specifically excluded from this report.

"Canadian manufacturers" as used in this report includes all of the establishments classified to the manufacturing industries mentioned above, i.e. those establishments whose principal activity is manufacturing, together with those establishments classified to other industries, such as construction and wholesale trade, whose principal activity is not manufacturing but which nevertheless engage in some manufacturing activity. This latter group of establishments was asked to complete a special "Commodity Schedule" listing details of products of own manufacture sold or shipped in 1969. The inclusion of products shipped by this group of establishments results, of course, in a greater value of factory shipments than that reported by the manufacturing industries *per se*.

### Arrangement and Identification of Items

Pending implementation of the Industrial Commodity Classification in the annual Census of Manufactures, the arrangement of the items, as in previous years, is basically alphabetical. This means that, in some cases, even using an alphabetic key, the commodities in the report are not directly comparable with those in Statistics Canada reports,

<sup>1</sup> Standard Industrial Classification Manual (Catalogue 12-501), Statistics Canada, 1960.

"Imports by Commodities" and "Exports by Commodities", which are based on the Standard Commodity Classification.

Although the arrangement of items is essentially alphabetical, certain exceptions have been made in the case of commodities in the clothing, electrical appliance (small), fabrics, food, furniture, machinery and some other groups. Under "Clothing", for example, are listed in alphabetical order all major items of wearing apparel except footwear, gloves and mittens, headwear and hosiery, each of these four appearing in its appropriate place in the main listing. Within the clothing and other groups, major items (e.g. coats, dresses, suits, etc.) have been listed in alphabetical order, but subdivisions in many instances have been arranged, in conformity with industry or traditional usage, by such criteria as chief component material, method of fabrication, and sex and age group of the consumer. The basis for arrangement of such sub-groups should be readily apparent in most cases.

The use of computer print-out for this report has necessitated showing all footnotes and symbols in a special column, the condensing of some commodity descriptions, and the omission of the apostrophe from certain possessive forms (e.g., "mens" for "men's"). For an explanation of symbols and units of measure, see facing page; for footnotes, see end of table.

### Limitations of Data

Although every effort has been made to ensure complete coverage and unique identification of items included in the list, certain inherent limitations in the collection and presentation of the basic data should be noted. To avoid placing an undue reporting burden on respondents, the Bureau asks manufacturing establishments in each industry to report a specified list of products and to report separately any other large items not on the specified list. All other products shipped are reported in total only and are included in the "All other products, not specified" category following the alphabetical list of products in this report. It is obvious, therefore, that this "not specified" category may include items in the alphabetical list which were not considered of sufficient importance by individual establishments to be reported separately. It is impossible, of course, to estimate the effects of the non-allocation of "not specified" products to individual items although it is not considered serious enough to distort the value

of the list for most purposes. In total, the value of such products was \$1,017.0 million, representing 2.2 per cent of the aggregate value of shipments.

In addition to those products not specified by the reporting establishment, there are a large number of items specified on individual returns which cannot be published without substantially revealing particulars relating to one or more establishments. Such items are identified by "x" in the "Footnote or Symbol" column and are included in total, by group, under the heading "Products for which data cannot be published" at the end of the list. In total, these amounted to \$1,183.1 million, of which the chemical and chemical products industries accounted for \$369.6 million; primary metals, \$141.7 million; and transportation equipment, \$127.1 million.

Although efforts have been made to avoid duplication in the listing of products, it is possible that essentially the same commodity produced in different establishments has been reported under different names, especially when such items were not on the "specified products" list and were "written in" by

the respondent. In such cases, the items would appear separately, or possibly in more detail than under another name, in the following list.

#### **Additional Sources of Information**

Shipments data in this report consolidate figures for commodities shipped by establishments classified to different industries. Statistics on shipments of specific commodities from particular industries are issued in annual reports on those industries; such reports are normally issued well in advance of "Products Shipped by Canadian Manufacturers" as the latter cannot be compiled until commodity data are available from all industries. In addition, readers with an interest in particular commodities will find that individual industry reports sometimes give more detail on shipments from those industries—or from all industries—than it is practicable to include in this consolidated report. Titles of the more than 130 annual reports for individual industries are included in Statistics Canada Subscription Order Form, available without charge from the Information Division, Statistics Canada, Ottawa, Ontario.
