The following table shows the population of the country of Canada, by sex and age group, for the years 1961 to 1971. The population of the country of Canada has increased from 20,300,000 in 1961 to 21,300,000 in 1971. The increase in population is due to a combination of factors, including a high birth rate and a low death rate. The population of the country of Canada is expected to continue to increase in the future.
