1927

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE— PRODUCTION STATISTICS—General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Lead—Manganese—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

Non-Metals.—Abrasives—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natro-Alunite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc and Soapstone.

Structural Materials and Clay Products.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

PART TWO—GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (*a*) by provinces; (*b*) by industries.

PART THREE—DIRECTORY.—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal—

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins—

(*a*) **PRODUCTION—**

Metals.—Arsenic—Cobalt—Copper—Gold—Iron Ore—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natro-Alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(*b*) **ANNUAL INDUSTRIAL REVIEWS—**

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(*c*) **ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—**

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

October, 1927

The output of coal from Canadian mines during October increased 9 per cent over the production for the preceding month, but was 10 per cent lower than the average for October in the past five years. The figures were 1,469,172 tons in October as against 1,339,465 tons in September and an average of 1,617,737 tons during the five preceding years.

All the coal producing provinces, except British Columbia, showed an increase in production over the preceding month, but all were lower than the average for the month in the five preceding years.

Comparison of October and September figures covering the total importations of coal showed an increase of 6 per cent as compared with the preceding month, and a decrease of 14 per cent below the average importations for the month for the past five years.

Imports in October amounted to 1,660,943 tons as compared with 1,561,092 tons in September, and the five-year average for the month of 1,916,858 tons. Receipts of coal from the United States during the month amounted to 1,546,953 tons and from Great Britain, 113,990 tons. For the first ten months of 1927 the total amount of coal imported into Canada was 16,457,425 tons, which was 15 per cent above the five-year average for the period.

Imports of anthracite totalled 386,898 tons in October, of which 286,225 tons came from the United States and 100,673 tons from Great Britain. This total was 18,201 tons greater than the tonnage reported in September. Entries through the ports of Ontario accounted for 215,922 tons, through the ports of Quebec 155,572 tons, through the ports of the Maritimes 12,166 tons, and through the ports of Manitoba and Saskatchewan, 3,238 tons. The total amount of anthracite imported during the ten months ending October was 3,296,864 tons, being about the same as the five-year average for the period.

Bituminous coal imported during October amounted to 1,273,073 tons, which was 81,744 tons more than the tonnage imported in September. In addition, 972 tons of lignite were imported. Entries through the ports of Ontario accounted for 1,115,047 tons, Quebec 121,765 tons, Manitoba, Saskatchewan, Alberta and British Columbia 18,921 tons; the Maritime provinces cleared 17,340 tons. Lignite coal imported into British Columbia totalled 972 tons. Bituminous coal imported during the ten months ending October totalled 13,153,304 tons, an increase of 21 per cent when compared with the five-year average for the period. Lignite imported during the same period amounted to 7,257 tons.

Exports of Canadian coal for the month of October were 12 per cent higher than the figures for the preceding month. The quantities were: October, 79,339 tons; September, 70,580 tons; there was thus an increase of 8,759 tons. Exports from the eastern provinces amounted to 29,691 tons, those from the western provinces totalled 49,648 tons. Comparison of October exports with the preceding five-year average showed a decrease of 39 per cent. Total exports for the first ten months of the calendar year amounted to 892,901 tons, or 8 per cent below the five-year average.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption showed an increase of 7 per cent over the figures for the previous month. During October the total was 3,050,776 tons, as against 2,829,977 tons made available during the month of September. In comparison with the five-year average for the month, the October available tonnage was lower by 12 per cent. The total coal made available for consumption during the twelve months ending October was 36,459,201 tons, as compared with 32,155,629 tons a year ago.

Men employed in the coal mines of Canada during October numbered 29,004 of whom 22,393 worked underground and 6,611 on surface, as compared with a total of 28,093 in September, of whom 21,689 worked underground and 6,404 on the surface. Production per man was 50.6 tons in October as against 47.7 tons in September. During October the production per man-day was 2.3 tons, being the same as in September. The tonnage lost (Table No. 4) was largely due to "lack of orders."

EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous reports, have been revised; finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1922-1926 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years 1922-1926, are also tabulated. The percentage relations between the corresponding items are shown.

Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1922-1926 are shown and the percentage relations between these data have been computed. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *"Reports of the Trade of Canada."* The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *"Reports of the Trade of Canada"* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff 45 cents a ton; and general tariff, 50 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the provinces of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

COKE STATISTICS FOR CANADA

October, 1927

A new feature of the record on coke statistics as presented in this bulletin is the addition beginning in January this year of two columns in Table 8, which show the imports of coke by ports of entry for the month and for the year to date, and in Table 9, two additional columns which show the exports of coke by ports of exit for the month and for the year to date. The inclusion of these data provides the reader with much additional useful information for which there has been an appreciable demand.

Production of coke in Canada during October amounted to 152,411 tons, a slight increase over the 150,271 tons of the previous month, but 12 per cent below the output of 173,592 tons reported for October of a year ago. Compared with the previous month, coke production in the eastern provinces increased to 39,395 tons from 38,069 tons; in the western provinces output advanced to 17,141 tons from 16,341 tons, while the tonnage made in Ontario was about the same at 95,875 tons in October as against 95,861 tons in September.

Statements by the makers on the disposition of coke showed, as compared with the previous month, that sales increased to 71,967 tons from 64,313 tons, coke plants consumed 21,096 tons as compared with 20,629 tons, while the tonnage shipped to the producing companies' associated smelters declined to 56,601 tons from 63,318 tons.

During the month imports of coke into Canada amounted to 104,909 tons and 3,946 tons were exported. The apparent consumption of coke in Canada, as determined by deducting the exports from the sum of the production and the imports, totalled 253,374 tons. For the ten months ending October 31, 1927, the apparent consumption, thus computed, totalled 2,229,458 tons, a decline of 6 per cent from the 2,371,244 tons consumed during the corresponding period of last year.

Charges to iron blast furnaces in Canada during October included 41,169 tons of coke, making a total of 680,843 tons for the year to date.

Coke Production in Canada, by Months, 1927

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers, Tanks and Engines — Agricultural Implements — Machinery — Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium and Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Products from Imported Clay—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Gypsum Products, (e) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.

SEE INSIDE FRONT COVER FOR PUBLICATIONS ON THE MINERAL INDUSTRY.
