## COAL

Nova Scotia mines produced 345,299 tons as compared with 362,572 tons in June, 1932. Alberta's output was 218,864 tons or 6.0 per cent below the total for June, last year. Production from British Columbia mines totalled 82,337 tons as against 168,303 tons, a year ago. New Brunswick produced 26,030 tons, an increase of 76.2 per cent over the June, 1932 output. An advance of 18.8 per cent was recorded in the output from Saskatchewan mines, the June total was 18,260 tons while in the corresponding month, last year, 15,369 tons were mined.

Exports of Canadian coal totalled 12,155 tons or 77.1 per cent below the June, 1928-1932 average of 53,083 tons. Nova Scotia and New Brunswick ports cleared 8,215 tons of Canadian coal in June and the western ports, 3,940 tons.

Canada's coal supply (computed on the basis of production plus imports less exports) in June was 1,800,702 tons, a 29.0 per cent decrease from the 1928-1932 average for the month of 2,536,544 tons. The June coal supply consisted of 289,276 tons of anthracite coal, 1,433,706 tons of bituminous coal, 16,579 tons of sub-bituminous coal and 61,262 tons of lignite coal. These tonnages were obtained from the following sources: the United States, 49.9 per cent; Canadian mines, 37.7 per cent; and Great Britain, 12.4 per cent.

# C O K E

Production of by-product and gas-house coke in Canada at 135,546 tons during June was slightly higher than the 134,275 tons of the previous month and 12 per cent over the 118,719 tons reported for June of a year ago. An iron blast furnace at Sydney, Nova Scotia was blown in during June necessitating an increase in coke production with the result that output in the eastern provinces rose to 30,846 tons from 27,141 tons. The totals for Ontario and the western provinces were slightly under the May figures due to June being a 30-day month.

June output included 9,905 tons of breeze of which 6,175 tons were made in Ontario. Sales of breeze totalled 3,057 tons of which 839 tons were sold by eastern producers, 2,027 tons by Ontario and 191 tons by ovens in the west.

During the month 40,971 tons of Canadian coal and 143,738 tons of imported coal, or a total of 184,709 tons of bituminous coal, were carbonized in Canada to make 135,546 tons of coke. For the first six months of this year output totalled 808,810 tons as compared with 841,653 tons during the six months ending June, 1932.
