COAL AND COKE STATISTICS FOR CANADA - JANUARY, 1935.

C O A L

Canadian mines produced 1,513,209 tons of coal during January as compared with 1,290,912 tons, a year ago and 1,268,346 tons, the average for the month during the past five years. The January, 1935 output consisted of 860,115 tons of bituminous coal, 63,599 tons of sub-bituminous coal and 584,495 tons of lignite coal.

Alberta's output of 630,785 tons was 23% higher than the total for January, 1934. During the month under review 176,095 tons of bituminous coal, 68,599 tons of sub-bituminous coal and 436,091 tons of lignite coal were produced in Alberta; in January, a year ago, 164,530 tons of bituminous coal, 65,597 tons of sub-bituminous coal and 324,496 tons of lignite coal were mined. Nova Scotia mines produced 506,564 tons of bituminous coal; in January, 1934 the output totalled 433,414 tons. An 19% increase was recorded in Saskatchewan's production in January as compared with the output a year ago; the totals were 148,404 tons and 125,535 tons, respectively. Production in British Columbia declined to 143,084 tons from the January, 1934 total of 146,636 tons. New Brunswick operators reported an output of 34,372 tons or 16% above the tonnage mined a year ago.

Canada imported 479,026 tons of coal in January; this represented an 11.6% decline from the tonnage brought into this country during January, 1934. The 1930-1934 average for the month was 730,263 tons. Receipts of anthracite coal in January were made up of 161,303 tons from the United States and 5,826 tons from Great Britain. Imports of bituminous coal included 302,074 tons from the United States and 8,728 tons from Great Britain. Lignite coal importations from the United States amounted to 590 tons in January.

Exports of Canadian coal totalled 23,109 tons as against 17,956 tons in January, 1934 and 39,663 tons, the average for January during the past five years.

Canada's coal supply (production plus imports less exports) was computed at 1,964,126 tons in January as compared with the January 1930-1934 average, 1,953,946 tons.

COKE - JANUARY, 1935.

Production of coke in Canada at 199,868 tons in January was 1.6 per cent over the 196,305 tons of the previous month and 2.5 per cent over the 194,957 tons made in the corresponding month of a year ago. The improvement over December was accounted for by the output in Ontario rising to 119,223 tons from 116,434 and in the western

provinces to 17,641 tons from 17,293 tons while the eastern provinces showed little change at 63,004 tons as against 63,078 tons.

Oven charges during January included 85,563 tons of Canadian coal and 183,353 tons of imported coal, or a total of 268,916 tons of bituminous coal all of which was charged to make 199,868 tons of coke. Included in the total coke made was 13,463 tons of breeze of which 6,053 tons came from eastern ovens, 11,640 tons from Ontario and 770 tons from the west. Sales of breeze totalled 11,331 tons, or 6,450 tons by eastern producers, 4,456 tons by Ontario and 425 tons by western ovens.
