PRIMARY IRON AND STEEL IN CANADA

JULY, 1947

Shipments of primary shapes by Canadian steel mills, exclusive of producers' interchange, totalled 167,498 net tons in July, 1947, compared with 188,655 net tons in June, 1947. The July, 1947 total included 14,659 tons of semi-finished shapes; 7,049 tons of structurals; 14,174 tons of plates; 14,357 tons of rails; 34,915 tons of hot rolled bars; 10,753 tons of pipes and tubes; 16,856 tons of wire rods; 18,072 tons of black sheets; 7,264 tons of galvanized sheets; 394 tons of tool steel; 5,580 tons of castings, and 23,445 tons of other shapes. The amount of producers' interchange was 57,258 tons in July and 70,478 tons in June.

Of the amount shipped for sale during July, 30,539 tons went direct to railways and railway car shops; 8,123 tons to pressing, forming and stamping plants; 18,808 tons to merchant trade products; 19,431 tons to building construction; 14,252 tons to the containers industry; 4,578 tons to agricultural equipment; 9,644 tons to the automotive industry; 11,264 tons to machinery plants; 3,101 tons to shipbuilding; 5,112 tons to mining, lumber, etc., and 3,297 tons to miscellaneous industries. Wholesalers and warehousing accounted for 22,259 tons and exports for 17,090 tons. Producers' interchange, or the tonnage shipped to producers' own works for further processing totalled 57,258 tons in July.

NOTE: Because there is at present an unavoidable delay in compiling the statistics of imports into Canada, it has been decided to issue this monthly report in two sections for a few months.

The first section on "Production and Shipments" will be released as soon as possible after the end of each month and the second section on "Imports" will follow about three weeks later as a separate report. This is a temporary arrangement and the two sections will be combined again when the situation with regards to imports has been cleared up.
