COAL AND COKE STATISTICS FOR CANADA, JUNE, 1934.

C O A L

Canadian coal mines produced 979,022 tons of coal during June or 40.1 per cent above the June, 1933, total of 698,951 tons. The average production for June during the past five years was 979,396 tons. During June, 1934, the output included 881,651 tons of bituminous coal, 29,075 tons of sub-bituminous coal and 68,296 tons of lignite coal.

Nova Scotia's production in June reached a total of 595,606 tons as compared with 345,761 tons a year ago. Production from Alberta mines amounted to 258,251 tons made up of 161,428 tons of bituminous coal, 29,075 tons of sub-bituminous coal and 47,728 tons of lignite coal. In June, 1933, the Alberta output was 220,517 tons consisting of 159,121 tons of bituminous coal, 16,949 tons of sub-bituminous coal and 44,447 tons of lignite coal. An increase of 25.7 per cent was recorded in British Columbia's coal production; the June total was 107,146 tons as against 85,218 tons in June, 1933. Mines in Saskatchewan produced 20,568 tons of coal, a 3.3 per cent decline from the output a year ago. In New Brunswick during June production declined 36 per cent to 17,471 tons from the total for the corresponding month of 1933.

Imports of coal into Canada during June were recorded at 1,532,375 tons as compared with 1,121,313 tons a year ago and the 1929-1933 average for the month of 1,384,106 tons. Anthracite coal receipts in June amounted to 376,482 tons made up of 213,083 tons from Great Britain and 163,399 tons from the United States. During the six months ending June, 39.5 per cent of Canada's anthracite requirements were supplied by Great Britain and 60.5 per cent by the United States. Imports of bituminous coal into Canada were obtained from the following countries - the United States, 1,131,576 tons and Great Britain, 24,269 tons. Forty-eight tons of lignite coal were received from the United States during June.

Canadian coal exports rose to 22,370 tons from the June, 1933, total of 12,155 tons. The June, 1929-1933 average was 42,516 tons. Clearances through Nova Scotia and New Brunswick ports totalled 17,729 tons while Saskatchewan, Alberta and British Columbia ports cleared 4,641 tons.

A 7.2 per cent increase was shown in the tonnage of coal made available for use in Canada in June as compared with the five-year average for the month; the quantities were 2,489,027 tons and 2,320,986 tons, respectively.

COKE - JUNE, 1934.

Production of gas-house and by-product coke in Canada during June at 179,305 tons compares with outputs of 185,171 tons in the previous month and 135,546 tons in the corresponding period of a year ago. The decline from May was largely in Ontario where the tonnage dropped to 113,956 from 120,190, but the western provinces also showed a slight falling-off to 15,384 tons from 15,602 tons while the eastern provinces improved a little to 49,965 tons from 49,379 tons.

Oven charges included 60,410 tons of Canadian coal and 186,733 tons of imported coal, all of which was carbonized to make 179,305 tons of coke. This coke output included 10,494 tons of breeze of which 3,569 tons were made in eastern ovens, 6,109 tons in Ontario and 816 tons in the west.

Disposition of coke by the makers included 18,312 tons used in coke plants, 38,118 tons used in associated smelters, 38,734 tons sold for domestic use and 22,999 tons sold for other uses. Included in the total sales of 61,733 tons were 5,776 tons of breeze of which 2,864 tons were sold by works in the eastern provinces and 2,860 tons by Ontario producers.

For the six months ending June 30, 1934, the cumulative output of coke in Canada amounted to 1,105,880 tons compared with 808,810 tons and 841,653 tons made during the corresponding periods of 1933 and 1932, respectively.
