# THE MISCELLANEOUS IRON AND STEEL PRODUCTS INDUSTRY

## 1956

The Miscellaneous Iron and Steel Products Industry includes the establishments which cannot be classified to any of the special groups into which the iron and steel industry is divided for statistical purposes. Products made in 1956 included ornamental and architectural iron work, steel forgings, safes, vaults and fittings; railway track equipment, mining machinery, steel wool, fireplace furnishings, horse-shoes, chains, sanitaryware, etc.

Of the 369 firms reporting in this industry in 1956, 173 were located in Ontario, 131 in Quebec, 33 in British Columbia, 15 in Alberta, 11 in Manitoba, 3 in Nova Scotia, 2 in Saskatchewan and 1 in New Brunswick. These firms afforded employment to a total of 11,449 people who were paid \$41,021,637 in salaries and wages. They spent \$3,161,355 for fuel and electricity and \$53,893,506 for materials for use in manufacturing processes. Value of factory shipments amounted to \$124,764,242.

<sup>1</sup> Due to lack of inventory data, figures for value added by manufacture prior to 1954 were obtained by subtracting the cost of materials used, including fuel and electricity, from the total value of factory shipments. In 1954 and 1955 the "Value added" adjustment incorporated the increase or decrease to shipments values resulting from changes in the value of inventories over the period. For these two years, the adjustments that were made used only the change in finished product inventory owned by manufacturers. Beginning with 1956 the calculation of the "Value added" figure was further adjusted to take into account the "Goods in process" as well as the finished goods held at plant or plant warehouse.

Note: Profits or losses cannot be calculated from the above figures as data are not available for general expense items, such as interest, rent depreciation, taxes, insurance, advertising, etc.

<sup>1</sup> Book value of all manufacturing inventories owned and held at plant and plant warehouses.

(a) Beginning with 1954, information on the value of year-end inventory holdings at plant and plant warehouses is being collected as part of the annual Census of Industry. These data were formerly collected by a separate survey. The summarized results for the Miscellaneous Iron and Steel Products Industry for the year under review are shown in the above table.

(b) The opening inventory for the current year may not necessarily agree with the closing inventory published the previous year because of changes in the composition of the industry such as, the addition of new establishments, the disappearance of old ones, or the transfer of establishments to other industries for statistical purposes. The figure for value added by manufacture for the previous year does not need to be altered because of such changes in the composition of the industry.
