COAL AND COKE STATISTICS FOR CANADA, SEPTEMBER, 1934.

C O A L

Canadian coal mines produced 1,293,867 tons of coal during September as compared with 1,140,978 tons, a year ago. The average production for September during the past five years was 1,150,150 tons. The output of bituminous coal during September totalled 881,621 tons; sub-bituminous coal, 40,417 tons, and lignite coal, 371,829 tons.

Nova Scotia's production was recorded at 596,649 tons or an increase of 19.4 per cent over the September, 1933, total of 499,850 tons. Alberta mines produced 479,662 tons consisting of 141,131 tons of bituminous coal, 40,417 tons of sub-bituminous coal, and 298,114 tons of lignite coal. In September, 1933, Alberta's output was made up of 117,799 tons of bituminous coal, 62,169 tons of sub-bituminous coal, and 256,720 tons of lignite coal. Production from British Columbia sources amounted to 116,070 tons, a 3.1 per cent advance over the total for the corresponding month of 1933. A 9.5 per cent increase was shown in Saskatchewan's output; in September 73,715 tons were mined and a year ago, 67,330 tons. New Brunswick operators reported an output of 27,771 tons as against 24,288 tons in September, 1933.

Canada imported 1,593,859 tons of coal in September; a year ago 1,464,060 tons were imported and the September, 1929-1933, average was 1,651,710 tons. Receipts of anthracite coal totalled 396,456 tons of which Great Britain supplied 213,490 tons, the United States, 165,164 tons, and Germany, 17,802 tons. During the first nine months of 1934 the Canadian anthracite supply was drawn from the following sources: the United States, 51.6 per cent; Great Britain, 47.5 per cent, and Germany, Belgium and Newfoundland minor tonnages. Imports of bituminous coal were recorded at 1,197,230 tons as compared with 1,083,826 tons in September, 1933. The United States shipped 173 tons of lignite coal into Canada during the month under review.

Exports of Canadian coal amounted to 20,719 tons, an 8.8 per cent advance over the September, 1933, total of 19,049 tons but a 50.4 per cent decline from the five-year average for September of 41,782 tons. Eastern Canada ports cleared 14,224 tons of Canadian coal in September while Saskatchewan, Alberta and British Columbia ports cleared 6,495 tons.

Canada's coal supply in September was computed at 2,867,007 tons; the average for the month during the past five years was 2,760,078 tons.

C O K E

Production of coke in Canada at 188,375 tons in September compares with 189,206 tons in the previous month and 155,711 tons in the corresponding month of last year. Although the total tonnage for the month under review was not equal to that of August the rate of production in September was 6,279 tons a day, an increase of 3 per cent over the 6,103 tons made per day in August.

Compared with the figures for August data for September showed that gains were made in the eastern and western producing areas while the output in Ontario was lower. Tonnage in eastern Canada advanced to 57,092 tons from 52,938 tons and in the west to 16,421 tons from 15,499 tons. Output in Ontario fell off to 114,862 tons from 120,769 tons.

September totals included 9,329 tons of breeze of which 3,481 tons were made in the east, 5,133 tons in Ontario and 715 tons in the west. Sales of breeze totalled 3,572 tons, the eastern sales amounting to 1,811 tons and Ontario sales to 1,684 tons.

For the first nine months of this year the production of coke in Canada amounted to 2,351,882 tons, an increase of 38 per cent over the 1,701,097 tons made during the nine months ending September 30, 1933.
