THE MISCELLANEOUS NON-FERROUS METAL PRODUCTS INDUSTRY

1951

The industry for which statistics are presented in this bulletin covers the operations of a miscellaneous group of concerns which cannot properly be classified to any of the other industries included in the manufactures of the non-ferrous metal group.

In 1951 there were 22 plants included in this group, 11 being located in Ontario, 6 in Quebec, 4 in Manitoba and 1 in British Columbia. Production from these factories was valued at \$8,469,651; the number of employees was 953; payments for salaries

and wages totalled \$2,529,599 and the cost of materials for use in manufacturing processes was \$2,702,958.

Production included gasoline lamps, lanterns, camp stoves and irons, weatherstrip, railway and marine lamps and lanterns, window screens, lamp and lantern burners, name plates, metallic packing, stellite, etc. Output of weatherstrip amounted to \$334,665, compared with \$189,198 in 1950. Figures for the other commodities cannot be published as there were only one or two producers in each case.
