NOTE - Figures in this report are the latest available at time of printing. Revised data by months are given in the printed quarterly editions.

COKE

Production of 142,616 tons of coke in Canada during November exceeded by 8.5 per cent the 131,472 tons of October which in turn was 4 per cent over September. In November of a year ago output was reported at 143,497 tons.

The advance over October was general to all producing areas. In the eastern provinces output rose to 37,260 tons from 35,615, in Ontario to 94,114 tons from 85,914 tons and in the western provinces to 11,242 tons from 9,943 tons.

Included in the November figures were 13,478 tons of breeze of which 4,382 tons were made in the east, 8,063 tons in Ontario and 1,033 tons in the west. Sales of breeze amounted to 9,290 tons and included 2,241 tons by eastern ovens, 6,104 tons by Ontario and 945 tons by western producers.

Coke oven charges during the month included 41,151 tons of Canadian coal and 151,778 tons of imported coal. For the year to date a total of 2,040,077 tons of bituminous coal was carbonized in Canada to make 1,490,484 tons of coke.

NOVEMBER, 1932.

Canadian coal output in November amounted to 1,263,467 tons, a 17.6 per cent decline from the five-year average for the month of 1,532,919 tons. Bituminous coal production during the month totalled 729,244 tons, sub-bituminous coal, 59,137 tons and lignite coal, 475,086 tons.

Alberta mines produced 608,380 tons, a decrease of 1.5 per cent from the November, 1931, total of 617,716 tons. Nova Scotia's output of 375,415 tons was 2.4 per cent above the production in the corresponding month of last year. Output from British Columbia mines totalled 129,318 tons as compared with 171,791 tons a year ago. Saskatchewan operators reported a production of 127,899 tons; in November, 1931, the output was 130,998 tons. New Brunswick mines produced 21,536 tons as against 14,339 tons a year ago.

Coal imports into Canada declined 9.7 per cent to 1,508,202 tons from the November, 1927-1931 average of 1,670,947 tons. Anthracite coal imports totalled 342,989 tons, made up of 197,696 tons from Great Britain, 126,027 tons from the United States, and 19,266 tons from Germany. From May to November Canada's anthracite requirements were drawn from the following sources: the United States, 42.5 per cent; Great Britain, 55.5 per cent; and Germany, 2.0 per cent. Importations of bituminous coal in November included 1,047,474 tons from the United States and 117,411 tons from Great Britain. Lignite coal imports during the month consisted of 27 tons brought into Manitoba and 301 tons into British Columbia.

Exports of Canadian coal amounted to 33,255 tons or 51 per cent below the average for the month during the past five years of 67,956 tons. Prince Edward Island, Nova Scotia, New Brunswick and Ontario ports cleared 20,081 tons and Manitoba, Saskatchewan, Alberta and British Columbia ports, 13,174 tons.

The Canadian coal supply (computed on the basis of production plus imports less exports) in November was 2,738,414 tons, a decline of 12.7 per cent from the 1927-1931 average for November of 3,135,910 tons. November's supply included 342,989 tons of anthracite coal, 1,863,222 tons of bituminous coal, 59,137 tons of sub-bituminous coal, and 473,066 tons of lignite coal.
