MONTHLY REPORT

ON

COAL AND COKE STATISTICS FOR CANADA

August, 1927

Published by Authority of the Hon. James Malcolm, M.P.
Minister of Trade and Commerce.

OTTAWA
F. A. ACLAND

PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1927

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE— PRODUCTION STATISTICS—General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Lead—Manganese—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

Non-Metals.—Abrasives—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natro-Alunite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc and Soapstone.

Structural Materials and Clay Products.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

PART TWO—GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

PART THREE—DIRECTORY.—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal—

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins—

(a) PRODUCTION—

Metals.—Arsenic—Cobalt—Copper—Gold—Iron Ore—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natro-Alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) ANNUAL INDUSTRIAL REVIEWS—

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(c) ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

SEE BACK COVER FOR PUBLICATIONS ON MANUFACTURES BASED CHIEFLY ON MINERALS.

DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

August, 1927

The output of coal from Canadian mines during August increased 6 per cent over the production for the preceding month, and was 19 per cent greater than the average for August in the past five years. The figures were 1,313,856 tons in August as against 1,229,104 tons in July and an average of 1,098,698 tons during the five preceding years.

All the coal producing provinces, except New Brunswick, showed an increase in production as compared with the preceding month, and the provinces of Saskatchewan, New Brunswick, and British Columbia showed decreases as compared with the average for the month in the five preceding years.

Comparison of August and July figures covering the total importations of coal showed an increase of 8 per cent over the preceding month, and an advance of 12 per cent above the average importations for the month for the past five years.

Imports in August amounted to 1,901,142 tons as compared with 1,755,569 tons in July and the five-year average for the month of 1,697,780 tons. Receipts of coal from the United States during the month amounted to 1,765,537 tons and from Great Britain 135,605 tons. For the first eight months of 1927 the total amount of coal imported into Canada was 13,235,390 tons, which was 24 per cent above the five-year average for the period.

Imports of anthracite totalled 408,743 tons in August, of which 297,341 tons came from the United States and 111,402 tons from Great Britain. This total was 45,450 tons more than the tonnage reported in July. Entries through the ports of Ontario accounted for 187,756 tons, through the ports of Quebec 208,217 tons through the ports of the Maritimes 11,619 tons and through the ports of Manitoba and British Columbia 1,151 tons. The total amount of anthracite imported during the eight months ending August was 2,541,269 tons, a decrease of 5 per cent below the five-year average for the period.

Bituminous coal imported during August amounted to 1,492,116 tons, which was 100,106 tons greater than the tonnage imported in July. In addition, 283 tons of lignite were imported. Entries through the ports of Ontario accounted for 1,292,494 tons, Quebec 179,770 tons, Manitoba, Saskatchewan, Alberta, British Columbia and Yukon 8,446 tons; the Maritime provinces cleared 11,406 tons. Lignite coal imported into British Columbia totalled 283 tons. Bituminous coal imported during the eight months ending August totalled 10,688,902 tons, an increase of 33 per cent above the five-year average for the period. Lignite imported during the same period amounted to 5,219 tons.

Exports of Canadian coal for the month of August were lower than the figures for the preceding month. The quantities were: August, 62,093 tons; July 82,206 tons; there was thus a decrease of 20,113 tons. Exports from the eastern provinces amounted to 33,051 tons; those from the western provinces totalled 29,042 tons. Comparison of August exports with the preceding five-year average showed a decrease of 45 per cent. Total exports for the first eight months of the calendar year amounted to 742,982 tons, or 1 per cent above the five-year average.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption showed an increase of 8 per cent over the figures for the previous month. During August the total was 3,152,905 tons, as against 2,902,467 tons made available during the month of July. In comparison with the five-year average for the month, the August available tonnage was higher by 17 per cent. The total coal made available for consumption during the twelve months ending August was 37,147,822 tons, as compared with 31,686,594 tons a year ago.

Men employed in the coal mines of Canada during August numbered 27,210, of whom 20,917 worked underground and 6,293 on surface, as compared with a total of 26,237 in July, of whom 20,223 worked underground and 6,014 on the surface. Production per man was 48.2 tons in August as against 46.8 tons in July. During August the production per man-day was 2.3 tons, being the same as in July. The tonnage lost (Table No. 4) was largely due to "lack of orders."

EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous reports, have been revised; finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1922-1926 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years 1922-1926, are also tabulated. The percentage relations between the corresponding items are shown.

Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1922-1926 are shown and the percentage relations between these data have been computed. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the "*Reports of the Trade of Canada*." The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the "*Reports of the Trade of Canada*" show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff 45 cents a ton; and general tariff, 50 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the provinces of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

COKE STATISTICS FOR CANADA

August, 1927

A new feature of the record on coke statistics as presented in this bulletin is the addition beginning in January this year of two columns in Table 8, which show the imports of coke by ports of entry for the month and for the year to date, and in Table 9, two additional columns which show the exports of coke by ports of exit for the month and for the year to date. The inclusion of these data provides the reader with much additional useful information for which there has been an appreciable demand.

Production of coke in Canada during August amounted to 169,130 short tons. This output was 6 per cent more than in July when 159,129 tons were produced and 3 per cent over the 165,662 tons made in August of a year ago. While production in the eastern provinces dropped to 42,996 tons from 46,211 tons, this loss was more than offset, by gains in Ontario and the western provinces. Ontario's output advanced to 108,966 tons from 97,511 tons in July and the western provinces produced 17,168 tons as against 15,407 tons in the previous month.

Statements by the makers on the disposition of coke showed a slight increase in the quantity used in the makers' own coke or gas plants, a continued increase in sales, and for the first time in four months, a gain was reported in the quantity used in associated smelters. Deliveries to the producing companies' associated smelters rose to 86,861 tons from 76,847 tons in July; coke sales amounted to 58,457 tons as compared with 50,847 tons and coke plants consumed 19,717 tons as against 19,102 tons in the previous month. Charges to coke ovens during August included 74,608 tons of Canadian coal and 172,396 tons of imported coal, a total of 247,004 tons of bituminous coal.

Imports of coke into Canada during August increased to 72,823 tons from 50,097 tons in July while exports dropped to 5,528 tons from 7,041 tons. The apparent consumption of coke in Canada, as determined by deducting the exports from the sum of production and the imports, amounted to 236,425 tons in August.

For the first eight months of the year 1,952,709 tons of bituminous coal were carbonized to produce 1,344,974 tons of coke. During the same period 468,410 tons of coke were imported into Canada and 57,126 tons were exported. The apparent consumption of coke in Canada for the eight months' period totalled 1,756,258 tons.

During August 70,379 tons of coke were charged to iron blast furnaces in Canada. Charges for the year to date amounted to 582,518 tons.

Coke Production in Canada, by Months, 1927

Month	Bituminous coal used for coke making			Coke made	Disposition of coke by makers			
	Canadian	Imported	Total		For use by maker		Sold	Total
					In coke plant	In own smelter

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers, Tanks and Engines — Agricultural Implements — Machinery — Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium and Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Products from Imported Clay—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Gypsum Products, (e) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.

SEE INSIDE FRONT COVER FOR PUBLICATIONS ON THE MINERAL INDUSTRY.
