AUTOMOBILES - NOVEMBER, 1935.

Production of 13,496 automobiles in Canada during November was 62 per cent over the 8,313 cars made in the previous month and compares with an output of 1,697 cars in November of a year ago. The high rate of output in October and November as compared with the corresponding periods of other years is accounted for by the producing companies advancing the time for the introduction and production of new models.

November figures included 12,042 passenger cars and 1,454 trucks as compared with 7,128 passenger cars and 1,185 trucks in October. Of the cars made for sale in Canada during the month, 5,947 were passenger cars and 729 were trucks, the balance of the cars and trucks being intended for export.

Actual exports, according to customs' records, totalled 5,606 as against 3,931 in October. Imports during the same period advanced to 327 from 180.

For the first eleven months of this year production numbered 159,159 units as compared with totals for the same period of other years, as follows: 114,158 in 1934, 62,662 in 1933, and 58,677 in 1932.
