MANUFACTURES OF THE NON-FERROUS METALS

THE BRASS AND COPPER PRODUCTS INDUSTRY, 1934.

This report covers the operations of brass foundries and other factories in Canada engaged chiefly in the manufacture of commodities (other than electrical supplies) from brass, bronze and copper. Eighty-one foundries and 44 fabricating plants reported under this industry in 1934 and production was valued at \$19,309,314 at factory prices, compared with outputs worth \$13,150,559 in 1933 and \$9,594,115 in 1932. The record output value for the industry was \$36,115,581 attained in 1929.

Products manufactured during 1934 included copper wire rods, \$6,275,199; copper sheets, plates and tubing, \$1,418,188; brass bars, rods, sheets and tubing, \$1,561,218; railway car and locomotive bearings and fittings, \$1,140,981; brass and bronze wire cloth, \$1,067,508; brass valves, \$769,743; iron valves, \$344,333; brass taps, \$154,629; other water and steam fittings, \$112,904; other plumbers' supplies, \$994,020; brass castings, \$510,944; bronze castings, \$225,205; bronze rods, plates, etc., \$328,058, and many other commodities of less importance. Copper wire and cable lighting fixtures, switches and other such articles for electrical purposes have not been listed under this industry as the concerns which were engaged chiefly in making these products have been classified to the Electrical Apparatus and Supplies Industry which is reviewed in a separate report. The total Canadian production of brass and copper wire and cable, lighting fixtures and commercial castings of brass, bronze and copper is recorded in Tables 12 to 14 of this bulletin.

Of the 125 factories included in this group in 1934, 81 were located in Ontario, 26 in Quebec, 10 in British Columbia, 5 in Manitoba and 1 in each of Nova Scotia, New Brunswick and Alberta. The works in Ontario accounted for 57 per cent of the production and the concerns in Quebec for 37 per cent.

Capital employed in 1934 was reported at \$22,325,567 of which \$13,607,513 represented the value of lands, buildings and equipment, \$4,492,135 the value of inventories and \$4,225,919 the total of operating capital. About 57 per cent of this investment was in Ontario and 36 per cent in Quebec.

The number of employees in 1934 was 3,932 compared with 3,395 in 1933. Salaries and wages aggregated \$4,187,652 in 1934 as against \$3,416,823 for last year.

Materials used for manufacturing during 1934 cost \$11,177,964 delivered at the works. About 45 per cent of this expenditure was for copper ingots, slabs, etc., chiefly for rolling into wire rods for the manufacture of electrical wires and cables.

Three rolling mills operated during 1934 as follows: Anaconda American Brass Ltd., at New Toronto, Ont.; Eugene F. Phillips Electrical Works Limited at Brockville, Ont.; and Canada Wire and Cable Company Limited at Montreal East, P.Q. The first mentioned company manufactured bars, rods, sheets, plates, wire and tubing of brass, bronze and copper, while the other two mills rolled copper wire rods only.

DIRECTORY OF FIRMS INCLUDED IN THE BRASS AND COPPER PRODUCTS INDUSTRY IN CANADA, 1934.

NOTE - This directory carries only the names of the concerns which the Bureau has classified to the Brass and Copper Products Industry. This industry includes all works which were engaged CHIEFLY in making brass and bronze or articles (other than wire or electrical equipment) from brass, bronze and copper.

Manufacturers of copper wire and cable and of electrical equipment have been classified to the Electrical Apparatus Industry which is covered by a separate bulletin.
