## MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

### MINERAL PRODUCTION (Mining and Metallurgy).

#### General Reports—

**Preliminary Reports (semi-annual) on the Mineral Production of Canada.**

**Annual Report on the Mineral Production of Canada.** (In one volume).

**PART ONE— PRODUCTION STATISTICS—**General Statistical Review of the Mineral Production of Canada.

*Metals.*—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Lead—Manganese—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

*Non-Metals.*—Abrasives—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natro-Alunite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc and Soapstone.

*Structural Materials and Clay Products.*—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

**PART TWO—GENERAL STATISTICS.**—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

**PART THREE—DIRECTORY.**—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

#### Coal—

**Monthly Report on Coal and Coke Statistics for Canada.**

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

**Annual Report on Coal Statistics for Canada.**

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

#### Bulletins—

(a) **PRODUCTION—**

*Metals.*—Arsenic—Cobalt—Copper—Gold—Iron Ore—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

*Non-Metals.*—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natro-Alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

*Structural Materials.*—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) **ANNUAL INDUSTRIAL REVIEWS—**

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(c) **ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—**

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

SEE OUTSIDE BACK COVER FOR PUBLICATIONS ON MANUFACTURES BASED CHIEFLY ON MINERALS.

## DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

### COAL STATISTICS FOR CANADA

MARCH, 1927

The output of coal from Canadian mines during March was 1 per cent more than the production for the preceding month, and 9 per cent greater than the average for March in the past five years. The figures were 1,401,278 tons in March as against 1,377,173 tons in February, and an average of 1,276,752 tons during the five preceding years.

Nova Scotia, New Brunswick and British Columbia were the coal-producing provinces which showed a gain in production over the preceding month, while Nova Scotia and New Brunswick showed increased outputs over the average for the month in the five preceding years.

Comparison of March and February figures covering the total importation of coal showed an increase of 23 per cent from the preceding month, and was 9 per cent above the average importations for the month for the past five years.

Imports in March amounted to 1,609,410 tons as compared with 1,307,588 tons in February and the five-year average for the month of 1,475,872 tons. Receipts of coal from the United States during the month amounted to 1,598,482 tons, and from Great Britain 10,928 tons. For the first three months of 1927, the total amount of coal imported into Canada was 4,377,657 tons, which was 17 per cent above the five-year average for the period.

Imports of anthracite totalled 193,470 tons in March, of which 182,542 tons came from United States and 10,928 tons from Great Britain. This was 41,409 tons less than the tonnage imported in February. Entries through the ports of Ontario accounted for 118,953 tons; through the ports of eastern Canada 73,321 tons; through the ports of Manitoba, 1,171 tons; of the remaining 25 tons, 2 were imported into Saskatchewan and 23 into British Columbia. The total amount of anthracite imported during the three months ending March was 670,676 tons, a decrease of 29 per cent below the five-year average for the period.

Bituminous coal imported during March amounted to 1,414,818 tons, which was 343,301 tons greater than the tonnage imported in February. In addition, 1,122 tons of lignite were imported. Entries through the ports of Ontario accounted for 1,196,864 tons; Quebec, 185,917 tons; Manitoba, Saskatchewan, Alberta, British Columbia and Yukon, 17,786 tons, including 1,122 tons of lignite imported into British Columbia; the maritime provinces cleared 15,373 tons. Bituminous coal imported during the three months ending March totalled 3,703,536 tons, an increase of 32 per cent above the five-year average for the period. Lignite imported during the same period amounted to 3,445 tons.

Exports of Canadian coal for the month of March were 24 per cent above the figures for the preceding month. The quantities were: March, 110,905 tons; February, 88,893 tons; there was thus an increase of 22,012 tons. Exports from the eastern provinces amounted to 38,176 tons; those from the western provinces totalled 72,729 tons. Comparison of March exports with the preceding five-year average showed a decrease of 19 per cent. Total exports for the first three months of the calendar year amounted to 423,570 tons, or 24 per cent above the five-year average.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption showed an increase of 12 per cent over the figures for the previous month. During March, the total was 2,899,783 tons, as against 2,595,868 tons made available during the month of February. In comparison with the five-year average for the month, the March available tonnage was higher by 18 per cent. The total coal made available for consumption during the twelve months ending March was 35,434,758 tons as compared with 29,085,948 tons a year ago.

