CANADA—DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS
MINING, METALLURGICAL AND CHEMICAL BRANCH

Vol. 6

No. 5

MONTHLY REPORT
ON
COAL AND COKE STATISTICS
FOR CANADA

May, 1927

Published by Authority of the Hon. James Malcolm, M.P.
Minister of Trade and Commerce.

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1927

LIST OF PUBLICATIONS

PREPARED IN THE MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE—PRODUCTION STATISTICS—General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Lead—Manganese—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

Non-Metals.—Abrasives—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natro-Alunite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc and Soapstone.

Structural Materials and Clay Products.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

PART TWO—GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

PART THREE—DIRECTORY.—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal—

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins—

(a) **PRODUCTION—**

Metals.—Arsenic—Cobalt—Copper—Gold—Iron Ore—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metal including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natro-Alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) **ANNUAL INDUSTRIAL REVIEWS—**

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(c) **ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—**

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

SEE BACK COVER FOR PUBLICATIONS ON MANUFACTURES BASED CHIEFLY ON MINERALS.

DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

J. I. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

May, 1927

The output of coal from Canadian mines during May decreased one per cent from the production for the preceding month, but it was 43 per cent greater than the average for May in the past five years. The figures were 1,304,520 tons in May as against 1,314,342 tons in April and an average of 906,063 tons during the five preceding years.

With the exception of Nova Scotia all the coal producing provinces showed a decrease in production as compared with the preceding month. Nova Scotia, Alberta and British Columbia showed increased outputs over the average for the month in the five preceding years.

Comparison of May and April figures covering the total importations of coal showed an increase of 53 per cent from the preceding month, and an advance of 48 per cent above the average importations for the month for the past five years.

Imports in May amounted to 1,719,425 tons as compared with 1,120,086 tons in April and the five-year average for the month of 1,161,101 tons. Receipts of coal from the United States during the month amounted to 1,598,391 tons, and from Great Britain 121,034 tons. For the first five months of 1927, the total amount of coal imported into Canada was 7,217,168 tons, which was 26 per cent above the five-year average for the period.

Imports of anthracite totalled 375,830 tons in May of which 279,285 tons came from the United States and 96,545 tons from Great Britain. This total was 193,694 tons more than the tonnage imported in April. Entries through the ports of Ontario accounted for 185,874 tons; through the ports of eastern Canada 189,779 tons; through the ports of Manitoba, 177 tons. The total amount of anthracite imported during the five months ending May was 1,228,642 tons, a decrease of 20 per cent below the five-year average for the period.

Bituminous coal imported during May amounted to 1,343,338 tons which was 405,682 tons higher than the tonnage imported in April. In addition, 257 tons of lignite were imported. Entries through the ports of Ontario accounted for 1,153,012 tons; Quebec 164,092 tons; Manitoba, Saskatchewan, Alberta, British Columbia and Yukon 10,930 tons; the Maritime provinces cleared 15,303 tons. Lignite coal imported into British Columbia totalled 257 tons. Bituminous coal imported during the five months ending May totalled 5,984,530 tons, an increase of 43 per cent above the five-year average for the period. Lignite imported during the same period amounted to 3,996 tons.

Exports of Canadian coal for the month of May were considerably higher than the figures for the preceding month. The quantities were: May, 84,755 tons; April 25,220 tons; there was thus an increase of 59,535 tons. Exports from the eastern provinces amounted to 34,189 tons; those from the western provinces totalled 50,566 tons. Comparison of May exports with the preceding five-year average showed an increase of 43 per cent. Total exports for the first five months of the calendar year amounted to 533,545 tons or 20 per cent above the five-year average.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption showed an increase of 22 per cent from the figures for the previous month. During May, the total was 2,939,190 tons, as against 2,409,208 tons made available during the month of April. In comparison with the five-year average for the month, the May available tonnage was higher by 46 per cent. The total coal made available for consumption during the twelve months ending May was 36,549,060 tons as compared with 30,242,352 tons a year ago.

Men employed in the coal mines of Canada during May numbered 25,549 of whom 19,579 worked underground and 5,970 on surface as compared with a total of 26,074 in April of whom 20,092 worked underground and 5,982 on surface. Production per man was 51.0 tons in May as against 50.3 tons in April. During May the production per man per day was 2.4 tons, as against 2.5 tons in April. The tonnage lost (Table No. 4) was largely due to "lack of orders."

EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous reports, have been revised; finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1922-1926 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years 1922-1926, are also tabulated. The percentage relations between the corresponding items are shown.

Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1922-1926 are shown and the percentage relations between these data have been computed. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the "*Reports of the Trade of Canada*." The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the "*Reports of the Trade of Canada*" show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff 45 cents a ton; and general tariff, 50 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the province of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

Table 1.—Summary of the Principal Coal Statistics for Canada

COKE STATISTICS FOR CANADA

May, 1927

Production of coke in Canada during May amounted to 173,727 short tons, an increase of 2 per cent over the 170,405 tons of April and 9 per cent more than the 159,390 tons reported for May of last year. This output almost equalled the record made in January of this year when production totalled 176,445 tons, the greatest tonnage reported for any month since commencement of monthly coke statistics in 1925.

Compared with April, higher outputs were reported for Ontario and the eastern provinces but production in the western provinces was lower. Coke output in Ontario rose to 111,047 tons from 106,722 tons and in the eastern provinces, to 44,942 tons from 43,712 tons; production in the western provinces declined to 17,738 tons from 19,971 tons in the previous month.

Statements by the makers on the disposition of coke showed that there was a greater tonnage used in associated smelters, and a decrease in sales while the quantity used in the producing plants remained about the same. Consumption as fuel in the coke plants amounted to 20,700 tons as against 19,909 tons in April; deliveries to the producing companies' associated smelters totalled 101,523 tons as compared with 97,432 tons, and the sales of coke declined to 36,372 tons from 47,604 tons in the previous month. For the first five months of the year the total disposition of coke amounted to 841,696 tons.

During May charges to coke ovens included 74,853 tons of Canadian coal and 173,869 tons of imported coal. In the first five months of the present year 1,235,375 tons of bituminous coal were carbonized to make 850,719 tons of coke.

Imports of coke into Canada during May increased to 56,656 tons from 38,392 tons in April and exports were about the same at 2,881 tons as compared with 3,000 tons in April. The apparent consumption of coke in Canada during May as determined by deducting the exports from the sum of the production and imports, amounted to 227,502 tons. Consumption for the five months ending May totalled 1,096,976 tons.

A new feature of the record on coke statistics as presented in this bulletin is the addition beginning in January this year of two columns in Table 8, which show the imports of coke by ports of entry for the month and for the year to date, and in Table 9, two additional columns which show the exports of coke by ports of exit for the month and for the year to date. The inclusion of these data provides the reader with much additional useful information for which there has been an appreciable demand.

Coke Production in Canada, by Months, 1927

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers, Tanks and Engines — Agricultural Implements — Machinery — Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium and Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Products from Imported Clay—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Gypsum Products, (e) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.

SEE INSIDE FRONT COVER FOR PUBLICATIONS ON THE MINERAL INDUSTRY.
