# AUTOMOBILE STATISTICS FOR CANADA

MAY, 1933.

Production of 9,396 motor vehicles in Canada during May was the highest output reported for any month since May, 1931, when 12,738 cars were made. The advance this month was the third gain in succession made during the current year. March output was 101 per cent over that of February; April 24 per cent over that of March; and May 14 per cent greater than April's output. The principal increase over the preceding month was in the output of passenger cars which rose to 8,024 from 6,957 while trucks also showed some improvement at 1,372 as against 1,298 in April.

During May 7,167 cars were made for sale in Canada, leaving a balance of 2,229 intended for export. The apparent consumption of cars in Canada during the month, as determined by adding the 7,167 cars made for sale in Canada to the 159 imported, amounted to 7,326 cars. For the five months ending May 30,939 cars were produced in Canada, 771 were imported and 6,415 were exported.