Men employed in the coal mines of Canada during March numbered 28,077, of whom 21,713 worked underground and 6,364 on surface, as compared with a total of 29,944 in February, of whom 23,345 worked underground and 6,599 on surface. Production per man was 49.9 tons in March as against 45.9 tons per man in February. During March the production per man per day was 2.4 tons, being the same as in February. The tonnage lost (Table No. 4) was largely due to "lack of orders."

## EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous reports, have been revised; finally revised data for the year are given in the *Annual Report on Coal Statistics*.

### Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1922-1926 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years 1922-1926, are also tabulated. The percentage relations between the corresponding items are shown.

### Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1922-1926 are shown and the percentage relations between these data have been computed. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *"Monthly Reports of the Trade of Canada."* The quantity of coal shown as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *"Monthly Reports of the Trade of Canada"* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff 45 cents a ton; and general tariff, 50 cents a ton.

### Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the province of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

### Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

### Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

Table 1.—Summary of the Principal Coal Statistics for Canada  
(Short tons)

## COKE STATISTICS FOR CANADA

MARCH, 1927

A new feature of the record on coke statistics as presented in this bulletin is the addition beginning in January this year of two columns in Table 8, which show the imports of coke by ports of entry for the month and for the year to date, and in Table 9, two additional columns which show the exports of coke by ports of exit for the month and for the year to date. The inclusion of these data provides the reader with much additional useful information for which there has been an appreciable demand.

Production of coke in Canada during March amounted to 171,894 tons, a gain of 8 per cent over the 158,248 tons of February and comparable with 152,480 tons reported for March of a year ago. Production from plants in Ontario advanced to 107,108 tons from 95,975 tons in the previous month; output from the eastern provinces rose to 44,978 tons from 44,204 tons, and the western provinces reported 19,808 tons in March as compared with 18,069 tons in February.

Disposition of coke by the makers showed that 20,704 tons were used in the coking plants, 87,064 tons were delivered to the producing companies' associated metallurgical works and 60,872 tons were sold. For the first quarter of the year production totalled 506,587 tons while the producers disposed of 518,156 tons; during the corresponding period of last year production totalled 474,192 tons and the disposition amounted to 481,256 tons.

During the month under review, 79,980 tons of Canadian coal and 176,289 tons of imported coal or a total of 252,269 tons of bituminous coal were carbonized to make 171,894 tons of coke, an average yield of 67 per cent. For the first three months of the year oven charges totalled 733,469 tons and production totalled 506,587 tons of coke giving an average yield of 69 per cent.

Imports of coke into Canada during March rose slightly to 70,375 tons from 65,715 tons in February and exports at 8,304 tons showed a drop of about 50 per cent from the 16,688 tons of the previous month. By deducting the exports from the sum of the production in Canada and the imports, the apparent consumption of coke in Canada is shown to have been 233,965 tons in March as compared with 207,275 tons in February. For the three months ending March the apparent consumption totalled 658,841 tons and in the corresponding period of last year it amounted to 752,179 tons.

Coke charged to iron blast furnaces during March amounted to 81,887 tons; for the year to date furnace charges totalled 199,261 tons.

## Coke Production in Canada, by Months, 1927

## LIST OF PUBLICATIONS

PREPARED IN THE

### MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

#### STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

##### *Annual Printed Reports—*

**Iron and Steel and Their Products:** Pig Iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers, Tanks and Engines — Agricultural Implements — Machinery — Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

**Manufactures of Non-Ferrous Metals:** Aluminium and Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

**Manufactures of Non-Metallic Minerals:** Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Products from Imported Clay—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Gypsum Products, (e) Mica Products.

**Chemicals and Allied Products:** Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

*Annual Bulletins.*—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

##### *Monthly—*

**Production of Iron and Steel in Canada.**

**Coke Statistics for Canada.**

**Automobile Statistics for Canada.**

#### **SPECIAL REPORTS.—**

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.
