MONTHLY REPORT

COAL AND COKE STATISTICS FOR CANADA, OCTOBER, 1946

Production of coal in Canada during the month of October amounted to 1,624,591 tons, making a total of 14,601,416 tons for the year to date. Production for the month included 1,131,027 tons of bituminous coal, 308,605 tons of sub-bituminous coal and 184,959 tons of lignite coal. Compared with last year, production showed an increase of 33 per cent in October and for the first ten months of the year an increase of 11 per cent.

The large increase in production for the month compared with last year was owing to the October, 1945, output being greatly reduced as a result of strikes in Alberta and British Columbia.

Alberta produced 763,682 tons during the month under review, an increase of 73 per cent over the output in October, 1945; Nova Scotia produced 500,204 tons, an increase of 12 per cent; Saskatchewan 184,959 tons, a decrease of 16 per cent; British Columbia 134,667 tons, an increase of 68 per cent and New Brunswick 41,079 tons, an increase of 31 per cent.

Imports of coal into Canada during October amounted to 4,069,680 tons, compared with 2,661,949 tons imported during October, 1945. Imports for the first ten months of the year totalled 21,880,140 tons compared with 20,355,205 tons in the corresponding period of last year.

Ccal exported during the month emounted to 85,428 tons compared with 74,778 tons in October, 1945. Exports for the first ten months of the year totalled 684,616 tons compared with 710,315 tons in the same period of 1945.

Employees in the coal mines of Canada during the month of October numbered 25,330 compared with 24,457 in October, 1945.
