DOMINION BUREAU OF STATISTICS - CANADA
Dominion Statistician: R. H. Coats, B.A., F.S.S. (Hon.), F.R.S.C.
Mining, Metallurgical and Chemical Branch

Chief: S. J. Cook, B.A., A.I.C., F.C.I.C.

THE PRIMARY IRON AND STEEL INDUSTRY IN CANADA, 1928.

Sales from the primary iron and steel industry (including production of pig iron, ferro-alloys, steel ingots and direct steel castings) in Canada during 1928 amounted to \$62,071,674, an increase of 36 per cent over the \$45,571,264 reported in the previous year which in turn was 11 per cent over the \$41,183,565 recorded for 1926.

of the 40 firms engaged principally in this line of production, 16 were located in Ontario, 10 in Quobec, 6 in Nova Scotia, 4 in Manitoba, 3 in British Columbia, and 1 in Saskatchevan. These concerns reported fixed and working capital at \$114,292,363; employed a monthly average of 9,057 people and paid \$15,470,836 in salaries and wages. Mamufacturing processes added \$34,907,211 to the value of purchased materials which cost \$27,164,463. An analysis of the sales values by provinces showed the following distribution: Ontario, \$36,926,646; Nova Scotia, \$15,625,206; Quebec, \$7,350,581; Manitoba, \$1,959,241; and Alberta and British Columbia, \$210,000.

(a) Pig Iron. Blast furnace production of 1,037,727 tong tons of pig iron showed a gain of 46 per cent over the 1927 output of 709,697 tons. About 70 per cent of the output, or 706,700 tons, was shipped to the makers' own plants, 258,479 tons were sold and the remainder, not otherwise accounted for, 72,548 tons, was probably in stock at the end of the year. Production for the year included 724,559 tons of basic iron, 233,386 tons of foundry iron and 79,782 tons of malleable iron.

