DOMINION BUREAU of STATISTICS

MONTHLY REPORT

ON

COAL AND COKE STATISTICS
FOR CANADA

September, 1927

Published by Authority of the Hon. James Malcolm, M.P.
Minister of Trade and Commerce.

OTTAWA
F. A. CLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1927

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE—PRODUCTION STATISTICS—General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Ideal—Manganese—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

Non-Metals.—Abrasives—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natrolite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc and Soapstone.

Structural Materials and Clay Products.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

PART TWO—GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

PART THREE—DIRECTORY.—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal—

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins—

(a) PRODUCTION—

Metals.—Arsenic—Cobalt—Copper—Gold—Iron Ore—Ideal—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natrolite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

b) ANNUAL INDUSTRIAL REVIEWS—

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(c) ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch

COAL STATISTICS FOR CANADA

September, 1927

The output of coal from Canadian mines during September increased 1 per cent over the production for the preceding month, and 4 per cent greater than the average for September in the past five years. The figures were 1,339,422 tons in September as against 1,317,332 tons in August and an average of 1,280,405 tons during the five preceding years.

All the coal-producing provinces, except Nova Scotia, showed increases in production as compared with the preceding month, and the provinces of Nova Scotia, Alberta, and British Columbia showed increases as compared with the average for the month in the five preceding years.

Comparison of September and August figures covering the total importations of coal showed a decrease of 18 per cent below the preceding month, and a decrease of 6 per cent below the average importation for the month for the past five years.

Imports in September amounted to 1,561,092 tons as compared with 1,901,142 tons in August and the five-year average for the month of 1,655,439 tons. Receipts of coal from the United States during the month amounted to 1,509,233 tons, from Great Britain 49,928 tons, and from the Netherlands 1,931 tons. For the first nine months of 1927 the total amount of coal imported into Canada was 14,796,482 tons, which was 20 per cent above the five-year average for the period.

Imports of anthracite totalled 368,697 tons in September, of which 332,810 tons came from the United States, 33,956 tons from Great Britain, and 1,931 tons from the Netherlands. This total was 40,046 tons less than the tonnage reported in August. Entries through the ports of Ontario accounted for 208,705 tons, through the ports of Quebec 145,082 tons, through the ports of the Maritimes 13,267 tons, and through the ports of Manitoba and Saskatchewan 1,643 tons. The total amount of anthracite imported during the nine months ending September was 2,909,966 tons, a decrease of 1 per cent below the five-year average for the period.

Bituminous coal imported during September amounted to 1,191,329 tons, which was 300,787 tons less than the tonnage imported in August. In addition, 1,066 tons of lignite were imported. Entries through the ports of Ontario accounted for 1,023,024 tons, Quebec 152,800 tons, Manitoba, Saskatchewan, Alberta, British Columbia and Yukon 839 tons; the Maritime provinces cleared 14,666 tons. Lignite coal imported into British Columbia totalled 1,066 tons. Bituminous coal imported during the nine months ending September totalled 11,880,231 tons, an increase of 27 per cent above the five-year average for the period. Lignite imported during the same period amounted to 6,285 tons.

Exports of Canadian coal for the month of September were 13 per cent higher than the figures for the preceding month. The quantities were: September, 70,580 tons; August, 62,093 tons; there was thus an increase of 8,487 tons. Exports from the eastern provinces amounted to 32,820 tons, which includes 410 tons from Ontario and 40 tons from Quebec; those from the western provinces totalled 37,760 tons. Comparison of September exports with the preceding five-year average showed a decrease of 34 per cent. Total exports for the first nine months of the calendar year amounted to 813,562 tons, or 3 per cent below the five-year average.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption showed a decrease of 11 per cent over the figures for the previous month. During September the total was 2,829,934 tons, as against 3,156,381 tons made available during the month of August. In comparison with the five-year average for the month, the September available tonnage was lower by 1 per cent. The total coal made available for consumption during the twelve months ending September was 36,836,922 tons, as compared with 31,857,323 tons a year ago.

Men employed in the coal mines of Canada during September numbered 28,093, of whom 21,689 worked underground and 6,404 on surface, as compared with a total of 27,210 in August, of whom 20,917 worked underground and 6,293 on the surface. Production per man was 47.7 in September as against 48.2 tons in August. During September the production per man-day was 2.3 tons, being the same as in August. The tonnage lost (Table No. 4) was largely due to "lack of orders."

EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous reports, have been revised; finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1922-1926 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years 1922-1926, are also tabulated. The percentage relations between the corresponding items are shown.

Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1922-1926 are shown and the percentage relations between these data have been computed. With regard to the table of imports, it is to be noted that the data given are not comparable with the import statistics published in the "Reports of the Trade of Canada." The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the "Reports of the Trade of Canada" show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff 45 cents a ton; and general tariff, 50 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the province of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

COKE STATISTICS FOR CANADA

September, 1927

A new feature of the record on coke statistics as presented in this bulletin is the addition beginning in January this year of two columns in Table 8, which show the imports of coke by ports of entry for the month and for the year to date, and in Table 9, two additional columns which show the exports of coke by ports of exit for the month and for the year to date. The inclusion of these data provides the reader with much additional useful information for which there has been an appreciable demand.

Production of coke in Canada at 150,271 tons in September marked the lowest monthly output of the year. This tonnage was 11 per cent under the 169,130 tons of the previous month and 10 per cent less than the 166,292 tons reported for September a year ago. The greatest loss was in Ontario, where production fell to 95,861 tons from 108,966 tons in August. In the eastern provinces tonnage dropped to 38,069 tons from 42,996 tons, and in the western provinces to 16,341 tons from 17,168 tons.

Statements by the makers on the disposition of coke showed, as compared with the previous month, that sales increased to 64,313 tons from 58,457 tons, coke plants consumed 20,629 tons as against 19,717 tons, while the tonnage shipped to the producing companies' associated smelters declined to 63,318 tons from 86,861 tons.

At the end of the third quarter of this year, 666,918 tons of Canadian coal and 1,504,788 tons of imported coal, a total of 2,171,706 tons of bituminous coal, had been carbonized to produce 1,495,245 tons of coke. During this period 541,076 tons of coke were imported into Canada and 60,237 tons were exported. The apparent consumption of coke in Canada during the nine months, as determined by deducting the exports from the sum of the production and the imports, amounted to 1,976,084 tons. Comparing the first nine months of this year with the corresponding period of 1926, coke production and export figures show increases, while imports and apparent consumption figures show decreases. For the nine months ending September 30, 1926, production totalled 1,424,417 tons, imports 739,137 tons, export 39,267 tons, and the apparent consumption was 2,124,287 tons.

During September 57,156 tons of coke were charged to iron blast furnaces in Canada. Charges for the year to date amounted to 639,674 tons.

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products—Castings and Forgings—Boilers, Tanks and Engines—Agricultural Implements—Machinery—Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock—Wire and Wire Goods—Sheet Metal Products—Hardware and Tools—Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium and Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Products from Imported Clay—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Gypsum Products, (e) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.
