Explanatory Notes - Airport Activity Tables

1. The data refers to regularly scheduled international and mainline domestic flights. Data concerning charter flights have not been included in the tables.
2. The data concerning international flights were collected on a census basis. Data concerning domestic flights were collected on a mixed 15 per cent sample and census basis. The sample is such that each day of the week is sampled twice each quarter, and there is at least one sample day in each week.
3. Cargo has been considered as express and freight.
4. The tables will not balance horizontally within the traffic categories which are "Domestic", "Transborder", and "Other International". This is because the intransit load may arrive at a station under one category, and depart under another. The traffic categories are derived by allocating the traffic according to the last stop made before arrival and the next stop planned after departure. For example, consider a flight from Calgary to London, England via Winnipeg. The arrival at Winnipeg, from Calgary would be classed as a "Domestic" arrival, and the departure from Winnipeg to London, England would be considered an "Other International" departure.
5. At airports where flight numbers changed, all traffic on board was reported deplaned as well as arrived.
6. All flights to and from Alaska have been considered under the category "International, Transborder". Beginning with 1968 data, flights to and from Hawaii have been included under the traffic category "International, Transborder".