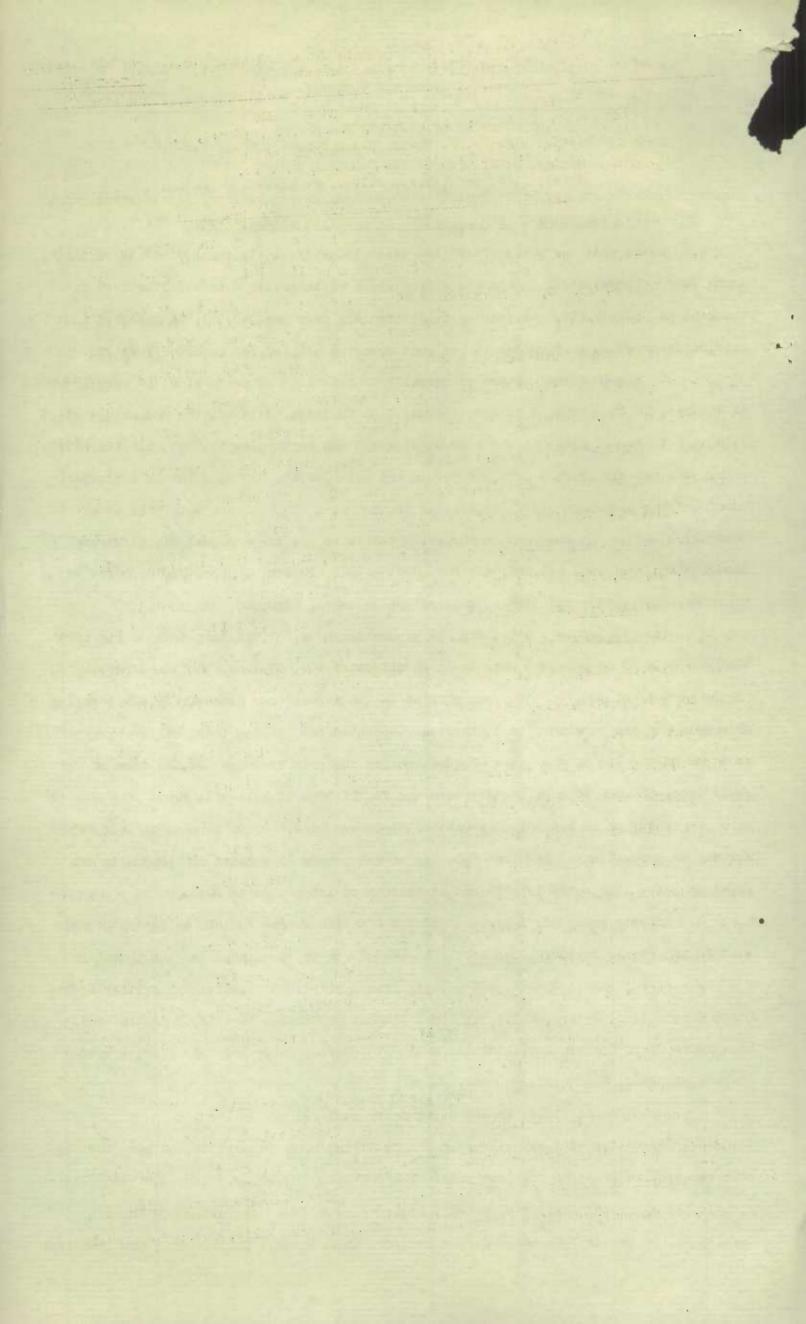

Based on an estimated population in Canada of 9,658,000 persons in 1928, the per capita production of pig iron amounted to 241 pounds as against 167 pounds in the previous year, 178 pounds in 1926 and an average of 136 pounds in 1925.

Ontario produced 71 per cent of the Canadian output in 1928 as against 65 per ent in the previous year. Nova Scotia accounted for the remainder in each year.

Four firms in Canada produced pig iron during 1928, namely: The British Empire Steel Corporation, Sydney, N.S.; The Steel Company of Canada, Limited, Hamilton, Ont.; The Algoma Steel Corporation, Limited, Sault Ste. Marie, Ont.; and The Canadian Furnace Company, Limited, Port Colborne, Ont.

Employees in blast furnace departments numbered 959 in 1928.

Production of ferro-alloys in Canada during 1928 totalled 44,882 long tons as compared with 56,230 tons for last year. The following firms manufactured during 1928: Electro Metallurgical Company of Canada, Ltd., Welland, Ont. (including the Union Carbide Co. of Canada); Canadian Carborundum Co. Ltd., Niagara Falls, Ont.; The Abrasive

Company of Canada, Ltd., Remilton, Ont.; and the Exolon Co., Thorold, Ont. Only the first mentioned company has been included in the iron and steel group, the others being essentially manufacturers of abrasives.

(5) Steel Ingots and Castings.— Production of steel ingots and castings in 1928 was 1,234,719 tons, an increase of 36 per cent over the total of 907,945 tons for 1927. The year's figures included 1,190,001 tons of steel ingots and 44,718 tons of steel castings; practically all the ingots were intended for the further use of the makers while most of the castings were made for sale.

Por capita production in Canada of steel ingots and castings amounted to 288 pounds during the year under review, as compared with 213 pounds in 1927, an average of 185 pounds in 1926, and 180 pounds in 1925.

During the year 23 plants had furmaces for making steel ingots and direct steel castings. Quebec had 7 plants; Ontario, 7; Manitoba, 3; British columbia, 3; Nova Scotia, 2; and Alberta, 1.

Employees in these plants numbered 3,079 in 1928.

(c) Rolled Products.- Rolling mill sales were valued at \$46,565,831 in 1928 as compared with \$31,354,665 in 1927. During the year 1,445,081 long tons of iron and steel passed through the rolling mills and of this total 1,306,179 tons came from the producers' own plants and 138,904 tons were purchased.

The 12 rolling mills operated during 1928 were located as follows: Ontario, 5; Quebec, 3; Nova Scotia, 3; Manitoba, 1. The average number of employees in these plants in 1928 was 5,019.

Rolling mill products in 1928 included 1,058,321 tons of blooms, billets and slabs; 358,375 tons of bars, 349,189 tons of rails, 160,446 tons of rods; 70,613 tons of railway tie plates; 54,193 tons of plates and sheets; 35,659 tons of structural steel shapes; 17,549 tons of railway fish plates; 350,598 kegs of railway spikes, and many articles such as axles for railway cars and locomotives; railway track equipment, horseshoes, washers, bolts, nuts, rivets. etc. There are, of course, some duplications in the tonnages given above; for example, most of the blooms and billets are rolled into bars, rods, etc.

Table 1.- PRINCIPAL STATISTICS OF THE PRIMARY IRON AND STEEL INDUSTRY IN CANADA, 1924-1928
