THE PRIMARY IRON AND STEEL INDUSTRY

1952

Statistics for the Primary Iron and Steel Industry include data for all establishments in Canada which were engaged chiefly in the manufacture of (a) pig iron, (b) ferro-alloys, (c) steel ingots and steel castings, (d) hot-rolled iron and steel products, (e) cold-drawn steel bars, strips and shapes. Forty-five firms were included in this industry in 1952, and reports were received from 58 different plants or departments, including 5 blast furnace departments, 3 ferro-alloy plants, 36 steel furnace divisions, and 14 rolling or drawing mills. Separate reports were received for blast furnace departments, for steel furnace divisions and rolling mills, even when all three were units of a single works.

Factory sales of pig iron, ferro-alloys, steel ingots and castings and finished rolled products were 8.5 per cent higher in value in 1952 than in 1951, the totals being \$504,000,394 and \$464,587,486 respectively. Twenty-four works in Ontario accounted for 77 per cent of the total for Canada, or \$386,834,377; 14 plants in Quebec accounted for 12 per cent, or \$60,535,519; 5 plants in Nova Scotia for

8 per cent, or \$40,477,549 while the remaining \$16,152,949, or 3 per cent, was accounted for by 4 plants in Manitoba, 2 in Alberta and 9 in British Columbia.

In 1952 a total of 35,001 people was employed in this industry, an increase of 4.8 per cent over the 1951 total of 33,393. Sixty-seven per cent of the employees, or 23,479, worked in plants in Ontario, 5,319 in Nova Scotia, 4,503 in Quebec, 1,058 in Manitoba and 642 in Alberta and British Columbia. Payments in salaries and wages during 1952 amounted to \$124,387,290, an increase of 14.6 per cent over the previous year's total of \$108,561,802. Salaries advanced to \$18,972,041 from \$16,744,000 and wages increased to \$105,415,249 from \$91,817,802.

Materials used in manufacturing processes cost \$239,001,158 in 1952 compared with \$223,011,814 in 1951, and the cost of fuel and electricity was \$31,421,918 as against \$32,103,307, an increased expenditure of 6 per cent for materials, fuel and power.

PIG IRON

Output of 2,681,585 net tons of pig iron in 1952 was 5 per cent more than the 2,552,893 tons reported for the previous year. Production of basic iron amounted to 2,053,691 tons or 77 per cent of the total; foundry iron amounted to 220,754 tons, and malleable iron to 407,140 tons.

Producers' sales of pig iron totalled 752,963 tons at \$37,998,156 compared with 726,357 tons at \$36,891,960 in 1951.

Charges to iron blast furnaces during the year included 3,477,356 tons of imported iron ore, 1,404,797 tons of Canadian ore, 2,493,903 tons of coke and 981,489 tons of limestone.

Imports of pig iron during the calendar year decreased to 1,665 tons from the 22,126 tons in 1951, and exports increased to 375,987 tons from 223,635 tons.

Producers' stocks of pig iron at the end of 1952 totalled 58,959 tons compared with 81,220 tons at the end of the previous year.

The apparent consumption of pig iron in Canada, as calculated by deducting the exports from the sum of the production and imports, and allowing for changes in producers' stocks, amounted to 2,329,524 tons in 1952, or about 1 per cent less than in 1951 when the apparent domestic supply was 2,355,536 tons.

Producers of pig iron in Canada had 15 blast furnaces at the end of 1952 which could produce 3.45 million net tons if operated at rated capacity. Actual production of 2,681,585 net tons in 1952 showed an operating rate of about 78 per cent. Fifteen furnaces were in blast during the year.

FERRO-ALLOYS

Ferro-alloys were made in 1952 by 9 different concerns, 5 of which recovered ferrosilicon as a by-product in the manufacture of abrasives. Output of ferro-alloys in 1952 amounted to 232,117 tons, a decline of about 13 per cent from the 266,252 tons reported in 1951.

Altogether, ferrosilicon was made in eight different plants, spiegeleisen in one, ferrochrome in two, ferromanganese in one and silicomanganese in one. Other ferro-alloys produced by one firm only included silicospiegel, ferrozirconium, chrom-sil-x and ferrophosphorus.

IRON AND STEEL PRODUCTS

STEEL INGOTS AND CASTINGS

Steel production increased about 4 per cent to 3,703,111 tons in 1952 from 3,568,720 tons in 1951, the output of steel ingots going to 3,577,758 tons from 3,447,132 tons, while castings production rose to 125,353 tons from 121,588 tons. Factory sales of ingots and castings totalled 265,723 tons at \$57,178,291.

Thirty-six steel plants were in operation during the year. At the end of 1952 these plants had 127 furnaces, including 48 basic open-hearth furnaces with an annual rated capacity of 3,808,900 tons, 77 electric furnaces rated at 970,400 tons and 2 con-

verters at 4,800 tons. There were 10 makers of steel ingots with capacity of 3,371,700 net tons per annum. The total annual steel capacity of all plants, including ingots and castings, was 4,784,100 tons at the year-end.

Operating steel furnaces in 1952 used 1,958,258 net tons of pig iron, 2,122,270 tons of scrap iron or steel, 277,804 tons of iron ore, 276,202 tons of limestone, 149,310 tons of dolomite, 74,986 tons of lime, 135,439 tons of silica sand, 17,918 tons of magnesite and 52,999 tons of ferro-alloys.

ROLLED AND DRAWN STEEL

In 1952 there were 11 mills occupied chiefly in hot rolling of steel products and 3 mills making only cold-drawn and cold-rolled shapes. Eight of these mills were in Ontario, 2 in Nova Scotia, 2 in Quebec, 1 in Manitoba and 1 in British Columbia.

Rolling mill sales advanced 9 per cent to \$353,453,081 from \$323,615,728 in 1951. The main items sold during the year under review were 600,302 tons of hot-rolled bars at \$81,124,625; 234,799 tons

of plates at \$26,071,334; 341,302 tons of rails and rail fastenings at \$30,937,476; 399,753 tons of semi-finished forms, such as blooms, billets, etc., at \$34,946,164; 212,919 tons of structural shapes at \$22,140,506; 128,900 tons of wire rods at \$11,554,693; 50,652 tons of cold-reduced bars at \$13,049,782; and other rolled products including hot and cold-rolled sheets and strip, skelp, sheet piling, tin plate, galvanized sheets, etc., totalling 830,152 tons at \$125,322,643.
