AUTOMOBILE STATISTICS FOR CANADA

JUNE, 1933.

Production of automobiles in Canada fell off in June to 7,323 cars from 9,396 cars in the previous month, after advancing sharply in March over February and again showing increases in April and May. The output of passenger cars declined to 6,005 from 8,024 while the number of trucks and other commercial cars showed little change at 1,318 units in June as against 1,372 in May.

During June 5,522 cars were made for sale in Canada, leaving a balance of 1,801 intended for export. The apparent consumption of cars in Canada during the month, as determined by adding the 5,522 made for sale in Canada to the 158 imported, amounted to 5,680 cars. For the six months ending June 38,262 cars were produced in Canada, 929 were imported and 8,714 were exported.

Table 1 -- Number of Automobiles Produced in Canada during June, 1933, and the Six Months ending June, 1932 and 1933.
